Re: FOIA Request No.: 20-063

Dear Mr. Suryanarayanan:

This the fifth interim response to your Freedom of Information Act (FOIA) request perfected on August 31, 2020, and assigned FOIA case number 20-063 by the Defense Threat Reduction Agency (DTRA). You requested asking for the following:

1. Containment failures and/or accidental or deliberate release of biological agents in dual-use biosafety research, along with assessments of the risks, hazards and efficacy of BSL-2, BSL-3 or BSL-4 containment schemes and/or assessments of the potential flaws or failings and weaknesses, in BSL-2, BSL-3 or BSL-4 research facilities in Armenia, Azerbaijan, Canada, China, Egypt, France, Germany, Georgia, India, Iran, Israel, Kazakhstan, Malaysia, the Netherlands, Pakistan, Russia, South Africa, Taiwan, Ukraine, the United Kingdom, and/or Thailand.
2. Contracts, grants, grant proposals and communications about funding between DTRA staff and EcoHealth Alliance staff about specific contracts and/or grants awarded by DTRA to EcoHealth Alliance, since January 1, 2014.
3. Contracts, grants, and communications about funding between DTRA employees and employees of Metabiota, Inc. pertaining to specific contracts and/or grants awarded by DTRA to Metabiota, Inc. since January 1, 2013.

In a letter dated February 16, 2022, you received an interim response with copies of documents responsive to the second item of your request totaling 2,790 pages. Specifically, the responsive documents pertained to the following contracts, grants, and communications between DTRA staff and EcoHealth Alliance: HDTRA113C0029, HDTRA115C0041, HDTRA11910033, HDTRA11410029, HDTRA11710037.

In a letter dated March 16, 2022, you received a second interim response with copies of documents responsive to your request totaling 875 pages. Specifically, the responsive documents pertained to the following contracts, grants, and communications between DTRA staff and EcoHealth Alliance: HDTRA12010016 and HDTRA12010018.

In a letter dated March 31, 2022, you received a third interim response with copies of documents, which are also responsive to items 2 and 3 of your request, totaling 1,132 pages. Specifically, the responsive documents pertain to the following contracts, grants, and communications between DTRA staff and EcoHealth Alliance: HDTRA11410029, HDTRA11710064, HDTRA11710037, HDTRA11910033, HDTRA12010016, HDTRA12010018, as well as Metabiota, Inc.: HDTRA112C0024, HDTRA11410052, HDTRA11410053.

In a letter dated April 15, 2022, you received a fourth interim response with copies of documents, which are responsive to item 3 of your request, totaling 1,216 pages. Specifically, the responsive documents pertain to contract HDTRA114C0104.

In this fifth interim release, we enclosed copies of documents, which are responsive to item 3 of your request, totaling 1,499 pages. Specifically, the responsive documents pertain to contract HDTRA114C0104.

These documents are being released to you in part. Some information is being withheld under FOIA Exemptions 4 and 6. Exemption 4 of the FOIA protects trade secrets and commercial or financial information obtained from a person that is privileged or confidential. Exemption 6 applies to information, which, if released, would constitute a clearly unwarranted invasion of the personal privacy of an individual.

Please be advised that the search for and review of documents responsive to the remaining requests are still ongoing. We will provide the additional responsive documents to you in the sixth release. A final response letter containing all applicable appeal language will be sent to you at the completion of the production of documents, which we anticipate will be on May 15, 2022.

Determinations for this interim release were made by the Initial Denial Authority (IDA), Mr. Earl Washington, Chief, Records Management, FOIA, and Privacy Act Division / DTRA Records Officer, Information Management and Technology Directorate, on behalf of DTRA. If you consider this decision to be an adverse determination, you may file a written appeal that is postmarked no later than 90 calendar days after the date of this letter to the Deputy Director, Defense Threat Reduction Agency, Information Management and Technology Directorate, ATTN: FOIA/PA Office, 8725 John J. Kingman Road, MSC 6201, Fort Belvoir, Virginia 22060. The appeal should reference the FOIA/Privacy Act case number, contain a concise statement of the grounds upon which the appeal is brought, and a description of the relief sought. A copy of this letter should also accompany your appeal. Both the envelope and your letter should clearly identify that a Freedom of Information Act and/or a Privacy Act Appeal is being made.

Should you have additional questions or concerns regarding this case, you may seek dispute resolution services from the DTRA FOIA Public Liaison or the Office of Government Information Services (OGIS). The DTRA FOIA Public Liaison, Mr. Mario Vizcarra, may be contacted by phone at (703)767-1792 or by email at dtrafoiaprivacy@mail.mil. The contact information for OGIS can be found at www.archives.gov/ogis.

Sincerely,

Eugene McGirt

Active Projects

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015 – 11/15/2016

CLIN 1002 – Labor

Program Manager:
(b)(6) held email and phone communications with the NHLS team to discuss final project status and closeout. (b)(6) also reviewed, edited, and submitted the NHLS final report/lessons learned document to DTRA/A&AS. Lastly, (b)(6) burned the BS&S videos (CDRL A013) onto two DVDs and hand-delivered the DVDs to (b)(6)

Trainer 1:
(b)(6) participated in email and phone communications with the NHLS team to discuss final project status and closeout. (b)(6) drafted the NHLS final report/lessons learned document.

CLIN 1003 – Materials and Supplies
Material costs invoiced include the purchase of Calipers for the NHLS team to continue with training implementation. This purchase was approved by the Country Manager.

CLIN 1004 – ODCs
No ODC costs are invoiced this period.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 013 One Health Epidemiology Training - Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 – 11/15/2016

CLIN 1002 – Labor

Program Manager:
Metabiota Regional Africa Program Manage(b)(6) worked to develop and submit a project training summary and facts sheet detailing all training activities at the request of DTRA CBEP country manage(b)(6) In support of this effort(b)(6) eld a final conference call with in country performer, CDC-Uganda. He also continued to communicate with DTRA CBEP Uganda representation during this time on an as needed basis.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
No DBA costs are invoiced this period.

CLIN 1005 – Travel
Travel costs incurred this period include the final cost for lodging for FOIA (b)(6) in September for the final training not previously invoiced.

TD 016 Georgia GIS

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 11/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) held email and phone communications with the University of Florida (UF) GIS team to discuss project status and administrative and technical issues including project closeout (b)(6) further reviewed administrative documents, including invoices, quad charts, and other reporting documents. (b)(6) (b)(6) also communicated with LMA to inquire about the status of data for the GG-20 effort and encourage participation in the GoToMeeting mentorship sessions. (b)(6) also participated in email and phone communications with DTRA/A&AS to discuss project status. (b)(6) rafted and submitted the final report/lessons learned document for this effort.

Subject Matter Expert 1:
(b)(6) articipated in email and phone communications with University of Florida team to discuss project status and administrative and technical issues. (b)(6) also drafted and assisted drafting of other administrative and reporting documents for this effort including monthly reports, quad charts, and financial summaries. (b)(6) also participated in email and phone communications with DTRA/A&AS to discuss project status.

Subject Matter Expert 2:
(b)(6) participated in email and phone communications with (b)(6) to discuss project status. (b)(6) provided oversight to the UF team on all aspects of the project, including UF administrative issues and the GIS spatial epidemiology expertise required for the three CBR projects. (b)(6) lso participated in CBR project calls with the greater CBR project teams. (b)(6) ontinued working on developing the vignettes and other documentation for the R package.

Research and Data Analyst:
(b)(6) participated in email and phone communications with (b)(6) o discuss project status. (b)(6) continued working on the R package encapsulating GIS spatial epidemiology algorithms and routines and investigated two routes of distribution, GitHub and CRAN. (b)(6) further assisted (b)(6) n finishing the vignettes for sample testing of the R package. (b)(6) assisted in testing the R package using data from GG-19. (b)(6) lso held a GoToMeeting mentorship session with the Georgian scientists to help them understand the process of analyzing the data from the CBR projects. (b)(6) further worked on analyzing data from GG-19 and assisted (b)(6) on the outlining of the manuscript for GG-19. A credit is applied for (b)(6) after receipt of a final invoice from the subcontractor.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
No ODC costs are invoiced this period.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 017 Georgia SME Grantsmanship

Objectives
Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/15 – 11/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) eld email and phone communications with Avila Scientific to discuss project status and any ongoing issues (b)(6) along with (b)(6) reviewed subcontractor invoices and reports. (b)(6) (b)(6) lso reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports (b)(6) eviewed, edited, and submitted the trip report for the late October/early November mentoring trip (b)(6) lso reviewed, edited, and submitted the final report/lessons learned document for this effort to DTRA on November 15.

Subject Matter Expert 1:
(b)(6) participated in email and phone communications with Avila Scientific to discuss project status and any ongoing issues (b)(6) reviewed subcontractor invoices and reports. (b)(6) (b)(6) also drafted reporting instruments including quad charts, invoicing, and monthly reports further drafted the final report/lessons learned document for this effort.

Subject Matter Expert 2:
(b)(6) participated in email and phone communications with (b)(6) to discuss project status and any ongoing issues (b)(6) conducted in-country grantsmanship mentoring with LMA scientists. She worked with them on identifying collaborators, developing full proposals, budgeting, and responding to reviewer comments. She also assisted them with understanding some of the mechanical processes of applying to grant opportunities (b)(6) drafted the trip report for the late October/early November mentoring trip and provided some insights to the final report/lessons learned document for this effort (b)(6) so drafted reporting instruments including invoices and reports.

Trainer 2:
(b)(6) n conducting in-country grantsmanship mentoring of LMA scientists. She worked with them on the coordination aspects of the grant application process, in identifying collaborators, and developing budgets.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
No ODC costs are invoiced this period.

CLIN 1005 – Travel

Travel costs invoiced this period include the final close out travel for Avila's last trip to Tbilisi at the end of October to early November. Flight costs were previously invoiced.

TD 018 Georgia Visiting Scientist Genomics

Objectives
Metabiota will provide subject matter expertise in genomics for providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 08/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) held email and phone communications with (b)(6) to discuss project status and closeout (b)(6) along with (b)(6) reviewed subcontractor invoices and reports (b)(6) reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports (b)(6) (b)(6) also drafted and submitted the final report/lessons learned document for this effort to DTRA on November 15.

Subject Matter Expert 1:
(b)(6) participated in email and phone communications with (b)(6) to discuss project status and closeout (b)(6) reviewed subcontractor invoices and reports (b)(6) drafted reporting instruments including quad charts, invoicing, and monthly reports.

Visiting Scientist
(b)(6) participated in email and phone communications to discuss project status and ongoing issues (b)(6) also drafted reporting including invoicing and weekly updates, and contributed insights to the final report/lessons learned document for this effort. (b)(6) continued genomics and bioinformatics mentorship activities, including assisting Georgian researchers on whole-genome comparative analyses of African swine fever virus and data analyses for the tick-borne encephalitis virus genome stability manuscript (b)(6) also helped to finalize the page proofs for the strain 55 genome announcement publication.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
DBA costs are applied for Jason Farlow FOIA (b)(4) total compensation.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 021 Field Epidemiology Training - Iraq

Objectives
Conduct remote trainings on epidemiology and BS&S/Biorisk management for one cohort of Iraqi scientists, and also engage them to familiarize them with the Iraq National Biological Emergency Response Plan and work on a gap analysis of said plan. Conduct remote trainings on epidemiology for a second cohort.

Period of Performance: 02/19/16 – 11/15/16

CLIN 1002 – Labor

Program Manager:
Program Manage(b)(6) continued to provide overall technical and administrative expertise to the project. He participated in the in final project calls and meetings with all team members and stakeholders(b)(6) assisted in the execution of the HOT and completed the final NBEP gap analysis, to include submission to both CBEP and Iraqi stakeholder(b)(6) reviewed all final grades and student standing at the close of the course and signed all training certificates prior to distribution to the students.

Program Manager(b)(6) continued to provide overall oversight and coordination of the program. She participated in final project calls and meetings with all team members and stakeholders. She assisted in the facilitation and completion of the HOT. She coordinated the completion and submission of all required CDRLs to include trip reports, TTRs, ToP, and transfer of LMS recordings. (b)(6) viewed all final grades and student standing and ensured all certificates were provided to the students(b)(6) ensured final completion of all project activities and closed out contracts with the epidemiology training team, as well as initiated close out with all subcontractors and independent consultants performing on the project.

Subject Matter Expert 1:
SME 1(b)(6) continued to provide overall project coordination during this period. She hosted and participated in final project calls with the epidemiology training team, BS&S training team, and in-country trainers(b)(6) provided administrative and technical support during the HOT ensuring a successful delivery of the hands-on course. She compiled all final grades and scoring of students, following submission of the BS&S requirements from WRMI, and submitted them for CME determination by the Iraqi MoH(b)(6) prepared and sent course completion certificates to Cohorts I and II, and provided participants with feedback on their success and final grades for the course. As well, FOIA (b)(6) provided input into the TTRs and the final after action report, as well as assisted in coordinating signature and receipt of the Transfer of Property (ToP) agreement. Finally, FOIA (b)(6) FOIA (b)(6) copied all LMS training materials and recorded sessions to CDs for final delivery to CBEP.

SME 1(b)(6) supported(b)(6) in completion of the gap analysis report. She provided a final review of the document and shared feedback, edits, comments with(b)(6) for final execution and submission of the report.

SME 1(b)(6) participated in close out project calls and administrative activities during this period. He assisted in review of the ToP agreement and completion of final deliverables, to include

reporting, required by WRMI to wrap up the project. He assisted [(b)(6)] in ensuring all administrative needs were completed for project close out.

SME 1 [(b)(6)] delivered the HOT to local participants in conjunction with Metabiota team members, WRMI, and in-country trainers, completing course implementation. She provided input into the Cohort I TTR and final after action report. [(b)(6)] participated in final project calls and ensure completion of all epidemiology team deliverables prior to the project end date.

SME 1 [(b)(6)] delivered the HOT to local participants in conjunction with Metabiota team members, WRMI, and in-country trainers, completing course implementation. She provided input into the Cohort I TTR and final after action report. [(b)(6)] participated in final project calls and ensure completion of all epidemiology team deliverables prior to the project end date.

Subject Matter Expert 2:

SME 2 [(b)(6)] continued to provide routine project coordination and administration for the WRMI team during the final two weeks of the project. He executed the HOT in conjunction wit [(b)(6)] [(b)(6)] nd the Metabiota team. He participated in project calls with the Metabiota project team and assisted in close out activities, to include transfer of all US procured materials from Metabiota to WRMI following completion of the HOT. He provided final feedback and an overall review of the gap analysis for final submission. In addition, he completed the final report and TTR required following Cohort I training, and provided the student grades to Metabiota for submission and determination of credit hours by the Iraqi MoH.

SME 2 [(b)(6)] continued to participate in routine project calls and close out activities for the project. He executed the HOT training wit [(b)(6)] ompleting all BS&S requirements [(b)(6)] conducted a final inventory of all materials procured following completion of the HOT and provided the inventory to Metabiota for transfer of materials to WRMI. He organized the materials and prepared for disposable and donation following execution of the ToP agreement. He provided feedback for the TTR and final report submitted to Metabiota.

SME 2 [(b)(6)] delivered the HOT to local participants in conjunction with Metabiota team members, WRMI, and in-country trainers, completing course implementation. She provided input into the Cohort I TTR and final after action repor [(b)(6)] participated in final project calls and ensure completion of all epidemiology team deliverables prior to the project end date.

Research and Data Analyst:

RDA [(b)(6)] prepared the WRMI October invoice and submitted it to Metabiota. She initiated preparation of the November invoice, which will be submitted at the close of the month. This will be the final project invoice and will capture all remaining costs for WRMI's efforts in support of this engagement.

RDA [FOIA (b)(6)] provided LMS and Moodle administration during the HOT, supporting SMEs [(b)(6)] in delivery of the BS&S training components. She also worked wit [(b)(6)] o complete the final grading and evaluation of Cohort I students following completion of the BS&S courses. She coordinated with [FOIA (b)(6)] to ensure timely submission of all grades. As well, she participated in the final project calls and wrap up of all WRMI deliverables ensuring the course was completed on time and submission of requirements met.

RDA (b)(6) continued to provide overall project coordination for the URC team. She ensured completion and execution of the HOT, and assisted in coordinating the final inventory and ToP execution with in-country team members (b)(6) completed all URC deliverables to include input on training trip reports, the TTR and final report (b)(6) nsured submission of URC invoices and back up documentation for all materials procured, and initiated contractual close out activities and requirements with (b)(6)

RDA (b)(6) continued to provide in-country coordination to support the project, which included working closing with CLS and in-country trainers to facilitate and successfully execute the HOT. (b)(6) ensured all technical requirements were met to facilitate the remote HOT and worked with his team to support final efforts in executing the closing out the HOT. He participated in final project calls, conducted a final inventory of all in-country supplies, and supported execution of the ToP and transfer of all materials to the Central Public Health Laboratory (CPHL). In addition, (b)(6) provided feedback and input to the TTR and after action report.

RDA (b)(6) continued to coordinate and complete execution of the HOT with fellow in-country trainers and (b)(6) He ensured successful execution of the training and provided input into the final CDRLs, to include the after-action report and TTR.

RDA (b)(6) attended the HOT as an observer and ensured the overall successful implementation of the course. He participated in final calls and meetings with the Metabiota team. He worked with the participants to ensure completion of all course requirements to support their successful awarding of CME credits following submission to the Iraqi MoH. In addition (b)(6) assisted in coordinating the execution of the ToP and provided final course updates, to include student grades, to the MoH.

Foreign Local Nationals:

FLN (b)(6) continued to coordinate and complete execution of the HOT with fellow in-country trainers and (b)(6) He ensured successful execution of the training and provided input into the final CDRLs, to include the after-action report and TTR.

FLN, (b)(6) continued to coordinate and complete execution of the HOT with fellow in-country trainers and (b)(6) He ensured successful execution of the training and provided input into the final CDRLs, to include the after-action report and TTR.

FLN (b)(6) continued to work with the URC team and CLS during implementation of the HOT to ensure all in-country materials were prepared and ready for the practicum components of the course. In addition, he assisted in the inventory of all materials following the HOT and provided support t (b)(6) in completing the transfer of supplies to the CPHL.

CLIN 1003 – Materials and Supplies

The Material costs include the final purchases of texts and supplies for the in-country training. A $115.00 credit for ASM Press has been applied for (b)(6) as Metabiota incurred this as a non-billable cost.

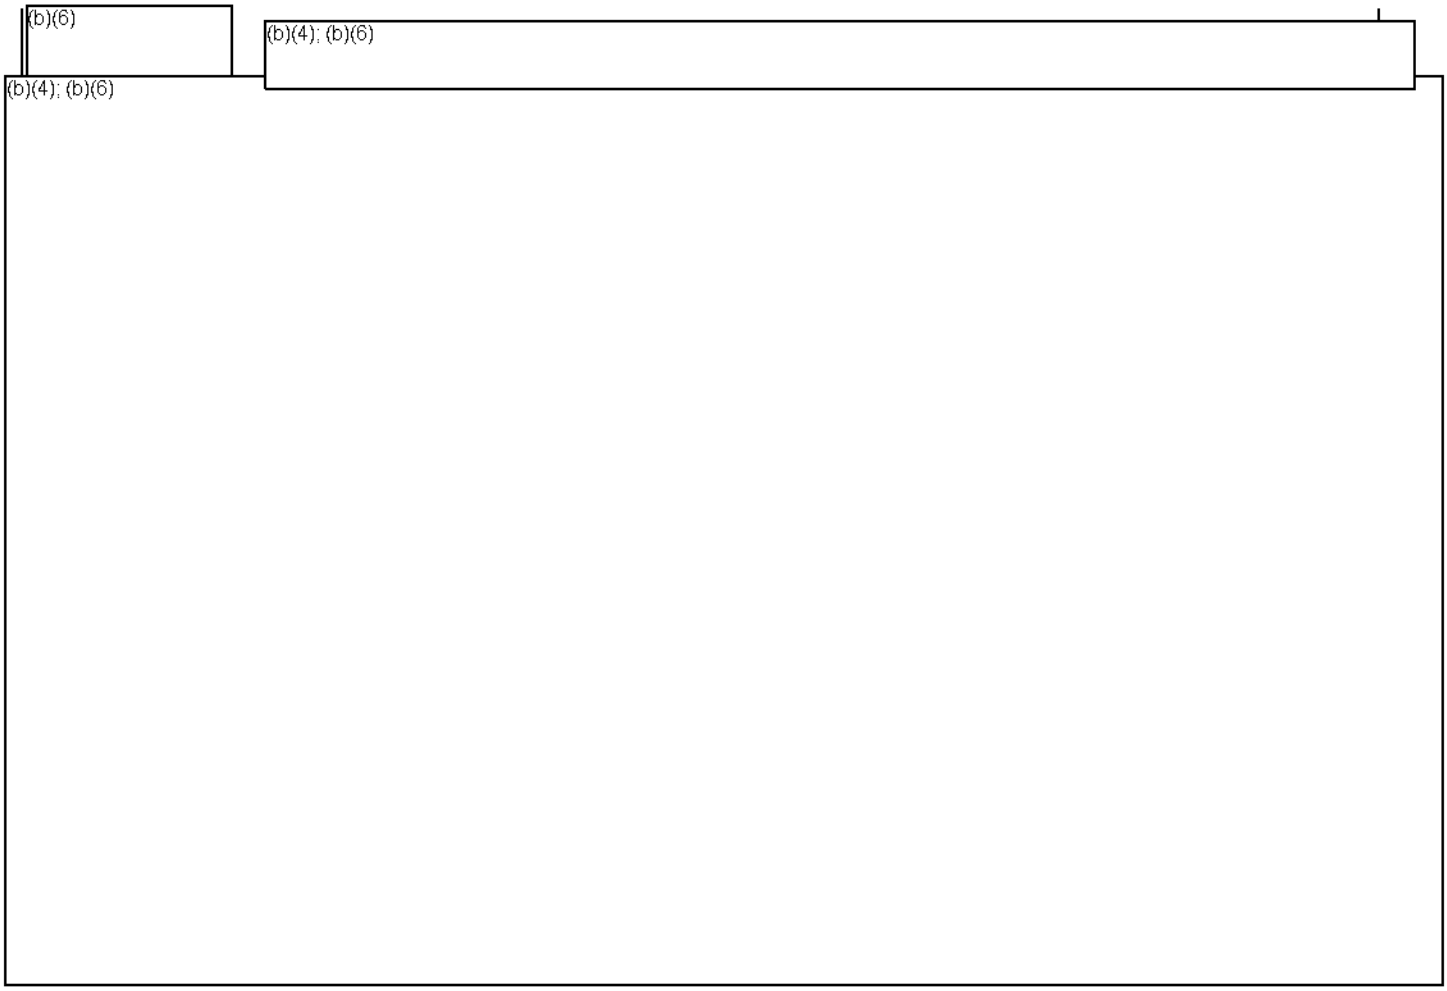

CLIN 1004 – ODCs

DBA is applied FOIA (b) (6) of total compensation for all in country performers.

CLIN 1005 – Travel

No travel costs are invoiced.

TD 022 Biosurveillance Training - Uganda

Objectives

Advance the Biosafety and Biosecurity capacity in Uganda through the development, coordination and execution of a pilot biosurveillance study focused in Rift Valley Fever (RVF), Avian Influenza (AI), and Peste des Petuts Ruminants Virus (PPRV). Provide subject matter expertise to assist participants in development and submission of grant proposals, and development of Standard Operating Procedures to increase enhance local skills in early detection and prevalence determination of RVF AI and PPR.

Period of Performance: 3/21/16 – 11/15/16

CLIN 1002 – Labor

Program Manager

Metabiota Regional Africa Program Manager (b)(6) led regular bi-weekly and as needed communications with in country stakeholders. He also led communications with DTRA CBEP representation on a bi-weekly basis. He provided project and programmatic oversight to the continued implementation of the biosurveillance pilot study. He also contributed to the finalization of all project procurement needs. (b)(6) led the development of a final project report during this time and ensured that all those working on this effort were able to offer their input where relevant.

Subject Matter Expert 1:

Represents the time of Metabiota Subcontractor (b)(6) of Africa Biomedical Laboratories (ABL). (b)(6) continued to lead the proposal development component of this project by continuing to schedule and host at length discussions with study leads (b)(6) and (b)(6) (b)(6) He followed up to these discussions by continuing to request their contributions regarding the development of a proposal purposed for eventual submission to a DTRA CBEP Broad Agency Announcement.

Time spent during this period is also represented by the efforts of (b)(6) of ABL. (b)(6) contributed to the proposal development process at the guidance of (b)(6) was engaged to support proposal writing and study design portions of this effort, and additionally worked to provide back-up technical support when necessary.

CLIN 1003 – Materials and Supplies

A credit invoice is being applied due to receipt of final invoices from Metabiota's vendor.

CLIN 1004 – ODCs

No ODC costs are invoiced.

CLIN 1005 – Travel

Travel costs include transportation support for AFRICOM FLNs (b)(6) and (b)(6) to complete follow up visits to sampling sights. Metabiota provided a flat $25.00 per day stipend. Metabiota additionally reimbursed (b)(6) or the use of a car service for 2 days of travel.

This submission of the Monthly Report (Contract Data Requirements List; CDRL A001 encompasses implementation of Academic Engagement Partnership (AEP) program activities in accordance with Defense Threat Reduction Agency (DTRA) Cooperative Biological Engagement Program (CBEP) contract HDTRA1-14-C-0104 for 09/01/15-09/30/15.

Technical Directives

AFRICOM

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing- Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 – 11/60/15
Total Estimated Budget: $125,975.00
Estimated Expenditure: $80,342.00
Technical Direction Status: Approved

Completed Activities

- Continued project coordination activities, including ongoing communications and outreach with the Cameroon Ministry of Defense.
- Completed Phase 3, Training Materials Adaptation and Approval, including the submission of modified training materials and subsequent amendments for PAO approval and translation. The project team additionally developed and submitted a draft agenda for the training.
- Drafted an official letter of invitation to collaborate for the Ministry of Defense, providing a detailed explanation of the needs for participant details and contact information in order to meet Leahy vetting as well as logistical requirements.
- Submitted Training Event Plans, CCRs, TAF, and CLS logistics support requests. Additionally, Metabiota staff and subcontractors completed preliminary travel requirements including identifying efficient travel routes and providing letters of support for Cameroon visa applications.
- The project team identified the Yaoundé Military Hospital pallet as the source for the training's equipment needs. In-country team members initiated equipment and materials gathering from this palette.
- The project team established a participant threshold of 75% (or <25 persons) as the minimum needed for project continuation on the current schedule. If this threshold appears to not be attainable within 72 hours of the current scheduled start date (Nov. 17), the project team will coordinate with DTRA CBEP and will issue a formal postponement.

Upcoming Activities

- Training equipment will be pulled from the identified pallet and set aside in a secure location until the training takes place.
- Training pre- and post-test and evaluations will be developed.
- The Ministry of Defense, in cooperation with the project team, will formally announce and invite Ministry of Defense participants. The Ministry of Defense will additionally provide Metabiota with the required participant information, and Metabiota will coordinate logistics needs with the CLS subcontractor.
- Metabiota will conduct the training November 17-19 in Yaoundé, Cameroon.

Challenges

The project team has encountered a delay in obtaining detailed Ministry of Defense participant personal and contact information. In order to better communicate the need to the Ministry of Defense, Metabiota provided support to DTRA CBEP with a draft of an official letter of invitation to collaborate, which included details regarding US regulation requirements and the logistics role of the CLS contractor. Metabiota and in-country subcontractors will maintain communication with the Ministry of Defense and other stakeholders, and will obtain the remaining needed information through less formal routes (email/phone) as available.

TD 008 Clinician Training - Uganda

Objectives

Identify gaps in current country-specific training systems and develop clinical training materials to address those gaps and sustainably increase the capacity of medical practitioners at the sub-national level of healthcare systems to identify, diagnose & report disease outbreaks.

Period of Performance: 05/16/15-08/18/15
Total Estimated Budget: $2,769,776.00
Estimated Expenditure: $632,826.00
Technical Direction Status: Cancelled

Completed Activities

- Metabiota completed an audit of invoice submitted by subcontractor, the Alliance, for time and materials used during period of active performance and sent the subcontractor feedback requesting additional narrative and documentation to support invoiced costs.

Upcoming Activities

- Submission of invoice for all costs incurred during period of active performance to DTRA.

Challenges

Metabiota requested an invoice from subcontractor the Alliance following the notice of cancellation by DTRA of unapproved TD-008, and subsequent to our delivery of a termination notice. The invoice was not delivered until significant time had passed, and the submitted materials lacked the necessary comprehensiveness regarding clarity and supporting documentation of all costs incurred. At this time, we are continuing to audit the Alliance's

invoice, while communicating needs for improvement to them, in an effort to ensure that our final submission to DTRA is accurate and complete.

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/15- 05/15/16
Total Estimated Budget: $335,608.00
Estimated Expenditure: $55,811.00
Technical Direction Status: Approved

Completed Activities

- Submitted Training Event Plans and initiated CLS logistics support requests, for the upcoming SHE Officer Master-level training.
- The project team continued *Phase 1 BS&S training video* scripts drafting. Script outlines were finalized and approved by NHLS leadership.
- The project team initiated the development of Fit Test Scale-up and Master-Level training plans. Once finalized, plans will encompass testing for all NHLS regional staff.
- The project team initiated a monthly reporting and invoicing process, and continued the equipment procurement process.

Upcoming Activities

- The project team will complete *Objective 1 BS&S training videography*, including the full scripting, video shoots, and editing.
- The project team will complete *Objective 3* Fit Test Scale-Up and Master-level training plan and cohort selections.
- The project team will continue equipment procurements, and will ensure South African electronic compatibility.
- SHE Officer training will take place in Johannesburg, South Africa, November 24-26, 2015.

Challenges
Metabiota continues to experience challenges with NHLS labor and materials invoicing process, particularly in regards to meeting all FAR regulations and expectations. Metabiota will continue to maintain regular communication with NHLS and provide support where possible to resolve these issues. NHLS corporate structure appears to have a delayed process of completion due to a bottleneck for approval of basic business processes at high levels which has caused delays in various aspects of project implementation.

TD 010 One Health Epi Training - South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 12/31/15
Total Estimated Budget: $134,551.00
Estimated Expenditure: $39,924.00
Technical Direction Status: Approved

Completed Activities

- Initiated coordination activities with South African stakeholders, including members of the CDC SA and USDA ARS SA.
- Conducted initial review of One Health Epidemiology training materials, engaging Metabiota Subject Matter Experts.
- Conducted preliminary One Health Epidemiology training materials review engaging OHE in country stakeholders including those representative of CDC South Africa and USDA South Africa.
- Initiated Training Materials Landscape review processes.
- Initiated the development of OHE stakeholder project communication planning.
- Conducted bi-weekly conference calls with DTRA CBEP personnel and A&AS support contractors.

Upcoming Activities

- Development of OHE Landscape Review report.
- Completion of SME and OHE stakeholder materials recommendations.
- Identification of additional stakeholders to help ensure maximum effectiveness of adapted materials.
- Submission of relevant CDRLs upon identification of relevant training dates.
- Ensure effective coordination of communication between all stakeholders involved in materials review process.

Challenges
OHE Stakeholders communication and responses have been generally delayed. To manage any future compounding schedule risks, Metabiota will establish bi - weekly calls with all stakeholders and ensure that efforts for effective management and communication will be coupled with clear project planning and expectations.

TD 013 One Health Epi Training - Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan and Nigerian National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency

cooperation and a unified training approach.

Period of Performance: 05/16/15- 02/29/15
Total Estimated Budget: $381,705.00
Estimated Expenditure: $80,959.00
Technical Direction Status: Approved

Completed Activities

- Completed expansions, updates and improvements to course evaluation tool.
- Participated in bi-weekly calls with DTRA CBEP and A&AS Support representation for Uganda to ensure transparency and consistency in communication.
- Executed bi-weekly stakeholder calls with CDC-Uganda and Ministry of Health Uganda to ensure effective communication and execution of project activities.
- The Training Event Plan (TEP) for Cohort 9 module 2 slated to take place in the Jinja district Uganda December 7-11th 2015 was submitted.
- The responsibility matrix was completed and designed to ensure effective support is allocated to all project activities.
- In collaboration with in county stakeholders Letter of Invitations were distributed to all participants and three Ministry of Health Trainers.
- Development of independent consultant agreements for foreign local national trainers was completed in line with DTRA CBEP and US embassy in Uganda guidelines.
- Procurement of necessary in country logistical support needs for Metabiota staff.
- Coordination with CLS, CDC Uganda and DTRA CBEP to ensure that in-country logistical needs for the participants and trainers not supported by Metabiota were supported by the CLS form and in line with the DTRA CBEP regulations as well as US Embassy of Uganda requirements for Government of Uganda Employees.

Upcoming Activities

- Submission of all remaining CDRLs for Cohort 9 Mod 2 to include: (TAF, CCR, CLS, and BOM).
- Submission of CDRLs for Cohort 10 Mod 1 to include: (TEP, TAF, CCR, CLS, and BOM).
- Metabiota staff will depart for Jinja district Uganda on October 16, 2015 and return to the United States on October 24th 2015.
- The training event: Cohort 9 Module 1 will take place October 19-23, 2015.
- Continuation of bi-weekly calls for with all stakeholders.
- Continuation of bi-weekly calls with DTRA CBEP representation and Metabiota specifically.
- Submission of Training Trip Report for Cohort 9 Mod 1 to DTRA CBEP.

Challenges

Metabiota has encountered difficulties in communication with in country stakeholders. These difficulties increase the risk for miscommunication and have potential to inhibit effective execution of project activities. To mitigate this risk, Metabiota has increased its coherence to consistent outreach efforts and has developed a responsibility matrix to increase transparency.

TD 014 Grant Writing Mentorship and Workshop - Kenya

Objectives
The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 7/21/15- 5/15/16
Total Estimated Budget: $113,982.82
Estimated Expenditure: $10,020.00
Technical Direction Status: Approved

Completed Activities

- This technical direction was not approved until the end of September and therefore no costs were incurred.

Upcoming Activities

- Establish regular calls with all stakeholders including those in country, DTRA CBEP and A&AS representation supporting Kenya.
- Obtain list of candidates slated to participate in the workshop.
- Identification of two Kenyan SME III scientists and one SME I Metabiota scientist to support manuscript review.
- Submission of CDRLs.

Challenges
No challenges to report in the month of September.

CENTCOM

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats – Kazakhstan

Objectives
To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-Cov) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 06/01/15- 01/31/16
Total Estimated Budget: $391,056.00
Estimated Expenditure: $271,460.00
Technical Direction Status: Approved

Completed Activities

- Finalized decision to reschedule training event for December 7-11, 2015 and updated project schedules accordingly.
- Resubmitted TEP 1304, TAF, and CCR with updated training dates.
- Resubmitted CLS travel and logistics support requests with updated training dates and participant list.
- Rescheduled transportation, lodging, catering, and other logistical needs.
- Modification of Duke-NUS subcontract with revised POP and budget.
- Received CBEP/PAO approval of Training Materials and forwarded materials for translation services.
- Submitted CLS travel and logistics support request for in-country travel support for IVM POC's to conduct a second pre-training preparations trip.
- In-country PIs from IVM initiated second pre-training trip on September 22. The purpose of this trip is to: (1) coordinate additional collaboration with regional laboratories, anti-plague stations, and university; (2) gather pre-training information on current camel and bat populations, the number of people in direct-contact with possibly infected camels, and number and spread of patients with MERS-like symptoms; and (3) secure participant attendance and sample collection support for Diagnostics Workshop.
- Finalized negotiations on the Memorandum of Understanding (MoU) between Metabiota and the Institute of Microbiology and Virology. Final countersignatures are in process.
- Continued communication and collaboration with key CBEP, in-country partners, Duke-NUS Qualified Trainers (QT) and CLS to coordinate logistical requirements of the training event.
- Continued coordination of material and supply shipments for December training with CLS.
- Initiated completion of CDRL 11 following receipt of forms from CBEP.

Upcoming Activities

- Submission of CDRL 11 to CBEP- Transferring Equipment and Materials to IVM;
- Finalize translation process of training materials, to include submission of updated participants list, syllabus, and training certificates.
- Receive final countersignature for MoU between Metabiota and the Institute of Microbiology and Virology.
- Continue to work with key CBEP personnel, in-country partners, and CLS to monitor shipment through KZ customs clearance, finalize procurement of required materials for the event, and secure all pending logistical needs for the training event.
- IVM POC's to conclude second pre-training trip on October 6, 2015 and report to Metabiota on its overall success /findings.

Challenges

Metabiota faced communication challenges with language barriers while finalizing the MoU with the IVM due to our POC's limited English abilities. Simple misunderstandings prolonged the process of finalizing this agreement. To counter this challenge, we engaged our Russian-speaking staff to assist in translating emails and phone calls so as to ensure clear communication and understanding. While language barriers will occasionally create obstacles, we will continue to utilize our on-site language assets to mitigate those effects.

TD003 Bat Borne Virus from Annual Bat Cull India- Cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: Cancelled

TD004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/15 to 02/15/16
Total Estimated Budget: $488,040.00
Estimated Expenditure: $101.666.00
Technical Direction Status: Approved

Completed Activities

- Finalized modified subcontract agreement with partner Gryphon Scientific with extended POP.
- Communication and collaboration with Gryphon and CLS to prepare for and implement successful MESA conference meeting/ outreach event on September 29.
- Implemented MESA conference meeting and outreach event on September 29, successfully communicating conference objectives and information to USG and regional partners.
- Finalized transportation, lodging, and other logistical needs for Scoping Visit scheduled for October 11-12.
- Received PAO approval for event website, and launched website initiating acceptance of applicants to attend the conference.
- Conference speakers have been invited; currently coordinating CLS transportation requirements.
- Ongoing communication and collaboration with CBEP personnel, in-country partner RSS, Gryphon Scientific, and CLS to coordinate logistical requirements of the Workshop.

Upcoming Activities

- Finalizing agenda for Scoping Visit in collaboration with CBEP personnel, Gryphon, and RSS.
- Implement Scoping Visit in Amman, Jordan from October 11-12.
- Half-day Scientific Advisory Board meeting scheduled for October 23.
- Continue to work with key CBEP personnel, Gryphon, RSS, and CLS to monitor travel requests, participant applications, and finalize CLS logistical requirements for March,

2016 Workshop.

Challenges
Longer than anticipated PAO approval turn-around times have required us to adjust milestone dates in the project schedule, which will increase the workload towards the end of the year and may jeopardize the project's ability to submit the required CLS and travel forms by their deadlines. Metabiota is coordinating deadline dates with CBEP personnel, US partner Gryphon, and the Science Advisory Board to ensure that adequate time is allocated for abstract submissions for perspective participants throughout the region, yet still allow sufficient time for required document preparations and submissions. In addition, Metabiota will submit "rolling" CLS applications for travel support to mitigate the workload towards the end of the year, and allow for additional time in coordination of participant/speaker travel and training requirements.

