

**FISCAL YEAR 2011 REPORT OF CLOSED MEETING OF
THE THREAT REDUCTION ADVISORY COMMITTEE
UNDER SECTION 10(d) OF THE FEDERAL ADVISORY COMMITTEE ACT**

The Threat Reduction Advisory Committee met in closed plenary session on July 26, 2011 at the ANSER Conference Facility, Shirlington, Virginia.

The meeting was conducted in closed session because it concerned matters listed in 5 U.S.C. 552B(c)(1)(1988). Full development of the topics required discussion of information classified at the Top Secret and Secret levels. Classified and unclassified issues were so intertwined that they could not reasonably be separated without defeating the effectiveness and meaning of the overall meeting. As the TRAC Chairman, I presided over the July meeting. The Committee considers threat reduction strategies and implementation, global threat reduction prototypes, biological defense, nuclear security and weapons of mass destruction threats. These national security issues relate to the scientific and technical aspects of overall threat reduction.

The committee received updates from the five working groups on their current state of information gathering and product development. There were deliberations of the five working group's interim findings, but no final recommendations were prepared for presentation to the sponsoring organization. The committee decided that the working groups would present findings to the plenary for deliberation and preparation of recommendations at the next meeting.

Gary W. Hart
Chairman
Threat Reduction Advisory Committee