Due to the large size of this event, questions concerning the coordination of travel requirements have arisen. Metabiota is in communication with key CBEP personnel to clarify roles and responsibilities, and work with CBEP teams to determine a process for JKO and DoD training requirements for US attendees funded through CLS travel, and a "rolling" submission process of CLS forms that will limit end-of-year burden on personnel completing requirements and ensure plenty of time for submission to meet CDRL deadlines.

TD005 Long Distance Learning Iraq- Cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: Cancelled

EUCOM

TD 011 Ukraine TADR Activity Project 4 (TAP-4)

Objectives
The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/15/15-01/31/16
Total Estimated Budget: $116,879,54
Estimated Expenditure: $50,369.00
Technical Direction Status: Approved

Completed Activities
- Revised technical and cost proposal were submitted addressing DTRA concerns about the travel estimate. Revised technical and cost proposal were approved.
- Travel authorization request submitted fo (b)(6) Project Coordinator) November travel to Tbilisi for final workshop.
- CCR data submitted to A&AS in support of November travel to Tbilisi for final

workshop.
- Ukrainian veterinarians printed educational materials (flyer and poster) and began distribution of the materials. Unfortunately, due to the ongoing ASF outbreak in Ukraine, the actual distribution of materials has been impacted.
- Conducted communications with team in Ukraine serving as liaison to the Ukrainian veterinarians working on this project.

Upcoming Activities
- Finalize travel logistics.
- Work with the Ukrainians to ensure they are ready to present their efforts during the final workshop. They will likely also give a brief on the current ASF outbreak in country.
- Work with Metabiota BTRIC to understand whether there will be additional ASF-related work in Ukraine, and if so, work to develop a short presentation on those efforts for the final day of the workshop.
- Implement fourth and final workshop in Tbilisi, Georgia from 3-4 November 2015.

Challenges
Due to the ongoing ASF outbreak in Ukraine, the actual distribution of materials has been impacted as many of the vets that were to be conducting outreach are responding to the outbreak. We anticipate that the Ukrainians will be able to distribute all of the educational materials, but may be unable to gather data on the efficacy of their efforts and may not be able to spend as much time doing outreach as desired.

TD 012 Ukraine Project 2 (UP-2)

Objectives
The overarching objectives of this project are to develop both explanatory and predictive, spatially-explicit models to explore the geography and ecology of EDPs, specifically Francisella tularensis, the causative agent of tularemia, and Bacillus anthracis, the causative agent of anthrax, across Ukraine at multiple spatial scales.

Period of Performance: 05/16/15-09/30/2015
Total Estimated Budget: $264,788.00
Estimated Expenditure: $262,078.00
Technical Direction Status: Approved, Closed (Transferred to BTRIC TO4)

Completed Activities
- Revised technical and cost proposal were submitted addressing DTRA concerns about labor costs, materials, and travel. A new, revised TD was further issued after this proposal was submitted.
- A second, further revised technical and cost proposal was submitted which proposed costs that took into consideration transition of the project back to the BTRIC. This proposal was accepted.
- Conducted routine communications with the project team to direct and guide progress on this project.
- Conducted routine project administration efforts including reconciliation and payment of

invoices.

- Ukrainian team at IVM has begun analysis of boar sera using the Alpha Diagnostic ELISA kits, under remote guidance from the US collaborators at WRAIR and University of Florida. Initial results on the first plate raised several questions, as they seemed to imply a much higher rate of seropositivity than was expected.
- US collaborators at WRAIR are working to identify the desired DNA pool samples to be shipped from Ukraine to the US.
- US collaborators at WRAIR identified a new travel window in early December to work with UCDCM on tularemia analysis. They are working to ensure all travel documentation is submitted on time.
- UCDCM is proceeding forward with PCR analysis of previously collected biological samples.

Upcoming Activities

- This project is transitioning to BTRIC October 01,2015 and no further work will be performed on AEP.

Challenges

UP-2 continues to be challenged with the coordination of multiple stakeholders, some of who are not subcontracted by Metabiota. Travel into Ukraine by US collaborators continues to be difficult to coordinate, in large part due to the fact that many of the collaborators' travel documents are not handled by Metabiota. Forward progress is being made by the Ukrainian teams on sample analysis, however there are some questions as to efficacy, appropriateness, and procedure for using the Alpha Diagnostic ELISA kits.

TD 016-Georgia GIS

Objectives

Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15-05/15/16
Total Estimated Budget: $139,514.62
Estimated Expenditure: $4,402.00
Technical Direction Status: Approved

Completed Activities

- Technical and cost proposal were developed and submitted to DTRA in response to the initial TD. The proposal was approved.
- Project coordination activities were initiated; project documentation for the three CBR projects was obtained from A&AS for review, and Metabiota reached out to the project leads at CH2M Hill for understanding of current project needs.
- Metabiota reached out to the original GIS SME support for the three projects to discuss whether their efforts can be aligned with DTRA requirements as described in the TD.
- Metabiota identified potential alternate GIS SMEs if the original GIS SME cannot be secured.

Upcoming Activities

- Coordinate with leaders of GG-19, GG-20, and GG-27 to fully understand GIS requirements and participate regularly in project meetings to stay abreast of needs for GIS subject matter expertise.
- Secure GIS subject matter expertise, whether it is the original GIS expert involved, or whether Metabiota needs to go another direction.

Challenges

In preliminary discussions with the GIS subject matter expert originally involved in GG-19, GG-20, and GG-27, it appears that there may be some disconnect between the requirements and level of effort expected by DTRA in the TD, and the actual efforts required as stated in the Forms A of the various projects, as well as the level of effort believed to be necessary by the original GIS SME on these projects. This is causing delays in securing subject matter expertise as we try to reconcile the disparate levels of effort anticipated.

TD 017-Georgia SME Grantsmanship

Objectives

Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $136,732.00
Estimated Expenditure: $1,112.00
Technical Direction Status: Approved

Completed Activities

- Technical and cost proposal were developed and submitted to DTRA in response to the initial TD. The proposal was approved.
- Project coordination activities were initiated; Metabiota obtained names and contact information of POCs at NCDC and LMA.
- Metabiota has identified subject matter experts to complete this objective.

Upcoming Activities

- Metabiota will work to secure subject matter expertise via subcontract and will submit request for subcontractor approval as soon as possible.
- Establish regular communications with Lugar Center stakeholders and begin project activities.
- Contact DTRA technical POCs and inquire as to desired frequency of updates and appropriateness of communications should the DTRA CBEP BAA be targeted as a potential funding opportunity.

Challenges

At this time, there are no significant known challenges to completion of this task. As communications progress with the Lugar Center stakeholders, Metabiota will develop a better understanding of the interests and needs of the Georgian researchers.

TD 018-Georgia Visiting Scientist Genomics Grantsmanship

Objectives
Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects. The genomics SME will

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: 384,435.00
Estimated Expenditure: $1,099.00
Technical Direction Status: Approved

Completed Activities

- Technical and cost proposal were developed and submitted to DTRA in response to the initial TD. The proposal was approved.
- Metabiota has identified subject matter expertise to support these requirements.
- Metabiota received some additional information on scope of work from communications with A&AS.

Upcoming Activities

- Metabiota will work to secure subject matter expertise via independent consulting arrangement.
- Coordinate with leaders of GG-19, GG-20, GG-27, and GG TAP-11 to fully understand genomics support requirements for these and any other CBEP-funded research projects at the Lugar Center.
- Establish regular communications with Lugar Center stakeholders and begin support activities.
- Contact DTRA technical POCs and A&AS to establish lines of communication and be certain that we have identified all current relevant genomics needs, including those related to the operations of the Genomics Center.

Challenges
At this time, there are no significant known challenges to completion of this task. As communications progress with CBEP and Georgian stakeholders, Metabiota will develop a better understanding of the genomic expertise required by the Georgian researchers.

TD 019-Georgia Visiting Scientist Microbiology

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $382,330.00
Estimated Expenditure: $1,295.00
Technical Direction Status: Approved

Completed Activities

- Technical and cost proposal were developed and submitted to DTRA in response to the initial TD. The proposal was approved.
- Metabiota has identified subject matter expertise to support these requirements.

Upcoming Activities

- Metabiota will work to secure subject matter expertise.
- Contact DTRA technical POCs and A&AS to establish lines of communication and be certain that we have identified all current relevant microbiology needs.
- Coordinate with leaders of CBEP-funded research projects at the Lugar Center to determine microbiology needs.
- Establish regular communications with Lugar Center stakeholders and begin support activities.

Challenges

At this time, there are no significant challenges that have presented themselves. As communications progress with the CBEP and Georgian stakeholders, Metabiota will develop a better understanding of the needs of the Georgian researchers.

PACOM

TD 006 Nipah Research Activity Project-Cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: $11,986.00
Technical Direction Status: Cancelled

TD 007 Regional Baseline Assessment

Objectives

Characterize the region based on the disease landscape, organic regional capabilities, and external factors that impact CBEP objectives, identify needs and areas of overlap with other stakeholders, and provide overarching strategic guidance & goals to CBEP PACOM Country Managers in the development of country engagement strategies.

Period of Performance: 05/16/15 – 10/31/15
Total Estimated Budget: $850,489.00
Estimated Expenditure: $749,535.00
Technical Direction Status: Approved

Completed Activities

- Following draft deliverable submissions on 9/2/2015 and 10/2/2015 as well as meetings with regional leadership and A&AS support staff, the team continues to incorporate feedback and make revisions to the style, flow, and organization of the document for submission of the next deliverable on 10/21/2015.
- Engaged additional SMEs to serve as editors for finalization of the deliverable.
- Continued routine communication and meetings with project team, CBEP leadership, and SMEs to finalize the analysis.

Upcoming Activities

- The team will continue to incorporate feedback from Regional Leads and A&AS support in refining and refocusing the final deliverable document for submission on 10/21/2015.
- The team will submit hard copies as well of electronic copies of the document to CBEP Regional Leads on 10/21/2015, as well as presenting key findings from the analysis.
- Available SMEs will attend the meeting with CBEP Regional Leads on 10/21/2015 in order to answer any expertise-related questions.
- Additional graphics development and review to support the analysis.
- Identify graphic services to print final version of the analysis for submission after receiving approval of the final deliverable from CBEP Regional Leads.

Challenges

The landscape analysis is a large and critical undertaking that must be completed under a rigorous and accelerated timeframe requiring targeted and informed communication across the program with key CBEP personnel. Metabiota will actively manage communication, especially any external communication related to CBEP engagement countries utilizing a professional and pre-approved approach.

TD 015 Health Informatics Support in Vietnam-Complete

Objectives

This effort has completed.

Period of Performance: 05/16/15 – 06/30/15
Total Estimated Budget: $51,804.80
Estimated Expenditure: $51,804.80
Technical Direction Status: Approved, Closed

This submission of the Monthly Report (Contract Data Requirements List; CDRL A001 encompasses implementation of Academic Engagement Partnership (AEP) program activities in accordance with Defense Threat Reduction Agency (DTRA) Cooperative Biological Engagement Program (CBEP) contract HDTRA1-14-C-0104 for 10/01/15-10/31/15.

Technical Directives

AFRICOM

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing- Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 – 11/06/15
Total Estimated Budget: $125,975.00
Estimated Expenditure: $74,591.00
Technical Direction Status: Approved

Completed Activities

- Metabiota revised training materials in response to DTRA/A&AS comments. The revised training materials were submitted and accepted. The training materials were then sent simultaneously for public affairs approval and translation into French.
- Metabiota filed a Country Clearance Request for the November PPE training event.
- Metabiota drafted and filed a travel authorization request, which was approved.
- Metabiota drafted a CLS form for logistics of the November PPE training event and handed it off to DTRA/A&AS.
- Metabiota DC engaged in regular communications with the overseas personnel to discuss and work through training event logistics.
- Metabiota drafted letters to the US Embassy and Cameroon Ministry of Defense for DTRA to assist with obtaining information for Leahy vetting.

Upcoming Activities

- PPE training event slated for November is likely to be postponed. Metabiota will work with DTRA to identify alternative dates once Leahy vetting is completed.
- Metabiota is reviewing CLS-translated training materials for accuracy.

Challenges
MinDef has said no additional information will be provided on participants. DTRA and A&AS are working with US Embassy on the path forward. This will likely result in postponement of training until late January at the earliest.

TD 008 Clinician Training - Uganda

Objectives
Identify gaps in current country-specific training systems and develop clinical training materials to address those gaps and sustainably increase the capacity of medical practitioners at the sub-national level of healthcare systems to identify, diagnose & report disease outbreaks.

Period of Performance: 05/16/15-08/18/15
Total Estimated Budget: $2,769,776.00
Estimated Expenditure: $737,361.00
Technical Direction Status: Cancelled

Completed Activities

- Metabiota completed the audit of an invoice updated and re-submitted by subcontractor, the Alliance, for labor and materials used during the period of active performance.
- A final cost for time and materials used during the period of active performance was aggregated through an iterative process with subcontractor, the Alliance, to support accuracy and comprehensiveness.
- A final invoice for TD-008 Clinician Training Uganda has been developed and prepared for submission to DTRA.

Upcoming Activities

- Final submission of Metabiota invoice to DTRA

Challenges
Finalization of Metabiota's invoice to DTRA for time and materials supporting Clinician Training Uganda was further delayed by our continued need to audit the invoice and supporting documentation produced by subcontractor the Alliance. The Alliance as an organization is traditionally unfamiliar with the time and materials contract mechanism, and experienced significant challenges in producing a comprehensive invoice. Extensive communication and technical support was required to support this effort.

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/15- 05/15/16
Total Estimated Budget: $335,608.00
Estimated Expenditure: $85,138.00
Technical Direction Status: Approved

Completed Activities

- Metabiota personnel engaged in teleconferences and email communications with both NHLS and DTRA personnel.
- Metabiota submitted a Training Event Plan, which was approved.
- Metabiota worked with NHLS personnel to identify appropriate participants for the fit-testing training event. Metabiota drafted a CLS request containing these participant's information, along with a venue request. This CLS form was submitted to DTRA.
- Metabiota began the procurement of PortaCount Pro fit testers from TSI, Inc.
- Metabiota investigated multiple vendors for iPad pricing and began the procurement of iPads from Apple, Inc.
- Metabiota and NHLS personnel generated fit-testing training materials from established protocols provided by TSI, Inc.
- Metabiota drafted a CLS form for shipping needs and sent this onward to DTRA for submission to the CLS contractor.
- Metabiota drafted and submitted a Travel Authorization request with plug data; this request was approved.
- The Metabiota team members at NHLS began identifying additional requirements for the OHASIS module development.

Upcoming Activities

- BS&S training videography is expected to begin soon.
- PortaCount fit testers and iPads are expected to be delivered to the CLS shipping warehouse for further shipment to South Africa.
- The fit testing training event is scheduled to occur at the end of November.

Challenges

Coordination with CLS on both the training venue/logistics and procurement shipping/logistics has been cumbersome as we are routing all communications through DTRA/A&AS.

TD 010 One Health Epi Training - South Africa

Objectives

Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 12/31/15
Total Estimated Budget: $134,551.00
Estimated Expenditure: $50,392.00
Technical Direction Status: Approved

Completed Activities

- Development and delivery of structured outline to support the training materials and landscape review process.
- Conducted bi-weekly conference calls with DTRA CBEP personnel and A&AS support contractors.
- Conducted bi-weekly conference calls with South African stakeholders supporting the

review and modification of one health epidemiology materials.

- Conducted individual calls with each South African stakeholder to ensure understanding of project scope of work and to provide opportunity for direct questions.
- Completion of module 1 review and analysis of one health epidemiology materials by Metabiota Subject Matter Expert.
- Technical discussions between Metabiota Epidemiology Subject Matter Expert and South African stakeholders regarding training goals and training needs in country.

Upcoming Activities

- Continued development of OHE Landscape Review report to include identification of section leads among South African stakeholders and the Metabiota Project Team.
- Solidification of dates for in-country materials review and modification meeting.
- Submission of relevant TEP for in-country assessment.
- Continue to ensure effective coordination of communication between stakeholders involved in the materials review process.

Challenges

A misunderstanding in project scope was identified to have occurred among the South African stakeholders. They were collectively under the impression that One Health Epidemiology South Africa was related to an effort implemented by a DTRA country manager previous to (b)(6) (b)(6) This lead to questions and some confusion regarding the existing scope of work; however, this misunderstanding has since been rectified. Additionally, in country stakeholders have had some level of trouble attending regularly scheduled bi-weekly calls with the Metabiota Project Team due to availability and other obligations.

TD 013 One Health Epi Training - Uganda

Objectives

Increase the operational biosafety and bio-surveillance capacity of Ugandan and Nigerian National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 02/29/15
Total Estimated Budget: $381,705.00
Estimated Expenditure: $135,337.00
Technical Direction Status: Approved

Completed Activities

- Completion of Cohort 9 Module 1 One Health training in Jinja, Uganda (October 19- 23, 2015).
- Submission of TAF, CCR, CLS, and BOM in support of Cohort 9 Module 2 to take place in Jinja, Uganda.
- Submission of TEP, TAF, CCR, CLS, and BOM in support of Cohort 10 Module 1 to take place in Kabarole, Uganda.

- The Non-Disclosure and Independent Consultant Agreements between the lead Trainer-(b)(6) and Metabiota were signed and invoiced.
- Held bi-weekly conference calls with DTRA CBEP personnel and A&AS support representation.
- Held bi-weekly conference calls with CDC-Uganda and Ugandan Ministry of Health to discuss implementation of trainings going forward.
- Submission of Training trip report 238 In support of Cohort 9 Module 1 One Health Epidemiology training.

Upcoming Activities

- Preparation for Cohort 9 Module 2 set to take place December 7-11, 2015 in Jinja, Uganda.
- Preparation for Cohort 10 Module 1 set to take place December 14-18, 2015 in Kabarole District Uganda.
- Continuation of bi-weekly calls for with all stakeholders.
- Continuation of bi-weekly calls with DTRA CBEP representation and Metabiota.
- Incorporation of new labor rates for foreign local national independent consultants supporting OHE training.

Challenges

During training implementation in Jinja, Uganda, Module 1 of Cohort 9, some logistical problems were encountered. Insufficient quantities of training materials were provided for participants. The company subcontracted to support this training did not provide per diem to trainees and facilitators until mid-week. Per Diem payments were requested for distribution daily, and were promised to the trainers in kind. The decision by the company to delay distribution created anxiety among trainees and facilitators who were promised otherwise. The junior level staff representing this company at the training event was not authorized to make decisions, nor come up with a timely solution.

Trainees were concerned that they would not be able to meet with their team to complete the field assignments once back in the district. The fieldwork is a key component of the training and provides participants the chance to implement the theories learned in module one.

TD 014 Grant Writing Mentorship and Workshop - Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 7/21/15- 5/15/16
Total Estimated Budget: $113,982.82
Estimated Expenditure: $11,384.00
Technical Direction Status: Approved

Completed Activities

- Established bi-weekly calls with DTRA CBEP representation, (b)(6) and the Metabiota Project Team.
- Development of Project Charter for TD-014.
- Development of profile for Subject Matter Experts slated to participate in the writing workshop.
- Identification of probable dates for the writing workshop set to take place in Nairobi, Kenya.
- Request submitted to (b)(6) for the delivery of the manuscripts produced by 20 participants selected from the Regional Conference on Zoonotic Diseases in Eastern Africa.

Upcoming Activities

- Selection of subject matter experts to support the Writing Workshop.
- Finalization of dates for the workshop.
- Submission of TEP, CLS form, CCR form, and any other relevant CDRLs in support of in country efforts.
- Continuation of bi-weekly stakeholder calls.

Challenges

The Grant Writing Mentorship and Workshop purposed to foster the improvement of research manuscripts from selected participants is on time and currently on track to remain within the budget ceiling. However, the tasks involving the coordination, management, and actual technical review and improvement of manuscripts for this effort will likely require more time than proposed.

CENTCOM

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats – Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-Cov) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/15- 01/31/16
Total Estimated Budget: $391,056.00
Estimated Expenditure: $273,285.00
Technical Direction Status: Approved

Completed Activities

- PIs from IVM completed second pre-training trip on October 6 and submitted Trip Report on October 15. An additional institution was identified during this trip to participate in the December training: The Aralomorsk AntiPlague Station.
- Submitted CLS travel and logistics support request for additional participant from the

Aralomorsk AntiPlague Station, which was identified during the second IVM pre-training trip. Resubmitted translation and interpretation request of training materials.

- Confirmed laboratory access for all participants, trainers and organizers.
- Secured DBA insurance for Metabiota and Duke personnel for travel to Almaty, and in response to the extended PoP.
- Finalized daily itinerary and reserved ground transportation for Metabiota, and Duke personnel to and from the December training venue.
- Executed the MOU between Metabiota and the IVM.
- Completed modification of the Duke-NUS subcontract with revised PoP and budget.
- Completed the Brokerage agreement signatures between SAIC, Global Link, and IVM.
- Received updated quote from local procurement support TMC Global Professional Services and modified PO to the extended period of performance and increased ceiling price.
- Continued coordination with IVM to arrange official approval from the Ministry of Agriculture to secure customs acceptance of training materials being shipped into the country continued communication with CLS to coordinate translation, printing, and shipment of training materials.
- Continued communication and collaboration with key CBEP, in-country partners, Duke-NUS Qualified Trainers (QT), and CLS to coordinate logistical requirements of the training event.

Upcoming Activities

- Completion and submission of CDRL 11 Transfer of Equipment and Materials to IVM.
- Completion of modified PO with TMC.
- Continue to work with key CBEP personnel, in-country partners, and CLS to monitor shipment through KZ customs clearance, finalize procurement of required materials for the event, and secure all pending logistical needs for the training event.
- Conduct shipment of materials for pick-up date in USA and Singapore during the week of November 16 and delivery date in Almaty, Kazakhstan during the week of November 23.
- Final bi-weekly project meetings with in-country partners and Duke-NUS Qualified Trainers (QT) before travel dates of December 1-2.

Challenges

Metabiota faced communication challenges and language barriers while finalizing the in-county material procurement quote with TMC. While language barriers will occasionally create obstacles, we will continue to utilize our on-site language assets to mitigate those effects. Additionally, IVM PI's have expressed desires to pursue extended engagements after the completion of the December training event. While Metabiota will not be the prime contractor for the continued CBEP work in Kazakhstan, we have explained the shift of contractors following the December training event to IVM and assuaged their concerns regarding any perceived impact the switch will have on the current and future activities.

TD003 Bat Borne Virus from Annual Bat Cull India- Cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00

Total Expenditure: 0.00
Technical Direction Status: Cancelled

TD004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/15 to 05/15/16
Total Estimated Budget: $488,040.00
Estimated Expenditure: $150,808.00
Technical Direction Status: Approved

Completed Activities
- Completed Scoping Visit of RSS facilities in Amman, Jordan on October 12.
- Following Scoping Visit of venue, prepared initial CLS logistics request; logistics are currently being edited internally before submission.
- Prepared first CLS travel support request for March Conference; document is currently being edited internally before submission.
- Began JKO trainings for U.S. citizens who will require travel support for March Conference.
- Submitted Press Release for PAO approval.
- Speakers and panel board members continue to be invited.
- Continued revisions of conference agenda and panel board members with Gryphon, CBEP, and Scientific Advisory Board.
- Ongoing outreach of conference event to increase participation.
- Ongoing communication and collaboration with CBEP personnel, in-country partner RSS, Gryphon Scientific, and CLS to coordinate logistical requirements for the conference.

Upcoming Activities
- First round of abstract submission deadlines on November 06, to be extended through December 1.
- Submit first CLS travel support request for Scientific Advisory Board Members and Speakers who have confirmed attendance.
- Submit Travel Authorization Form for Gryphon and Metabiota personnel for March Conference event.
- Gryphon subcontract to be modified a second time due to personnel and additional administrative changes.
- Continue to work with key CBEP personnel, Gryphon, RSS, and CLS to monitor travel requests, participant applications, and finalize CLS logistical requirements for March, 2016 Conference.

Challenges
Due to the large size of this event, questions concerning the coordination of travel requirements have arisen. Metabiota is in communication with key CBEP personnel, CLS, and Gryphon Scientific to clarify roles and responsibilities and ensure that all required information is collected and provided to CLS. Additionally, outreach efforts will be expanded to increase the number of abstracts submitted and participants attending the Conference.

TD005 Long Distance Learning Iraq- Cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: Cancelled

EUCOM

TD 011 Ukraine TADR Activity Project 4 (TAP-4)

Objectives
The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/15/15-01/31/16
Total Estimated Budget: $116,879,54
Estimated Expenditure: $57,687.00
Technical Direction Status: Approved

Completed Activities
- Travel arrangements for Metabiota personnel were established.
- Metabiota confirmed the Ukrainian participant list and followed up with A&AS regarding CLS's arrangements for the Ukrainian delegation after identifying unusual flight arrangements that arrived very late into Georgia.
- Metabiota developed a short presentation for the Metabiota slot of workshop day 2.
- Metabiota personnel participated in conference calls and email communications with the broader ASF working group and also with SAFOSO specifically.
- The Ukrainian personnel continued with the distribution of educational materials and outreach activities.
- (b)(6) reprinted several of his ASF-related research posters for presentation at the November conference.

Upcoming Activities
- TAP-4 final workshop occurred in early November; travel trip report and final closeout to occur.

Challenges

Beyond the current ASF outbreak in Ukraine, no significant challenges were encountered.

TD 012 Ukraine Project 2 (UP-2)

Objectives
The overarching objectives of this project are to develop both explanatory and predictive, spatially-explicit models to explore the geography and ecology of EDPs, specifically Francisella tularensis, the causative agent of tularemia, and Bacillus anthracis, the causative agent of anthrax, across Ukraine at multiple spatial scales.

Period of Performance: 05/16/15-09/30/2015
Total Estimated Budget: $264,788.00
Estimated Expenditure: $297,064.00
Technical Direction Status: Approved, Complete (Transferred to BTRIC TO4)

Completed Activities
- Project transitioned to BTRIC TO4.

Upcoming Activities
- Closing out invoicing for Kansas State University and Ukrainians via CRDF Global.

Challenges
None identified.

TD 016-Georgia GIS

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15-05/15/16
Total Estimated Budget: $139,514.62
Estimated Expenditure: $8,489.00
Technical Direction Status: Approved

Completed Activities
- Metabiota achieved agreement with the GIS subject matter expertise team at University of Florida on scope and budget.
- Metabiota began preliminary coordination with CBR project leads in order to understand needs.
- Metabiota developed and submitted a revised proposal as a result of ground-truthing the actual project requirements from project teams and Forms A of the relevant CBR projects.

Upcoming Activities
- Metabiota will finalize the subcontract with the UF team.

- Metabiota will work with CBR project leads to ensure GIS SME needs are met.

Challenges
The requirements outlined in the technical direction do not mesh up with the requirements as outlined in the Forms A of the various CBR and TAP projects. This leads us to a discrepancy between the labor mix initially approved and the labor mix that we believe will be required to correctly fill the requirements of the technical direction.

TD 017-Georgia SME Grantsmanship

Objectives
Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $136,732.00
Estimated Expenditure: $14,609.00
Technical Direction Status: Approved

Completed Activities
- Metabiota identified the SME team to execute Grantsmanship mentoring.
- Metabiota drafted SOW and contract documents, and signed subcontract with Attimo (soon to be Avila).
- The Metabiota project team spoke with Georgian stakeholders at LMA and NCDC on separate occasions to gather input on the mentorship needs of each institution.
- The Metabiota project team has drafted an initial mentorship project plan.

Upcoming Activities
- The Metabiota project team will push a tentative schedule of milestones out to stakeholders at LMA and NCDC. This schedule will establish an initial work plan for Georgian participants.
- After the near-term work plan has been distributed, we expect to receive project ideas and drafts of proposals to begin coming in for initial review.

Challenges
Subcontractor approval has not yet been granted by DTRA. Currently Attimo has stopped work on this project, which puts timelines at risk.

TD 018-Georgia Visiting Scientist Genomics Grantsmanship

Objectives
Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects. The genomics SME will

Period of Performance: 09/21/2015-05/15/16

Total Estimated Budget: $384,435.00
Estimated Expenditure: $36,517.00
Technical Direction Status: Approved

Completed Activities

- Metabiota identified genomics expertise and established subcontract said expertise.
- Genomics VS has continued mentoring of (b)(6) in comparative genomics. They are examining the in-country anthrax vaccine strain STI. Preliminary results suggest a significant variance between the Georgian STI strain and the reference STI strain reported by Okinaka, *et al.*
- Genomics VS is working with Lugar center staff to acquaint them with publicly available genome databases.
- Genomics VS has begun mentoring (b)(6) on raw sequence data quality control, draft genome assembly, and comparative genomic analysis. Together they have created genome assemblies for an atypical *Shigella*-like bacterial strain. Preliminary bioinformatics analysis indicates that the isolate encodes shiga toxin genes. They are also working on understanding its phylogenetic placement.
- Genomics VS advised Lugar Center microbiologists on the need to potentially modify testing procedures for bacterial strains that do not react to established pathogen-specific antisera.
- Genomics VS has begun training (b)(6) in viral genome assembly and annotation using a test data set.

Upcoming Activities

- Genomics VS has begun development of an *in silico* workflow for pathogen subtyping and will mentor (b)(6) and others in both the development and use of the workflow for NGS data.
- Genomics VS has begun developing workflow for genome and plasmid sequence annotation in order to enable Lugar Center staff to characterize genomic data and submit data to Genbank prior to publication.
- Genomics VS is developing a skill-set review workshop in conjunction with NCDC science director (b)(6)
- Genomics VS will continue supporting all activities listed above.

Challenges

The Lugar Center (and by extension NCDC) does not appear to have a good method for transferring knowledge learned (especially that learned abroad) from person to person, and many staff members frequently switch research topics. Additionally, it appears that collaborating foreign labs are doing a significant portion of the sequence analysis. These factors have the effect of impacting sustainability. Lugar Center staff are also often skipping the post-NGS quality control step in their workflows.

TD 019-Georgia Visiting Scientist Microbiology

Objectives

Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $382,330.00
Estimated Expenditure: $46,377.00
Technical Direction Status: Approved

Completed Activities

- Metabiota identified and worked to bring onboard the subject matter expertise requested in the technical direction. Metabiota is bringing the VS on as a full-time Metabiota employee effective 1 November, and issuing an independent consulting agreement to cover work activities in the month of October.
- Metabiota personnel communicated electronically with CBR project leads to better understand needs under this technical direction.
- Metabiota VS is working with Batumi Zonal Diagnostic Laboratory on avian influenza PCR work. Metabiota VS assisted with troubleshooting of Rotor-Gene PCR instruments at Batumi; this work is ongoing.
- Metabiota VS is assisting Lugar Center personnel with drafting and editing of GG TAP-11 validation plan.
- Metabiota VS is assisting NCDC with preparations and planning for the installation of a GC/MS instrument funded by UNICRI. This ongoing effort will enhance NCDC relationships with international organizations and provide the foundation for a potential proteomics capability which may be leveraged in future research, as well as biosafety and biosecurity efforts.
- Metabiota VS met with FOIA (b)(6) and other CBR project personnel to discuss ongoing efforts on GG-19, -20, -27, and TAP-11.
- Metabiota VS met with a field team from LMA to help prepare them for a seroprevalence study among animal workers and animals.

Upcoming Activities

- Metabiota VS will test avian influenza PCR controls and primers at Lugar Center.
- Metabiota VS will continue assisting with all ongoing efforts listed above.

Challenges

The Metabiota VS previously recruited a technical translator/interpreter who was then hired by CH2M Hill. CH2 was issued technical direction by a previous Georgia country manager to provide support to the PSU AEP VS, and believes that this technical direction is now expired. Technical translation is difficult, and it would be preferred to continue working with the same person, but new technical direction to CH2M Hill may be required in order to make this happen. We believe quality and speed of translation/interpretation efforts will be impacted if forced to use CLS.

PACOM

TD 006 Nipah Research Activity Project-Cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: $11,986.00
Technical Direction Status: Cancelled

TD 007 Regional Baseline Assessment

Objectives
Characterize the region based on the disease landscape, organic regional capabilities, and external factors that impact CBEP objectives, identify needs and areas of overlap with other stakeholders, and provide overarching strategic guidance & goals to CBEP PACOM Country Managers in the development of country engagement strategies.

Period of Performance: 05/16/15 – 10/31/15
Total Estimated Budget: $850,489.00
Estimated Expenditure: $850,489.00
Technical Direction Status: Approved

Completed Activities

- Submitted draft gap analysis to CBEP on 29 October and held review meeting with regional team on 30 October.
- Submitted responses in comments matrix on 30 October to CBEP regional team, showing revisions and progress made in addressing identified modifications and changes improving the overall document.
- Secured additional SME support to complete revisions and edits needed to finalize the regional baseline analysis and respond to comments received by CBEP.
- Assigned internal team leads and functional teams to support revisions to the regional baseline analysis.
- Met with CBEP regional team and set revised submission schedule with final deliverable due 18 December.
- Requested NCE extending project period to 31 December.
- Continued revisions and edits to regional gap analysis in preparation for final submission.

Upcoming Activities

- Continue revisions, and editing to the regional baseline analysis for submission of draft document on 20 November.
- Perform QAQC reviews of draft document by SMEs prior to submission of draft document on 20 November.
- Secure additional SME support, at no cost to the Government for further build out and analysis of the regional baseline analysis.
- Secure additional graphic services for finalization and stylization of the report.

Challenges

The deliverable submitted to CBEP on 1 October did not meet the standards of research that both Metabiota and CBEP were looking for in the final product. Previous challenges identified in the accelerated schedule and volume of research and analysis required to complete this project impeded progress towards the 1 October submission that should have been more clearly communicated to CBEP leadership. Following review and receipt of the comments matrix by the CBEP team, Metabiota has initiated revisions and responses to CBEP comments in preparation for the final deliverable on 18 December. To complete this task, Metabiota has secured additional internal and external SME support, at no cost to the Government to complete the required revisions to the analysis and provide a final product that meets the standards required.

TD 015 Health Informatics Support in Vietnam-Complete

Objectives
This effort has completed.

Period of Performance: 05/16/15 – 06/30/15
Total Estimated Budget: $51,804.80
Estimated Expenditure: $51,804.80
Technical Direction Status: Approved, Closed

Metrics

Table 1 – Summary of Invoicing

CLIN	Total Awarded	Total Funded	Total Invoiced	Total Remaining
0001	$2,945,896.76	$2,945,896.76	$2,945,896.76	$0.00
0002	$392,352.53	$392,352.53	$392,352.53	$0.00

Table 3- Summary of Contract Modifications

Contract Modifications	Requirement / Description	Date Received	Letter Issued to DTRA
P00001	Respond to the Ebola outbreak in Africa	21-Mar-14	18-Apr-2014
P00002	Removed FTE and geographical restrictions from SOW	27-Mar-14	25-Apr-2014
P00003	Authorized use of existing LOE under CLIN 04 at the discretion of the COR	4-Apr-14	9-May-2014
P00004	Bat-borne pathogen surveillance	6-May-14	5-Jun-2014
P00004	Clinician Training in at least 3 African countries	6-May-14	5-Jun-2014
P00004	BS&S / NHLS Training in South Africa	6-May-14	5-Jun-2014
P00005	Added funding at the SLIN level to requirements listed in P00004	14-May-14	N/A
P00006	SURGE CLIN - Extended POP for EBOV response	12-Jun-14	N/A
P00007	REA Negotiation	25-Jun-14	27-Jun-2014
P00008	Surge POP extension	6-Aug-14	N/A
P00009	REA for Bat-Borne Training and revised Rate Cards	3-Sep-14	N/A
P00010	Ukraine Projects – UP2 & TAP4	17-Sep-14	N/A
P00011	Incorporates FAR clause 52.225-99 initiating use of Synchronized Pre-deployment and Operational tracker for efforts in Africa.	4-Dec-14	N/A
P00012	Authorizes FFP funds for CLIN 0003 and CLIN 1006. Incorporates requirement for DBA insurance.	26-Jan-15	N/A
P00013	Issues change order from FFP LOE to FFP. Requests Proposal extension of base year through April.	2-Feb-15	N/A
P00014	Awards Base Year Extension	10-Apr-15	N/A
P00015	Realigns funding between ACRNS	16-Apr-15	N/A
P00016	Issues two week extension for base year	21-Apr-15	N/A

P00017	Awards T&M Option Year for $12,771,956.28.	15-May-15	N/A
P00018	Provides Incremental funding for Option Year 1	15-May-15	N/A
P00019	Funds REA and changes contract clauses.	3-Sep-15	N/A
P00020	Adds funding to CLIN 1002 and 1005	28-Sep-15	N/A
P00021	Adds FLN rate card. Changes Key Personnel. Adds Subcontractor and FAR clause	28-Sep-15	N/A

Table 4- Summary Committed Funds

CLIN	Total Awarded	Total Funded	Total Committed	Total Remaining
0001	$2,945,896.76	$2,945,896.76	$2,945,896.76	$0.00
0002	$392,352.53	$392,352.53	$392,352.53	$0.00
0003	$1,283,857.97	$1,283,857.97	$1,283,857.97	$0.00
0004	$1,194,823.51	$1,194,823.51	$1,194,823.51	$0.00

This submission of the Monthly Report (Contract Data Requirements List; CDRL A001 encompasses implementation of Academic Engagement Partnership (AEP) program activities in accordance with Defense Threat Reduction Agency (DTRA) Cooperative Biological Engagement Program (CBEP) contract HDTRA1-14-C-0104 for 11/01/15-11/30/15.

Technical Directives

AFRICOM

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing- Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 – 04/30/16
Total Estimated Budget: $125,975.00
Estimated Expenditure: $79,696.49
Technical Direction Status: Approved

Completed Activities
- Training materials were translated by CLS; Metabiota staff fluent in French have reviewed the translated materials and made corrections where necessary.
- A revised TD with a new period of performance was executed.

Upcoming Activities
- Metabiota is standing by, awaiting the outcome of the Leahy vetting to identify new training dates.

Challenges
The Cameroon Ministry of Defense has been reticent to provide the additional information required to complete Leahy vetting of their trainees. The US Embassy defense attaché office in Yaoundé has issued diplomatic notes to try to unstick this roadblock, but little to no action has been seen to date.

TD 008 Clinician Training - Uganda

Objectives
This effort has been cancelled.

Period of Performance: 05/16/15-08/18/15
Total Estimated Budget: $2,769,776.00
Total Expenditure: $737,361.45
Technical Direction Status: *Completed, Closed.*

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/15- 05/15/16
Total Estimated Budget: $335,608.00
Estimated Expenditure: $184,501.09
Technical Direction Status: Approved

Completed Activities

- Metabiota PM and PC conducted bi-weekly conference calls with DTRA CBEP personnel and A&AS support contractors.
- The Metabiota PM and PC conducted regular conference calls with NHLS point of contacts to discuss and work through logistical and programmatic issues.
- The Metabiota PM and PC drafted and submitted a CLS shipping support request for PortaCounts and iPad procurement.
- The Metabiota team procured and delivered PortaCounts, iPads, respirators, and other fit testing training materials with the assistance of CLS shipping.
- NHLS Respirator Fit testing, Master Trainer Orientation training materials and agenda were developed by the NHLS occupational health specialist (billed as a Metabiota Research and Data Analyst) and participants selected. Due to inadequate time to allow for customs processing of materials, the orientation training was postponed to Feb. 2-4, 2016.
- The Metabiota PM and PC submitted Travel Event Plan (TEP) to the assigned DTRA CBEP representative with amended training dates.
- The Metabiota PM and PC submitted a CLS logistics support request for NHLS trainers and participants with the amended training dates.
- Biosafety and Biosecurity training scripts were drafted and video plans developed.

Upcoming Activities

- The Master Trainer Orientation training for fit testing will take place Feb. 2-4, 2016.
- Biosafety and Biosecurity training video scripts will be finalized and videography initiated.
- OHASIS maintenance module stakeholders consulting and schedule development.

Challenges
Due to of anticipated delays related to shipping and customs of hazardous materials, isopropyl alcohol was removed from the PortaCount packages prior to export to South Africa. As such, the NHLS team must obtain equivalents for the use of the PortaCounts. Metabiota will continue to support NHLS staff in obtaining these alcohols for all sites to ensure the upcoming fit testing needs within a reasonable and appropriate cost. Additionally, after Master Trainer planning was conducted, one participant resigned his position with the NHLS. Metabiota will continue to communicate with NHLS POCs to identify an appropriate alternative participant to act as eventual fit testing trainer.

TD 010 One Health Epi Training - South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 12/31/15
Total Estimated Budget: $134,551.00
Estimated Expenditure: $63,975.63
Technical Direction Status: Approved

Completed Activities
- Designation of technical and sectional leads in support of the training materials and landscape review report.
- Conducted bi-weekly conference calls with DTRA CBEP personnel and A&AS support contractors.
- Conducted bi-weekly conference calls with South African stakeholders supporting the review and modification of One Health Epidemiology (OHE) materials.
- Conducted individual calls with each South African stakeholder as necessary to ensure continued understanding of project scope of work and to provide additional opportunity for direct questions.
- Completion of modules 1 & 2 review and analysis of One Health epidemiology materials designated for Ugandan and Nigerian district health officers by Metabiota Subject Matter Expert.
- Dates for in-country event to support the review and recommendations for modification of One Health epidemiology materials selected in concert with South African stakeholders and the Metabiota Project Team for February 17th-19th, 2016.

Upcoming Activities
- Finalization and submission of the One Health Epidemiology Landscape Review report to DTRA CBEP representation.
- Submission of TEP for in-country assessment.
- Submission of all travel related CDRLs in support of Metabiota Project Team requirements in South Africa.
- Identify final logistical needs for the in-country effort.
- Continue to ensure effective coordination of communication between stakeholders involved in the materials review process.

Challenges
Previous confusion regarding the misunderstanding of project scope per communication of South African stakeholders with the former DTRA CBEP country manager on a now defunct project has been resolved. However, the time it took to reach this understanding has left Metabiota and the South African stakeholders with a smaller window than expected regarding the delivery of the One Health epidemiology landscape review and analysis report. In addition, at least one stakeholder has expressed concern over limited availability of time due to scheduled training and leave. Metabiota still intends to

deliver the document before the scheduled submission date, and has taken measures to mitigate this situation by condensing the mentioned stakeholders' duties to a more manageable level of effort.

TD 013 One Health Epi Training - Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan and Nigerian National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 02/29/16
Total Estimated Budget: $381,705.00
Estimated Expenditure: $148,672.57
Technical Direction Status: Approved

Completed Activities
- Conduction of pre travel meetings purposed to prepare both CDC Uganda the Metabiota Project Team for the implementation of Cohort 9 Module 2 and Cohort 10 Module 1 trainings.
- Procurement and selection of best available options for necessary travel and materials to support Cohort 9 Module 2 and Cohort 10 Module 1 trainings.
- Submission of TEP in support of Cohort 10 Module 2 trainings slated to take place in Fort Portal, Kabarole, Uganda.
- Held bi-weekly conference calls with DTRA CBEP personnel and A&AS support representation.
- Held bi-weekly conference calls with CDC-Uganda and Ugandan Ministry of Health to discuss implementation of trainings going forward.
- Resubmission of TD-013 in support of contractual changes regarding foreign local national labor rates and programmatic needs for the Metabiota Project Team.

Upcoming Activities
- Implementation of Cohort 9 Module 2 set to take place December 7-11, 2015 in Jinja, Uganda.
- Implementation of Cohort 10 Module 1 set to take place December 14-18, 2015 in Kabarole District Uganda.
- Continuation of bi-weekly calls for with all stakeholders.
- Development and delivery of Training Trip Report in support of Cohort 9 Module 2 and Cohort 10 Module 1 trainings.
- Continuation of bi-weekly calls with DTRA CBEP and Metabiota.

Challenges
Some minor issues occurred regarding bi-weekly communications with in-country stakeholder CDC-Uganda. Due to obligations on their behalf, conference call attendance was low or non-existent. Metabiota mitigated this concern by reaching out with comprehensive follow up emails. Though this delay in communication caused an associated delay in requested and relevant information in support of CLS form changes, the project timeline was not affected.

TD 014 Grant Writing Mentorship and Workshop - Kenya

Objectives
The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 7/21/15- 5/15/16
Total Estimated Budget: $113,982.82
Estimated Expenditure: $13,576.33
Technical Direction Status: Approved

Completed Activities

- Held bi-weekly calls with DTRA CBEP representation.
- Held follow up calls with DTRA CBEP and (b)(6) regarding resource concerns to support TD-014.
- Developed a resource reallocation solution in support of (b)(6) concerns over limitations in project resources.
- Identification of Kenyan subject matter experts slated to support the review and improvement of participant research manuscripts.
- Identification of Metabiota Subject Matter expert profile in support of the review and improvement of participant research manuscripts.
- Selection of dates in concert with Kenyan stakeholders for the Kenya Writing Workshop as February 8-13th, 2016.
- Request submitted to Kenyan Stakeholder (b)(6) to provide salary history information for all intended Kenyan SMEs in support of IC agreement development.
- Additional Request submitted to (b)(6) for the delivery of the manuscripts produced by 20 participants selected from the Regional Conference on Zoonotic Diseases in Eastern Africa.

Upcoming Activities

- Selection of subject matter experts to support the Writing Workshop.
- Finalization of dates for the workshop.
- Development and Submission of TEP, TAF, CLS, and CCR in support of the Kenya Writing Workshop.
- Development of Independent Consultant agreements to support the onboarding of Kenyan SMEs.
- Continuation of bi-weekly stakeholder calls.
- Presentation of resource constraint solution to DTRA CBEP representation.

Challenges
Forward progress on all phases of this effort is currently requisite on the submission of materials to Metabiota by in-country stakeholder (b)(6) The stated reason for his delays surround a general preoccupation with other activities, as well as a need to re amine the profiles of selected workshop participants. Metabiota has expressed these concerns to DTRA CBEP Regional Science Lead, (b)(6) who in kind has explained the urgency of our needs to (b)(6) through both

phone and email (b)(6) has since acknowledged the delay and expressed his interest in improving communications.

Upon receipt of the requested materials, Metabiota will be able to move forward with the presentation of its solution to DTRA CBEP representation regarding resource constraints, as well as with the project as a whole.

CENTCOM

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats – Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-Cov) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/15- 01/31/16
Total Estimated Budget: $391,056.00
Estimated Expenditure: $288,930.46
Technical Direction Status: Approved

Completed Activities

- Submitted CLS travel and logistics support request for PIs from IVM to collect samples from Almaty Oblast. Request was approved and PI's conducted sample collection on 27 – 28 November.
- Submitted CLS travel and logistics support request for PIs from IVM to travel to Astana to secure official approval and permit from the Kazakhstan Ministry of Agriculture for customs acceptance of training materials. Request was approved, and subsequently canceled due to supplementary instruction received from DTRO, informing us that the travel was unnecessary and the permit request should be processed through Almaty office.
- IVM received official approval and permit from the Kazakhstan Ministry of Agriculture for customs acceptance of training materials being shipped into the country.
- Proceeded with shipment of training materials; US shipment arrived on 25 November and Singapore shipments arrived on 2 December.
- Received additional trainees from the Research Institute for Biological Safety Problems (RIBSP), adjusted materials and support for increased number of trainees.
- Confirmed laboratory access for additional participants, interpreters and logistical support for pre-coordination meetings and training event scheduled for 7-11 December.
- Coordinated with A&AS team to revise printed order and resubmission of requested quantity of bound copies of the training materials, as well as inclusion of additional presentation slides.
- Finalized and distributed daily itinerary and logistical travel documents to Duke NUS trainers, CBEP regional and country leads, and in-country partners to facilitate event coordination.
- Finalized and distributed internal inventory and receipt of goods documents for review and sign-off following completion of supply inventory conducted with IVM.

- Completed modification of the PO with local procurement support TMC Global Professional Services for extended period of performance and increased ceiling price to support local procurement of training materials and supplies.
- Held project coordination meeting on 24 November with CBEP, IVM, Duke, TMC, and TTI/CLS to review status updates on shipment, samples collection, training materials, participants, travel logistics, and the training agenda prior to team departure to Almaty to conduct the training event.
- Continued communication with CLS to coordinate translation, printing, shipment, pick-up, and review of training materials, and event logistics.
- Continued coordination with CLS for in-country support to install translation equipment and arrange catering and transportation services in support of training event.
- Coordinated with IVM, CBEP, and Duke to arrange a meeting with the Director of IVM to support final administrative approval and coordination in support of the event.
- Continued communication and collaboration with key CBEP, in-country partners, Duke-NUS Qualified Trainers (QT) and CLS to coordinate logistical requirements for the training event.
- Shared CDRL 11 Transfer of Equipment and Materials with IVM. They are in agreement to sign the document. Waiting on final confirmation from CBEP on the way forward, and translation of the agreement into Russian.
- Metabiota PM, and Duke NUS trainer FOIA (b)(6) departed for Almaty to support pre-coordination and set-up of training to ensure requirements for event kick-off are finalized prior to 7 December kick-off.

Upcoming Activities

- In-country preparations of reagents and assays on 3-4 December for December 7 training.
- In-country review of inventory and materials on 3-4 December for December 7 training.
- In-country meeting with CBEP, IVM, and Duke-NUS on 6 December to in preparation for December 7 training.
- Coordination of participant group dinner.
- Coordination of meeting with IVM Director.
- Completion and submission of CDRL 11 Transfer of Equipment and Materials to IVM, and finalization with CBEP.
- Implementation of second Sample Collection and Diagnostics Training on MERS-CoV in Camels and Bats from 7-11 December, 2015.
- Completion of project deliverables after training event, to include the Travel Trip Report, the Training Trip Report, the participant feedback forms, etc.
- Completion of final project deliverables to close out TD 002.

Challenges

IVM PIs and in-country DTRO personnel experienced miscommunication of requirements and responsibilities regarding the official approval and permit from the Kazakhstan Ministry of Agriculture for customs acceptance of training materials. The MOA permit was not secured in the order and time-frame as was originally intended, which could have inhibited shipment of training materials into the country. The project was near cancelation, however, in-country CBEP personnel assisted IVM to successfully arrange the permit, allowing for shipment to proceed. Additionally, the Singapore shipment pick-up experienced challenges due to the package dimensions, weights, and temperature requirements not being relayed to the freight forwarder in Singapore. The Singapore freight forwarder did not have

the appropriate shipping materials readily available, which delayed pick-up of the materials. Duke personnel communicated the shipment needs and arranged the materials in time to meet the 2 December delivery date to IVM.

TD003 Bat Borne Virus from Annual Bat Cull India- Cancelled

Objectives
This effort has been cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: Cancelled

TD004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/15 to 05/15/16
Total Estimated Budget: $488,040.00
Estimated Expenditure: $193,146.67
Technical Direction Status: Approved

Completed Activities

- Modified Gryphon Scientific subcontract following continued coordination and finalization of agreement with Gryphon contracts personnel.
- Researched logistical requirements costs and possible itineraries for conducting an optional Petra Networking Day on 09 March, 2016.
- Invited speakers and Scientific Advisory Board members receiving travel support to participate in the Petra Networking Day.
- Prepared first CLS travel support request for March Conference with revised departure dates due to individuals that will participate in the Petra Networking Day; document is currently being edited internally before submission.
- The deadline for Abstract submission was extended from 06 November to 01 December. Abstract submissions were closed on 01 December.
- Gryphon Scientific distributed abstracts to Scientific Advisory Board members for review, acceptance determination, and selection for both poster and oral presentation.
- Preparation of the Travel Authorization Form and Customs Clearance Request for Gryphon and Metabiota personnel.
- Submission of the Travel Authorization Form for Gryphon and Metabiota personnel for March Conference event.
- Preparation of internal letters of invitation from RSS for Metabiota and Gryphon visas.

- Continued monitoring and providing support to US citizens completing JKO trainings for DoD travel support.
- Speakers and panel board members continue to be invited.
- Continued revisions of conference agenda and panel board members with Gryphon, CBEP, and Scientific Advisory Board.
- Ongoing outreach of Conference event to increase participation.
- Ongoing communication and collaboration with CBEP personnel, in-country partner RSS, Gryphon Scientific, and CLS to coordinate logistical and technical requirements necessary for the conference.

Upcoming Activities

- First round of abstract submission deadlines on 01 December.
- Scientific Advisory Board to review abstracts and discuss acceptance and placement (for platform talk, poster session, or neither) during the Abstract Review on 03 December.
- Abstract Review of Scientific Advisory Board rescheduled from 03 December to 10 December, postponing the submission of travel documents from 15 December to 22 December.
- Scientific Advisory Board to submit final results of selected abstract assignments for confirmation.
- Application registration and travel support deadline on 14 December to support logistics and approval processes according to CDRL requirements.
- Submission of abstracts to DTRA for PAO approval.
- Submission of CLS travel support request for Scientific Advisory Board Members, speakers, and participants.
- Submission of the Country Clearance Request for Gryphon and Metabiota personnel for March Conference event.
- Continue to work with key CBEP personnel, Gryphon, RSS, and CLS to monitor travel requests, participant applications, and finalize CLS logistical requirements for March, 2016 conference.

Challenges

Ongoing coordination of travel logistics for speakers, scientific advisory board members, and participants has proven very time-consuming given the large quantity of requests, especially given the additional coordination for the Petra Networking Day, FTR exemption requests, and varying personal travel dates. The postponement of the Scientific Advisory Board Abstract Review will delay the submission of travel documents, which will now be submitted to CLS and CBEP during the December holidays which may further postpone the process. Metabiota will work closely with CLS/TTI and CBEP representatives to ensure clear communication of individual travel requests and monitor the process so that all travelers are accounted for.

TD005 Long Distance Learning Iraq- Cancelled

Objectives

This effort has been cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00

Technical Direction Status: Cancelled

EUCOM

TD 011 Ukraine TADR Activity Project 4 (TAP-4)

Objectives
The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/15/15-01/31/16
Total Estimated Budget: $116,879.54
Estimated Expenditure: $66,984.66
Technical Direction Status: Approved

Completed Activities
- The final regional workshop took place in Tbilisi, Georgia, 3 – 4 November. Metabiota personnel met with DTRA and A&AS prior to the start of the workshop to discuss the overall effort and how it might be improved upon for future efforts.
- The final workshop included representatives from Armenia, Ukraine, Georgia, Kazakhstan, and other stakeholders. Representatives presented the outcomes of the outreach activities implemented in each country, discussed the challenges encountered during the implementation of the project, and discussed the implementation and sustainability of future outreach activities as part of a wider national ASF prevention strategy.
- Metabiota assisted the Ukrainian delegation in refining the materials presented at the final workshop. The presentation included an overview of TAP-6 activities, additional support activities to the Ukrainian State Network of Veterinary Medicine Laboratories, and an overview of other opportunities for regional engagement on ASF and other veterinary issues.

Upcoming Activities
- Metabiota will submit the final report summarizing the work done in Ukraine, including those items preformed by the subcontractor SAFOSO.

Challenges
None.

TD 012 Ukraine Project 2 (UP-2)

Objectives
This effort has completed

Period of Performance: 05/16/15-09/30/2015
Total Estimated Budget: $264,788.00
Total Expenditure: $297,064.00
Technical Direction Status: Approved, Complete (Transferred to BTRIC TO4)

TD 016-Georgia GIS

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15-05/15/16
Total Estimated Budget: $139,514.62
Estimated Expenditure: $10,547.60
Technical Direction Status: Approved

Completed Activities
- Metabiota PM, PC, and SME have participated in calls led by the project teams of GG-19, GG-20, and GG-27 to understand project schedules and goals.
- Metabiota PM and PC drafted SOW and other subcontract documents and conducted multiple back and forth discussions with SME at University of Florida in preparation for fully executing the subcontract to retain FOIA (b)(6) and his team for their GIS expertise.
- Metabiota received concurrence from DTRA on the revised labor mix which reduces SME 2 hours and allows for RDA hours to be billed instead.
- Metabiota SME provided input to the GG-27 project team on computers, software, and training.
- Metabiota SME reviewed data entry forms and provided feedback for GG-27 soil sample data capture.
- Metabiota SME reviewed current geospatial modeling literature as background for preparing a plan for GG-27 data analysis and training.
- Metabiota SME reviewed GIS training and mentorship materials for GG-20 and GG-27 participants.

Upcoming Activities
- Metabiota GIS SMEs are preparing for a possible trip to Georgia at the beginning of February in conjunction with the various CBR project teams to accomplish goals related to all three CBR projects. Metabiota will be submitting travel documents and travel authorization request.
- Metabiota expects to finalize the subcontract with the University of Florida shortly.
- Metabiota SME is reviewing the GG-20 quarterly report and providing feedback to the project team.
- Metabiota SME is working to bring RDAs up to speed on the CBR projects in order to efficiently provide GIS data analysis support and mentoring to the Georgian scientists.

Challenges
The CBR project teams have rescheduled teleconferences and meetings a number of times, which has made coordination of the GIS portion of this work challenging. However, it appears that the coordination of these projects is back on track and the Metabiota PM is communicating with the CBR project teams' leads outside of the scheduled teleconferences and meetings as a risk mitigation.

TD 017-Georgia SME Grantsmanship

Objectives
Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $136,732.00
Estimated Expenditure: $32,687.39
Technical Direction Status: Approved

Completed Activities
- Metabiota PM and PC held regular communications with the SMEs to monitor progress on the mentorship plan and materials.
- Metabiota SMEs generated a comprehensive Grantsmanship mentoring plan, including materials related to each week's projected effort. The plan and materials have been reviewed by the PM and PC.
- Metabiota PM, PC, and SMEs communicated the tentative plan to the stakeholders at NCDC and LMA and are awaiting feedback and the identification of project participants.

Upcoming Activities
- Upon identification of project participants by NCDC and LMA leadership, Metabiota SMEs will begin working with the mentees on initial coordination and brainstorming of possible grant topics to be elaborated upon during the mentorship.
- Metabiota are planning on submitting travel documentation and travel authorization request for a trip to Georgia to occur in late January/early February; however, this date may slip due to lack of commitment from NCDC and LMA.

Challenges
It does not appear that at this time, NCDC or LMA are sold on the concept of this mentorship. In recent discussions, both agencies appear reticent to commit personnel time to the program. Additionally, the holidays and work schedules of the two agencies may delay the start of the mentorship program. Mentorship requires a firm commitment of time and energy by the mentees (and by extension, their chain of command) in order to be successful. If NCDC and LMA cannot or will not commit wholly to Grantsmanship mentoring, it may be necessary to reevaluate in conjunction with DTRA the scope of this project.

TD 018-Georgia Visiting Scientist Genomics

Objectives
Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $384,435.00
Estimated Expenditure: $70,418.75
Technical Direction Status: Approved

Completed Activities

- Conducted mentorship activities on comparative genomics of FSU anthrax vaccine strains at the Lugar Center.
- Next-generation sequencing data suggests the genome of the anthrax STI strain currently in production in Georgia displays a significant amount of genetic variation that distinguishes it from the STI strain recently reported.
- NGS-based *in silico* analysis workflow for pathogen subtyping using established agent-specific genotypic markers including single-nucleotide polymorphisms (SNP), short nucleotide repeats (SNR), and variable number tandem repeat (VNTR) began development.
- Conducted mentorship activities on Next-generation-sequencing (NGS)-based pathogen characterization at the Lugar Center.
- Continued mentorship through individual stages of genomic analysis using standard methods in NGS raw sequence data quality control (QC), draft genome assembly and comparative genomic analysis using multiple software tools.
- Mentored activities produced de *novo* and mapped genome assemblies for these samples were generated across multiple in-house software platforms including CLCBio, Velvet, and Geneious programs.
- Mentorship activities also covered of the need in some instances to modify testing procedures for bacterial strains that to do not react to established pathogen-specific antisera.
- Conducted mentorship activities on general sequence analysis at the Lugar Center.
- Mentorship activities included a viral genomics test data set for general sequence analysis using the software MEGA. The example pathogen chosen for this mentorship activity was Crimean-Congo-Hemorrhagic Fever (CCHF) virus.
- Conducted Genome Center capacity building in DNA sequence annotation.
- Preparation of a workflow for genome/plasmid sequence annotation for Lugar Center staff using both in-house software at the Lugar Center as well as available open-source free-ware that is standard in this field including the RAST annotation server was begun.

Upcoming Activities

- Continued mentorship activities on comparative genomics of FSU anthrax vaccine strains at the Lugar Center.
- Additional mentored analysis on the nature and extent of observed genetic variation. Mentorship activities will ideally result in data suitable for a Genome Report publication and potentially a follow-on comparative genomics manuscript that illustrates major features of variation exhibited by FSU vaccine strains compared to their global relatives.
- Continued mentorship activities on NGS-based pathogen characterization at the Lugar Center.
- Additional mentorship activities will include computational strategies to approach sequence-structure-function relationships for resolving NGS-based genotype-phenotype associations in conventional and atypical pathogens.
- Continued mentorship activities on general sequence analysis at the Lugar Center.
- Additional mentorship activities will include NGS-based viral genome assembly, annotation and methods in whole genome viral molecular evolution.

Challenges

Metabiota's visiting scientist has encountered a few issues in the conduction of mentorship activities. Most notably, the VS has identified that technical skills developed by Lugar staff in foreign laboratories have not been transferred to other in-house staff. Additionally, many international collaborators with the Lugar Center do the majority of sequence analysis for the internationally-funded projects. As such, Lugar Center intellectual capital has not been maintained or further developed. Metabiota's visiting scientist will continually work to sustain, further develop, and disseminate technical resources and provide 1-on-1 mentorship to better ensure greater access to skills development throughout the lab. Such activities will include an assessment of individual skill sets related to genetics and genomics research of Lugar Center staff via a skill set review workshop with the Lugar Science Director.

TD 019-Georgia Visiting Scientist Microbiology

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $382,330.00
Estimated Expenditure: $91,8835.11
Technical Direction Status: Approved

Completed Activities

- The Metabiota PM and PC held regular calls with the Visiting Scientist (VS) to discuss current activities and assist the VS with any issues requiring programmatic input.
- The Metabiota PM communicated several times with the DTRA Country Manager regarding the possibility of using BTRIC support for technical translation and interpretation.
- Metabiota VS continued working on the TAP-11 validation plan with NCDC scientis (b)(6) (b)(6) and discussed the path forward for the IRB determination with NCDC and USAMRIID. The VS also participated in a CBR meeting with NCDC and Attimo.
- Metabiota VS reviewed and provided feedback to Georgian scientists on three abstracts for submission to DTRA in support of conference attendance, including one abstract on the GG-19 invasion assay work.
- Metabiota VS is providing bacteriology mentoring to LMA staff, especially as related to helping LMA with brucellosis proficiency testing. Related to this, Metabiota VS has discussed with (b)(6) (b)(6) about the possibility of resupplying LMA with Bruce Ladder reagents.
- Metabiota VS held discussions with CH2M Hill sustainment team about conventional PCR equipment at the ZDLs.
- Metabiota VS is assisting Lugar Center and Batumi staff with troubleshooting of the PCR protocols and reagents for the avian influenza CBR work with University of Cambridge. After extensive troubleshoot, it appears that the fluorescent probe being used may have gone bad. Metabiota VS is communicating with project leads and staff at Batumi to either have new probe shipped to Georgia, or check to see if an unopened tube of probe exists in the Batumi stocks.
- Metabiota VS is assisting NCDC staff at the Lugar Center in designing a dilution series of vaccine strain *Brucella* to meet a project need at the Agrarian University.

- Metabiota VS assisted NCDC with preparatory work for the GCMS instrument secured through a grant from UNICRI. This included building a pre-installation checklist including items like verifying condition of electrical supply and environmental factors and working through it with NCDC staff. The VS is also suggesting that NCDC leadership consider developing a strategy for the operation and maintenance of the device, given that there are few people at NCDC currently qualified to do so.

Upcoming Activities

- Metabiota VS expects to continue assisting with the troubleshooting of the avian influenza PCR reaction at the Lugar Center, which will then be followed by running confirmatory diagnostic tests on samples which are putatively positive for HPAI recently collected from waterfowl in Georgia. In conjunction with this project, the VS expects to need to make a trip to the Batumi Zonal Diagnostic Laboratory to mentor staff there in various protocols and troubleshooting techniques.
- Metabiota VS expects to help NCDC staff complete work on the validation plan for GG TAP-11.
- Metabiota VS will continue to participate in coordination calls and meetings for CBR projects funded by DTRA and support and mentor Georgian scientists involved in those projects as needed.

Challenges

The DTRA Country Manager has determined that BTRIC translation/interpretation support will not be made available to the Metabiota VS. Metabiota will seek to use CLS for all translation/interpretation support; however, we expect this to result in degraded quality of language services due to the need for specialized technical knowledge, and difficulty in scheduling as mentorship needs have been unpredictable and often arise on short notice. Metabiota will endeavor to make interpretation support needs as predictable as possible, possibly by trying to create a regular working schedule at the institutes where interpretation is most needed.

PACOM

TD 006 Nipah Research Activity Project-Cancelled

Objectives

This effort has completed.

Period of Performance: 06/01/15 – 09/30/15
Total Estimated Budget: $874,846.00
Total Expenditure: $11,985.82
Technical Direction Status: Cancelled

TD 007 Regional Baseline Assessment

Objectives

Characterize the region based on the disease landscape, organic regional capabilities, and external factors that impact CBEP objectives, identify needs and areas of overlap with other stakeholders, and provide overarching strategic guidance & goals to CBEP PACOM Country Managers in the development of country engagement strategies.

Period of Performance: 05/16/15 – 10/31/15
Total Estimated Budget: $850,489.00
Total Expenditure: $850,489.00
Technical Direction Status: Approved

Completed Activities

- Held review meetings with CBEP regional team 18 Nov and 24 November to work through and discuss revised submission schedule, acceptance criteria, and APLA Volume I and II progress and revisions completed to date.
- Secured additional SME support to complete revisions and edits needed to finalize the APLA and respond to comments received by CBEP.
- Internal team leads and functional teams continued revisions and QAQC required to finalize the document.
- Developed maps and graphs to provide greater visual detail for data in all sections of the document.
- Initiated coordination for 11 December review meeting with CBEP leads to conduct a presentation and review of APLA in preparation for final submission on 18 December.
- Continued revisions and edits to all sections of the APLA in preparation for final submission.

Upcoming Activities

- Continue revisions, and editing to the APLA for submission of document on 18 December.
- Continue edits and QA/QC in preparation for 11 December review meeting with CBEP leads and SMEs.
- Perform QA/QC reviews of draft document by SMEs prior to submission of document on 18 December.
- Secure additional SME support, at no cost to the Government for further build out and analysis of the regional baseline analysis.
- Secure additional graphic services for finalization and stylization of the report.

Challenges

The deliverable submitted to CBEP on 1 October did not meet the standards of research that both Metabiota and CBEP were looking for in the final product. Previous challenges identified in the accelerated schedule and volume of research and analysis required to complete this project impeded progress towards the 1 October submission that should have been more clearly communicated to CBEP leadership. Following review and receipt of the comments matrix by the CBEP team, Metabiota has initiated revisions and responses to CBEP comments in preparation for the final deliverable on 18 December. To complete this task, Metabiota has secured additional internal and external SME support, at no cost to the Government to complete the required revisions to the analysis and provide a final product that meets the standards required.

TD 015 Health Informatics Support in Vietnam-Complete

Objectives

This effort has completed.

Period of Performance: 05/16/15 – 06/30/15
Total Estimated Budget: $51,804.80
Total Expenditure: $51,804.80
Technical Direction Status: Approved, Closed

Cooperative Threat Reduction (CTR)

Part I: Training Event Plan

Staffing Instructions

Each individual training event requires a Training Event Plan in accordance with a Statement of Work/Task Order/CDRL. Plans are to be turned in to the Country Manager/CBEP Training Coordinator via CBEP.Training@dtra.mil no later than 60 days prior to the training event.

BTRIC/Govt Collaborator Name and Country Code:

Instructor(s): FOIA (b)(6)

Course Information

Course Name and Number:

Bat Borne Virus Surveillance Training Workshop: Transformative Science Through Collaborative Research

Type of Training:

Initial training workshop

SOW/CDRL Task Reference:

Metabiota AEP SOW Task #3, CDRL A006

Location: Singapore

Start Date: 2014 May 19

End Date: 2014 May 30

Estimated Cost: $45,000

Training Documents PA Approved?
☐ Yes ☒ No ☐ Not Applicable

Translation Services Required of DTRA
☐ Yes ☐ No ☒ Not Applicable

Special Equipment Requests:

N95 respirators, leather gloves, protective sleeves, harp traps (2), bat ecology books, dissecting kits, protective eyewear, forceps, mounting media

Special Travel Requests for Instructor/Participant:

Lodging, per diem, travel costs

Date Submitted to CBEP: 2014 June 9

Date Training Material Submitted for Review: N/A

Approved by Country Manager or Designee: N/A

Participant Information (If Known)

Last, First, MI	Position	Place of Duty
(b)(6)	Senior specialist	Ilia State University
	Specialist	National Center for Disease Control and Public Health, Ivane Javakhishvili Tbilisi State University
	Project Director	Royal Scientific Society (RSS)
	Veterinarian II/Head	Veterinary Research Dept, Research Institute for Tropical Medicine
	Science Research Specialist I	Dept of Microbiology, Research Institute for Tropical Medicine
	Associate Service Fellow	Rabies section, CDCP (Atlanta)
	Laboratory Chief	Faculty of Medicine, Chulalongkorn University
	Assistant Research Fellow	Animal Health Research Institute, Council of Agriculture, Taiwan

Part II: Training Trip Report

Staffing Instructions

Training Trip Reports are due to the Country Manager/CBEP Training Coordinator 10 working days after the completion of the training. Please submit to: CBEP.Training@dtra.mil

Trip Purpose

This is a training workshop to demonstrate the theoretical, field, laboratory and genetic analytic techniques pertinent to bat borne virus surveillance.

Executive Summary

Issues/Concerns/Recommendations:
There were no major issues or concerns during this training. The course ran smoothly and the participants were very receptive to the itinerary. This course came up with short notice, so more time to prepare would have benefited the laboratory portion. Should future training events occur, the infrastructure has already been built making future courses easier to facilitate.

Instructor Feedback:
This bat borne virus surveillance training workshop primarily followed the FAO animal manual, "Investigating the role of bats in emerging zoonoses: Balancing ecology, conservation, and public health", but also demonstrated field surveillance and BSL-2 laboratory approaches where participants received hands-on experience handling bats and taking samples.

It is the overarching hope of the instructors that the trainees will bring this information to their home country with the intent of establishing a bat-borne pathogen surveillance program.

In total, the course was implemented over the course of 10 days, with 3.5 days of lectures, 4 nights of field trapping, and 2.5 days of laboratory work.

Participant Comments (Optional)
I was hoping that the training will focus more on the detection of viruses. So for the next training (if it happens) I would like →

more focus on the detection of mosquito borne viruses

Overall, the training met my expectation & it was an excellent opportunity for connection & networking

Finally, I would like to thank FOIA (b)(6) FOIA (b)(6) all the group for the excellent organization of this training & wonderful hospitality.

I really look forward for the next training & I highly appreciate the support of DTRA.

Participant Comments (FOIA (b)(6)

Thank you and your group's help on this trip. I learned a lot on bat on rat handling and other lab techniques. I am interested in the ecology of bat and multiplex PCR of bat pathogen. Hope next time can learn about it.

Active Projects

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing - Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 – 11/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) worked with (b)(6) on the drafting of the final report and lessons learned document for this project. (b)(6) also worked with (b)(6) on administrative activities including review and approval of subcontractor and independent consultant invoices, and communication with Metabiota Cameroon and DTRA on disposition of remaining training materials. (b)(6) also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports.

Trainer 1:
(b)(6) worked with (b)(6) on the drafting of the final report and lessons learned document for this project. (b)(6) also worked on administrative activities including review and approval of subcontractor and independent consultant invoices, and communication with Metabiota Cameroon and DTRA on disposition of remaining training materials. (b)(6) also drafted reporting instruments including quad charts, invoicing, and monthly reports.

AFRICOM FLN 1:
(b)(6) provided assistance to (b)(6) in identifying and organizing all required PPE for the August training. She provided administrative and technical support to (b)(6) throughout the training and reporting process.

Trainer 1:
(b)(6) participated in calls and email communications with the Metabiota training team (b)(6) (b)(6) traveled to Yaoundé, Cameroon to act in the role of SME trainer (b)(6) provided subject matter expertise throughout the lecture and hands-on PPE activities of the training event, as well as translation and interpretation support (b)(6) invoice was received in September for training that occurred in August.

Trainer 2:
(b)(6) participated in calls and email communications with the Metabiota training team, providing both equipment delivery coordination and pre-training communication and coordination with MinDef leadership (b)(6) provided subject matter expertise throughout the lecture and hands-on PPE activities of the training event, as well as translation and interpretation support (b)(6) additionally provided post-training equipment handover support (b)(6) invoice was received in September for the training which occurred in August.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
No DBA costs are applied this period.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015 – 11/15/2016

CLIN 1002 – Labor

Program Manager:
(b)(6) held email and phone communications with the NHLS team to discuss current project status and any issues. (b)(6) also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports. (b)(6) held email and in-person communications with DTRA/A&AS to review the 4th edit of the BS&S videos and discuss current project status including the potential for procurement of calipers for facial measurements during respirator fit testing. (b)(6) also led communications with TSI, Inc. to resolve an issue regarding the model of one of the Porta Count units which was procured for use by NHLS.

Trainer 1:
(b)(6) participated in email and phone communications with the NHLS team to discuss current project status and any issues. (b)(6) participated in email and in-person communications with DTRA/A&AS to review the 4th edit of the BS&S videos and discuss current project status. (b)(6) (b)(6) also drafted reporting instruments including quad charts, invoicing, and monthly reports.

TD 013 One Health Epidemiology Training - Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 – 11/15/2016

CLIN 1002 – Labor

Program Manager:
Metabiota Regional Africa Program Manager (b)(6) led regular communications with in country performer, CDC-Uganda and DTRA CBEP Uganda. He provided project and programmatic oversight to the submission of all travel and training related CDRLs and contractual requirements associated with training implementation. Additionally, during this month (b)(6) managed the procurement of travel support for the Metabiota implementation team.

Research and Data Analyst:
Metabiota Project Coordinato (b)(6) continued to provide support to (b)(6) during all communications with CDC Uganda and DTRA CBEP Uganda representation. (b)(6) departed the organization this month and worked to ensure that all of her earlier responsibilities were handed over to (b)(6) in an effective manner.

Trainer 1:
Metabiota Program Manager and epidemiology subject matter expert (b)(6) MSPH provided technical training support during One Health Epidemiology (OHE) training implementation for Cohort 11 Module 2. He traveled from Washington, DC to Fort Portal Uganda for this effort (b)(6) served as an epidemiologist Trainer 1 during this time and took observational minutes of all training presentations. During this time (b)(6) served as the field team leader throughout the training event. (b)(6) reported all project activates back to Metabiota AEP leadership and maintained consistent communication with DTRA CBEP representation as necessary.

Subject Matter Expert 3:
Metabiota Senior Advisor (b)(6) attended bi-weekly stakeholder calls and attended pre travel meetings while contributing expert advice to lessons learned and the general technical training approach.

(b)(6) raveled to Uganda from Washington, DC to support the implementation of Cohort 11 module 2 training in Fort Portal, Uganda (b)(6) erved as both a presenter and a training mentor during this training event and evaluated both the materials and the presentation of information in an effort to ensure both accuracy and consistency. (b)(6) provided expert insight to both Metabiota staff and CDC Uganda representation during all pre training meetings, and during exercise breakout sessions.

AFRICOM FLN-1:

Metabiota Independent Contractor, Epidemiologist (b)(6) served as the lead trainer in support the implementation of Cohort 11 Module 2 training in Fort Portal, Uganda. He was tasked to provide both leadership and support to other OHE trainers and to provide lectures to all OHE training participants during the exercises and presentations. (b)(6) was tasked to travel from his home base in Kampala, Uganda to Fort Portal in support of the training event.

CLIN 1003 – Materials and Supplies

Material costs include communication expenses incurred by the trainers while executing the training in Uganda.

CLIN 1004 – ODCs

DBA was applied for the in country performers at a rate FOIA (b)(4) of total compensation.

CLIN 1005 – Travel

Travel costs incurred this period include flights, lodging, per diem and ground transportation for FOIA (b)(6) FOIA (b)(6) and (b)(6) o travel to Uganda and execute the final Cohort 11 Module 2 training.

TD 016 Georgia GIS

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 11/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) held email and phone communications with University of Florida (UF) subject matter expertise team to discuss project status and any ongoing issues. (b)(6) also participated in CBR project calls. (b)(6) also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports.

Subject Matter Expert 1:
(b)(6) participated in email and phone communications with the UF subject matter expertise team to discuss project status and any ongoing issues. (b)(6) also drafted reporting instruments including quad charts, invoicing, and monthly reports.

Subject Matter Expert 2:
(b)(6) participated in email and phone communications with (b)(6) to discuss project status and issues. (b)(6) also participated in email communications with the CBR project teams. (b)(6) provided oversight and guidance to (b)(6) on their work. He also worked with (b)(6) on framing a potential publication for the GG-27/AJ TAP-11 anthrax analysis project.

Research and Data Analyst:
Mr. (b)(6) Haase participated in email and phone communications to discuss project status and ongoing issues. (b)(6) continued work on developing geospatial analysis algorithms in R, and began packaging them for potential distribution. (b)(6) tested the algorithms using data from GG-19. He also scheduled and conducted GoToMeeting mentorship sessions for Georgian scientists working on the various CBR projects. (b)(6) participated in CBR project calls. (b)(6) worked with (b)(6) on framing a potential publication for the GG-27/AJ TAP-11 project.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
No ODC costs are invoiced this period.

CLIN 1005 – Travel
No travel costs are invoiced this period.

CLIN 1002 LABOR

NAME	LABOR CATEGORY	RATE	CURRENT HOURS	CURRENT INVOICE	CUMULATIVE HOURS	CUMULATIVE INVOICED
(b)(4); (b)(6)						

TD 017 Georgia SME Grantsmanship

Objectives

Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/15 – 11/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) held email and phone communications with Avila Scientific to discuss project status and any ongoing issues. (b)(6) along with (b)(6) reviewed subcontractor invoices and reports. (b)(6) (b)(6) also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports. (b)(6) also reviewed, revised, and filed travel documentation with DTRA for mentor travel in late October and early November.

Subject Matter Expert 1:

(b)(6) participated in email and phone communications with Avila Scientific to discuss project status and any ongoing issues. (b)(6) reviewed subcontractor invoices and reports. (b)(6) (b)(6) also drafted reporting instruments including quad charts, invoicing, and monthly reports.

Subject Matter Expert 2:

(b)(6) participated in email and phone communications with Avila Scientific to discuss project status and any ongoing issues. (b)(6) conducted in-country and remote (via Skype) grantsmanship mentoring with LMA scientists. In particular, she worked with them on identifying collaborators, developing full proposals, budgeting, and responding to reviewer comments. She also assisted them with understanding some of the mechanical processes of applying to grant opportunities.

Trainer 2:

(b)(6) assisted (b)(6) in conducting in-country and remote grantsmanship mentoring of LMA scientists. In particular, she worked with them on the coordination aspects of the grant application process, in identifying collaborators, and developing budgets.

CLIN 1003 – Materials and Supplies

No material costs are invoiced this period.

CLIN 1004 – ODCs

No ODC costs are invoiced this period.

CLIN 1005 – Travel

Travel costs were incurred by Avila Scientific for implementation of in country mentorship. Flights were invoiced in August. Remaining travel costs include lodging, per diem and ground transportation costs.

TD 021 Field Epidemiology Training - Iraq

Objectives
Conduct remote trainings on epidemiology and BS&S/Biorisk management for one cohort of Iraqi scientists, and also engage them to familiarize them with the Iraq National Biological Emergency Response Plan and work on a gap analysis of said plan. Conduct remote trainings on epidemiology for a second cohort.

Period of Performance: 02/19/16 – 11/15/16

CLIN 1002 – Labor

Program Manager:
PMs (b)(6) have supported all project activities to date. PMs participated in routine meetings with DTRA CBEP and A&AS teams to facilitate updates and activities according to the project schedule, discuss challenges faced, and support routine implementation and tracking of project deliverables. The PMs have maintained visibility with DTRA CBEP on project status and have offered solutions to address project obstacles.

(b)(6) continued to work with all stakeholders to ensure successful execution of the remote training courses and completion of the NBERP gap analysis. (b)(6) continued to assist in the development, review, and revisions completed for BS&S, epidemiology, and HOT course materials submitted to CBEP for use in the training course. He worked with SME's (b)(6) to continue review and finalization of the NBERP gap analysis, following presentation of initial findings at the NBMC. He participated in routine project calls and meetings with trainers, Iraqi partners, and CBEP stakeholders on a weekly basis to facilitate program implementation and provide expertise and input where needed. In addition (b)(6) provided technical guidance and coordination of locally procured materials to ensure they met the standards required for the training and to adjust requirements when materials were not available to ensure successful execution of the HOT.

(b)(6) continued to manage administrative components of the project to include the schedule, LOE, budget, and delivery and submission of CDRLs. (b)(6) worked with the project coordinator and Watermark Risk Management International (WRMI) RDA to finalize copyright permissions for all materials. In addition, she supported both local and US procurement, coordinating with the team to ensure all materials were purchased and secured according to standard and market availability. She executed and completed contractual requirements, to include contract modifications to facilitate project efforts and realign costs accordingly to support implementation. She participated in routine project calls and meetings with trainers, Iraqi partners, and CBEP stakeholders on a weekly basis to facilitate program implementation and provide expertise and input where needed. In addition, she continued to work with the project team to coordinate the CLS logistics requirements (via CDRL submission), as well as the transfer, storage, and use of all materials being procured in country to support the HOT course, to include completion of the Transfer of Materials (TOM). (b)(6) participated in the epidemiology and BS&S trainings and provided administrative assistance, as needed to facilitate the training sessions, to include attendance tracking, uploading of resources, recorded videos, and troubleshooting.

Subject Matter Expert 1:
(b)(6) continued to provide assistance and expertise in completion of the gap analysis during this period. She traveled with the Metabiota and WRMI team of experts to New Mexico and took part in

presenting high-level findings of the NBERP gap analysis at the NBMC. In addition (b)(6) continued to finalize the gap analysis with (b)(6) for submission to CBEP in November. (b)(6) participated in routine communication with WRMI, PC and PMs.

The Project Coordinator (b)(6) worked in coordination with the PMs to facilitate and implement the project. She continued to provide assistance in maintaining the project schedule, preparation of CDRL requirements, communication with training teams, LOE, material review and procurement, and coordination of routine project conference calls with all stakeholders. She continued submission of training materials for technical review and public affairs approval, to include ensuring PAO approval was secured prior to training course kick-off. She continued to coordinate submission of CDRLs and supported completion of the CLS logistics form. (b)(6) assisted trainers with build out and maintenance of the training scheduled and participated in remote training sessions to provide administrative assistance, including attendance tracking, uploading of resources, recorded videos, and troubleshooting. In addition, (b)(6) ontinued to coordinate with the trainees to ensure attendance and any challenges faced were addressed and routed to the appropriate individuals. She worked with URC and Metabiota procurement personnel to secure materials for the HOT course, and coordinated directly with (b)(6) o secure CPHL as a venue and the recipient of materials. In addition (b)(6) (b)(6) drafted communications and provided routine guidance to ensure project implementation.

Epidemiology SMEs (b)(6) continued to participate in routine project calls and regular email communications with Metabiota PC and PMs. They worked with the epidemiology team to complete development and revisions of epidemiology training materials for submission to CBEP and use in the training course. They assisted in the development of the Cohort II and HOT schedule, to include trainer delivery of each course and module. In addition (b)(6) continued to facilitate internal meetings with the epi team for coordination of material development, as well as provide administrative support in maintaining the epidemiology content on the LMS site. Both SMEs delivered and supported lectures during the Cohort I and Cohort II epidemiology training courses. In addition, they continued to source and provide additional resource materials for the trainees.

University Research Co. (URC) SMEs (b)(6) and (b)(6) continued to provide operational project support. As the US based project coordinator (b)(6) ommunicates routinely with URC's Iraq based team to ensure FLNs are attending and providing routine technical/administrative support during the remote training sessions. In addition, she works directly with (b)(6) and the procurement team to ensure all materials are being sourced in country and procured to facilitate the HOT. She provides routine updates to Metabiota project team members and coordinates with URC leadership to ensure completion and delivery of CDRLs.

(b)(6) participated in routine project calls, meetings, and email communications with Metabiota, URC US-based team members, and in-country stakeholders to ensure operational project needs are being executed in-country. He worked with the procurement team to identify vendors and secure materials needed for the HOT course, finding alternatives when needed, and notifying Metabiota of availability and pricing changes due to the local market. He continued to coordinate with in-country stakeholders to assist in facilitating the transfer of materials and chain of custody for all locally procured items. He provided routine in-country updates and in-country information necessary to support completion of deliverables and project requirements.

WRMI SME (b)(6) participated in routine project calls and communications with Metabiota and WRMI personnel to support execution of the BS&S and HOT portions of the course. He continued

to refine course materials following CBEP guidance and delivered remote BS&S training courses according to schedule. In addition, he attended Zoom/LMS training sessions to ensure facilitation of the remote BS&S training course and to prepare for delivery of the HOT course at the end of the month. In addition, he provided administrative support to team members in completing deliverable requirements on the project.

(b)(6) was mistakenly represented as a SME 2 under activities completed in August's report. He is, however, invoiced correctly at a SME 1 level.

Subject Matter Expert 2:

WRMI SMEs (b)(6) participated in routine project calls with Metabiota personnel and developed information requirements and recommendations for project execution via email and phone communications. They completed revisions to HOT course materials and resubmitted them for approval. They also participated in training on Zoom and Moodle, and completed the build out of the BS&S training site on the LMS platform with assistance from (b)(6) They conducted BS&S remote trainings, and assisted in the development of the HOT syllabus and identified requirements necessary to successfully implement the HOT course (b)(6) provided technical support in procurement and began receiving locally procured materials for HOT delivery. In addition, they presented high-level findings of the gap analysis at the NBMC, and (b)(6) continues to assist Metabiota SMEs in completion of the final draft.

Epidemiology Trainer (b)(6) participated in routine project calls and regular email communications with Metabiota PC and PMs. She worked with the epidemiology team to complete development and revisions of the epidemiology training materials for course delivery. She conducted epidemiology training for Cohort I and II, and assisted in preparations for the HOT. She continued to source reference materials for the epidemiology course, uploading them to the LMS site. She continued to provide local guidance on training implementation and as a native Arabic speaker assisted in translations and structuring of materials and schedule to ensure cultural sensitivities are maintained and customs are accounted for in training delivery.

Research and Data Analyst:

WRMI RDA (b)(6) provided administrative support to the WRMI project team, to include completion of copyright permission requests for all BS&S and HOT materials (b)(6) completed administrative and formatting revisions for BS&S HOT materials. In addition, she completed the preparation and build out of the BS&S LMS site for training execution, and administers all remote training courses for the BS&S team, to include hosting sessions, taking attendance, material / video uploads, troubleshooting, and providing routine communications and updates to the Metabiota team on course progress.

WRMI RDA (b)(6) completed the monthly invoice requirement on the project.

Epidemiology Trainer (b)(6) continued to collect reference materials, develop and revise training materials for HOT submission and approval. She participated in routine project calls and communicated regularly with PC, PMs, and the epidemiology project team (b)(6) delivered and supported lectures during the ongoing Cohort I and II epidemiology training courses. In addition, she assisted in planning and preparation of the HOT schedule.

Iraqi Advisor (b)(6) participated in routine project calls with the PC, PMs, and URC team to support project implementation. He attended epidemiology and BS&S training sessions to observe participation and execution of the course. In addition, he spoke with participants to gather feedback and provide updates to the Metabiota project team. He met with MoH officials and secured the CPHL as the training venue and receiver of all materials, and communicated with URC team members in country to ensure chain of custody for materials and coordination in storage and transfer of items once procured. In addition, he worked with the Director General (DG) of Public Health at the MoH to ensure he had all information required for the HOT and to begin conversations securing participant attendance and release from normal duties during this event.

FLN Trainer (b)(6) continued to attend and support Cohort I and II epidemiology remote training courses. In addition, he attended and supported the BS&S remote training course. He was actively engaged in facilitating the online training to include participating in discussion sessions, assisting trainees with troubleshooting, encouraging participation, and responding to questions.

Foreign Local Nationals:

FLN (b)(6) continued to work with the URC team to complete in-country procurement activities, purchasing the necessary supplies for the HOT course. He worked with the operations manager to identify vendors, securing revised bids, and identifying alternate materials for procurement in the local market. He provided updates on materials available, not available, and pricing changes in order to finalize needs and issue purchase orders for local supplies. In addition, he provided routine administrative support to the team.

FLN trainers (b)(6) and (b)(6) continued to attend and support Cohort I and II epidemiology remote training courses. In addition, they attended and supported the BS&S remote training course. They were actively engaged in facilitating the online training to include participating in discussion sessions, assisting trainees with troubleshooting, encouraging participation, and responding to questions.

CLIN 1003 – Materials and Supplies

The Material costs include purchases of texts for the in country training.

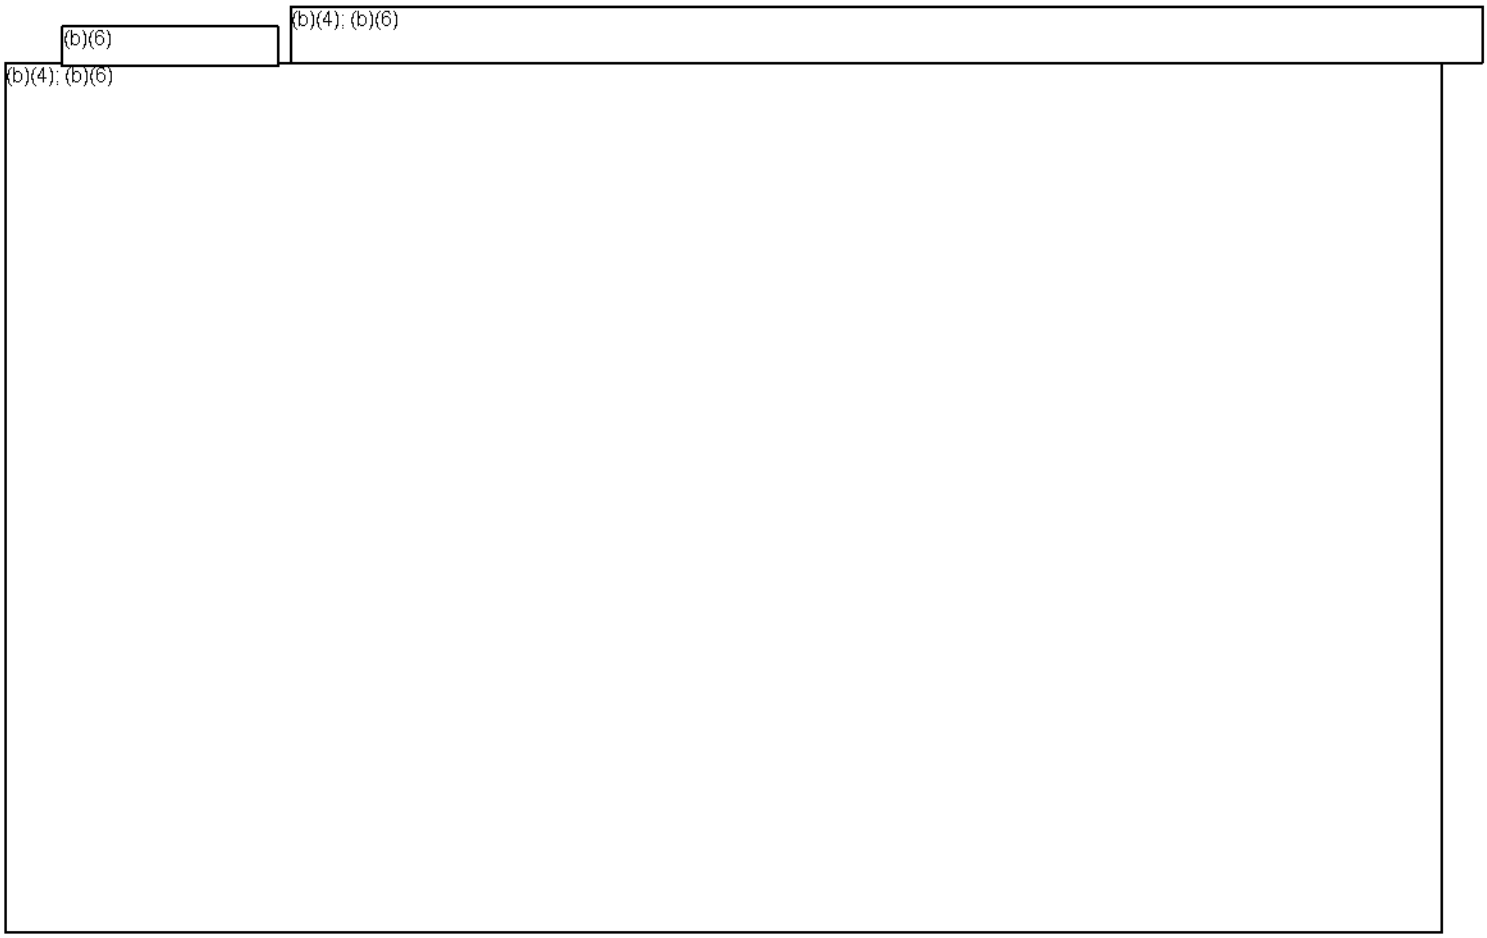

CLIN 1004 – ODCs

DBA is applied for FOIA (b)(4) of total compensation.

CLIN 1005 – Travel

Travel costs include flights, lodging, ground transport and per diem fo (b)(6) (b)(6) travel to Albuquerque to present high-level findings of the NBERP gap analysis at the NBMC

Total Payment

Payment Information

Metabiota makes all payments by electronic direct deposit to a payee's bank account. This is the most secure, cost effective and expedient method of payment. All payments will be deposited to the bank account you should have provided on appointment (contained in your vendor master record). Use the spaces provided below to advise the hiring unit's transaction processor of your bank account details and mailing address or any changes that may have occurred.

** bank account information – Any updates will be submitted to Accounts Payable to ensure prompt payment.

** mailing address – Your transaction processor will update the master record to ensure any correspondence by mail reaches you.

Electronic Deposit/Wire Transfer Information ✓ Check here if this updates previously provided information

TD 022 Biosurveillance Training - Uganda

Objectives

Advance the Biosafety and Biosecurity capacity in Uganda through the development, coordination and execution of a pilot biosurveillance study focused in Rift Valley Fever (RVF), Avian Influenza (AI), and Peste des Petuts Ruminants Virus (PPRV). Provide subject matter expertise to assist participants in development and submission of grant proposals, and development of Standard Operating Procedures to increase enhance local skills in early detection and prevalence determination of RVF AI and PPR.

Period of Performance: 3/21/16 – 11/15/16

CLIN 1002 – Labor

Program Manager

Metabiota Regional Africa Program Manager (b)(6) ed regular bi-weekly and as needed communications with in country stakeholders. He also led communications with DTRA CBEP representation on a bi-weekly and as needed basis. He provided project and programmatic oversight to the update, re-development and delivery of pilot study related CDRLs and other associated contractually requirement document resubmissions. He also contributed to the finalization of procurement documents and provided technical oversight to the selection of items necessary for pilot study implementation. (b)(6) rovided general management and direction to the project team during the finalization of the biosurveillance training event in the early days of September. He continued to lead presentations including the closing remarks and next steps conversations, and continued to provide technical guidance in the subject areas of epidemiology, data analysis, study design, and sample size calculation. (b)(6) also maintained communications with DTRA CBEP during this time and developed and implemented a reporting protocol for all study leads.

Research and Data Analyst:

(b)(6) rovided general coordination and implementation support to the project team in the during the execution of the biosurveillance training event. She continued to provide technical leadership during several components of the training event including the set up and execution of post-collection sample management activities. (b)(6) also contributed to the post-training next steps discussion that provided guidance to the study leads during the subsequent 8 weeks' pilot study. Finally, (b)(6) t the direction of (b)(6) egan building out relevant components of the final project report due at the time of project closeout (11/15/2016).

Subject Matter Expert 1:

(b)(6) emained on travel during the early days of this month in Kasese, Uganda and continued to serve as a technical leader during the closeout of the biosurveillance training event. His efforts during this period included the delivery of technical oversight on BS&S in the field laboratory, trapping sampling and handling of avian and ruminant species, field waste management, sample management in the field, and sample management in the field laboratory. (b)(6) additionally participated in all post training meetings and provided general support to the teams in preparation for the subsequent and forthcoming biosurveillance pilot studies. Finally, (b)(6) began the proposal development process, by holding at length discussions with study leads and building out a general outline.

Time spent during this period at SME 1 is also represented by the efforts of Africa Biomedical Laboratories (ABL) representative [redacted] contributed to the proposal development process at the guidance of [redacted] was engaged to support both proposal writing and study design portions of this effort.

AFRICOM FLN 1:

[redacted] provided technical and operational support to the Rift Valley fever biosurveillance pilot study team during this period. He served as a local community liaison tasked with engaging farmers and local government representatives in an effort to ensure that his team was able to sample the respective target animal populations. He additionally provided veterinary technical support in the form of handling and sampling of animals. [redacted] additionally worked to support the set up and breakdown of sample collection staging areas and participated in pre and post sampling meetings with team members.

[redacted] provided technical and operational support to the avian influenza and peste des petits ruminants biosurveillance pilot study teams during this period. He served as a local community liaison tasked with engaging farmers and local government representatives in an effort to ensure that his teams were able to sample their respective target animal populations. He additionally provided veterinary technical support in the form of handling and sampling of animals. [redacted] additionally worked to support the set up and breakdown of sample collection staging areas and participated in pre and post sampling meetings with team members.

CLIN 1003 – Materials and Supplies

Material costs invoiced include procurement for implementation of the workshop and communication costs for the team in the field during implementation.

CLIN 1004 – ODCs

DBA costs are allocated for [redacted] and [redacted] a FOIA (b)(4) total compensation.

CLIN 1005 – Travel

Travel costs invoiced include Airfare, Per Diem, and ground transportation for FOIA (b)(6) to implement the BSV workshop. Per Diem and ground transportation for Calla Martyn during implementation of the BSV workshop.

TD 023 One Health Epidemiology Short Course – South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through the development of a One Health Epidemiology short course tailored to the needs of South Africa. Increase the sustainability of the course work through development of a train the trainer module to be delivered to select South African trainers of the short course.

Period of Performance: 3/21/16 – 11/15/16

CLIN 1002 – Labor

Program Manager:
Metabiota Africa Regional Program Manager, (b)(6) provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as programmatic communications for the internal project team. He led regular bi-weekly communication with DTRA CBEP. (b)(6) additionally worked with Metabiota PC (b)(6) to progressively elaborate the project schedule in an effort to reflect input from project SME's in real-time. (b)(6) also led a 60% review of progress meeting during the day of 09/15/2016 and provided transparency on the status of the project. (b)(6) also worked with DTRA CBEP during this meeting to identify a final deliverables submission and review schedule.

Research and Data Analyst:
Metabiota Project Coordinator (b)(6) provided communication support during all engagements with DTRA CBEP and the Ugandan stakeholders by participating in project calls.
Metabiota Epidemiologist (b)(6) also represented by this labor category, provided technical support towards the development and adaptation of materials and contributed to the development of the 30% review response. She participated in technical and programmatic communication calls with project staff, and provided infectious disease expertise towards the overall project approach as well as the delineation between advanced and basic course work. She also reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation.

Subject Matter Expert
Metabiota Staff Scientist (b)(6) provided technical leadership and overall product development guidance towards the development and adaptation of all materials. She participated in bi-weekly conference calls with DTRA CBEP representation and led weekly technical communications with project technical staff, and represented the technical team at the 60% review meeting held at CTSC. She additionally contributed directly to the development of presentations and worked to adapt and develop training materials, and to review the work of other project SMEs to ensure an overall consistency in approach. She reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation (b)(6) also contributed to the development of the 30% review response document.

Trainer 2:
(b)(6) provided technical support towards the development and adaptation of materials. He participated in technical and programmatic communication calls with project

staff, and provided veterinary and training program development expertise towards the overall project approach as well as the delineation between. (b)(6) also contributed to the development of the 30% review response document.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
DBA costs are allocated for FOIA (b)(4) of total compensation.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 025 Technical Writing Workshop – Ethiopia

Objectives
Provide capacity building and sustainability in BS&S projects by conducting a Technical Writing workshop on developing a successful research proposal and white paper. Provide mentorship and support to workshop participants in finalizing and submitting for grant support to increase the research project completed in country.

Period of Performance: 4/15/16 – 11/15/16

CLIN 1002 – Labor

Program Manager:
Metabiota Africa Regional Program Manager (b)(6) provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as programmatic communications for the internal project team. (b)(6) additionally managed daily communications will all members of the project team to ensure adherence to the proposal deliverables schedule.

Research and Data Analyst:
Metabiota Project Coordinator (b)(6) participated in project calls, both internal and with DTRA CBEP. (b)(6) took and distributed minutes following calls with DTRA CBEP. (b)(6) also provided coordination support to (b)(6) as necessary during post training reporting.

Subject Matter Expert 1:
(b)(6) post the closeout of the training workshop worked as the technical lead of this project to maintain communication with leadership from EPHI and NAHDIC. (b)(6) worked with (b)(6) and his technical team to develop the proposal deliverables schedule, and to relay the DTRA CBEP approved schedule and its implications to the team leads for both EPHI and NAHDIC. (b)(6) additionally provided oversight and direct contribution to his technical team towards the development of draft DTRA BAA Thrust Area 6 abstracts and white papers by EPHI and NAHDIC led teams.

(b)(6) during the month of August, provided support to (b)(6) as the technical project lead. (b)(6) additionally worked with representation from EPHI and NAHDIC towards concept and abstract development, and reported timeline challenges to (b)(6) also worked to provide recommended edits to draft abstracts submitted by EPHI and NAHDIC.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
No ODC costs are invoiced this period.

CLIN 1005 – Travel
Travel costs include lodging for AAAS performers during the workshop held in late July.

6. CONTRACING OFFICER REPRESENTATIVE	7. CONTRACTOR POC
NAME: (b)(6)	NAME: (b)(6)
PHONE: (b)(6) EMAIL: (b)(6)	PHONE (b)(6) EMAIL: (b)(6)

8. DESCRIPTION OF TD (NOT TO EXCEED 1 PAGE):

This revision extends the Period of Performance (PoP) for TD-016 from 15 May 2016 to 15 November 2016. This PoP extension is to continue providing expertise in geographic information systems (GIS) modeling and regional Single Nucleotide Polymorphisms (SNPs) at the Richard G. Lugar Center for Public Health Research in Georgia. Metabiota should coordinate directly with the Technical POCs identified below. Your technical approach as outlined in TD-016 Rev A with the exception of the 3 x 1 week of trips stipulated to support GG-27 (identified in box 8 paragraph 5 and box 9c under travel), proposed budget, and basis of estimate for continuing this requirement, not to exceed $147,000 is requested by 17 May 2016. Please note that the current Metabiota contract does not allow for logistical support services, such as translation, shipping & customs clearance, conference services, etc. These requirements will be coordinated through CLS and the in-country DTRO (as appropriate) by the CBEP POCs below. No further changes to the previously approved proposal are required at this time.

9a. PROPOSED SOLUTION (NOT TO EXCEED 2 PAGES):

Proposal Development & Initiation
Metabiota developed a project plan and implementation strategy, which aligns with narrative from Box 8 and leverages information gleaned from discussions with A&AS contractors. Originally, a key assumption for this effort was that the Georgian scientists are generally capable of conducting GIS analyses on their own. After discussions with some individuals familiar with the level of expertise in Georgia and the scientific goals sought to be accomplished in the stated projects, Metabiota believes that the Georgian scientists will require an increased level of support when conducting GIS analyses. It is anticipated that the plan for TD-016 is considered a living document and it is expected that revisions to the plan will be necessary following stakeholder meetings. During proposal development, Metabiota expects to use Program Manager (PM) and Project Coordinator (PC, billed as SME I) time to identify the best path forward, required deliverables, and any other programmatic requirements which can reasonably be expected to be a part of this project.

Project Coordination:
From the information provided in Box 8, Metabiota assumes that these projects are ongoing affairs led by a third party. The Metabiota PM, PC, and GIS SME(s) will participate in communications with the CBR teams to understand what the mentoring and research needs are for each project. The Metabiota PM and PC will work with the GIS SME(s) to ensure that mentoring and research needs are met as best as possible using remote technologies. The Metabiota PM and PC will also work with the project teams to ensure that the GIS SME(s) provide inputs to project deliverables in a timely manner.

Mentoring:
Mentoring will consist of remote mentoring. After assessing the need for in-person GIS mentoring, the PM, PC, and primary GIS SME will work with the project teams to elucidate the specific goals, and requirements of each mentoring request to ensure that the mentoring visit is conducted efficiently and effectively. The primary GIS SME will work with the PM, PC, and appropriate stakeholders in each respective project to create a list of tasks to be accomplished by the Georgian scientists leading up to the mentoring visit, to create a list of topics for the primary GIS SME to be prepared to assist with during the mentoring visit, and to facilitate the communication and exchange of any necessary data or concepts both prior to and following each mentoring visit.

Reach-back support and Research collaboration:
Based on our updated understanding of the requirements and the proposed scope of the projects, Metabiota now expects to be required to provide significant GIS analysis support to the three projects, but does expect to place a significant focus on transitioning this expertise to the Georgians. Through regular communications with the respective project teams, Metabiota will be made aware of any additional subject matter expertise requests. The GIS SME will address these needs as they arise.

9b. BUDGET (USE EMBEDDED TABS FOR BUDGET BREAKDOWN):

Table 1: Incremental funding requested for 16 May 2016 – 15 November 2016, per CLIN. Please note that labor rates have changed.

CLIN	DESCRIPTION	TOTAL
1002	LABOR	$132,202.28
1003	MATERIALS	$0
1004	ODCs	$0
1005	TRAVEL	$0
TOTAL		**$132,202.28**

9c. TD SOLUTION BASIS OF ESTIMATE – DESCRIPTION (NOT TO EXCEED 2 PAGES):

Labor
Costs for direct labor to support this activity is required for the following personnel:

All phases:
Metabiota Program Manager: The Metabiota PM will provide oversight of the planning and execution of program objectives towards the completion of DTRA CBEP goals at the regional level and will lead communication with DTRA CBEP for this activity. The PM will do so by participating in proposal

development and maintaining oversight of stakeholder and subcontractor coordination and project execution, including anticipating, managing, and communicating projects risks and recommended mitigation strategies to the funder. The PM will ensure Metabiota and other DTRA CBEP subcontractors meet all project requirements and deliverables while ensuring the program remains within scope, budget, and timeline. The PM will lead communication with DTRA CBEP for this activity.

As some of our Subject Matter Experts and Research and Data Analysts may be independent consultants or subcontractors, the Metabiota PM will additionally oversee and ensure that all project personnel adhere to DoD and DTRA CBEP standard operating procedures and operational requirements to include overseeing the development of Statements of Work (SOW) and appropriate budgets under the T&M mechanism, the acquisition of Defense Base Act insurance, and any other requirements which may be applicable to the work. The Metabiota PM will provide management oversight of the project team, including subcontractors and independent consultants throughout the span of the project.

Metabiota Subject Matter Expert 1: The Metabiota SME 1 will act as a Project Coordinator (PC) throughout the planning and execution of project objectives, as well as participating in proposal development. The Metabiota PC will lead the planning and execution of DTRA CBEP objectives towards the completion of project goals. The PC will do so by participating in proposal development and leading stakeholder and subcontractor coordination and project execution, including assisting the PM in anticipating, managing, and communicating projects risks and recommended mitigation strategies to the funder. The PC will regularly communicate the project status with the PM and will manage the GIS SME, including all subcontractors, to ensure all project requirements and deliverables are met and the program remains within scope, budget, and timeline.

The PC will coordinate with the project stakeholders to identify travel dates. The PC will participate in regular communications between the project stakeholders and the GIS SME. The PC will drive the coordination required to sufficiently gather the answers to the logistical questions that will arise in the planning and execution of requested travel for mentoring activities.

The Metabiota PC will aid the PM in ensuring that all personnel adhere to operational requirements imposed by DoD or DTRA CBEP standard operating procedures. As the GIS SME may be unfamiliar with DoD contracting, the Metabiota PC will assist the SME and/or their organization with adhering to DoD contracting requirements, to include developing Statements of Work (SOW) and appropriate budgets under the T&M mechanism, the acquisition of Defense Base Act insurance, and any other requirements which may be applicable to the work. The Metabiota PC will provide continuing management oversight over the subcontractors and independent consultants throughout the span of the project.

Subject Matter Expert 2: The SME 2 will serve as the primary GIS SME and research collaborator. The SME 2 will participate in regular project coordination communications (teleconferences, emails) to ensure that they understand the context of each project and the GIS subject matter expertise needed. The SME 2 will provide remote mentoring and research collaborator support as directed by the respective project leads.

Research and Data Analysts (RDAs): It is anticipated that the SME 2 will employ multiple RDAs with GIS expertise to assist him in mentoring the Georgian scientists in the advanced GIS techniques proposed in the three research projects and to assist in performing data analysis, technical writing, and other research duties as needed.

Materials

No materials are expected to be procured for this effort.

Other Direct Costs

Per contract guidelines, DBA insurance is required for all personnel engaged on work conducted overseas. As no work will be physically conducted overseas, no additional funds are being requested.

Subcontracts

Subcontracts will be issued to SMEs, RDAs, and/or their home organizations as needed for the labor necessary for this effort, as well as any materials and supplies they will procure in support of this effort. Costs are captured under the appropriate labor categories in CLIN 1002 and materials in CLIN 1003 of the budget. Metabiota anticipates issuing a firm-fixed price level of effort (FFPLOE) contract to the GIS SME team as a mechanism for controlling costs, as Metabiota expects that the cost for the total number of hours worked by the SME2 and RDAs to far exceed the previously budgeted amount.

Travel

No travel is anticipated during the extended period of performance and thus no additional funds are being requested.

8. DESCRIPTION OF TD (NOT TO EXCEED 1 PAGE):

This revision modifies the original technical directive and extends the end of the Period of Performance (PoP) for TD-017 from 15 May 2016 to 15 November 2016. This PoP extension is to continue providing expertise in grantsmanship at the Laboratory of the Ministry of Agriculture in Georgia only. The Metabiota team should no longer provide expertise in grantsmanship development at the Richard G. Lugar Center for Public Health Research. Metabiota should coordinate directly with the Technical POCs identified below. Your technical approach as outlined in TD-017, proposed budget, and basis of estimate for continuing this requirement, not to exceed $95,712 is requested by 17 May 2016. Please note that the current Metabiota contract does not allow for logistical support services, such as translation, shipping & customs clearance, conference services, etc. These requirements will be coordinated through CLS and the in-country DTRO (as appropriate) by the CBEP POCs below. No further changes to the previously approved proposal are required at this time.

9a. PROPOSED SOLUTION (NOT TO EXCEED 2 PAGES):

Proposal Development & Initiation:
Metabiota developed a project plan and implementation strategy, which aligns with narrative from Box 8. A key assumption for this effort is that the Georgian scientists have their own research ideas which can be shaped into proposals. A second key assumption is that Metabiota Subject Matter Experts providing grantsmanship support will **not** be the primary drafters of any white papers or full proposals, but rather will only provide assistance in drafting said white papers and proposals. A third key assumption is that the Georgian scientists will not require any assistance in analysis of any data which may be presented in the proposals as preliminary work. It is anticipated that the plan for TD-017 is considered a living document and it is expected that revisions to the plan will be necessary following stakeholder meetings. During proposal development, Metabiota expects to use Program Manager (PM) and Project Coordinator (PC, billed as Subject Matter Expert (SME) I) time to identify the best path forward, required deliverables, and any other programmatic requirements which can reasonably be expected to be a part of this project.

Project Coordination:
From the information provided in Box 8, Metabiota assumes that there are several relevant POCs at LMA which will be involved in the grantsmanship efforts. The Metabiota PM and PC will, upon approval of the TD, engage relevant LMA stakeholders to begin understanding what efforts they would like to work on. Upon approval and receipt of additional information, the Metabiota PM and PC will identify a grantsmanship subject matter expert (billed as SME 2) and work to either onboard them as a Metabiota employee, or establish a subcontract or independent consulting arrangement with the VS. The Metabiota PM, PC, and SME 2 will participate in communications with stakeholders at LMA in order to understand what mentoring activities will be required. The Metabiota PM and PC will work with the SME 2 to ensure that all necessary documentation required prior to travel is completed correctly and submitted on time, and that all trip reports are filed on time. The Metabiota Travel Coordinator will coordinate with the project team to ensure that transportation and lodging arrangements are secured. The Metabiota PM and PC will work with the project teams to ensure any need for translation, interpretation, or other logistical requirements are adequately anticipated and communicated to CLS and/or DTRO-Tbilisi.

In-Country Grantsmanship Mentoring
Mentoring will consist of in-country and remote mentoring. Based on our understanding of the requirements, Metabiota does not expect to be required to provide data analysis support to the LMA scientists. In order to ensure the success of the in-country mentoring visits, the PM, PC, and SME 2 will work with the POCs at LMA to establish a list of deliverables to be provided to Metabiota prior to any in-country mentoring. These deliverables may include budgetary data, drafts of proposed plans and SOPs, drafts of white papers and full proposals, and analyses of preliminary data complete with methodology. The PM and PC will maintain regular communications with the SME 2 to ensure that the SME 2 has all required resources for mentoring. After assessing the need for in-country mentoring, the SME 2 will implement the mentoring work plans, only assisting with actual proposal writing in cases of last resort.

Metabiota is proposing a slight alteration of our plans from Revision A based on observations from our first two in-country mentoring sessions. In particular, we have seen that mentees can become distracted with their primary duties at LMA and are thus proposing to run two cohorts of mentees simultaneously but for two weeks of half-day sessions. This would allow each cohort to dedicate part of their day directly to their normal duties which we believe will reduce distraction during the portion of their day focused on grantsmanship mentoring. One cohort would run in the mornings, and the other cohort would run in the afternoons. We are proposing to run two (2) two-week sessions (July and September), with remote mentoring in between. In the July session, cohort 1 would be working on full proposal and cohort 2 would receive their second session on white papers. In the September session, cohort 1 would be finishing full proposals and participating in a train-the-trainer approach to assist cohort 2 with their first efforts on full proposals.

Reach-back Support / Remote Mentoring:
Based on our understanding of the requirements, Metabiota does not expect to be required to provide primary authorship support to any proposals, but does expect the SME 2 to be available to provide remote editorial guidance and limited assistance with drafting of select passages. Through regular communications with the respective project teams, Metabiota will be made aware of any additional subject matter expertise requests. The SME 2 will address these needs as they arise.

9b. BUDGET (USE EMBEDDED TABS FOR BUDGET BREAKDOWN):
Table 1: Incremental funding requested for 16 May 2016 – 15 November 2016, per CLIN. Please note that labor rates have changed.

CLIN	DESCRIPTION	TOTAL
1002	LABOR	(b)(4)
1003	MATERIALS	$0.00
1004	ODCs	$0.00
1005	TRAVEL	(b)(6)
TOTAL		**$134,505.90**

9c. TD SOLUTION BASIS OF ESTIMATE – DESCRIPTION (NOT TO EXCEED 2 PAGES):

Labor

Costs for direct labor to support this activity is required for the following personnel:

All phases:

Metabiota Program Manager: The Metabiota PM will provide oversight of the planning and execution of program objectives towards the completion of DTRA CBEP goals at the regional level and will lead communication with DTRA CBEP for this activity. The PM will do so by participating in proposal development and maintaining oversight of stakeholder and subcontractor coordination and project execution, including anticipating, managing, and communicating projects risks and recommended mitigation strategies to the funder. The PM will ensure Metabiota and other DTRA CBEP subcontractors meet all project requirements and deliverables while ensuring the program remains within scope, budget, and timeline. The PM will lead communication with DTRA CBEP for this activity.

As our Subject Matter Expert may be an independent consultants or subcontractor, the Metabiota PM will additionally provide management oversight of the project subcontractors (microbiology SME) and the integration with other project stakeholders throughout the duration of this project. The PM will also ensure that all project personnel (Metabiota and subcontractors) adhere to DoD and DTRA CBEP standard operating procedures and operational requirements to include overseeing the development of Statements of Work (SOW) and appropriate budgets under the T&M mechanism, the acquisition of Defense Base Act insurance, and any other requirements which may be applicable to the work.

Metabiota Subject Matter Expert 1: The Metabiota SME 1 will act as a Project Coordinator (PC) throughout the planning and execution of project objectives, as well as participating in proposal development. The Metabiota PC will lead the planning and execution of DTRA CBEP objectives towards the completion of project goals. The PC will do so by participating in proposal development and leading stakeholder and subcontractor coordination and project execution, including assisting the PM in anticipating, managing, and communicating project risks and recommended mitigation strategies to the funder. The PC will regularly communicate the project status with the PM. The PC will manage the SME 2, to include leading regular coordination calls with the SME 2, participating in regular communications between the proposal stakeholders and the grantsmanship SME, and coordinating with the SME 2 to ensure all project requirements and deliverables are met and the program remains within scope, budget, and timeline. The PC will aid the PM and SME 2 in ensuring project startup and closeout are completed to the satisfaction of the funder.

The Metabiota PC will aid the PM in ensuring that all personnel adhere to operational requirements imposed by DoD or DTRA CBEP standard operating procedures. As the grantsmanship SME may be unfamiliar with DoD contracting, the Metabiota PC will assist the SME and/or their organization with adhering to DoD contracting requirements, to include developing Statements of Work (SOW) and appropriate budgets under the T&M mechanism, the acquisition of Defense Base Act insurance, and any other requirements which may be applicable to the work. The Metabiota PC will provide continuing management oversight over the subcontractors and independent consultants throughout the span of the project.

Subject Matter Expert 2: The SME 2(s) will serve as the grantsmanship SME(s). The SME 2(s) will participate in regular project coordination communications (teleconferences, emails) to ensure that they understand the context of each proposal, the needs and expectations of the Georgian scientists, and the grantsmanship assistance needed. The SME 2(s) will provide mentoring as directed by the respective project leads. We are expecting a higher level of effort required in the extension period as mentees move into developing full proposals which would require more time to review. During the base period we leveraged other CBEP work travel to Tbilisi to be able to supply additional fractional support in country, and expect to do the same during the extension period.

Materials

No additional material costs are projected for the extension of the period of performance.

Other Direct Costs

Per contract guidelines, DBA insurance is required for all personnel performing work overseas on the AEP project. DBA insurance will be secured for all staff for the period of performance for this engagement. No additional funds for DBA insurance are requested for the extension of the period of performance.

Subcontracts

Subcontracts will be issued to the SME 2 and/or their home organization as needed for the labor necessary for this effort, as well as any materials and supplies they will procure in support of this effort. Costs are captured under the appropriate labor categories in CLIN 1002 and materials in CLIN 1003 of the budget.

Travel

Travel is requested to support the deployment of the SME(s) to Tbilisi, Georgia for two (2) two-week deployments. During the base period we leveraged other CBEP work travel to Tbilisi to be able to supply additional fractional support in country, and expect to do the same during the extension period. No additional travel is projected based on the requirements provided. Projected airfares are based off of actual quotes, but may be subject to changes based on timing of purchase. The travel budget represents the estimated amount required; precise numbers may vary depending on factors beyond Metabiota control. Travel on the AEP contract is cost reimbursable.

8. DESCRIPTION OF TD (NOT TO EXCEED 1 PAGE):

This revision extends the Period of Performance (PoP) for TD-018 from 15 May 2016 to 15 November 2016. This PoP extension is to continue providing on-site expertise in microbiology research activities at the Richard G. Lugar Center for Public Health Research in Georgia. Metabota should coordinate directly with the Technical POCs identified below. Your technical approach as outlined in TD-019, proposed budget, and basis of estimate for continuing this requirement, not to exceed $342,000 is requested by 17 May 2016. Please note that the current Metabiota contract does not allow for logistical support services, such as translation, shipping & customs clearance, conference services, etc. These requirements will be coordinated through CLS and the in-country DTRO (as appropriate) by the CBEP POCs below. No further changes to the previously approved proposal are required at this time.

9a. PROPOSED SOLUTION (NOT TO EXCEED 2 PAGES):

Proposal Development & Initiation:
Metabiota developed a project plan and implementation strategy, which aligns with narrative from Box 8 of the original version of the TD. A key assumption for this effort is that the Georgian scientists are generally capable of conducting microbiological analyses on their own but that the requested support personnel will occasionally be asked to directly perform microbiological analyses. A second key assumption for this effort is that it is expected to be a full-time expat position. It is anticipated that the plan for TD-019 is considered a living document and it is expected that revisions to the plan will be necessary following stakeholder meetings. During proposal development, Metabiota expects to use Program Manager (PM) and Project Coordinator (PC, billed as Subject Matter Expert (SME) I) time to identify the best path forward, required deliverables, and any other programmatic requirements which can reasonably be expected to be a part of this project.

Project Coordination:
From the information provided in Box 8, Metabiota assumes that the unspecified CBEP-funded research projects are ongoing affairs led by third parties. In order to effectively ensure that an appropriate microbiology subject matter expert (microbiology SME, billed as a Visiting Scientist/VS) is available to provide the requested mentoring, the Metabiota PM and PC will, upon approval of the TD, continue to engage relevant DTRA CBEP and Lugar Center stakeholders to identify how, where, and when project status updates are communicated (for example, monthly teleconference, weekly email exchanges, etc.) and what the onboarding and daily requirements are for working at the Lugar Center. Upon approval and receipt of additional information, the Metabiota PM and PC will identify a VS and work to either onboard them as a Metabiota employee, or establish a subcontract or independent consulting arrangement with the VS. The Metabiota PM, PC, and VS will participate in project communications in order to understand what mentoring activities will be required. The Metabiota PM and PC will work with the VS to ensure that all necessary documentation required prior to travel is completed correctly and submitted on time, and that all trip reports are filed on time. The Metabiota Travel Coordinator will coordinate with the project team to ensure that transportation and lodging arrangements are secured. The Metabiota PM and PC will work with the project teams to ensure any need for translation, interpretation, or other logistical requirements are adequately anticipated and communicated to CLS and/or DTRO-Tbilisi.

Mentoring and Performance of Microbiological Research:
Mentoring will consist of in-country mentoring. Based on our understanding of the requirements, Metabiota does not expect to be required to provide primary microbiological analysis support to the various projects being conducted at the Lugar Center. The PM and PC will maintain regular communications with the VS to ensure that the VS has all required resources for mentoring. After assessing the need for microbiology mentoring, the VS will work with the PM, PC, and other appropriate stakeholders to develop mentoring work plans. The VS will then implement the mentoring work plans, only assisting with actual analyses and scientific writing when necessary.

Risk Management:
In order to maintain our course of action and guarantee project implementation that will reduce regional risk and forward DTRA CBEP's mission, Metabiota must overcome the obstacles included (but not limited to) those listed in the Risk Management Matrix shown below. Identifying and acknowledging the risks associated with not implementing this activity, as well as capturing the risks associated with conducting and completing it, to include contingency planning and course correction measures will lead to overall regional risk reduction, as outlined in the Risk Management Matrix.

9b. BUDGET (USE EMBEDDED TABS FOR BUDGET BREAKDOWN):

Table 1: Incremental funding requested for 16 May 2016 – 15 November 2016, per CLIN. Please note that labor rates have changed.

CLIN	DESCRIPTION	TOTAL
1002	LABOR	$323,696.71
1003	MATERIALS	$0
1004	ODCs	$0
1005	TRAVEL	$0
TOTAL		**$323,696.71**

9c. TD SOLUTION BASIS OF ESTIMATE – DESCRIPTION (NOT TO EXCEED 2 PAGES):

Labor

Costs for direct labor to support this activity is required for the following personnel:

All phases:

Metabiota Program Manager: The Metabiota PM will provide oversight of the planning and execution of program objectives towards the completion of DTRA CBEP goals at the regional level and will lead communication with DTRA CBEP for this activity. The PM will do so by participating in proposal development and maintaining oversight of stakeholder and subcontractor coordination and project execution, including anticipating, managing, and communicating projects risks and recommended mitigation strategies to the funder. The PM will ensure Metabiota and other DTRA CBEP subcontractors meet all project requirements and deliverables while ensuring the program remains within scope, budget, and timeline. The PM will lead communication with DTRA CBEP for this activity.

The Metabiota PM will additionally provide management oversight of the microbiology SME and the integration with other project stakeholders throughout the duration of this project. The PM will also ensure that all project personnel (Metabiota and any subcontractors) adhere to DoD and DTRA CBEP standard operating procedures and operational requirements to include overseeing the development of Statements of Work (SOW) and appropriate budgets under the T&M mechanism, the acquisition of Defense Base Act insurance, and any other requirements which may be applicable to the work.

Metabiota Subject Matter Expert 1: The Metabiota SME 1 will act as a Project Coordinator (PC) throughout the planning and execution of project objectives, as well as participating in proposal development. The Metabiota PC will lead the planning and execution of DTRA CBEP objectives towards the completion of project goals. The PC will do so by participating in proposal development and leading stakeholder and subcontractor coordination and project execution, including assisting the PM in anticipating, managing, and communicating project risks and recommended mitigation strategies to the funder. The PC will regularly communicate the project status with the PM. The PC will manage the microbiology SME, to include leading regular coordination calls with the microbiology SME, participating in regular communications between the project stakeholders and the microbiology SME, and coordinating with the microbiology SME to ensure all project requirements and deliverables are met and the program remains within scope, budget, and timeline. The PC will aid the PM and VS in ensuring project startup and closeout are completed to the satisfaction of the funder.

The Metabiota PC will aid the PM in ensuring that all personnel adhere to operational requirements imposed by DoD or DTRA CBEP standard operating procedures. As the microbiology SME may be unfamiliar with DoD contracting, the Metabiota PC will assist the SME and/or their organization with adhering to DoD contracting requirements, to include developing Statements of Work (SOW) and appropriate budgets under the T&M mechanism, the acquisition of Defense Base Act insurance, and any other requirements which may be applicable to the work. The Metabiota PC will provide continuing management oversight over the subcontractors and independent consultants throughout the span of the project.

Visiting Scientist: The VS will serve as the microbiology SME. The VS will participate in regular project coordination communications (teleconferences, emails) to ensure that they understand the context of each project, the needs and expectations of the Georgian scientists, and the microbiological subject matter expertise needed. The VS will provide mentoring as directed by the respective project leads. The VS will be working full-time on this effort.

Materials

No additional material procurements are anticipated on this effort, and thus no additional funds are being requested on this CLIN through the extended period of performance.

Other Direct Costs

Per contract guidelines, DBA insurance is required for all personnel engaged on the AEP project. DBA insurance will be applied for labor costs incurred overseas. Metabiota maintains a blanket DBA policy for all personnel and will add the VS and any other performers meeting DBA requirements to this policy as they are engaged. A reconciliation of the total DBA will be performed prior to final invoicing to ensure accuracy of the charges, in accordance with total hours worked. If necessary, final invoicing will be adjusted to reflect the final DBA allocation numbers. At this time, no additional funds are being requested for DBA, as the previously requested amount for CLIN 1004 should be sufficient to cover further DBA costs.

Travel

Travel is requested to support the deployment of the VS to Batumi, Georgia or other locations within Georgia as needs arise. At this time, no additional funds are being requested for travel, as the previously requested amount for CLIN 1005 should be sufficient to cover one additional trip. Travel on the AEP contract is cost reimbursable.

8. DESCRIPTION OF TD (NOT TO EXCEED 1 PAGE):

This revision extends the Period of Performance (PoP) for TD-024 from 30 June 2016 to 31 July 2016. This PoP extension is to provide enough time to continue developing a Film Narrative of Epigenetics and Genomics of Infectious Diseases in the Middle East, South Asia and CBEP collaborations in the CENTCOM Region and route through DTRA PAO office. In addition, contractor shall add closed caption features to the film narrative and all subsequent copies via various media types develop under this TD not to exceed $2,000. Metabiota should coordinate directly with the Technical POCs identified below. No additional changes to the previously approved proposal are required at this time.

9a. PROPOSED SOLUTION (NOT TO EXCEED 2 PAGES):

Metabiota will continue development of the film narrative highlighting CBEP efforts in the CENTCOM region, and specifically the conference held on the Epigenetics and Genomics of Infectious Diseases in the Middle East and South Asia. To support this effort, an extended PoP through 31 July 2016 is required to ensure completion of the short film, supporting additional time to include closed captioning and voice over options, as well as secure PAO approval prior to release. In direct support of this effort and PAO requirements, Metabiota will continue to engage August II Productions, the vendor responsible for film production, to include a voice over for the film narrative and closed captioning.

To facilitate the voice over requirements, August II Productions will secure studio time to record the voice over, being read by (b)(6) for this effort. In addition, (b)(6) Executive Producer at August II Productions will work with (b)(6) to coach him on professional voice over requirements and execution to ensure a professional narrative and film is achieved. Once the voice over is recorded, FOIA (b)(6) and her editing team will overlay the voice over on the film footage, and complete final edits, as needed, for it's incorporation.

In addition, August II Productions, will provide closed captioning options on the film, per the DTRA PAO office. Production of closed captioning will include creating the transcript of the entire film, caption files, encoding, and ensuring that the final closed captioning film will be accessible on all forms of media, to include straight-play DVD, and digital files for YouTube and other media channels determined necessary and appropriate by DTRA.

To achieve these requirements, the Metabiota PM will augment the services agreement with August II Productions to include both the voice over and closed captioning services. The Metabiota PM and PC will work with August II Productions to realign the schedule in accordance with the PoP and oversee all activities to ensure completion within the assigned timeframe. The Metabiota team will remain in weekly communication with CBEP regional team leads to maintain visibility on project scope and achievements.

9b. BUDGET (USE EMBEDDED TABS FOR BUDGET BREAKDOWN):

CLIN	DESCRIPTION	TOTAL
1002	LABOR	$0
1003	MATERIALS	$2,000
1004	ODCs	$0
1005	TRAVEL	$0
TOTAL		**$2,000**

9c. TD SOLUTION BASIS OF ESTIMATE DESCRIPTION (NOT TO EXCEED 2 PAGES):

Materials

Voice Over: Voice over costs include studio time for (b)(6) to record the voice over narrative. This will also include time with FOIA (b)(6), the Executive Producer for coaching, editing of the script, as needed, and multiple readings to ensure a professional and polished product, as well as any additional "takes" required, as the final film is developed, or at the request of the PAO office following review of the product.

Closed Captioning: Closed captioning costs include creating the film transcript, caption files, encoding, and closed captioning compatibility with multiple media options, to include straight-play DVD and digital files. Costs also include any edits or revisions required in the closed captioning transcripts should they be be required during the production of the film, or at the request of the PAO office following review of the product.

No other costs or requirements are deemed necessary at this time.

8. DESCRIPTION OF TD (NOT TO EXCEED 1 PAGE):

This revision extends the Period of Performance (PoP) for TD-025 from 15 May 2016 to 15 November 2016 at no additional cost. This PoP extension is to provide enough time to continue developing a writing workshop for Ethiopian collaborators from the Ethiopian Public Health Institute (EPHI) and National Animal Health Diagnostic and Investigation Center (NAHDIC). Metabota should coordinate directly with the Technical POCs identified below. No changes to the previously approved proposal are required at this time.

Table 5 – 75% Estimate *19*

This submission of the Monthly Report (Contract Data Requirements List; CDRL A001) encompasses implementation of Academic Engagement Partnership (AEP) program activities in accordance with Defense Threat Reduction Agency (DTRA) Cooperative Biological Engagement Program (CBEP) contract HDTRA1-14-C-0104 for 12/01/15-12/31/15.

Technical Directives

AFRICOM

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing – Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 – 04/30/16
Total Estimated Budget: $125,975.00
Estimated Expenditure: $70,445.00
Technical Direction Status: Approved

Completed Activities

- There is nothing significant to report on this effort (see Challenges). The Metabiota team has maintained communication with DTRA awaiting the outcome of Leahy vetting and continues to keep tabs on potential training windows based on staff availability.

Upcoming Activities

- Metabiota is standing by, awaiting the outcome of the Leahy vetting to identify new training dates.

Challenges
The Cameroon Ministry of Defense has been reticent to provide the additional information required to complete Leahy vetting of their trainees. The US Embassy defense attaché office in Yaoundé has issued diplomatic notes to try to unstick this roadblock, but little to no action has been seen to date.

TD 008 Clinician Training – Uganda

Objectives
This effort has been cancelled.

Period of Performance: 05/16/15-08/18/15
Total Estimated Budget: $2,769,776.00
Total Expenditure: $737,361.45
Technical Direction Status: *Completed, Closed.*

TD 009 NHLS BS&S Training – South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/15- 05/15/16
Total Estimated Budget: $335,608.00
Estimated Expenditure: $199,184.00
Technical Direction Status: Approved

Completed Activities
- Metabiota PM and PC communicated with DTRA CBEP personnel and A&AS support contractors via email and phone to discuss ongoing work and issues related to VAT and CLS shipping of the PortaCounts and iPads.
- The Metabiota PM communicated with CLS shipping team regarding VAT issues.
- The Metabiota PM and PC communicated regularly with NHLS point of contacts to discuss and work through logistical and programmatic issues.
- The Metabiota PM and PC submitted a CLS logistics support request for NHLS trainers and participants with the amended training dates.
- The video shoot has been approved by NHLS management, scouting of filming locations is in progress, and the video shoot is scheduled for 18-22 January 2016.
- Procurement was initiated on reagent-grade isopropyl alcohol for use with the PortaCounts during the fit testing training event.

Upcoming Activities
- The Master Trainer Orientation training for fit testing will take place Feb. 2-4, 2016.
- Biosafety and Biosecurity training video scripts will be finalized and videography initiated.
- OHASIS maintenance module stakeholders consulting and schedule development.
- Procurement of iPad adaptors for South African electrical systems.

Challenges
The VAT on the shipment of PortaCounts and iPads continues to arise as a potential budget issue, as the South African importer continues to submit an invoice for those costs to NHLS. Metabiota is communicating with CLS to resolve the situation and will keep the DTRA Country Manager apprised of the situation. Additionally, (b)(6) the developer of the OHASIS module, has been seconded on a temporary basis to NHLS Head Office to act in a senior position. Metabiota and NHLS are discussing impacts to the project and possible mitigations.

TD 010 One Health Epi Training – South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting

interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 12/31/15
Total Estimated Budget: $134,551.00
Estimated Expenditure: $83,153.00
Technical Direction Status: Approved

Completed Activities

- Finalized and Submitted the One Health Epidemiology - Republic of South Africa Landscape Analysis Report to DTRA CBEP representation.
- Conducted bi-weekly conference calls with DTRA CBEP personnel and A&AS support contractors.
- Conducted bi-weekly conference calls with South African stakeholders supporting the review and modification of One Health Epidemiology (OHE) materials.
- Conducted individual calls with each South African stakeholder as necessary to ensure comprehensive contribution to the landscape analysis deliverable.
- Dates for in-country event to support the review and recommendations for modification of One Health epidemiology materials finalized in concert with South African stakeholders and the Metabiota Project Team for February 17th-19th, 2016.
- Submission of TEP for in-country assessment.
- Submission of all travel related CDRLs in support of Metabiota Project Team requirements in South Africa including CCR, and CLS forms.

Upcoming Activities

- Receive and respond to questions or needs for clarification regarding the submitted One Health Epidemiology landscape analysis report.
- Identify final logistical needs for the in-country effort and submit the TAF in support of the in country meeting.
- Continue to ensure effective coordination of communication between stakeholders involved in the materials review process.
- Development of in-country meeting agenda.
- Development of final deliverable outline for detailing of recommendations for modification of existing one health epidemiology materials.

Challenges

In an effort to fill knowledge gaps among existing project contributors, several new stakeholders have been introduced to this project. Their respective contribution to the landscape analysis report was valuable; however, their onboarding during the later phases of this project will require some additional and unexpected time and effort from the original project team.

TD 013 One Health Epi Training – Uganda

Objectives

Increase the operational biosafety and bio-surveillance capacity of Ugandan and Nigerian National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified

training approach.

Period of Performance: 05/16/15- 02/29/16
Total Estimated Budget: $381,705.00
Estimated Expenditure: $202,930.00
Technical Direction Status: Approved

Completed Activities

- Implemented Cohort 9 Module 2 training between December 7-11, 2015 in Jinja, Kabarole, Uganda.
- Implemented Cohort 10 Module 1 training between December 14-18, 2015 in Fort Portal, Kabarole, Uganda.
- Submission of CCR, CLS, and TAF in support of Cohort 10 Module 2 trainings slated to take place in Fort Portal, Kabarole, Uganda.
- Held bi-weekly conference calls with DTRA CBEP personnel and A&AS support representation.
- Held bi-weekly conference calls with CDC-Uganda and Ugandan Ministry of Health to discuss implementation of trainings going forward.
- Submitted TTR 224 to DTRA CBEP.

Upcoming Activities

- Continuation of bi-weekly calls with all OHE project stakeholders.
- Continuation of bi-weekly calls with DTRA CBEP and Metabiota.
- Preparation for field travel to support the implementation of OHE training cohort 10 Module 2.
- Implementation of OHE Cohort 10 Module 2 training between February 1-5, 2016 in Fort Portal, Kabarole, Uganda.

Challenges

Prior to the implementation of Cohort 10 Module 1 training in Fort Portal, Kabarole, Uganda between December 14th-18th, 2015, CDC Uganda representation had mistakenly requested Metabiota to remove 5 individuals from the CLS form that had been submitted. However, these 5 individuals were still invited to the trainings. The logistics company representing SAIC did not offer these individuals per diem immediately, but did allow them to remain in hotel rooms that had not been reserved or paid for, all without notifying anyone else of the issue. By the second training day, our team became aware of the situation, and reported the issue back to our headquarters. DTRA CBEP offered a solution to the CDC error and a follow up CLS form was subsequently developed and submitted to support the inclusion of the 5 mentioned individuals in the training. The 5 trainees were offered per diem, and allowed to complete the training without being informed of this logistical mishap. The trainings as a whole completed without issue.

TD 014 Grant Writing Mentorship and Workshop – Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 7/21/15- 5/15/16
Total Estimated Budget: $113,982.82
Estimated Expenditure: $19,593.00
Technical Direction Status: Approved

Completed Activities

- Held bi-weekly calls with DTRA CBEP representation.
- Held follow up calls with DTRA CBEP and (b)(6) regarding resource concerns to support TD-014.
- Developed and submitted a resource reallocation solution in support of (b)(6) concerns over limitations in project resources to DTRA CBEP.
- Engagement of Metabiota Subject Matter expert in support of the review and improvement of participant research manuscripts.
- Development of SME engagement plan regarding the review of submitted research manuscripts.
- Request submitted to Kenyan Stakeholders (b)(6) and (b)(6) to provide salary history information for all intended Kenyan SMEs in support of IC agreement development.
- Receipt of 18 of 20 research manuscripts requested.
- Submission of TEP and CCR forms in support of Kenya Writing workshop in country event.

Upcoming Activities

- Onboarding of Selected subject matter experts to support the Writing Workshop.
- Finalization of dates for the workshop.
- Receive request for and resubmit TD-014 in support of additional stakeholders and potential change of writing workshop dates.
- Finalization of Independent Consultant agreements to support the onboarding of Kenyan SMEs.
- Begin the process of SME review of participant manuscripts.
- Continuation of bi-weekly stakeholder calls.
- Implementation of Kenya Writing Workshop.

Challenges

Forward progress on all phases of this effort is currently requisite on the submission of materials to Metabiota by in-country stakeholder (b)(6) and approval of proposed TD revisions by DTRA CBEP representation. Metabiota is additionally fielding concern from the identified Kenyan SMEs who believe that an increase in the proposed LOE is required to complete this effort, and that they should be valued at a rate equal to that of a US based SME with similar qualifications. However, this concern does not currently align with the limitations respective of our current ceiling price for this technical direction. In kind the lack of definition we are able to offer regarding LOE for each SME has caused a significant delay in the execution of IC agreements and vicariously a delay in the implementation of a manuscript review schedule.

TD 020 Initial Engagement SME Support – Gabon – Cancelled

Objectives
To provide technical support to DTRA CBEP regarding initial engagement activities with Gabonese ministerial officials, historical context and technical advice on gap analyses, and recommend CBEP engagement approaches with the Government of Gabon

Period of Performance: 12/14/15 - 3/31/16
Total Estimated Budget: $ 31,955.00
Estimated Expenditure: $1,876.00
Technical Direction Status: *Cancelled*

Completed Activities
- Developed and submission of technical proposal.
- Submission of Cable Clearance Request form.

Upcoming Activities
- This technical direction has been cancelled

Challenges
No Challenges to report in December.

CENTCOM

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats – Kazakhstan

Objectives
To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/15- 01/31/16
Total Estimated Budget: $391,056.00
Estimated Expenditure: $358,000.00
Technical Direction Status: Approved

Completed Activities
- Secured IMV laboratory access for CLS in-country staff and translators.
- International and local supply shipments arrived at IMV by 4 December, with a few outstanding items received on 7 December prior to laboratory practicums.
- Supply inventory conducted by Metabiota, IMV POC's, and Duke trainers. Inventory sheets reviewed and signed off on by Metabiota and IMV project personnel.
- Received and conducted final review of printed materials on 4 December.

- In-country preparations of reagents and assays for laboratory practicum conducted at IMV on 3-4 December to ensure equipment and supplies were in place and running according to training requirements.
- Pre-coordination and final preparations executed on 4-6 December, to include meeting with EZS in-country logistics personnel, set up of interpretation booth, laboratory practicum set-up, review and final revisions to training agenda, IMV walk through and coordination with key personnel and partners in preparation for the event.
- In-country final meeting with CBEP, IMV, and Duke-NUS, on 6 December to review and prepare for training kick-off and schedule on 7 December.
- CLS in-country support installed interpretation equipment and arranged catering services.
- Completed and submitted CDRL 11 Transfer of Equipment and Materials to IMV.
- Implementation of second Sample Collection and Diagnostics Training on MERS-CoV in Camels and Bats from 7-11 December, 2015 – participant attendance rate at 95%.
- Distribution and collection of Participant Feedback Report – participant satisfaction rate at 96%.
- Completion and submission of Training Trip Report
- Initiated completion of final project deliverables to close out TD 002.

Upcoming Activities

- Project close out including final billing against the project.
- Receipt and approval of all sub-contractor invoices and reports.
- Financial revisions to the project will be submitted to CBEP for review and adjustment, to realign funds across project CLINS.

Challenges

A minor instance of miscommunication on expectations and requirements occurred on 3 December when Metabiota was informed that the IMV Director must approve and sign the event syllabus. Metabiota used Russian-speaking staff to translate the documents in-house quickly so as to avoid a delay in the training event. In addition, on the first day of training the IMV Director decided last minute that he did not want the event held at the institute. Trainers, trainees, and coordinators had to wait for over an hour until the situation was resolved and the Director allowed entry into the facility and the training to move forward.

TD 003 Bat Borne Virus from Annual Bat Cull – India – Cancelled

Objectives

This effort has been cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: *Cancelled*

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop – Jordan

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/15 to 05/15/16
Total Estimated Budget: $488,040.00
Estimated Expenditure: $243,094.00
Technical Direction Status: Approved

Completed Activities
- Abstracts received and reviewed by the Scientific Advisory Board.
- Scientific Advisory Board, Gryphon, Metabiota, and CBEP selected placement for abstract submitters: oral presentation, poster session, mentorship, or rejection.
- Gryphon, Metabiota, and CBEP selected abstract submitters to receive travel support.
- Continued preparations for logistical requirements, to include estimation of costs, itinerary, and agenda for the justification of the Networking and Proceedings Day on 9 March, 2016.
- Submitted the travel CLS for Scientific Advisory Board members and invited Speakers receiving travel support.
- Submitted the travel CLS for presenters receiving travel support.
- Submitted the CCR for USG employees attending the March 2016 Conference.
- Submitted the Master CLS for in-country ground travel and logistics support request for March Conference for an estimated 115 attendees (confirmed to date).
- Invited speakers, Scientific Advisory Board members, presenters, and participants not receiving travel support to participate in the Petra Networking Day and participate in the Marriott Hotel Block.
- Arranged Jordan visas for Metabiota and Gryphon personnel, finalized travel itineraries and flight arrangements.
- Completion of JKO trainings for US citizens receiving DoD travel support.
- Sent remaining invitations for speakers and panel board members.
- Continued revisions of conference agenda and panel members with Gryphon, CBEP, and the Scientific Advisory Board.
- Continued outreach activities for conference to increase event participation.
- Continued communication and collaboration with CBEP personnel, in-country partner RSS, Gryphon Scientific, and CLS to coordinate logistical requirements and continue event planning.

Upcoming Activities
- Final submission of travel CLS forms for presenters and speakers.
- Final CCR submission for non-USG, US attendees.
- Completion of conference materials for submission and printing with CLS.
- Submission of CLS form for Proceedings Book.
- Continue to work with key CBEP personnel, Gryphon, RSS, and CLS to monitor travel requests, participant applications, and finalize CLS logistical requirements for March, 2016 Conference.

Challenges
The project schedule required deadline adjustments due to the December holidays. Metabiota has worked in close coordination with Gryphon, CLS, RSS, CBEP and A&AS team members to ensure clear communication of the revised deadlines and that all materials and requirements are submitted, reviewed, and processed with adequate timing for the March conference.

TD 005 Long Distance Learning – Iraq – Cancelled

Objectives
This effort has been cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: *Cancelled*

EUCOM

TD 011 TADR Activity Project 4 (TAP-4) – Ukraine

Objectives
The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/15/15-01/31/16
Total Estimated Budget: $116,879,54
Estimated Expenditure: $75,864.00
Technical Direction Status: Approved

Completed Activities
- Metabiota PM and PC began drafting final report summarizing the work done in Ukraine, including those items preformed by the subcontractor SAFOSO.

Upcoming Activities
- Metabiota will finalize and submit the final report.

Challenges
None.

TD 012 Ukraine Project 2 – Ukraine

Objectives
This effort has completed

Period of Performance: 05/16/15-09/30/2015
Total Estimated Budget: $264,788.00

Total Expenditure: $264,788.00
Technical Direction Status: *Completed, Closed* (Transferred to BTRIC TO4)

TD 016 Georgia Geographic Information Systems – Georgia

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15-05/15/16
Total Estimated Budget: S139,514.62
Estimated Expenditure: S13,820.00
Technical Direction Status: Approved

Completed Activities
- Metabiota PM, PC, and SME have participated in calls led by the project teams of GG-19, GG-20, and GG-27 to understand project schedules and goals.
- Metabiota PM and PC revised SOW and other subcontract documents and conducted multiple back and forth discussions and negotiations with SME and the grants/contracts office at University of Florida in preparation for fully executing the subcontract to retain FOIA (b)(6) FOIA (b)(6) and his team for their GIS expertise.
- Metabiota SME provided additional input to the GG-27 project team regarding GIS software options and computer specifications for the AJ component of the project.
- Metabiota submitted travel documents and travel authorization request for SME team to travel to Tbilisi in late January/early February to meet with and assist the Georgian collaborators.

Upcoming Activities
- Metabiota SME is working to bring RDAs up to speed on the CBR projects in order to efficiently provide GIS data analysis support and mentoring to the Georgian scientists.

Challenges
The CBR project teams have rescheduled teleconferences and meetings a number of times, which has made coordination of the GIS portion of this work challenging. However, it appears that the coordination of these projects is back on track and the Metabiota PM is communicating with the CBR project teams' leads outside of the scheduled teleconferences and meetings as a risk mitigation.

TD 017 Georgia Subject Matter Expert Grantsmanship – Georgia

Objectives
Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: S136,732.00
Estimated Expenditure: S37,337.00

Technical Direction Status: Approved

Completed Activities

- Metabiota PM and PC held regular communications with the SMEs to discuss the mentorship plan and materials, and the strategy for moving forward without firm commitments from NCDC or LMA.
- Metabiota PM, PC, and SMEs communicated with DTRA and A&AS via email and phone to discuss project status and obstacles.
- Metabiota submitted travel documentation and a travel authorization request for a trip to Georgia to occur in late January/early February.

Upcoming Activities

- Upon identification of project participants by NCDC and LMA leadership, Metabiota SMEs will begin working with the mentees on initial coordination and brainstorming of possible grant topics to be elaborated upon during the mentorship.

Challenges

It does not appear that at this time, NCDC or LMA are sold on the concept of this mentorship. In recent discussions, both agencies appear reticent to commit personnel time to the program. Additionally, the holidays and work schedules of the two agencies may delay the start of the mentorship program. Mentorship requires a firm commitment of time and energy by the mentees (and by extension, their chain of command) in order to be successful. If NCDC and LMA cannot or will not commit wholly to Grantsmanship mentoring, it may be necessary to reevaluate in conjunction with DTRA the scope of this project.

TD 018 Georgia Visiting Scientist Genomics – Georgia

Objectives

Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $384,435.00
Estimated Expenditure: $104,161.00
Technical Direction Status: Approved

Completed Activities

- The Metabiota PM and PC held email and phone communications with the Visiting Scientist (VS) to discuss current activities and assist the VS with any issues requiring programmatic input.
- Metabiota VS continued mentoring (b)(6) with the comparative genomic analysis of FSU anthrax vaccine strains. The Georgian STI strain appears to have changes compared to the recently published STI strain consisting of several SNPs, indels, and VNTR copy number alterations. Further analyses are being conducted.
- Metabiota VS is mentoring (b)(6) in multiple areas of introductory molecular evolution. These efforts covered topics such as phylogenetic analysis of sequence data and the probabilistic methods underpinning tree generation; character state methods for cluster analysis

of sequence data; and the assessment of phylogenetic relationships, among other topics. The VS also provided instruction on how to use software programs for these analyses.

- Metabiota VS mentored the Eliava Institute virology team on quality assessment analyses of NGS raw data generated at the Lugar Center. Topics included generating sequence quality run reports, assessment of basic run statistics, and other quality metrics which may shed light on run issues.
- Metabiota continued to work with (b)(6) on NGS-based characterization of the *Shigella*-like bacterial strain that was identified and sequenced at the Lugar Center. Preliminary annotation of the putative virulence plasmid sequence was completed and identified 75 genes.
- Metabiota VS worked with (b)(6) to create a staff capability matrix to better understand and deploy staff on various tasks, and to identify those who may need additional mentoring.

Upcoming Activities

- Metabiota VS will continue mentoring in all above mentioned mentoring areas.

Challenges

No significant challenges were encountered in December. However, the Metabiota VS did continue to note that many of the Georgian scientists working on genomics and bioinformatics projects lack the basic fundamental training on molecular evolution that most western-trained scientists possess. This lack in fundamentals appears to often be masked by assistance with western collaborators, and it may impede true understanding of the utility of genomic analysis and the scientific independence of the NCDC staff.

TD 019 Georgia Visiting Scientist Microbiology – Georgia

Objectives

Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $382,330.00
Estimated Expenditure: $139,500.00
Technical Direction Status: Approved

Completed Activities

- The Metabiota PM and PC held regular calls with the Visiting Scientist (VS) to discuss current activities and assist the VS with any issues requiring programmatic input.
- Metabiota VS continued working on the TAP-11 validation plan with NCDC scientist (b)(6) (b)(6) The Metabiota VS also contacted Ellie Labs to try to obtain additional information about their kits for inclusion in the validation plan.
- The Metabiota VS further participated in a meeting between (b)(6) (LMA) and (b)(6) (NCDC) regarding several topics including serology and bacteriology training for a collaboration between LMA and Jordanian researchers; BAA submissions regarding African swine fever, and *Brucella* bacteriology testing. Related to this last item, Metabiota VS has coordinated with (b)(6) who has agreed to resupply LMA with Bruce Ladder reagents.

- Metabiota VS has assisted Lugar Center and Batumi staff with troubleshooting of the PCR protocols and reagents for the avian influenza CBR work with University of Cambridge. The Metabiota VS helped coordinate with all entities, including NCDC, Batumi, Cambridge, Erasmus, and APHA. After extensive troubleshooting, and multiple secondary checks, it appears that at the minimum, reagent quality is a major issue. Metabiota VS is communicating with project leads to find a way to secure new reagents. It is possible additional issues will be found after new reagents are secured.
- Metabiota VS assisted NCDC with the final preparatory steps for the installation of the GCMS instrument secured through a grant from UNICRI. Helium gas was procured, and argon gas procurement is proceeding. Metabiota VS has repeatedly recommended that the tables that NCDC leadership has selected as the instrument's resting place be welded together or that a new table be purchased/manufactured, but NCDC leadership has not concurred with this assessment.

Upcoming Activities

- Metabiota VS expects to continue assisting with the troubleshooting of the avian influenza PCR reaction at the Lugar Center, which will then be followed by running confirmatory diagnostic tests on samples which are putatively positive for HPAI recently collected from waterfowl in Georgia. In conjunction with this project, the VS expects to need to make a trip to the Batumi Zonal Diagnostic Laboratory to mentor staff there in various protocols and troubleshooting techniques.
- Metabiota VS expects to help NCDC staff complete work on the validation plan for GG TAP-11.
- Metabiota VS will continue to participate in coordination calls and meetings for CBR projects funded by DTRA and support and mentor Georgian scientists involved in those projects as needed.

Challenges

No challenges encountered in December.

PACOM

TD 006 Nipah Research Activity Project – Philippines – Cancelled

Objectives

This effort has completed.

Period of Performance: 06/01/15 – 09/30/15
Total Estimated Budget: $874,846.00
Total Expenditure: $11,985.82
Technical Direction Status: *Cancelled*

TD 007 Regional Baseline Assessment – Southeast Asia

Objectives

Characterize the region based on the disease landscape, organic regional capabilities, and external factors that impact CBEP objectives, identify needs and areas of overlap with other stakeholders, and provide overarching strategic guidance & goals to CBEP PACOM Country Managers in the development of country engagement strategies.

Period of Performance: 05/16/15 10/31/15
Total Estimated Budget: S850,489.00
Total Expenditure: $850,489.00
Technical Direction Status: Approved

Completed Activities

- Held 11 December review meeting with CBEP leads to conduct a presentation and review of APLA in preparation for final submission on 18 December.
- Secured additional SME support to complete revisions and edits needed to finalize the APLA and respond to comments received by CBEP.
- Internal team leads and functional teams continued revisions and QAQC required to finalize the document.
- Developed maps and graphs to provide greater visual detail for data in all sections of the document.
- Developed slide deck and coordinated with SMEs for planned out-briefing on 7 January. Rescheduled event to end of month and will continue coordination in response to change in timeframe.
- Finished revisions and edits to all sections of the APLA, and completed final submission of the electronic document on 18 December and a hard copy of the document on 21 December.

Upcoming Activities

- Finalize presentation and deliver 26 January out-briefing with CBEP leads, CMs, and Metabiota SMEs.
- Close out project activities following successful out-briefing.

Challenges
No Challenges to report in December.

TD 015 Health Informatics Support – Vietnam

Objectives
This effort has completed.

Period of Performance: 05/16/15 06/30/15
Total Estimated Budget: S51,804.80
Total Expenditure: $51,804.80
Technical Direction Status: *Completed, Closed*

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing- Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 - 04/30/16

CLIN 1002 – Labor

Program Manager:
(b)(6) led project activities for this effort. including communications with DTRA/A&AS to communicate project status. He also led coordination with the Metabiota training team to discuss logistics and further solidify the training details (b)(6) also participated in communications with DTRA's logistics contractor to discuss and help coordinate PPE delivery (b)(6) also worked with (b)(6) (b)(6) to identify a new trainer after one of the original training team resigned her position.

CLIN 1003 – Materials and Supplies
No material costs are being invoiced this period.

CLIN 1004 – ODCs
No ODC costs are being invoiced this period.

CLIN 1005 – Travel
No travel costs are being invoiced this period.

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/2015 - 05/15/2016

CLIN 1002 – Labor

Program Manager:
Project activities for the month of March were focused on implementation of the conference from 7-9 March 2016. The PM (b)(6) and team members departed on 5 March for Amman, Jordan and conducted a pre-planning coordination meeting on 6 March with RSS, CBEP, and TTI to ensure all requirements were organized and the event venue, and logistics were ready for implementation on the morning of the 7th. She participated on the organization committee in preparation for and throughout the entire event, effectively cooperating and communicating to address conference needs, shifting logistics, and to resolve issues/changes as they arose allowing for the successful implementation of the event. The PM implemented the conference, overseeing all logistics for the event. coordinating directly with TTI and other team members to ensure smooth operations and delivery of the technical requirements. Following execution of the event, the PM has participated in routine project calls, coordinated submission of CDRLs and the proceedings book, and investigated options for video production services. In addition, the PM attended a hot wash with the project team and CBEP in DC to review implemented activities, open action items (proceedings, photo sharing, etc.). Additional activities during this time included review of LOE, submission of routine deliverables, and continued project coordination towards close out.

Research and Data Analysts:
The Project Coordinator (b)(6) supported the PM and project team in execution of the conference in Amman, Jordan, participating in all pre-planning activities and working directly with TTI to ensure all participants safely arrived at the event, and coordinated any last minute travel changes or logistic requirements, as needed. She participated on the organization committee in preparation for and throughout the entire event, effectively cooperating and communicating to address conference needs, shifting logistics, and to resolve issues/changes as they arose allowing for the successful implementation of the event. RSS collaborators and their team were very flexible and accommodating with minor changes required for the planned itinerary (e.g., pushing the coffee break up an hour on day 1, adding items to the lunch menu on day 2, filming interviews in the RSS lobby, and having the poster session tent stay up an additional half-day).

(b)(6) coordinated with Logistics Support, they were responsive, professional, and assisted above and beyond their requested services. TTI helped the organizing committee in all aspects of conference planning, preparation, execution, and closing out. Staff was on call 24/7 before and after the conference organizing travel, audio/visual, catering, and overall event logistics. (e.g., providing runners to direct people between the opening ceremony and conference venue, providing last-minute cars and drivers to participants, supporting unexpected needs and requests from travelers who needed additional travel or logistical services due to illness/ family emergency/ security issues/ etc.)

In addition (b)(6) followed up with all participants after the event, assisting in the development of feedback for the conference website, participants were actively engaged and enthusiastic throughout the two-day conference, and the networking and proceedings day. Metabiota had an almost perfect attendance with active conversations, presentations, and did not run into any logistical challenges during coordination and execution of the event FOIA (b) participated in the hot wash, developing the after action draft report, and submission of the CDR1 and proceedings book for review and approval. (b)(6) of Gryphon Scientific supported administrative and contractual requirements during this past month to facilitate compliance, and submission of project deliverables (monthly reporting and invoicing) required under the Gryphon Scientific sub-contract governing project execution. She participated on the organization committee in preparation for and throughout the entire event, effectively cooperating and communicating to address conference needs, shifting logistics, and to resolve issues/changes as they arose allowing for the successful implementation of the event.

Subject Matter Expert I:

SMEs FOIA (b)(6) and (b)(6) traveled to Amman, Jordan to execute the conference with the MB project team. They facilitated the event, as part of the organizing committee, to include poster set up, note taking, timekeeping, presentation uploads, and technical coordination on the event, as well as scientific engagement and collaborative discussions with all participants (b)(6) (b)(6) assisted in facilitation of the networking and proceedings day. Both SMEs attended the hot wash remotely, and assisted in completion of the proceedings book for submission to CBEP, to include technical review of all included papers. They followed up with participants following the conference, and assisted in the development and compilation of participant feedback.

Subject Matter Expert III:

(b)(6) executed the conference in March, to include leading the technical engagement for this event. She worked closely with (b)(6) of RSS to facilitate conference proceedings to include MCing the event, chairing sessions, ensuring collaborative discussions. She participated on the organization committee in preparation for and throughout the entire event, effectively cooperating and communicating to address conference needs, shifting logistics, and to resolve issues/changes as they arose allowing for the successful implementation of the event. She participated in all pre-planning, and post-conference activities to include attending the American Corner with the US Embassy in Amman on 6 March, and the hot wash conducted with the team in DC (b)(6) engaged publications to facilitate submission of post-conference announcements/write-ups in coordination with CBEP and the project team. In addition (b)(6) led the development of the proceedings book for submission, and oversaw team activities for all Gryphon personnel. She participated in routine project calls and ensured project deliverables were submitted on time and according to schedule.

CLIN 1003 – Materials and Supplies

Material and supply costs were incurred to support the development of the password protected site, the conference proceedings page on the website, update case studies, and continue to provide services updating additional information on the conference website. In addition, costs were incurred to secure and provide services maintaining the conference app. Costs were also incurred for the graphical design of the conference certificate, posters, and agenda card. Additionally, costs were incurred for international communications for (b)(6) to execute program coordination while in Amman.

CLIN 1004 – ODCs

DBA was applied to the project for Metabiota and Gryphon Scientific employees to travel to Jordan for the conference deliverable in March.

CLIN 1005 – Travel

Travel costs include lodging, airfare and Per Diem for (b)(6) to travel to Amman Jordan for the final workshop. Additionally, costs incurred include expenses to purchase visas for Gryphon Scientific as well as airfare for Gryphon Scientific's FOIA (b)(6)

TD 005 Iraqi Distance Learning – Canceled and will not be invoiced

TD 006 Nipah Research Activity Project- Canceled - Invoiced to Completion Invoice #725

TD 007 Regional Baseline Assessment - Invoiced to Completion Invoice #725.

TD 008 Clinician Training – Invoiced to Completion Invoice #726.

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015-05/15/2016

CLIN 1002 – Labor

Program Manager:
(b)(6) led project activities for this effort. including communications with DTRA/A&AS to communicate project status. He led coordination with the in-country NHLS team to work through financial and administrative issues (b)(6) also spoke with the University of British Columbia to determine the technical requirements necessary for OHASIS module development in the event that the in-country developer is unable to complete the task.

Grants Manager:
(b)(6) led in-country activities for this effort, working with local vendors, banks, and the administrative staff at NHLS to resolve a financial issue with the videography subcontractor. (b)(6) also participated in calls with (b)(6) to work through additional financial and administrative issues.

Trainer 1:
(b)(6) participated in project activities on this effort, including communications with DTRA/A&AS to communicate project status. She also coordinated with the in-country NHLS team to work through some financial and administrative issues.

Research and Data Analyst:
(b)(6) and (b)(6) assisted in working through financial and administrative issues including invoicing and the availability of (b)(6) to complete the OHASIS development.

CLIN 1003 – Materials and Supplies
No material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs
No other direct costs are being invoiced this period.

CLIN 1005 – Travel
Travel costs being invoiced this period include lodging and per diem for the NHLS staff to conduct fit testing for deliverable 2.

TD 010 One Health Epidemiology - South Africa

Objectives
Define the South African Training One Health and Epidemiology training landscape, and oversee the review and development of recommendations for adaptation of existing One Health Epidemiology Training Materials while supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 - 03/31/2016

CLIN 1002 – Labor

Program Manger:
Metabiota Africa Regional Program Manager (b)(6) ed project activities during this time period. He led bi-weekly conference calls with DTRA CBEP Representation, and separate bi-weekly calls with South African Project Stakeholders. (b)(6) provided oversight to the development and submission of the final project deliverable. He ensured that all relevant technical information gained during Metabiota's in-country meetings was integrated into the final project deliverable, and that the project was closed appropriately.

Trainer 1:
Metabiota Project Manage (b)(6) provided coordination support to the Program Manager and SME throughout this period. She participated in bi-weekly conference calls with DTRA CBEP representation and the South African project stakeholders. She contributed to the final project deliverable by providing technical input and general edits.

Subject Matter Expert 2:
Metabiota Staff Scientist (b)(6) provided technical leadership in the development of the final project deliverable during this period. She participated in bi-weekly conference calls with DTRA CBEP representation and the South African project stakeholders. She additionally provided technical oversight towards the development of the final project deliverable through ensuring that information integrated into the report was relevant to project scope and general scientific best practices. She additionally supported the PM by ensuring appropriate project closeout.

CLIN 1003 – Materials and Supplies
No material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs
No other direct costs are being invoiced this period.

CLIN 1005 – Travel
Travel costs incurred include lodging, airfare and per diem for subject matter exper (b)(6) (b)(6) to travel to South Africa and lead/participate in face to face landscape analysis meetings. While in South Africa a car service was used to transport Metabiota staff. To meetings and to the airport.

TD 014 Grant Writing Mentorship and Workshop – Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 07/02/15-04/30/16

CLIN 1002 – Labor

Program Manager:

Metabiota Regional Program Manager for Africa, (b)(6) continued to manage and provide oversight to this project. He maintained bi-weekly communication with DTRA CBEP representation and worked to address their concerns on quantifying the SME evaluation process (b)(6) worked to maintain regular communication with the project team as they continued their evaluation of manuscripts. He worked to integrate updated project deliverable language into final deliverables.

Subject matter 1:

Metabiota Project Manager (b)(6) led coordination efforts and provided technical support during this period. (b)(6) attended, recorded, and provided technical insight as necessary during bi-weekly calls. She additionally provided support to the PM and AEP leadership during the integration of new project deliverable requirements.

Metabiota independent consultant (b)(6) continued his work towards the evaluation and review of research participant manuscripts. He maintained communication with the PM and ensured compliance and understanding of the updated deliverable requests.

Metabiota independent consultant (b)(6) continued his work towards the evaluation and review of research participant manuscripts. He maintained communication with the PM and worked with lead SME (b)(6) to understand requests for updated deliverables.

Metabiota independent consultant (b)(6) ontinued his work towards the evaluation and review of research participant manuscripts. He maintained communication with the PM and worked with lead SME (b)(6) o understand requests for updated deliverables.

CLIN 1003 – Materials and Supplies

Costs being invoiced include access to KENVET: an investigation into a human anthrax outbreak in central Kenya for FOIA (b)(6) d training materials for the workshop.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced this period.

CLIN 1005 – Travel

Airfare, Lodging, ground transportation and Per Diem costs are being invoiced this period fo (b)(6) (b)(6) and FOIA (b)(6) complete the Writing Workshop in Kenya in February. Per Diem costs for Metabiota SMEs (b)(6) and (b)(6) are being invoiced for their time conducting the workshop, their other travel costs have already been invoiced. Costs for purchasing visas for Metabiota staff to enter Kenya to complete the training are also being invoiced.

TD 015 Health Informatics Support Services – Vietnam - Invoiced to completion on Invoice #239

TD 016 Georgia GIS

Objectives

Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) led project activities for this effort, including communications with DTRA/A&AS to communicate project status. He also led coordination with the UF SME team to discuss project needs and upcoming travel. (b)(6) filed travel documentation for (b)(6) in collaboration with (b)(6) (b)(6) also worked with (b)(6) to educate the UF contracts office on reporting requirements for T&M and FFPLOE contracts. (b)(6) also participated in project calls for the CBR projects on this project.

Subject Matter Expert 1:

(b)(6) participated in project activities on this effort, including communications with DTRA/A&AS to communicate project status. She also coordinated with the UF team to discuss invoicing and travel logistics. (b)(6) also participated in project calls and observed the videoconferences with the GG-27 and AJ TAP-11 teams.

Subject Matter Expert 2:

Narrative covers the period from 1 October 2015 – 31 March 2016. (b)(6) served as the lead SME on the GIS team. He participated in all CBR project calls, and worked with the CBR project teams to identify GIS mentoring and research specific needs. (b)(6) also reviewed current geospatial modeling literature as background for preparing a plan for GG-27 data analysis and mentoring. He worked with (b)(6) and (b)(6) to establish a path forward for the GG-27/AJ TAP-11 project. He and (b)(6) conducted videoconferences with the GG-27 and AJ TAP-11 teams.

(b)(6) additionally traveled to Tbilisi Jan. 31-Feb. 6 in order to: participate in collaborator meetings on GG-10, GG-20, GG-27 (coordinated by CH2M Hill and Avila Scientific); to conduct a on-site visit at the Lugar Center GIS Center and mentor GG-19 personnel on project-related geospatial data; and to conduct a site visit at LMA's GIS Laboratory to provide mentorship on data entry and editing on GG-20 and GG-27. (b)(6) also worked with (b)(6) to file travel documentation for (b)(6) (b)(6) upcoming trip to Tbilisi.

Research and Data Analyst:

Narrative covers the period from 1 October 2015 – 31 March 2016. (b)(6) provided background information on AJ biosurveillance efforts to the team and worked with (b)(6) (b)(6) to establish a path forward for the GG-27/AJ TAP-11 project. (b)(6) Ludwig worked with the GIS teams for GG-19 on the analysis of data and provided guidance via remote communications. (b)(6) conducted videoconferences with the GG-27 and AJ TAP-11 teams. These videos are being placed online on the SEER Lab website. (b)(6) additionally traveled to Tbilisi Jan. 31-Feb. 6 in order to: participate in collaborator meetings on GG-10, GG-20, GG-27 (coordinated by CH2M Hill and Avila Scientific); to conduct a on-site visit at the Lugar

Center GIS Center and mentor GG-19 personnel on project-related geospatial data; and to conduct a site visit at LMA's GIS Laboratory to provide mentorship on data entry and editing on GG-20 and GG-27. Ms. Ludwig also worked to get up to speed on the GG-20 and GG-27 projects in advance of her April trip to Tbilisi.

CLIN 1003 – Materials and Supplies
No Material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs
DBA costs were incurred for FOIA (b)(6) to Tbilisi Georgia to provide GIS mentorship.

CLIN 1005 – Travel
Travel costs for the trip in January will be invoiced in April after the subcontractor invoice is correcte.

TD 017 Georgia SME Grantsmanship

Objectives

Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) led project activities for this effort. including communications with DTRA/A&AS to communicate project status. He also led coordination with the Avila team to discuss project needs and upcoming travel. (b)(6) filed travel documentation for the Avila team's upcoming trip in April (b)(6) participated in a teleconference with the interim director of the Laboratory of Ministry of Agriculture to seek their continued cooperation on this project and the potential identification of additional mentees.

Subject Matter Expert 1:

(b)(6) participated in project activities on this effort, including communications with DTRA/A&AS to communicate project status. She also coordinated with the Avila team to discuss project needs and upcoming travel (b)(6) drafted travel documentation for the Avila team's upcoming trip in Apri (b)(6) participated in a teleconference with the Avila team and LMA to seek their continued cooperation on the project.

Subject Matter Expert 2:

(b)(6) ed the Grantsmanship mentoring on this project, holding weekly teleconferences with the mentees at LMA. They worked with (b)(6) to file travel documentation for their upcoming trip to Tbilisi (b)(6) have begun working with the mentees to identify potential collaborators and prepare their draft white papers for submission to Horizon 2020 and ISTC for possible funding.

CLIN 1003 – Materials and Supplies

No material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced during this period.

CLIN 1005 – Travel

No travel costs are being invoiced this period.

TD 018 Georgia Visiting Scientist Genomics

Objectives

Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) led project activities for this effort. including communications with DTRA/A&AS to communicate project status. He also led coordination with (b)(6) to discuss project implementation. He drafted and edited narrative for reporting purposes, and reviewed and approved subcontractor invoices and reports.

Visiting Scientist

(b)(6) provided mentorship on genomics for the Georgian scientists at NCDC and LMA who do work at the Lugar Center. Specifically (b)(6) continued working with (b)(6) and (b)(6) on their comparative genomics analyses of *F. tularensis* strains. He also mentored (b)(6) and (b)(6) in optimizing draft genome assembly strategies and performing annotations using the Georgian Samtredia *Shigella* strain (described in past reports as a *Shigella*-like bacteria isolated in Georgia). (b)(6) is assisting the Georgians in developing a white paper on this *Shigella* work to potentially be used in seeking additional funding. (b)(6) also continued working with (b)(6) on the assembly of the draft genome of the Georgian anthrax STI vaccine strain.

CLIN 1003 – Materials and Supplies

No material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs

DBA allocation is applied to this contract for FOIA (b)(6) to continue work in country.

CLIN 1005 – Travel

No travel costs are being invoiced this period.

TD 019 Georgia Visiting Scientist Microbiology

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) led project activities for this effort, including communications with DTRA/A&AS to communicate project status. He also led coordination with (b)(6) to discuss project implementation, and provided guidance on what directions to gently steer the Georgians in with regards to future project implementation and seeking additional funding (b)(6) wrote a letter to the TAP-11 team indicating that Metabiota's position is that the project is IRB-exempt (b)(6) also participated in the CBR project calls for TAP-11.

Subject matter 1:
(b)(6) participated in project activities on this effort, including communications with DTRA/A&AS to communicate project status. She also coordinated with (b)(6) to discuss project implementation. (b)(6) also participated in drafting narrative for reporting purposes.

Visiting Scientist
(b)(6) provided mentoring to the Georgian scientists at NCDC and LMA. He also participated in regular project coordination calls with (b)(6) and drafted narrative and bullets for reporting purposes. He assisted the TAP-11 PI on navigating the IRB issues and facilitating communications between Fluidigm Labs (the provider of the kits) and NCDC (b)(6) also began working with a Lugar Center scientist (b)(6) on drafting a manuscript for research on pathogens in bats. He is providing guidance in conjunction with (b)(6) from CDC. Dr. Arner is also investigating reference manager solutions (EndNote, Zotero) for the Georgian scientists. He further provided guidance and inputs to microbiologists at Lugar Center on a poster submission for a conference to occur in Munich. (b)(6) also provided guidance and support in helping LMA evaluate which AIV probes to use. He worked with Lugar Center scientists on developing responses to reviewer comments on a *Yersinia* white paper proposal for the DTRA BAA. He has also been coordinating with both the Batumi Zonal Diagnostic Laboratory and Cambridge to discuss AIV diagnostic troubleshooting and at the end of the month identified a need for a trip to Batumi to do mentoring.

CLIN 1003 – Materials and Supplies
No material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs
DBA allocation was applied to this project FOIA (b)(6) continue providing support in country.

TD 020 Gabon Initial Engagement SME Support - Invoiced to Completion Invoice #729.

TD 021 Field Epidemiology Training - Iraq

Objectives
Conduct remote trainings on epidemiology and BS&S Biorisk management for one cohort of Iraqi scientists, and also engage them to familiarize them with the Iraq National Biological Emergency Response Plan and work on a gap analysis of said plan. Conduct remote trainings on epidemiology for a second cohort.

Period of Performance: 02/19/16 – 05/15/16

CLIN 1002 – Labor

Program Manager:
PMs (b)(6) have supported all project activities to date (b)(6) has worked closely with CBEP, in-country and WMRI SMEs to facilitate project kick-off, receipt of training materials, review of BS&S needs and establishment of project meetings and routine calls supporting this engagement. They conducted a meeting with Watermark Risk Management International to facilitate their engagement on the project providing BS&S SME support developing and adapting training materials. The MB PM team held an in-person meeting with FOIA (b)(6) on 29 March to discuss project details and LOE projections. In addition, both PMs have participated in interviews and hiring of Epi Trainers as SMEs for this project, and will continue to support these efforts until the project team is complete, and fully engaged. The PMs have reviewed sub-contracting requirements for engagement of WMRI, and initiated review of the received BS&S materials, in addition to overseeing the project team. The team conducted meetings with Iraq FETP POC, (b)(6) to collect existing epidemiology training materials. The team also received a list of topics (b)(6) believes should be included in the trainings, and we will initiate research into Tephinet, CDC, and WHO developed materials for inclusion / adaptation once the Epi Trainers are on board.

Subject Matter Expert 1:
SMEs (b)(6) have supported project activities in direct coordination with the PMs. They have participated in routine project calls, meetings, and assisted in the identification and engagement of the project team.

Specifically, (b)(6) has utilized her regional network to engage potential partners, SMEs, and FLNs for training activities. She has met with WMRI to review BS&S needs for the project and will work closely with them for the development and implementation of BS&S training components. She received existing and approved BS&S training materials from CBEP and began coordinating and performing review of the materials for use during the training. The team will meet to discuss material review and the way forward in early April.

(b)(6) has coordinated all project activities to include development of the project schedule and CDRL requirements, initiation and participation in interviews with candidates for Epi Training positions, coordination of conference calls, and meetings to support engagement with in-country POCs and determination of participants, training topics and available materials for approval and adaptation on the project. She coordinated submission of a mutual non-disclosure agreement to American Councils, in support of identifying FLN trainers for this event through their in-country network and past training engagements in the region. Should they be successful in identifying appropriate FLNs, we will request approval to contract with them for this project.

Subject Matter Expert 2:

WMRI [FOIA (b)(6)] participated in in person and teleconference meetings with DTRA, CBEP A&AS and Metabiota personnel. He worked to assist [(b)(6)] with development of information requirements and recommendations for project execution. He provided email and phone communications to support in engagement with in country SMEs.

Active Projects

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing - Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 11/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) held calls and email communications with DTRA/A&AS to discuss ongoing logistical issues surrounding the execution of the training event that took place 9-11 August. (b)(6) also held calls and email communications with the Metabiota training team for this effort (home locations in DC, Yaoundé, and France). (b)(6) also participated in communications with CLS regarding both PPE delivery and event logistics.

Trainer 1:
(b)(6) participated in calls and email communications with DTRA/A&AS to discuss ongoing logistical issues surrounding the execution of the training event. (b)(6) also participated in communications with the Metabiota training team for this effort. (b)(6) worked with our travel coordinator to arrange for travel logistics for our training team. (b)(6) additionally traveled to Yaoundé, Cameroon 5-13 August to conduct the training, in the role of both lead coordinator and SME trainer.

(b)(6) participated in calls and email communications with the (b)(6) to prepare for the PPE/VHF training. (b)(6) additionally assisted DTRA CBEP with pre-training equipment delivery coordination as well as pre-training communication and coordination with MinDef leadership.

Research and Data Analyst:
(b)(6) (b)(6) provided support for the in country training event including printing of materials. (b)(6) also provided administrative support to Trainers (b)(6) and (b)(6) throughout the training.

Scientific Mentor:
(b)(6) participated in calls and email communications with the Metabiota training team. (b)(6) provided subject matter expertise throughout the lecture and hands-on PPE activities throughout the training event as well as translation and interpretation support.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
DBA was applied for the performers at a FOIA (b)(6) of total compensation.

CLIN 1005 – Travel
Travel costs were incurred for trainers (b)(6) Mentor (b)(6) (b)(6) to execute the training event including lodging, per diem and ground transportation as well as visa fees. Also invoiced are the foreign transaction fees for purchases completed in country by (b)(6) (b)(6)

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015 – 11/15/2016

CLIN 1002 – Labor

Program Manager:
(b)(6) held communications with the South African team working on this project to discuss administrative and technical issues, including the resolution of invoicing of materials and the potential for the material acquisition of additional supplies, specifically calipers for taking facial measurements. (b)(6) investigated pricing of those calipers (b)(6) also held communications with DTRA/A&AS to communicate project status (b)(6) began review of the 4th version of the BS&S videos.

Grants Manager:
(b)(6) participated in communications with (b)(6) to discuss administrative and technical issues related to this project. He worked with (b)(6) and (b)(6) on generating invoices for materials purchased. (b)(6) also worked with the videography company, Grounded Media, on securing a new revision of the BS&S videos and sent copies of the latest (4th) revision to (b)(6) via courier.

Trainer 1:
(b)(6) participated in communications with the South African team working on this projec (b)(6) also participated in communications with DTRA/A&AS to communicate project status (b)(6) reviewed the 4th version of the BS&S videos and developed recommendations for NHLS to consider.

Subject Matter Expert 1:
(b)(6) completed development of the OHASIS module and worked with NHLS staff to identify and fix bugs in the module. He also worked on the development of a training manual for the OHASIS module.

Research and Data Analyst:
(b)(6) and (b)(6) worked with (b)(6) on administrative and financial matters for the South African NHLS team.

CLIN 1003 – Materials and Supplies
Material costs incurred include respirators, fluid shields, and calipers for facial measurements. These supplies will assist with continuation of fit testing and were approved for purchase by the country manager.

CLIN 1004 – ODCs
DBA was applied for the NHLS subcontractor performers at a FOIA (b)(4) of total compensation.

CLIN 1005 – Travel

No travel costs are invoiced this period.

TD 013 One Health Epidemiology Training - Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 – 11/15/2016

CLIN 1002 – Labor

Program Manager:
Metabiota Regional Africa Program Manager (b)(6) led regular communications with in country performer, CDC-Uganda and DTRA CBEP Uganda. He provided project and programmatic oversight to the submission of all travel and training related CDRLs and contractual requirements associated with training implementation.

Research and Data Analyst:
Metabiota Project Coordinator (b)(6) provided support to (b)(6) during all communications with CDC Uganda and DTRA CBEP Uganda representation (b)(6) also worked closely with Metabiota Travel Coordinator (b)(6) to support the finalization of travel arrangements for the project team.

Trainer 1:
Metabiota Program Manager and epidemiology subject matter expert (b)(6) provided technical training support to One Health Epidemiology (OHE) training implementation for Cohort 11 Module 1. He traveled from Washington, DC to Fort Portal Uganda for this effort. (b)(6) served as an epidemiologist Trainer 1 during this time and took observational minutes of all training presentations. During this time, (b)(6) served as the field team lead throughout the training event. (b)(6) reported all project activates back to Metabiota AEP leadership and maintained consistent communication with DTRA CBEP representation as needed.

Subject Matter Expert 3:
Metabiota Senior Advisor (b)(6) attended bi-weekly stakeholder calls and attended pre-travel meetings while contributing expert advice to lessons learned and the general technical training approach.

(b)(6) traveled to Uganda from Washington, DC to support the implementation of Cohort 11 module 1 training in Fort Portal, Uganda. (b)(6) served as both a presenter and a training mentor during this training event and evaluated both the materials and the presentation of information in an effort to ensure both accuracy and consistency. (b)(6) provided expertise and oversite during all pre-training meetings, and during exercise breakout sessions.

AFRICOM FLN-1:
Epidemiologist, (b)(6) served, as a lead trainer in support the implementation of Cohort 11 Module 1 training in Fort Portal, Uganda. He was tasked to provide both leadership and support to other OHE trainers and to provide lectures to all OHE training participants during the exercises and

presentations. (b)(6) was tasked to travel from his home base in Kampala Uganda to Fort Portal in support of the training event.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
DBA was applied for the in country performers at a FOIA (b)(4) total compensation.

CLIN 1005 – Travel
Travel costs incurred this period include airfare, ground transportation and visa fees for FOIA (b)(6) FOIA (b)(6) to travel to Uganda and execute the training. A refund for 1 room for a trainer that was unable to attend has also been applied to this invoice.

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 11/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) held calls and email communications with DTRA/A&AS to discuss project status (b)(6) further held calls with University of Florida to discuss work on this project and contractual issues. (b)(6) also participated in CBR project calls.

Subject Matter Expert 1:
(b)(6) participated in calls and email communications with DTRA/A&AS to discuss project status (b)(6) further held calls with University of Florida to discuss work on this project and contractual issues.

Subject Matter Expert 2:
(b)(6) participated in CBR project calls and identified and on boarded new staff to conduct GIS analyses on the three CBR projects GG-19, -20, and -27. (b)(6) also participated in calls and email communications with (b)(6) to discuss future work on this project. (b)(6) provided guidance to (b)(6) worked with (b)(6) on developing new count model approaches for mapping the distribution of primary tularemia hosts on GG-19. He also worked with (b)(6) on developing the plans for the anthrax modeling efforts for GG-27/AJ TAP-11.

Research and Data Analyst:
(b)(6) participated in CBR project calls for this effort. (b)(6) worked on analyzing the GG-19 data set and the transition from ArcGIS to QGIS. (b)(6) also set up GoToMeeting calls as well as developed training materials for the GG-19 team. KT Haase worked on implementing analytical routines in R which had initially been built in Excel to both accelerate the analyses and streamline workflows. (b)(6) worked with (b)(6) on developing plans for the anthrax modeling efforts for GG-27/AJ TAP-11.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
No ODC costs are invoiced this period.

CLIN 1005 – Travel
No travel costs are invoiced this period.

Metabiota

FARE INFORMATION

Fare Breakdown	
Airfare:	2,035.00USD
U.S. Customs User Fee:	5.50
U.S. Immigration User Fee:	7.00
U.S. APHIS User Fee:	3.96
U.S. Transportation Tax:	35.60
September 11th Security Fee:	11.20
Germany Airport Security Charge:	7.10
Germany Passenger Service Charge:	39.40
Georgia Airport Tax:	22.00
Georgia Airport Passenger Security Fee:	4.10
U.S. Passenger Facility Charge:	13.50
Per Person Total:	2,184.36USD
eTicket Total:	**2,184.36USD**

Form of Payment:
AMERICAN EXPRESS
Last Four Digits 1044

The airfare you paid on this itinerary totals: 2,035.00 USD

The taxes, fees, and surcharges paid total: 149.36 USD

Fare Rules:

Additional charges may apply for changes in addition to any fare rules listed.

-REFUNDABLE/CXLFEE/CHGFEE

Baggage allowance and charges for this itinerary.

TD 018 Georgia Visiting Scientist Genomics

Objectives
Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 08/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) held email and phone communications with (b)(6) to discuss ongoing issues. (b)(6) also conducted email communications with DTRA/A&AS to communicate project status. In particular, (b)(6) pulled together financial estimates for extending TD-018 through 15 November 2016. (b)(6) reviewed and approved subcontract modification documents.

Subject Matter Expert 1:
(b)(6) participated in email and phone communications with (b)(6) to discuss ongoing issues. (b)(6) drafted subcontract modification documents for Farlow Scientific after the period of performance for this TD was extended.

Visiting Scientist
(b)(6) participated in email and phone communications with (b)(6) to discuss ongoing issues. (b)(6) provided mentorship in genomics and bioinformatics to Georgian scientists at NCDC and LMA. He continued working with NCDC staff on the comparative genomics analyses of *Francisella tularensis* strains and began guiding them to think about considerations for publication of these data. (b)(6) continued working on the draft genome assemblies for the anthrax vaccine strains. (b)(6) coordinated further discussions between LMA and NCDC regarding a potential project to sequence and compare African swine fever virus (ASFV) strains and assisted LMA scientists in generating an abstract for consideration by DTRA.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
DBA costs are applied for FOIA (b)(6) total compensation.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 019 Georgia Visiting Scientist Microbiology

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 11/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) eld email and phone communications with (b)(6) to discuss ongoing issues. D (b)(6) also conducted email communications with DTRA/A&AS to communicate project status.

Subject matter 1:
(b)(6) participated in email and phone communications with (b)(6) rner to discuss ongoing issues.

Visiting Scientist
(b)(6) participated in email and phone communications with (b)(6) to discuss ongoing issues. (b)(6) provided mentorship to Georgian scientists at NCDC and LMA. He worked with the GG-19 PI at NCDC to discuss expanding the media qualification report and explain the importance of including statistical analysis. (b)(6) also met with the LMA Director to discuss and begin planning for mentorship on the detection and identification of *Brucella* spp. through bacteriological techniques. He also helped LMA staff to coordinate a visit from a technician from (b)(6) Labs to work through some issues with their new FPA (fluorescence polarization assay) devices. He also reviewed, advised, and/or provided inputs to Georgian scientists on abstracts, reports. and SOPs.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
DBA costs are applied for FOIA (b)(4) total compensation.

TD 021 Field Epidemiology Training - Iraq

Objectives

Conduct remote trainings on epidemiology and BS&S Biorisk management for one cohort of Iraqi scientists, and also engage them to familiarize them with the Iraq National Biological Emergency Response Plan and work on a gap analysis of said plan Conduct remote trainings on epidemiology for a second cohort.

Period of Performance: 02/19/16 - 11/15/16

CLIN 1002 – Labor

Prog PMs (b)(6) have supported all project activities to date. PMs participated in routine meetings with DTRA CBEP and A&AS teams to facilitate updates and activities according to the project schedule, discuss challenges faced, and support routine implementation and tracking of project deliverables. The PMs have maintained visibility with DTRA CBEP on project status and have offered solutions to address project obstacles.

(b)(6) continued to work closely with CBEP POCs as well as in-country and Watermark Risk Management International (WRMI) SMEs to facilitate communication, receive training materials, review BS&S needs, and participate in routine project meetings and calls to support this engagement. (b)(6) provided a general review of WRMI's submitted course materials for the BS&S Remote Course, and BS&S components of the hands-on-training (HOT) course. (b)(6) reviewed epidemiology training materials, and provided subject matter expertise in conducting the NBERP gap analysis. (b)(6) coordinated and secured travel to attend the NBMC for presentation of the gap analysis, and assisted in the development of PowerPoint slides for presentation at this meeting. He participated in routine project calls with BS&S and Epidemiology Trainers and provided technical support and guidance as needed. In addition, Dr. Lee participated in the epidemiology trainings and provided administrative assistance, as needed to facilitate the training sessions.

(b)(6) continued to manage administrative components to include project schedule, LOE, budget, and delivery and submission of CDRLs. (b)(6) approved purchases of selected course materials, supported copyright permissions tracking. She executed and completed contractual requirements, to include execution of consulting agreements, subcontracts, and contract modifications to facilitate project efforts. She participated in routine project calls with the epi and BS&S teams, and has taken part in the Learning Management System (LMS) and Zoom training. (b)(6) assisted in review and submission of the developed training materials, and uploading of approved materials to the LMS site. In addition, she continues to work with the project team to coordinate CLS logistics requirements (via CDRL submission), as well as the transfer, storage, and use of all materials being procured in country to support the HOT course, to include completion of the Transfer of Materials (TOM). (b)(6) participated in the epidemiology trainings and provided administrative assistance, as needed to facilitate the training sessions, to include attendance tracking, uploading of resources, recorded videos, and troubleshooting.

Subject Matter Expert 1:

SMEs [redacted] supported project activities in direct coordination with PMs. They participated in routine project calls, meetings, and assisted in the engagement of the project team.

[redacted] supported WRMI in the development of BS&S training components. She provided a review of the revised WRMI course materials for the BS&S course, as well as the HOT course, and provided feedback to the team. [redacted] assisted in the execution of the gap analysis and presentation of findings to be delivered at the NBMC. [redacted] participated in routine communication with WRMI, PC and PMs.

The Project Coordinator, [redacted] supported the PMs through the maintenance of the project schedule, preparation of CDRL requirements, communication with and coordination of BS&S and Epidemiology technical teams, LOE review, material review and procurement, maintenance of project visibility to CBEP POCs and stakeholders, and coordination of routine project conference calls and meetings with technical teams and CBEP POCs. [redacted] established and participated in the LMS and Zoom trainings. She continued submission of training materials for technical review and public affairs approval and continued to coordinate submission of CDRLs and routine calls with the project team and SMEs. [redacted] participated in the epidemiology trainings and provided administrative assistance, as needed to facilitate the training sessions, to include tracking of attendance, uploading of resources, recorded videos, and troubleshooting. In addition, [redacted] coordinated and submitted LOIs to all participants and secured course participation by the cohorts. She continued to monitor and support training enrollment and participation, as well as coordination with URC and [redacted] to implement the project.

Epidemiology SMEs, [redacted] participated in routine project calls and regular email communications with Metabiota PC and PMs. They worked with the epidemiology team to complete development of epidemiology training materials and development of the course schedule, to include trainer delivery of each course and module. [redacted] completed responses and revisions to the epidemiology training materials following feedback from CBEP, and completed the comments trackers for submission. In addition, [redacted] continued to facilitate internal meetings with the epi team for coordination of material development, as well as provide administrative support in maintaining the epidemiology content on the LMS site. Both SMEs delivered and supported lectures during the ongoing Cohort I epidemiology training course. In addition, they sourced and provided additional resource materials for the trainees, and participated in routine conversations to improve delivery of the course and plan for the execution of Cohort II training.

University Research Co., SMEs [redacted] and [redacted] provided operational project support. They participated in routine project calls, meetings and routine email communications. They initiated in-country procurement requirements for HOT course materials and worked with vendors to identify and secure supplies. They took part in communications regarding the storage and transfer of materials, and are assisting with completion of transfer requirements necessary for the TOM. In addition, [redacted] coordinated with the Iraqi trainers and participated in routine meetings to support facilitation of the online training.

WRMI SME, [redacted], participated in routine project calls with Metabiota personnel and developed information requirements and recommendations for project execution via email and phone communications. He completed revisions to remote BS&S and HOT course materials and resubmitted

them for approval. He also participated in training on Zoom and Moodle, and began building out the BS&S training site on the LMS platform. He provided input to and began development and execution of the gap analysis. In addition, they supported development of the PP presentation to be delivered at the NBMC.

Subject Matter Expert 2:

WRMI SME (b)(6) participated in routine project calls with Metabiota personnel and developed information requirements and recommendations for project execution via email and phone communications. He completed revisions to remote BS&S and HOT course materials and resubmitted them for approval. He also participated in training on Zoom and Moodle, and began building out the BS&S training site on the LMS platform. He provided input to and began development and execution of the gap analysis. In addition, they supported development of the PP presentation to be delivered at the NBMC.

Epidemiology Trainer (b)(6) participated in routine project calls and regular email communications with Metabiota PC and PMs. She worked with the epidemiology team to complete development of epidemiology training materials.

Research and Data Analyst:

The WRMI RDA, (b)(6) provided administrative support to the WRMI project team, to include supporting copyright permission requests for all BS&S and HOT materials. She participated in Zoom and Moodle trainings, and supported the build out of the Moodle site for BS&S and epidemiology training components. In addition, she formatted BS&S and HOT materials according to CBEP guidelines, and reviewed all materials to ensure proper citation.

Iraqi POC (b)(6) participated in routine project calls with the PC, PMs, and epidemiology trainers to support project objectives, course materials, and provide in-country regional expertise to help guide engagement. He met with MoH officials to support course and CME credit approval, and assist with the transfer of materials. He assisted in the identification and communication with selected training participants and help secured their response and attendance in the training. In addition, he identified alternate participants and facilitated their inclusion in the course. He participated in the epidemiology trainings and provided feedback and support on how to improve facilitation of the online lectures.

(b)(6) participated in routine project calls with the PC, PMs, and epidemiology trainers to support the initiation and continuation of Cohort I training. He completed training in the Zoom and Moodle platforms for facilitation of the online course, and was actively engaged in facilitating the online training to include participating in discussion sessions, assisting trainees with troubleshooting, encouraging participation, and responding to questions. In addition, he provided feedback through verbal and written communications on how to enhance and improve the online training taking into consideration culture and language.

Foreign Local Nationals:

(b)(6) initiated in-country procurement activities to purchase the necessary supplies for the HOT course. He worked with the operations manager to identify vendors and begin securing bids for procurement. In addition, he provided routine training coordination supporting the Iraqi trainers in the facilitation of the Cohort I training course.

(b)(6) participated in routine project calls with the PC, PMs, and epidemiology trainers to support the initiation and continuation of Cohort I training. They completed training in the Zoom and Moodle platforms for facilitation of the online course, and were actively engaged in facilitating the online training to include participating in discussion sessions, assisting trainees with troubleshooting, encouraging participation, and responding to questions. In addition, they provided feedback through verbal and written communications on how to enhance and improve the online training taking into consideration culture and language.

CLIN 1003 – Materials and Supplies
Material costs invoiced include licensing fees for the use of training materials.

CLIN 1004 – ODCs
DBA is applied for FOIA (b)(4) of total compensation.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 022 Biosurveillance Training - Uganda

Objectives

Advance the Biosafety and Biosecurity capacity in Uganda through the development, coordination and execution of a pilot biosurveillance study focused in Rift Valley Fever (RVF), Avian Influenza (AI), and Peste des Petuts Ruminants Virus (PPRV). Provide subject matter expertise to assist participants in development and submission of grant proposals, and development of Standard Operating Procedures to increase enhance local skills in early detection and prevalence determination of RVF AI and PPR.

Period of Performance: 3/21/16 11/15/16

CLIN 1002 – Labor

Program Manager

Metabiota Regional Africa Program Manager (b)(6) ed regular bi-weekly and as needed communications with in country stakeholders. He also led communications with DTRA CBEP representation on a bi-weekly and as needed basis. He provided project and programmatic oversight to the update, re-development and delivery of all travel and training related CDRL and other associated contractually requirement document resubmissions (b)(6) additionally provided oversight and direct support to the development of training materials by subcontractor Africa Biomedical Laboratories (ABL), and the final submission process including management of the response to comments generated during the CTSC review prior to PAO approval. He contributed to the development of procurement documents and provided oversight to the development of procurement timeline contingency plans and actions.

(b)(6) rovided general management and direction to the project team in the preparation and subsequent execution of the biosurveillance training event. He led presentations including the opening remarks and introductory sessions, and lead portions of the technical training which included introduction to epidemiology, data analysis, study design, and sample size calculation (b)(6) also maintained communications with DTRA CBEP during this time and led all pre and post training discussions.

Research and Data Analyst:

Metabiota Project Coordinator, (b)(6) managed the revision of laboratory and field materials lists. (b)(6) post DTRA approval of the proposed procurement list, identified and contacted appropriate vendors to obtain final quotes, and place orders; she additionally ensured the execution of purchase orders by AEP leadership. Subsequently, (b)(6) provided the list of materials and shipment information to the CLS warehouse and led communications with vendors and relevant logistics personnel. In light of a potential shipment delay, (b)(6) has identified and reached out to several in-country vendors capable of delivering materials as a stopgap solution.

(b)(6) additionally worked with DTRA representation and performer ABL to support the development of a detailed training agenda for the biosurveillance training event.

(b)(6) provided general coordination and implementation support to the project team in the preparation and subsequent execution of the biosurveillance training event. She led several components of the training event including the set up and execution of all daily ELISA and PCR methods breakout sessions. She contributed significantly during all pre and post training discussions, and importantly

worked with laboratory staff representing UVRI, NaLIRRI, and NADDEC to ensure they were adequately prepared for the implementation of the biosurveillance pilot study.

Subject Matter Expert 1:
Metabiota subcontractor, (b)(6) served in a technical leadership capacity during the development of materials for the biosurveillance training event. He led the development of the materials as a whole and participated in discussions and coordination calls with Metabiota project leadership. During this period, (b)(6) supported the finalization of all materials and contributed to the development of the CTSC technical review response. He also developed the pre and posttests, and provided general oversight to the development of the daily training agenda.

(b)(6) traveled from his home in Nairobi, Kenya to Entebbe and Kasese, Uganda to serve as a technical leader of the biosurveillance training event between the dates of 8/22/16 and 9/2/16. His efforts during this period include the delivery of training presentations including BS&S in the laboratory as well as in the field, theory of ELISA, theory of PCR, interpreting RT-PCR results, and the sampling and handling of avian species. (b)(6) additionally participated in all pre and post training meetings and provided general support to the teams in preparation for the subsequent and forthcoming biosurveillance pilot studies.

Time spent during this period at SME 1 is also represented by the efforts of ABL representative (b)(6) (b)(6) contributed to the further development of biosurveillance training materials at the direction of technical lead (b)(6) was also available for project coordination and communication efforts and provided responses to internal technical inquiries as requested.

CLIN 1003 – Materials and Supplies
Material costs invoiced this month include materials and supplies necessary for implementation of the BSV workshop and subsequent sample collection.

CLIN 1004 – ODCs
DBA costs are allocated for (b)(6) and (b)(6) at FOIA (b)(4) total compensation.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 023 One Health Epidemiology Short Course – South Africa

Objectives

Increase the operational biosafety and bio-surveillance capacity through the development of a One Health Epidemiology short course tailored to the needs of South Africa Increase the sustainability of the course work through development of a train the trainer module to be delivered to select South African trainers of the short course.

Period of Performance: 3/21/16 – 11/15/16

CLIN 1002 – Labor

Program Manager:

Metabiota Africa Regional Program Manager, (b)(6) provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as programmatic communications for the internal project team. He led regular bi-weekly communication with DTRA CBEP (b)(6) additionally worked with Metabiota PC (b)(6) to progressively elaborate the project schedule in an effort to reflect input from project SME's in real-time. (b)(6) also worked with DTRA CBEP representation to identify the 60% review meeting dates as 15 September 2016 and to provide transparency on what should be expected during this meeting.

Research and Data Analyst:

Metabiota Project Coordinator (b)(6) provided communication support during all engagements with DTRA CBEP and Ugandan stakeholders by participating in all project calls and recording and distributing all meeting minutes.

Metabiota Epidemiologist (b)(6) also represented by this labor category, provided technical support towards the development and adaptation of materials specifically for "Analysis of Surveillance Data, Measures of Spread, Outbreak Investigation, and Generating Hypotheses, Developing a Working Case Definition, and Epidemiologic Clues, to Bioterrorism". She participated in technical and programmatic communication calls with project staff, and provided infectious disease expertise towards the overall project approach as well as the delineation between advanced and basic course work. She also reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation.

Subject Matter Expert 2:

Metabiota Staff Scientist, (b)(6), provided technical leadership and overall product development guidance towards the development and adaptation of all materials. She participated in bi-weekly conference calls with DTRA CBEP representation and led weekly technical communications with project technical staff, and provided represented the technical team at the 30% review meeting held at CTSC. She additionally contributed directly to the development of presentations including, "Measures of Disease Spread and Public Health Statistics, Avian Influenza" (b)(6) worked to adapt and develop training materials, and to review the work of other project SMEs to ensure an overall consistency in approach. She reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation.

Trainer 2:

(b)(6) provided technical support towards the development and adaptation of materials specifically for "Questionnaire Design, Measures of Disease Spread, and Finalization of the Case Definitions Presentation". He participated in technical and programmatic communication calls with project staff, and provided veterinary and training program development expertise towards the overall project approach as well as the delineation between.

CLIN 1003 – Materials and Supplies

No material costs are invoiced this period.

CLIN 1004 – ODCs

DBA costs are allocated for (b)(6) FOIA (b)(4) of total compensation.

CLIN 1005 – Travel

No travel costs are invoiced this period.

TD 025 Technical Writing Workshop – Ethiopia

Objectives

Provide capacity building and sustainability in BS&S projects by conducting a Technical Writing workshop on developing a successful research proposal and white paper. Provide mentorship and support to workshop participants in finalizing and submitting for grant support to increase the research project completed in country.

Period of Performance: 4/15/16 11/15/16

CLIN 1002 – Labor

Program Manager:

Metabiota Africa Regional Program Manager, (b)(6) provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as programmatic communications for the internal project team. (b)(6) additionally developed the post workshop survey report and worked with AAAS representation regarding the development and submission of a proposal deliverables schedule.

Research and Data Analyst:

Metabiota Project Coordinator (b)(6) participated in all project calls, both internal and with DTRA CBEP. (b)(6) took and distributed minutes following calls with DTRA CBEP. (b)(6) also provided coordination support to (b)(6) as necessary during post training reporting.

Subject Matter Expert 1:

(b)(6) post the closeout of the training workshop, worked as the technical lead of this project to maintain communication with leadership from EPHI and NAHDIC. (b)(6) worked with (b)(6) and his technical team to develop the proposal deliverables schedule, and to relay the DTRA (b)(6) CBEP approved schedule and its implications to the team leads for both EPHI and NAHDIC. (b)(6) (b)(6) additionally provided oversight and direct contribution to his technical team towards the development of abstracts and white papers by EPHI and NAHDIC led teams, which will be submitted to the DTRA BAA under Thrust Area 6.

(b)(6) during the month of August, provided support to (b)(6) as the technical project lead. (b)(6) additionally worked with representation from EPHI and NAHDIC towards concept and abstract development, and reported timeline challenges to (b)(6) also worked to provide recommended edits to draft abstracts submitted by EPHI and NAHDIC.

CLIN 1003 – Materials and Supplies

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing- Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 - 12/31/15

CLIN 1002 – Labor
No labor hours were invoiced in December as the training effort was on hold pending the completion of Leahy vetting of the Cameroon Ministry of Defense's trainees by the United States government.

CLIN 1003 – Materials and Supplies
Material and Supply costs were not incurred during this period.

CLIN 1004 – ODCs
Other Direct Costs were not incurred during this period.

CLIN 1005 – Travel
No travel costs were incurred during this period.

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats - Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/2015 - 01/31/2016

CLIN 1002 – Labor

Program Manager:

Hours incurred during this period were for work provided by (b)(6) the Metabiota program manager in support of finalizing all preparations and executing the MERS-CoV training event held from 07-11 December 2015 in Almaty, Kazakhstan (b)(6) department for Almaty on 30 November, and upon arrival worked with Duke NUS trainers to prepare and finalize all requirements for the training event at IMV, to include conducting "dry runs" in the lab, finalizing the agenda, and set up. She conducted an inventory of all materials and supplies procured for the event, and finalized CDRL 11 Materials and Transfer Agreement. The training was conducted successfully from 7-11 December, and the Training Event Trip Report submitted following completion of the event (b)(6) closed out all engagements in-country following the event and worked with Duke NUS and TMC to ensure deliverables and final invoices were received.

Research and Data Analyst:

Hours incurred during this period were for work provided by (b)(6) the Metabiota project coordinator in support of executing the MERS-CoV training event from 07-11 December 2015 in Almaty, Kazakhstan. Activities conducted during this period included, daily coordination and communication with CLS, in-country partners, and Duke-NUS trainers to ensure internationally procured reagents and supplies were picked up and shipped to Kazakhstan, in accordance with custom clearance requirements prior to start of the event. In addition, she finalized administrative documents for inventory and supply logs for both internationally and locally procured materials, per diem payments for Duke NUS trainers, and the daily agenda and travel schedule for the Metabiota and Duke NUS team during the training week. Lastly, she coordinated with all partners to ensure the final participant list was complete for the training event, capturing additional participants from RIBSP and CH2M Hill (b)(6) (b)(6) provided US-based support during the event, and assisted in closing out requirements following training completion at the end of the month.

Trainer II:

Hours incurred during this period were for work provided by (b)(6) and (b)(6) in support of executing the MERS-CoV training event held from 07-11 December 2015 in Almaty, Kazakhstan. (b)(6) arrived early in Almaty to prepare for the event with (b)(6) including laboratory set-up and finalizing the agenda, and administrative issues with in-country partners (b)(6) joined the team, and all three trainers successfully implemented the training event. Additional hours were incurred during this period were for the completion of all required deliverables and invoices for Duke NUS on this project.

Trainer III:

Hours incurred during this period were for work provided by (b)(6) during the MERS-CoV training event held from 07-11 December 2015 in Almaty, Kazakhstan. (b)(6) participated in the training event, as a senior trainer, and executed both practicum and classroom trainings.

Corrected Hours- Hours previously incurred for (b)(6) on this project were billed at at Trainer III instead of Trainer II level. Costs are corrected on this invoice to reflect (b)(6) status as a Trainer II, adjusting the cost to the government.

CLIN 1003 – Materials and Supplies

Material and Supply costs were incurred during this period for locally procured materials and supplies supporting the laboratory training event from 07-11 December in Almaty, Kazakhstan. Supply purchases included laboratory consumables necessary to execute the laboratory practicum portion of the training.

CLIN 1004 – ODCs

Other Direct Costs were incurred during this period for DBA insurance covering travel for Metabiota and Duke NUS trainers to Almaty, Kazakhstan to conduct the MERS-CoV training event. In addition, DBA costs were incurred to cover the Duke NUS trainers through 31 December 2015, inline with the PoP extension received for this project.

CLIN 1005 – Travel

Foreign Travel costs incurred during this period were in support of Metabiota and Duke NUS travel to Almaty, Kazakhstan to conduct the MERS-CoV training from 07-11 December 2015. Costs included in travel are for accommodations, ground transportation, and per diem.

TD 003 Bat Borne Virus from Annual Bat Cull India - Canceled and will not be invoiced

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives

Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/2015 - 05/15/2016

CLIN 1002 – Labor

Program Manager:

Hours incurred during this period were for work provided by (b)(6) the Metabiota program manager in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted include, routine conference calls and email communications with CBEP and A&AS regional leadership, Gryphon Scientific SMEs, RSS in-country partners, and Metabiota project personnel to coordinate conference invitations, abstract submissions and review, travel logistics, conference logistics for submission to CLS, and other routine project needs. In addition, activities included follow up on travel coordination efforts for all confirmed speakers, participants, and Scientific Advisory Board (SAB) members traveling to Amman for the conference, to include coordination of JKO trainings, completion of CLS requirements, and planning for the networking day. Activities also included submission of CCR forms, CLS travel forms for additional delegations, and updating logistics requirement necessary to conduct the conference.

Research and Data Analysts:

Hours incurred during this period were for work provided by (b)(6) the Metabiota project coordinator in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. (b)(6) activities included participation in routine project conference calls and travel tracking, coordination, and communication with all invited speakers and SAB members to ensure information was gathered for facilitation of JKO training requirements, travel needs for submission to CLS, and overall coordination of attendance (b)(6) worked closely with Gryphon SMEs, CLS and the Metabiota travel coordinator to ensure all participant information was secured, and accurately collected, logged, and submitted for vetting purposes. In addition, she reviewed conference documents and supported completion of the Master CLS form, revising logistics requested as needed, and in directed coordination with A&AS team members.

Hours incurred during this period also included work provided by (b)(6) n support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan (b)(6) (b)(6) hours included working directly with Metabiota contracts and program managers to provide monthly invoicing and reporting requirements to the Metabiota team.

Subject Matter Expert III:

Hours incurred during this period were for work provided by (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities included overseeing Gryphon SMEs working on this project, continuing to finalize the conference agenda, securing all speakers for the plenary sessions, and lectures planned during this

engagement. In addition, submitted abstracts were compiled and finalized to support completion of the abstract book (b)(6) continued to participate in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, CVs, travel requirements, etc., for review and submission to other team members (b)(6) continued to coordinate with the team regarding all logistics requirements, to include restructuring of the networking day.

Subject Matter Expert I:

Hours incurred during this period were for work provided by (b)(6) (b)(6) eplacement on the program, in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted by (b)(6) (b)(6) included continuing to finalize the conference agenda, reaching out to identified speakers for the plenary sessions, and lectures planned during this engagement. They collected and reviewed the abstracts, compiling them into the abstract book for submission to CBEP. They participated in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, CVs, travel requirements, etc., for review and submission to other team members. They supported finalization of the abstract book, and researched additional features and add-ons to the conference website, for review and approval, that would enhance networking capabilities among participants.

CLIN 1003 – Materials and Supplies

Material and Supply costs incurred during this period include costs for the publication and design of the conference logo, abstract and proceedings book, as well as the web banner. Additional costs were incurred for the creation and hosting of the conference website.

CLIN 1004 – ODCs

Other Direct Costs were not incurred during this period.

CLIN 1005 – Travel

Travel costs were incurred during this period to support the purchase of airfare and visas for Metabiota and Gryphon personnel in preparation for attendance at the conference in March. In addition, costs were incurred to support mailing of the ISOPREP forms for completion of DoD travel requirements. As well, travel costs from the pre-coordination site visit conducted in October were incurred for Gryphon personnel's local transportation, and visa fees supporting this trip.

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats - Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/2015 - 01/31/2016

CLIN 1002 – Labor

Program Manager:

Hours incurred during this period were for work provided by (b)(6) the Metabiota program manager in support of finalizing all preparations and executing the MERS-CoV training event held from 07-11 December 2015 in Almaty, Kazakhstan. (b)(6) department for Almaty on 30 November, and upon arrival worked with Duke NUS trainers to prepare and finalize all requirements for the training event at IMV, to include conducting "dry runs" in the lab, finalizing the agenda, and set up. She conducted an inventory of all materials and supplies procured for the event, and finalized CDRL 11 Materials and Transfer Agreement. The training was conducted successfully from 7-11 December, and the Training Event Trip Report submitted following completion of the event. (b)(6) closed out all engagements in-country following the event and worked with Duke NUS and TMC to ensure deliverables and final invoices were received.

Research and Data Analyst:

Hours incurred during this period were for work provided by (b)(6) the Metabiota project coordinator in support of executing the MERS-CoV training event from 07-11 December 2015 in Almaty, Kazakhstan. Activities conducted during this period included, daily coordination and communication with CLS, in-country partners, and Duke-NUS trainers to ensure internationally procured reagents and supplies were picked up and shipped to Kazakhstan, in accordance with custom clearance requirements prior to start of the event. In addition, she finalized administrative documents for inventory and supply logs for both internationally and locally procured materials, per diem payments for Duke NUS trainers, and the daily agenda and travel schedule for the Metabiota and Duke NUS team during the training week. Lastly, she coordinated with all partners to ensure the final participant list was complete for the training event, capturing additional participants from RIBSP and CH2M Hill. M(b)(6) (b)(6) provided US-based support during the event, and assisted in closing out requirements following training completion at the end of the month.

Trainer II:

Hours incurred during this period were for work provided by (b)(6) and (b)(6) in support of executing the MERS-CoV training event held from 07-11 December 2015 in Almaty, Kazakhstan. (b)(6) arrived early in Almaty to prepare for the event with (b)(6) including laboratory set-up and finalizing the agenda, and administrative issues with in-country partners. (b)(6) joined the team, and all three trainers successfully implemented the training event. Additional hours were incurred during this period were for the completion of all required deliverables and invoices for Duke NUS on this project.

Trainer III:

Hours incurred during this period were for work provided by (b)(6) Wang during the MERS-CoV training event held from 07-11 December 2015 in Almaty, Kazakhstan (b)(6) participated in the training event, as a senior trainer, and executed both practicum and classroom trainings.

Corrected Hours- Hours previously incurred for (b)(6) on this project were billed at at Trainer III instead of Trainer II level. Costs are corrected on this invoice to reflect (b)(6) status as a Trainer II, adjusting the cost to the government.

CLIN 1003 – Materials and Supplies

Material and Supply costs were incurred during this period for locally procured materials and supplies supporting the laboratory training event from 07-11 December in Almaty, Kazakhstan. Supply purchases included laboratory consumables necessary to execute the laboratory practicum portion of the training.

CLIN 1004 – ODCs

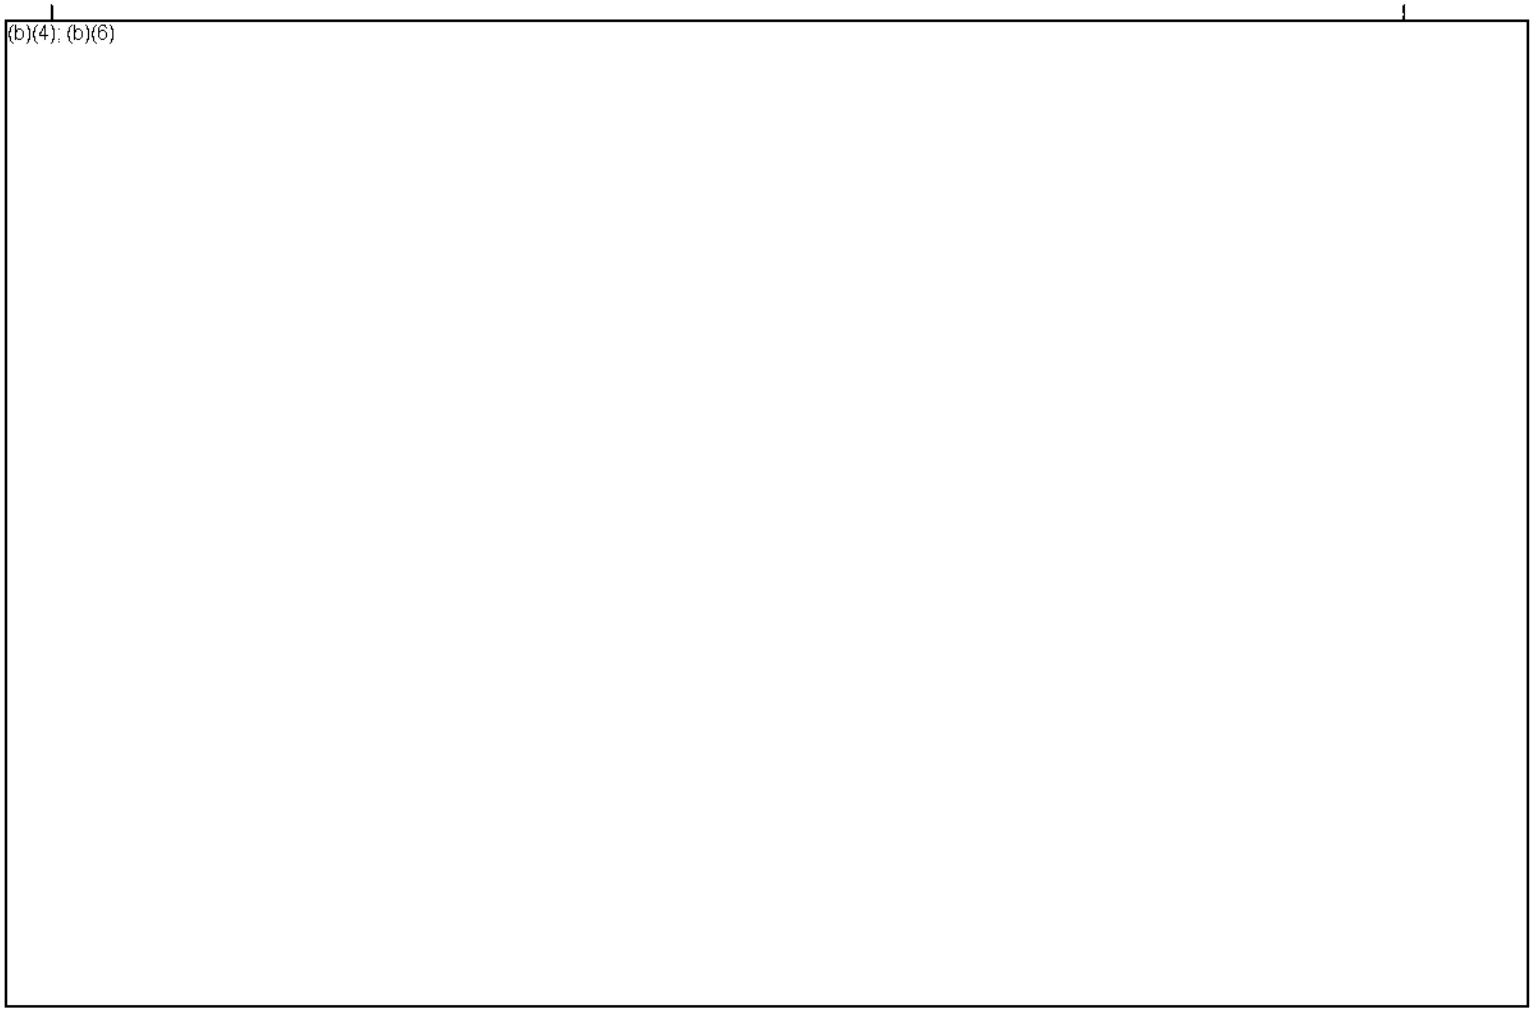

Other Direct Costs were incurred during this period for DBA insurance covering travel for Metabiota and Duke NUS trainers to Almaty, Kazakhstan to conduct the MERS-CoV training event. In addition, DBA costs were incurred to cover the Duke NUS trainers through 31 December 2015, inline with the PoP extension received for this project.

CLIN 1005 – Travel

Foreign Travel costs incurred during this period were in support of Metabiota and Duke NUS travel to Almaty, Kazakhstan to conduct the MERS-CoV training from 07-11 December 2015. Costs included in travel are for accommodations, ground transportation, and per diem.

TD 003 Bat Borne Virus from Annual Bat Cull India - Canceled and will not be invoiced

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives

Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/2015 - 05/15/2016

CLIN 1002 – Labor

Program Manager:

Hours incurred during this period were for work provided by (b)(6) the Metabiota program manager in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted include, routine conference calls and email communications with CBEP and A&AS regional leadership, Gryphon Scientific SMEs, RSS in-country partners, and Metabiota project personnel to coordinate conference invitations, abstract submissions and review, travel logistics, conference logistics for submission to CLS, and other routine project needs. In addition, activities included follow up on travel coordination efforts for all confirmed speakers, participants, and Scientific Advisory Board (SAB) members traveling to Amman for the conference, to include coordination of JKO trainings, completion of CLS requirements, and planning for the networking day. Activities also included submission of CCR forms, CLS travel forms for additional delegations, and updating logistics requirement necessary to conduct the conference.

Research and Data Analysts:

Hours incurred during this period were for work provided by (b)(6) the Metabiota project coordinator in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. (b)(6) activities included participation in routine project conference calls and travel tracking, coordination, and communication with all invited speakers and SAB members to ensure information was gathered for facilitation of JKO training requirements, travel needs for submission to CLS, and overall coordination of attendance (b)(6) worked closely with Gryphon SMEs, CLS and the Metabiota travel coordinator to ensure all participant information was secured, and accurately collected, logged, and submitted for vetting purposes. In addition, she reviewed conference documents and supported completion of the Master CLS form, revising logistics requested as needed, and in directed coordination with A&AS team members.

Hours incurred during this period also included work provided by (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan (b)(6) (b)(6) hours included working directly with Metabiota contracts and program managers to provide monthly invoicing and reporting requirements to the Metabiota team.

Subject Matter Expert III:

Hours incurred during this period were for work provided by (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities included overseeing Gryphon SMEs working on this project, continuing to finalize the conference agenda, securing all speakers for the plenary sessions, and lectures planned during this

engagement. In addition, submitted abstracts were compiled and finalized to support completion of the abstract book. (b)(6) continued to participate in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, CVs, travel requirements, etc., for review and submission to other team members. (b)(6) continued to coordinate with the team regarding all logistics requirements, to include restructuring of the networking day.

Subject Matter Expert I:

Hours incurred during this period were for work provided by (b)(6) (b)(6) replacement on the program, in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted by (b)(6) (b)(6) included continuing to finalize the conference agenda, reaching out to identified speakers for the plenary sessions, and lectures planned during this engagement. They collected and reviewed the abstracts, compiling them into the abstract book for submission to CBEP. They participated in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, CVs, travel requirements, etc., for review and submission to other team members. They supported finalization of the abstract book, and researched additional features and add-ons to the conference website, for review and approval, that would enhance networking capabilities among participants.

CLIN 1003 – Materials and Supplies

Material and Supply costs incurred during this period include costs for the publication and design of the conference logo, abstract and proceedings book, as well as the web banner. Additional costs were incurred for the creation and hosting of the conference website.

CLIN 1004 – ODCs

Other Direct Costs were not incurred during this period.

CLIN 1005 – Travel

Travel costs were incurred during this period to support the purchase of airfare and visas for Metabiota and Gryphon personnel in preparation for attendance at the conference in March. In addition, costs were incurred to support mailing of the ISOPREP forms for completion of DoD travel requirements. As well, travel costs from the pre-coordination site visit conducted in October were incurred for Gryphon personnel's local transportation, and visa fees supporting this trip.

S

TD 005 Iraqi Distance Learning – Canceled and will not be invoiced

TD 007 Regional Baseline Assessment - Invoiced to Completion Invoice #725.

TD 008 Clinician Training Invoiced to Completion Invoice #726.

TD 009 NHLS BS&S Training - South Africa

Objectives

Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015-05/15/2016

CLIN 1002 – Labor

Program Manager:

(b)(6) provided administrative and technical oversight to the project as a whole, and led communications with NHLS and DTRA on the efforts. He also led communication with CLS on both shipping issues and venue selection/training participant logistics. Metabiota is reverting erroneously accrued hours in the Program Manager labor category for (b)(6) they should have instead been accrued in the Grants Manager labor category. The value of the accrued hours in this labor category is less than those being invoiced in the Program Manager labor category.

Grants Manager:

(b)(6) provided administrative oversight of efforts by the South African team at NHLS and provided reporting to Metabiota on those efforts.

Trainer 1:

(b)(6) provided coordination of stakeholder meetings to ensure tasks and deliverables are completed on time. She reviewed reports and draft invoices and drafted an amended CLS logistics support request document for the fit-testing training. (b)(6) provided support to (b)(6) on oversight of the fit-testing effort and its rescheduling.

Research and Data Analyst:

Research and Data Analysts at NHLS participated in bi-weekly meetings and prepared draft reports and invoices. (b)(6) assisted with coordination leading up to the postponed fit testing training, refined the training agenda and managed receipt of the PortaCount fit-testing equipment. (b)(6) and (b)(6) provided financial management support to the NHLS team.

Subject Matter Expert 1:

No SME 1 hours were used in December.

CLIN 1003 – Materials and Supplies

$32.06 was paid to Lasec for 5 liters of 99.8% pure isopropyl alcohol for use in the PortaCount fit testers.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel

No travel related costs are being invoiced for during this period.

TD 010 One Health Epi Training - South Africa

Objectives

Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 - 03/31/2015

CLIN 1002 – Labor

Program Manger:

Represents the time spent by Metabiota Africa Regional Program Manage(b)(6) in support of this technical direction(b)(6) was responsible for leading all communications, including bi-weekly and as necessary conference calls, with DTRA CBEP representation and South African stakeholders representing CDC South Africa, and USDA South Africa.(b)(6) ead and oversaw the continued development and submission of the One Health Epidemiology - South Africa landscape review report, and ensured that progress on this deliverable was communicated effectively to DTRA CBEP representation and remained within the scope outlined by the technical direction. He additionally provided resource and leadership support to Metabiota Staff Scientist(b)(6) in her role as technical lead on the mentioned deliverable.

In an effort to support timeline and other deliverable needs for this TD,(b)(6) oversaw the development and submission of all travel related CDRLs to include the Travel Authorization form, Cable Clearance Request form, and the Contractor Logistics Services Form in support of the in-country meeting slated for February 17-19th 2016.

Trainer 1:

Represents the time spent by Metabiota Project Coordinator(b)(6) was responsible for attending and providing relevant commentary during all conference calls in support of this technical direction. She was also responsible for the development of meeting agendas and the aggregation of meeting minutes.(b)(6) was tasked with supporting the program manager in his efforts to lead the development and submission of the One Health Epidemiology - South Africa landscape review report, and in addition was requested to coordinate follow up communications between South African Project stakeholders.

In an added effort to support timeline and other deliverable needs for this TD,(b)(6) worked to develop all travel related CDRLs to include the Travel Authorization form, Cable Clearance Request form, and the Contractor Logistics Services Form for submission to DTRA CBEP representation and in support of in country efforts taking place in February.

Subject Matter Expert 2:

Represents the time spent by Metabiota Staff Scientis(b)(6) in support of this technical direction(b)(6) attended all conference calls between Metabiota and DTRA CBEP representation, as well as all calls between Metabiota and the South African project stakeholders. D(b)(6) (b)(6) served in the role of technical lead during the continued development of the One Health Epidemiology - South Africa landscape review, and in this role was tasked to engage all South African project stakeholders regarding their specific subject matter expertise.

(b)(6) more specifically in her role as technical lead on the development of the OHE-SA landscape review, spent time finalizing the document for submission to DTRA CBEP representation. She

consistently engaged project stakeholders to answers specific questions regarding One health gaps in country, current one health efforts in country, review of materials, and long term one health goals. (b)(6) took the lead on content development for the landscape review report and as such spent time writing her own as well as integrating stakeholder comments as necessary.

CLIN 1003 – Materials and Supplies
No materials or supply costs are being invoiced for during this period.

CLIN 1004 - Other Direct Costs
No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel
Costs were incurred in preparation for travel in February.

TD 011 Ukraine TADR Activity Project 4 (TAP-4)

Objectives
The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/16/2015 - 01/31/2015

CLIN 1002 – Labor

Program Manager:
(b)(6) provided administrative oversight over Metabiota efforts, including coordinating with the Ukrainian delegation to the final regional workshop and review of deliverables. He met with DTRA and A&AS to discuss this effort. He also started drafting the TAP-4 final report.

Trainer 1:
(b)(6) ssisted in the ongoing drafting of the TAP-4 final report.

CLIN 1003 – Materials and Supplies
No material costs were incurred during this period.

CLIN 1004 - Other Direct Costs
No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel
Travel expenses including flights, lodging, ground transportation, and per diem were incurred for (b)(6) (b)(6) to attend the final regional workshop in Tbilisi, Georgia in November.

TD 012 Ukraine Project 2 (UP-2) -Invoiced to Completion Invoice #725. Transitioned to BTRIC.

TD 013 One Health Epi Training - Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan and Nigerian National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015-02/29/2016

CLIN 1002 – Labor

Program Manager:
Represents the time spent by Metabiota Africa Regional Program Manager (b)(6) in support of this technical direction. In the period under review (b)(6) ontributed to support pre training events for One Health Epidemiology by leading bi-weekly stakeholder calls with CDC Uganda and DTRA CBEP representation. These calls provided an opportunity for all stakeholders to discuss key issues regarding upcoming trainings. (b)(6) ead email communication with all stakeholders in support of preparation of Cohort 9 Module 2 and Cohort 10 Module 1 epidemiology trainings.

(b)(6) upervised the program coordination activities for of OHE Uganda. CDRLs (CCR and CLS form) for Cohort 10 Module 2 were submitted to the client (b)(6) during this time. Due to participant cancellations, there were several revisions to the CLS form that took place (b)(6) ed the CONUS efforts to ensure that all changes were shared with DRTA CBEP representation. He also provided transparency to CLS subcontractor TTI when necessary and under the purview of DTRA CBEP representation.

Research and Data Analyst:
Represents the time spent by Metabiota Africa Project Coordinato (b)(6) functioned as a liaison between CDC Uganda and Metabiota under the supervision of the program manager. Her efforts were focused on supporting consistent communications with CDC Uganda representatives and training manager (b)(6) . The two were in regular communication with respect to the preparations for the Cohort 10 module 2 training event. In collaboration with the program manager (b)(6) ensured backs support for the timely submission of CDRLs, and as changes arose with participants (b)(6) (b)(6) hared updated CLS forms with (b)(6) drafted the agendas, participated, composed, and shared minutes for all bi-weekly OHE Stakeholder calls.

(b)(6) lso participated in, and lead the Metabiota pre training event trip planning meeting. These meetings included representation from Metabiota Programmatic, Technical, and Logistical team members. All parties reviewed upcoming travel and prepared for the team's travel. (b)(6) also worked with Metabiota AEP Travel Coordinator to ensure the in country logistics for Metabiota's team were in place and organized with respect to the FAR.

AFRICOM FLN-1:
Represents the time spent by Metabiota Independent Contractor and OHE lead trainer (b)(6)
(b)(6)

(b)(6) served as a lead trainer in support the the implementation of both Cohort 9 Module 2 training in Jinja, Uganda and Cohort 10 module 1 training in Fort Portal Uganda. He was tasked to provide both leadership and support to other OHE trainers as to provide lectures to all OHE training participants during both modules. (b)(6) was tasked to travel from his home base in Kampala Uganda to both Jinja and Fort Portal in support of the training event.

Trainer 1:
Represents the time spent by Metabiota Epidemiologist (b)(6) and Metabiota Epidemiology subject matter expert (b)(6)

(b)(6) attended bi-weekly stakeholder calls and offered his comments where relevant from a technical and scientific perspective. (b)(6) was tasked by the program manager to develop and update the trip risk report.

(b)(6) traveled to Uganda from Washington, DC to support the the implementation of both Cohort 9 Module 2 training in Jinja, Uganda and Cohort 10 module 1 training in Fort Portal Uganda. (b)(6) Vincent served as an epidemiologist trainer 1 during this time and took observational minutes of all training events. (b)(6) communicated his activities regularly during this time to Metabiota Program Coordinator (b)(6) who was tasked with providing backstopping support to this effort from the US.

(b)(6) raveled to Uganda from Washington, DC to support the the implementation of both Cohort 9 Module 2 training in Jinja, Uganda and Cohort 10 module 1 training in Fort Portal Uganda. (b)(6) served as an epidemiologist trainer 1 during this time and took observational minutes of all training events. During this time, (b)(6) served as the field team lead and was tasked with leading communications with CDC Uganda representation throughout the training event. (b)(6) eported all project activates back to Metabiota AEP leadership and maintained consistent communication with DTRA CBEP representation as needed.

Subject Matter Expert 3:
Represents the time spent by Metabiota Senior Scientist, (b)(6) attended bi-weekly stakeholder calls and attended pre travel meetings while contributing expert advice to lessons learned and general technical approach.

(b)(6) traveled to Uganda from Washington, DC to support the the implementation of both Cohort 9 Module 2 training in Jinja, Uganda and Cohort 10 module 1 training in Fort Portal Uganda (b)(6) (b)(6) erved as a Subject Matter Expert 3 during this time observed the training event and evaluated both the materials and of presentation of information for both accuracy and consistency (b)(6) provided expert insight to both Metabiota staff and CDC Uganda representation during all pre training meetings, and post training breakout sessions.

CLIN 1003 – Materials and Supplies
Material costs to support the communication needs of Metabiota personnel who traveled to and within Uganda are being invoiced for this period.

Communication hardware was that was purchased by Metabiota for a previous OHE training effort was brought to the field by the traveling staff members. While no additional hardware was required,

Metabiota staff purchased both data and airtime to support internet and telephone communications respectively.

Ugandan national (b)(6) was offered a daily communication allowance in support of his communication needs during One Health Epidemiology training Cohort 10 Module 2.

CLIN 1004 - Other Direct Costs
DBA Insurance was acquired to support the active time of those traveling to and working within Uganda during this period.

CLIN 1005 – Travel
To provide programmatic and technical support for Cohort 9 module 2 and Cohort 10 Module 1, a training event that took place between the dates of December 7th through December 18th, (b)(6) (b)(6) and (b)(6) traveled to the cities of Entebbe, Jinja, and Fort Portal, Uganda. Airline tickets for Metabiota Program Manager (b)(6) Epidemiologist (b)(6) and Senior Scientist (b)(6) were procured; allowing these key team members to attend the trainings and contribute their respective technical expertise. The Tickets were selected based on cost and time effectiveness, and are being expensed during the month of November.

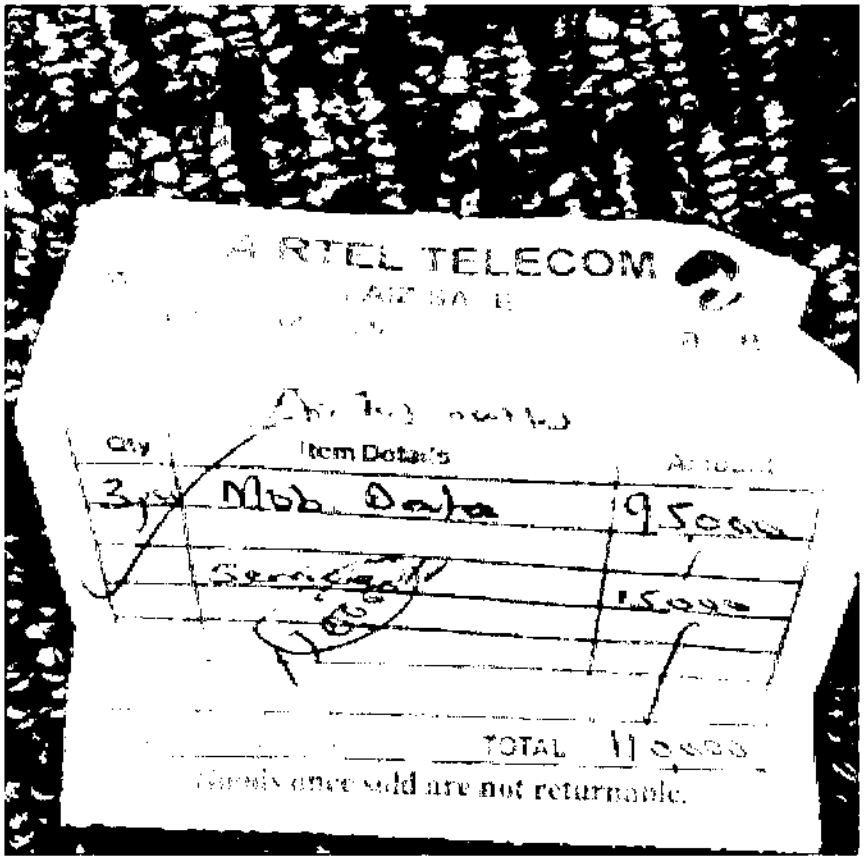

Ground transportation for the Metabiota in country project team to include (b)(6) (b)(6) was provided in support of Cohort 9 module 2, and Cohort 10 Module 1 OHE Trainings. A 4x4 vehicle was rented for a total of 14 days to support safety and convenience for the team, and to deliver Metabiota staff to and from the training location as needed. Fuel for this vehicle was purchased by Metabiota staff to ensure cost effectiveness, and to support travel between the embarkation city of Entebbe and the training sites of Jinja and Fort Portal Uganda for Cohort 9 Module 2 and Cohort 10 Module 1 events respectively. (b)(6) was provided a reimbursement for his travel to both training events for travel to and from his home in Kampala.

Lodging for the training events at a total of 14 nights for Metabiota staff members (b)(6) (b)(6) was provided for them to support the full breadth of both trainings (Cohort 9 Module 2 and Cohort 10 Module 1). (b)(6) were provided lodging for 1 night in Entebbe upon arrival, 5 nights in Jinja to support Cohort 9 Module 2, and 8 nights in Fort Portal to support Cohort 10 Module 1 and their weekend layover. Lodging for the training events at a total of 9 nights for Metabiota staff member (b)(6) was provided to support both trainings (b)(6) was provided lodging for 1 night in Entebbe, 5 nights in Jinja, and 3 nights in Fort Portal and did not remain in Uganda during the weekend layover. Metabiota IC and lead trainer (b)(6) was provided 5 nights of lodging in Jinja to support Cohort 9 Module 2 and 5 nights of lodging in Fort Portal to support Cohort 10 Module 1. (b)(6)

Per Diem in line with USG rates for each respective region traveled to are being expensed this month to support (b)(6) time in country and in transit. for a total of 17 full or partial dates in the regions of Entebbe, 2 full, and 2 half days each, Jinja, 5 full days each, Fort Portal, 8 full days each. (b)(6) was in kind compensated with per diem for the regions of Entebbe, 2 full, and 2 half days, Jinja, 5 full days, Fort Portal, 4 full days. (b)(6) was offered per diem compensation for his time in Jinja, 5 full days, and Fort Portal, 5 full days.

TD 014 Grant Writing Mentorship and Workshop – Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 07/02/15-05/15 16

CLIN 1002 – Labor

Program Manager:

Represents the time spent by Metabiota Africa Regional Program Manager (b)(6) in support of this technical direction (b)(6) lead bi-weekly calls with DTRA CBEP representation, and Kenyan Stakeholder (b)(6) He additionally led conference calls by request and as needed to offer both direction and explanation to the Kenyan Stakeholder. (b)(6) oversaw and worked to develop the SME and participant coordination plan (b)(6) versaw and provided adjustments to the developed work plan per suggestions from DTRA CBEP representation. He also provided oversight and final approval of the Cable Clearance Request form.

Subject matter 1

Represents the time spent by Metabiota Project Coordinator FOIA (b)(6) (b)(6) attended all conference calls held to support communications among Metabiota, DTRA CBEP representation, and our Kenyan stakeholder (b)(6) was responsible for recording minutes for these calls, and for providing comments on project work plan questions from all stakeholders. She was responsible for the development and submission of the Training Event Plan, and began the development of independent consultant agreements in lieu of sufficient information for their completion (b)(6) additionally contributed to the development of the SME participant communication plan and lead efforts to develop necessary independent consultant agreements.

CLIN 1003 – Materials and Supplies

TD 016 Georgia GIS

Objectives

Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) provided administrative oversight to this effort. He continued negotiations for establishing a subcontract agreement with University of Florida. Dennis also participated in teleconference calls for the three CBR projects related to this effort.

Subject matter expert 1:

(b)(6) as Project Coordinator, assisted in revising subcontract documents and participated in subcontract discussions and negotiations with University of Florida.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced for during this period

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced for during this period.

TD 017 Georgia SME Grantsmanship

Objectives

Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) provided administrative and technical oversight of all efforts, conducting communications with the subject matter experts and Georgian stakeholders. He held discussions with the DTRA Country Manager regarding the lack of firm commitments of mentees and their time by NCDC and LMA. He worked with the PC and SMEs to chart a possible strategy for moving forward and communicated that strategy to the DTRA CM. He also reviewed and submitted travel documentation.

Subject matter expert 1:

(b)(6) as Project Coordinator, assisted with administrative and technical oversight of all efforts, participating in communications with the subject matter experts and Georgian stakeholders. She assisted with planning a strategy for moving forward, and worked with the SMEs to draft travel documentation.

Subject Matter Expert 2:

Subcontractor Attimo (now Avila) SMEs (b)(6) and (b)(6) completed the extensive mentorship materials. They also participated in project coordination communications with Metabiota and the Georgian stakeholders, as well as the development of an alternate strategy for moving forward. They worked with the PC to draft travel documentation.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced for during this period

CLIN 1004 - Other Direct Costs

TD 018 Georgia Visiting Scientist Genomics

Objectives

Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) provided administrative and technical oversight of all efforts. He led communications with the visiting scientist and reviewed the visiting scientist's reports. He also communicated the ongoing efforts to DTRA in meetings and teleconferences.

Subject matter 1:

(b)(6) articipated in project coordination calls with the visiting scientist and drafted CDRL language summarizing communications with the visiting scientist.

Visiting Scientist

(b)(6) articipated in project coordination calls with the PM and PC and drafted written communications summarizing his ongoing mentorship work. He continued mentorship activities on comparative genomics of FSU anthrax vaccine strains at the Lugar Center. He began mentoring some junior staff in multiple areas of introductory molecular evolution to provide an educational foundation which appears to be missing in many of the senior staff. (b)(6) also mentored the Eliava Institute's virology team on quality assessment of NGS sequence data generated at the Lugar Center. He continued mentoring (b)(6) on the characterization of the *Shigella*-like bacterial strain identified and sequenced at the Lugar Center.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced for during this period

CLIN 1004 - Other Direct Costs

Defense Base Act insurance costs were accrued for this time period.

TD 019 Georgia Visiting Scientist Microbiology

Objectives

Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) rovided administrative and technical oversight to this effort. He held regular coordination calls with the Visiting Scientist to discuss current efforts and any technical or programmatic issues of concern and reviewed informal reports from the Visiting Scientist. He communicated with DTRA via teleconference and email.

Subject matter 1:

(b)(6) assisted the PM in providing administrative and technical oversight to this effort. She participated in regular coordination calls with the Visiting Scientist, reviewed informal reports from the Visiting Scientist, and drafted language for reporting to DTRA. She is also working with the Visiting Scientist to determine the most efficient path forward for translation and interpretation services.

Visiting Scientist

(b)(6) participated in regular coordination calls with the PM and PC, providing informal reports on activities being conducted. He continued work on the TAP-11 validation plan. The VS participated in a meeting between (b)(6) (LMA) and (b)(6) (NCDC) covering topics including serology and bacteriology training; BAA submissions; and *Brucella* bacteriology testing. He assisted Lugar Center and Batumi staff with troubleshooting of the PCR protocols and reagents for the avian influenza CBR work with University of Cambridge, coordinating communications between relevant entities. Ryan also assisted NCDC with the final preparatory steps for the installation of the GCMS instrument secured through UNICRI.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced for during this period

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced for during this period.

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives

Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/2015 - 05/15/2016

CLIN 1002 – Labor

Program Manager:

Costs were incurred during this period for (b)(6) support execution of the MESA conference in March. During this time period, (b)(6) oversaw all activities of the project coordinator and subcontractors, participated in routine communications with CBEP, Gryphon, RSS, CLS, and A&AS teams to continue conference logistics and requirements, (b)(6) support development and execution of the networking and proceedings day supported by Metabiota, and final review and submission of all abstracts, presentations, and posters for review and approval by CBEP.

Research and Data Analysts:

Costs were incurred during this period for (b)(6) to support execution of the MESA conference in March. During this period, (b)(6) participated in routine communications with CBEP, Gryphon, RSS, CLS, and A&AS teams to continue conference logistics and requirements. (b)(6) (b)(6) worked with A&AS and all participants to finalize travel requirements for all attendees, and ensure coordination and attendance at the networking day.

Costs were incurred during this period for (b)(6) to support contractual and administrative requirements for Gryphon Scientific in execution of the MESA conference. (b)(6) prepared the monthly invoice and back up documentation for Gryphon, as well as coordination with (b)(6) to prepare the monthly report and manage Gryphon's internal administrative needs to support this project.

Subject Matter Expert I:

Costs were incurred during this period for (b)(6) to support execution of the MESA conference. Both (b)(6) participated in review of all abstracts, presentations, and posters prior to submission to CBEP for review and approval. They worked directly with the scientists to secure their submissions and make any revisions required for final acceptance for presentation from the conference. In addition, they supported the development of the secure conference app for use during the event, and participated in routine logistics and technical communications with all team members to finalize needs prior to execution of the event.

Subject Matter Expert III:

Costs were incurred during this period for (b)(6) to support execution of the MESA conference. (b)(6) oversaw all work completed by the Gryphon team, to include review of conference materials, submitted posters and presentations, completion of the abstract book, and conference app. In addition, (b)(6) participated in routine conference calls with project team members and support implementation of logistics and technical requirements necessary for

implementation of the event. (b)(6) completed monthly report, labor tracking, and other administrative needs required for Gryphon performance on the project.

CLIN 1003 – Materials and Supplies
No material costs are being invoiced during this period.

CLIN 1004 – ODCs
Costs for International SOS insurance were incurred during this period for (b)(6) Project Coordinator, providing emergency coverage during her time in Amman, Jordan to implement the conference.

CLIN 1005 – Travel
Costs were incurred during this period to ship and submit the ISOPREP form for (b)(6) to complete travel training requirements for attendance at the MESA conference. This one-time charge was approved by (b)(6) on 14 January to facilitate her reimbursement for this expense.

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015-05/15/2016

CLIN 1002 – Labor

Program Manager:
Costs incurred during this period were for (b)(6) to continue project management activities on this project (b)(6) communicated with DTRA and A&AS to discuss the current status of the project and possible paths forward for the OHASIS module development. He communicated with the NHLS team via email and teleconference to manage efforts. He also managed logistical issues which arose with the venue chosen for fit-testing training when it became apparent that a disconnect had occurred in the coordination surrounding the Metabiota/NHLS team's lodging arrangements. (b)(6) also worked with (b)(6) on financial management and invoicing.

Grants Manager:
Costs incurred during this period were for (b)(6) to manage in-country efforts and participate in communications with (b)(6) managed all NHLS in country, including the fit-testing training effort at the beginning of February. (b)(6) continued coordinating efforts with the videography company.

Trainer 1:
Costs incurred during this period were for (b)(6) to continue project coordination activities on this project and for (b)(6) to serve as a trainer during the fit-testing training effort.

Research and Data Analyst:
Costs incurred during this period were for (b)(6) and (b)(6) to assist in administrative management, and (b)(6) to act as the lead trainer during the fit-testing training effort.

Subject Matter Expert 1:
Costs incurred during this period were for (b)(6) to assist with the fit-testing training effort.

CLIN 1003 – Materials and Supplies
No material costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs
Defense Base Act insurance is procured for all staff working outside of the United States. Metabiota has secured a blanket policy, and costs are reconciled each month and debited against the policy.

CLIN 1005 – Travel
No travel costs are being invoiced during this period.

TD 010 One Health Epidemiology - South Africa

Objectives
Define the South African Training One Health and Epidemiology training landscape, and oversee the review and development of recommendations for adaptation of existing One Health Epidemiology Training Materials while supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 - 03/31/2016

CLIN 1002 – Labor

Program Manger:
Costs incurred this period support time spent by Metabiota Program Manage (b)(6) oversaw all day to day project activities in support of One Health Epidemiology South Africa (b)(6) (b)(6) ead bi-weekly project calls with South African Partners CDC-South Africa, USDA-South Africa, and USDA-APHIS South Africa (b)(6) additionally lead calls with DTRA CBEP representation in support of regular client communications and development of an in-country meeting agenda and slide presentation.
(b)(6) raveled to Pretoria, South Africa to support the convention of in-country meetings with project stakeholders (b)(6) supported the efforts of Metabiota Staff Scientist (b)(6) during all presentations by providing insight and answering questions related to implementation of One Health Epidemiology trainings. He also oversaw the scheduling and coordination of all meetings and lead out-brief calls with DTRA CBEP representation.

Trainer 1:
Costs incurred this period by Metabiota Project Coordinato (b)(6) include attending, recording and offering technical insight during bi-weekly project stakeholder and client calls (b)(6) (b)(6) also provided technical support to the PM and SME 2 during the development of the in-country meeting agenda, and worked to backstop stakeholder communication.
(b)(6) raveled to Pretoria, South Africa to support the convention of in-country meetings with project stakeholders. Ms. Campbell supported the efforts of Metabiota Staff Scientist (b)(6) during all presentations by recording minutes and answering questions as necessary related to Metabiota's plans for engagement in-country. She was responsible for the general coordination and scheduling of these meetings with in Pretoria/Johannesburg.

Subject Matter Expert 2:
Costs incurred this period by Metabiota Staff Scientis (b)(6) n her role as epidemiology subject matter expert and project technical lead include editing the in-country meeting agenda, and provided regular progress updates on her activities to the PM, South African Stakeholders, and DTRA CBEP representation as necessary. She participated in all project calls by providing technical expertise to questions raised by other stakeholders.

(b)(6) raveled to Pretoria, South Africa to support the convention of in-country meetings with project stakeholders (b)(6) lead all presentations with support for the Metabiota Project Team and South African Stakeholders. She was responsible for oversight of stakeholder engagement during meetings and for providing technical support to (b)(6) during the out-brief call with DTRA CBEP representation

CLIN 1003 – Materials and Supplies
Material costs include the purchase of a USB Modem and SIM Card used to provide the Metabiota Project Team the ability to remain connected online and with South African Stakeholders while in Pretoria

CLIN 1004 - Other Direct Costs
Defense Base Act insurance is procured for all staff working outside of the United States. Metabiota has secured a blanket policy, and costs are reconciled each month and debited against the policy.

CLIN 1005 – Travel
Costs were incurred fo (b)(6) to travel to South Africa and convene in-country meetings. Receipts support the cost of flights, travel agent service fees, in-country transport, airport transfers, and per diem allocations for the dates of 2/15/16-2/20/16.

TD 013 One Health Epidemiology Training - Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015-02/29/2016

CLIN 1002 – Labor

Program Manger:
Costs incurred during this period for Program Manager (b)(6) include oversight of all day to day project activities in support of One Health Epidemiology training implementation. (b)(6) lead bi-weekly project calls with CDC-Uganda representation in support of both regular communication and implementation of Cohort 10 Module 2 One Health Epidemiology which took place in Fort Portal Uganda on February 2016, and oversaw submission of the Training Trip Report (TTR). (b)(6) additionally lead calls with DTRA CBEP representation in support of regular client communications post implementation Cohort 10 Module 2 training.

Research and Data Analyst:
Represents the time spent by Metabiota Project Coordinat (b)(6) provided coordination support to the PM during the month of February to include: participating in, and taking minutes during all project and client calls; incorporating necessary information updates into the TTR form in support of Cohort 10 Module 2 training. She maintained communication with the Metabiota project team during their in-country efforts and communicated regularly with Metabiota travel coordination and programs operations staff during this time.

Trainer 1:
Metabiota Epidemiologist (b)(6) was engaged during this month to participate in bi-weekly project calls, and to offer insights as necessary regarding preparation for training implementation. (b)(6) also traveled to Fort Portal Uganda to support the implementation of Cohort 10 Module 2 training. During this time (b)(6) provided technical oversight to the implementation of training and was responsible for taking meeting notes and offering his insights during pre and post training meetings.

These hours also represent the time of (b)(6) who traveled to Fort Portal Uganda as a Trainer 1 Epidemiologist in support of Cohort 10 Module 2 training implementation. (b)(6) utilized his technical background and experience to lead pre and post training meetings and to provide oversight to all logistical aspects of training implementation. He served as team lead while in county and provided additional technical support to (b)(6) as necessary. (b)(6) was also responsible for providing technical oversight to the TTR.

Subject Matter Expert 3:

Metabiota Senior Advisor (b)(6) was engaged during this month to participate in bi-weekly project calls, and to offer insights as necessary regarding preparation for training implementation. (b)(6) also traveled to Fort Portal Uganda to support the implementation of Cohort 10 Module 2 training. During this tim (b)(6) provided technical mentorship and oversight to all trainers during training implementation and was responsible for contributing meeting notes and offering his insights during pre and post training meetings.

AFRICOM Foreign Local National 1:
Metabiota Independent Consultant Trainer (b)(6) was engaged during this month regarding training implementation. (b)(6) also traveled to Fort Portal Uganda to support the implementation of Cohort 10 Module 2 training. During this time (b)(6) lead training session and served as the lead trainer during all training sessions. He was responsible for contributing during lessons learned discussions at pre and post training meetings.

CLIN 1003 – Materials and Supplies
No material costs invoiced during this period. Remaining costs incurred will be invoiced in March.

CLIN 1004 - Other Direct Costs
Defense Base Act insurance is procured for all staff working outside of the United States. Metabiota has secured a blanket policy, and costs are reconciled each month and debited against the policy.

CLIN 1005 – Travel
Costs for flights, Airport Transfers, Per Diem, an in-country vehicle rental, and fuel charges were incurred during the month of February and in support of Cohort 10 Module 2 implementation in Fort Portal Uganda. All costs incurred were used to support the movement of Metabiota Project Team members traveling in-country and including (b)(6) nd (b)(6)

TD 014 Grant Writing Mentorship and Workshop – Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 07/02/15-04-30-16

CLIN 1002 – Labor

Program Manager:

Costs were incurred during this period to support time spent by Metabiota Program Manager (b)(6) (b)(6) oversaw all day to day project activities in support of Kenya Writing Workshop Implementation (b)(6) ead bi-weekly project calls with Kenyan Partner (b)(6) and DTRA CBEP representation. He communicated regularly with DTRA CBEP representation in support of implementation and coordination through the CLS mechanism. (b)(6) emained engaged with DTRA CBEP representation and all traveling members of the Metabiota project team throughout the implementation of the writing worksho (b)(6) dditionally provided oversight to follow up activities including reporting and manuscript coordination by project SMEs.

Subject matter 1:

Represents the time spent by Metabiota Project Manager (b)(6) in her role as project coordinator during this period. (b)(6) as responsible for attending, recording and offering technical insight during bi-weekly project stakeholder and client calls (b)(6) also provided extensive support to the PM during the development of an in-country agenda with Kenyan Stakeholder (b)(6) , and worked to backstop stakeholder communication with DTRA CBEP during the pre-implementation process.

Additionally, (b)(6) aveled to Naivasha, Kenya to support the implementation and execution of the in-country writing workshop (b)(6) supported the efforts of Metabiota Independent Consultant SMEs and AEP Deputy Director (b)(6) during all aspects of the training by recording observations and contributing daily reports to DTRA CBEP representation. She was responsible for the general coordination and scheduling during the meeting and for supporting the PM on follow up activities associated with this effort.

Metabiota Senior Adviso (b)(6) Who was tasked to support this effort by evaluation and communication of complex information in French. (b)(6) translated, expanded, and eventually communicated information to a Congolese researcher requiring clarification and manuscript improvement in his native language. (b)(6) did not travel to Kenya, but did provide remote support during the workshop.

Metabiota Staff Scienti (b)(6) was tasked to provide SME support to three researchers with work associated with her technical capabilities (b)(6) id not travel to Kenya, but did provide remote support prior to, during, and before the writing workshop.

Metabiota Independent Consultant SME (b)(6) is a Kenyan national who provided support prior to the writing workshop by reviewing comprehensively all research manuscripts assigned to him. He was also responsible for working with Metabiota program management and coordination staff on agenda development and researcher outreach. During the workshop, (b)(6) (b)(6) served as the lead SME and attended all components of the workshop, lead many of the lecture sessions and worked directly with his assigned researchers. After the workshop, but still during the month of February (b)(6) maintained his role as mentor to his assigned researchers and communicated regularly with Metabiota project management and coordination staff.

Metabiota Independent Consultant SME (b)(6) is a Kenyan national who provided support prior to the writing workshop by reviewing comprehensively all research manuscripts assigned to him. During the workshop, (b)(6) attended all components of the workshop, lead many of the lecture sessions and worked directly with his assigned researchers. After the workshop, but still during the month of February (b)(6) maintained his role as mentor to his assigned researchers and communicated regularly with Metabiota project management and coordination staff.

After the workshop, but still during the month of February (b)(6) maintained his role as mentor to his assigned researchers and communicated regularly with Metabiota project management and coordination staff.

CLIN 1003 – Materials and Supplies

Project Coordinato (b)(6) nd AEP Deputy Directo (b)(6) raveled to the workshop from outside of Kenya and purchased a shared SIM card to support cellular communication needs in country with local points of contact and SMEs. Wireless data was also purchased to support continued communication with DTRA CBEP representation and Metabiota US based staff. Material costs were also incurred to support printing needs for researchers during the workshop including but limited to printing of research reference articles and workshop agenda summary sheets.

CLIN 1004 - Other Direct Costs

Defense Base Act insurance is procured for all staff working outside of the United States. Metabiota has secured a blanket policy, and costs are reconciled each month and debited against the policy.

CLIN 1005 – Travel

The Metabiota project team traveling to Naivasha, Kenya included (b)(6) (b)(6) and (b)(6) ime worked in country is supported under CLIN 1001 PMO, only his travel and materials are being invoiced. Flights were procured to support the travel of (b)(6) from the US to Nairobi. A flight was procured to support the travel of (b)(6) from his home in Kisumu, Kenya to Nairobi, and airport transfers were provided to all requiring them. Ground transport from Nairobi, Kenya to Naivasha Kenya was provided to all. Hotel accommodation was provided to all traveling members of the project team in Naivasha during the workshop, and hotel accommodation was provided to (b)(6) in Nairobi during transit. Per Diem was provided to all traveling members of the project team as appropriate and with respect to regional GSA rate.

TD 015 Health Informatics Support Services Vietnam - Invoiced to completion on Invoice #239

TD 016 Georgia GIS

Objectives

Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during this period were for (b)(6) to continue project management activities on this project (b)(6) communicated with DTRA and A&AS to discuss the current status of the project. He led communications with the University of Florida (UF) subject matter expertise team via email and teleconference.

Subject Matter Expert 1:

Costs incurred during this period were for (b)(6) to conduct project coordination activities (b)(6) participated in teleconferences with the UF team.

Subject Matter Expert 2:

Costs incurred for this category from October 1, 2015 – February 29, 2016 have not yet been invoiced in an effort to provide education and guidance on proper DOD and DCAA reporting requirements to the performing subcontractor.

Research and Data Analyst:

Costs incurred for this category from October 1, 2015 – February 29, 2016 have not yet been invoiced in an effort to provide education and guidance on proper DOD and DCAA reporting requirements to the performing subcontractor.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

Defense Base Act insurance is procured for all staff working outside of the United States. Metabiota has secured a blanket policy, and costs are reconciled each month and debited against the policy.

CLIN 1005 – Travel

No travel related costs are being invoiced during this period.

PO 016 OSA 1

TD 017 Georgia SME Grantsmanship

Objectives

Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during this period were f[(b)(6)] to continue project management activities on this project[(b)(6)] communicated with DTRA and A&AS to discuss the current status of the project. He led communications with the Avila subject matter expertise team via email and teleconference.

Subject Matter Expert 1:

Costs incurred during this period were for[(b)(6)] to conduct project coordination activities.[(b)(6)] participated in teleconferences with the Avila team and prepared drafts of CCR and CLS forms for April travel.

Subject Matter Expert 2:

Costs incurred during this period were for[(b)(6)] to conduct Grantsmanship activities and related administrative activities.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced for during this period. as Avila staff are covered under their own DBA insurance policy.

CLIN 1005 – Travel

Costs incurred during this period represent the balance of travel costs incurred during the 29 January – 7 February trip to Tbilisi to mentor LMA staff.

TD 018 Georgia Visiting Scientist Genomics

Objectives

Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during this period were for (b)(6) to continue project management activities on this project. (b)(6) communicated with DTRA and A&AS to discuss the current status of the project. He led communications with the Avila subject matter expertise team via email and teleconference.

Visiting Scientist

Costs incurred during this period were for (b)(6) to provide scientific mentoring in genomics and bioinformatics to Georgian scientists. (b)(6) also participated in regular project coordination communications including email and teleconferences.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

Defense Base Act insurance is procured for all staff working outside of the United States. Metabiota has secured a blanket policy, and costs are reconciled each month and debited against the policy.

CLIN 1005 – Travel

No travel related costs are being invoiced during this period.

FOIA DOS

TD 020 Gabon Initial Engagement SME Support - Invoiced to Completion Invoice #729.

TD 021 Field Epidemiology Training - Iraq

Objectives

Conduct remote trainings on epidemiology and BS&S/Biorisk management for one cohort of Iraqi scientists, and also engage them to familiarize them with the Iraq National Biological Emergency Response Plan and work on a gap analysis of said plan. Conduct remote trainings on epidemiology for a second cohort.

Period of Performance: 02/19/16 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs were incurred during this period for the Program Managers, (b)(6) to support TD response, to include development of the technical and budget narrative, budget, SME and subcontractor identification. In addition, both PMs participated in routine conference calls to engage Metabiota project team members, as well as Watermark in the development of their subcontract request and approval, and engagement on the project for the BS&S component. Lastly, a job description was developed and submitted to HR to support hiring for the epidemiologists required for execution of this project.

Subject Matter Expert 1:

Costs were incurred during this period for SME 1s, (b)(6) to support TD response, and initiate project activities. (b)(6) as the project coordinator for this effort, assisted in the development of the project schedule, identification of project requirements, and CDRLs as well as supported the PMs in administrative activities necessary for project kick-off FOIA (b)(6) as a trainer for this effort, began engagement with Watermark to determine BS&S capabilities, as well as identification of potential regional partners and SMEs that could support this effort due to her regional experience and collaborator network.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced for during this period.

CLIN 1004 - Other Direct Costs

No other direct cost related costs are being invoiced for during this period.

CLIN 1005 – Travel

No travel related costs are being invoiced for during this period.

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing- Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 - 12/31/15

CLIN 1002 – Labor

Program Manager:
Costs incurred during this period were for (b)(6) to continue project management activities on this project. (b)(6) communicated with DTRA and A&AS following the completion of Leahy vetting to discuss options for the training. He coordinated with the training team to identify potential training windows, and directed Metabiota Cameroon team to communicate with Ministry of Defense and Ministry of Military Health to confirm training dates. He also worked with subcontractors to resolve minor discrepancies with invoicing.

CLIN 1003 – Materials and Supplies
No material costs are being invoiced during this period.

CLIN 1004 – ODCs
No other direct costs are being invoiced during this period.

CLIN 1005 – Travel
No travel costs are being invoiced during this period.

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats - Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/2015 - 01/31/2016

CLIN 1002 – Labor

Program Manager:

Costs incurred during this period were for (b)(6) to complete close out activities on this project. The second laboratory training under this TD was completed in December 2016. Labor costs for January were required to close out contractual and deliverable requirements with Duke NUS to include receipt and review of their final report, travel report, invoice, and total expenses incurred on the project. In addition, training reports were followed up on to ensure submission and receipt by CBEP, finalizing all deliverables necessary on this TD. In addition, the vendor services contract was closed out with TMC for local procurement provided during the December event. (b)(6) organized and participated in routine communications with all partners to close out the project.

Research and Data Analyst:

Costs incurred during this period were for (b)(6) to assist the PM in closing out this activity. Hours worked included providing administrative support to close out TMC and Duke NUS contracts, ensure all deliverables were met, and final invoices were received. (b)(6) participated in final communications with partners and internal team members to ensure project close out.

Trainer I:

No Trainer 1 costs are being invoiced during this period.

Trainer II:

No Trainer 2 costs are being invoiced during this period.

Trainer III:

No Trainer 3 costs are being invoiced during this period.

CLIN 1003 – Materials and Supplies

Material and supply costs incurred during this period were the costs of reagents and consumables purchased by Duke NUS for the laboratory training event held in December 2016. All items procured by Duke NUS were shipped to Kazakhstan using CLS, and transferred to the Molecular and Virology Institute of Kazakhstan under the materials transfer agreement.

CLIN 1004 – ODCs

No other direct costs costs are being invoiced during this period.

CLIN 1005 – Travel

No travel costs are being invoiced during this period.

TD 003 Bat Borne Virus from Annual Bat Cull India - Canceled and will not be invoiced

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/2015 - 05/15/2016

CLIN 1002 – Labor

Program Manager:
Hours incurred during this period were for work provided by (b)(6) the Metabiota program manager in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted include, routine conference calls and email communications with CBEP and A&AS regional leadership, Gryphon Scientific SMEs, RSS in-country partners, and Metabiota project personnel to coordinate conference invitations, abstract submissions and review, travel logistics, conference logistics for submission to CLS, and other routine project needs. Specific activities included following up and completion of final JKO trainings, submission of all CCR and travel logistic requirements to CBEP and CLS, review and edits of the abstract book, conference presentations and posters, press release, conference app and password protected website. Activities also included coordination of networking day, and continuing to work closely with all partners to finalize logistic requirements necessary for event execution.

Research and Data Analysts:
Hours incurred during this period were for work provided by (b)(6) the Metabiota project coordinator in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan (b)(6) activities included participation in routine project conference calls and travel tracking, coordination, and communication with all invited speakers and SAB members to ensure information was gathered for facilitation of JKO training requirements, travel needs for submission to CLS, and overall coordination of attendance. (b)(6) worked closely with Gryphon SMEs, CLS and the Metabiota travel coordinator to ensure all participant information was secured, and accurately collected, logged, and submitted for vetting purposes. In addition, she reviewed conference documents and supported completion of the Master CLS form, revising logistics requested as needed, and in directed coordination with A&AS team members. She worked closely with the CLS and A&AS teams to ensure all details and requirements were met in preparation for event execution.
Hours incurred during this period included work provided by FOIA (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan (b)(6) (b)(6) hours included working directly with Metabiota contracts and program managers to provide monthly invoicing and reporting requirements to the Metabiota team.
Hours incurred during this period also included work provided by Jacqueline Chu in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. (b)(6) hours included working with the Gryphon scientific team to secure presentations from speakers for the proceedings book, review of submitted abstracts for the abstract book, and assistance in developing content for the conference app.

Subject Matter Expert III:

Hours incurred during this period were for work provided by (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities included overseeing Gryphon SMEs working on this project, and managing all administrative and technical requirements in coordination with her team. In addition, she reviewed submitted abstracts to support completion of the abstract book (b)(6) continued to participate in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, poster presentations, talks, CVs, travel requirements, etc., for review and submission to other team members. (b)(6) continued to coordinate with the team regarding all logistics requirements, to include restructuring of the networking day, and working closely with RSS to facilitate technical requirements for the event. In addition, she oversaw development of the website app and password protected site.

Subject Matter Expert I:
Hours incurred during this period were for work provided by (b)(6) Jackson in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted by (b)(6) included continuing to finalize the conference agenda, reaching out to identified speakers for the plenary sessions, and lectures planned during this engagement. They collected and reviewed the abstracts, compiling them into the abstract book for submission to CBEP. They participated in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, CVs, travel requirements, etc., for review and submission to other team members. They supported finalization of the abstract book, and initiated development of the conference app and password protected website.

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015-05/15/2016

CLIN 1002 – Labor

Program Manager:
Costs incurred during this period were for (b)(6) to continue project management activities on this project (b)(6) communicated with NHLS to work on resolving issues with invoicing. (b)(6) provided management oversight of final preparatory activities leading up to the BS&S videography shoot in January (b)(6) also communicated with NHLS leading up to the respirator fit-testing training event to ensure pick-up of required supplies including reagent-grade isopropanol. He additionally participated in communications with CLS and NHLS leading up to the respirator fit-testing training event regarding venue logistics (b)(6) also began investigating alternative solutions to completing the OHASIS module development in the event that (b)(6) became permanently assigned to NHLS headquarters.

Grants Manager:
(b)(6) oversaw in-country work on the BS&S videography. This cost was captured in the FFP period.

Trainer 1:
Costs incurred during this period were for (b)(6) to continue coordination activities on this projec (b)(6) assisted in resolving invoicing issues and confirmed progress on final logistical preparations for the February fit-testing training event.

Research and Data Analyst:
No research and Data Analyst costs are being invoiced during this period.

TD 010 One Health Epi Training - South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 - 03/31/2015

CLIN 1002 – Labor

Program Manger:
Costs were incurred during this period to support time spent by Metabiota Program Manager (b)(6) (b)(6) oversaw all day to day project activities in support of One Health Epidemiology South Africa. (b)(6) lead bi-weekly project calls with South African Partners CDC-South Africa, USDA-South Africa, and USDA-APHIS South Africa. (b)(6) additionally lead calls with DTRA CBEP representation in support of regular client communications. (b)(6) additionally oversaw the development of an in-country agenda purposed to provide the Metabiota project team with an opportunity to engage with current and potential One Health Epidemiology stakeholders.

Trainer 1:
Represents the time spent by Metabiota Project Manager (b)(6) in her role as project coordinator during this period. (b)(6) was responsible for attending, recording and offering technical insight during bi-weekly project stakeholder and client calls. (b)(6) provided technical support to the PM and SME 2 during the development of the in-country meeting agenda, and worked to backstop stakeholder communication.

Subject Matter Expert 2:
Represents the time spent by Metabiota Staff Scientis (b)(6) in her role as epidemiology subject matter expert and project technical lead. (b)(6) lead the development of the in-country meeting agenda, and provided regular progress updates on her activities to the PM, South African Stakeholders, to DTRA CBEP representation as necessary. (b)(6) additionally participated in all project calls by providing technical expertise to questions raised by other stakeholders.

CLIN 1003 – Materials and Supplies
No materials or supply costs are being invoiced for during this period.

CLIN 1004 - Other Direct Costs
No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel
Travel costs were incurred in preparation for (b)(6) to visit South Africa to review the landscape report and meet with stakeholders. This receipt covers the hotel costs for 3 rooms and corresponding fees for the duration of the trip.

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats - Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/2015 - 01/31/2016

CLIN 1002 – Labor

Program Manager:

Costs incurred during this period were for (b)(6) to complete close out activities on this project. The second laboratory training under this TD was completed in December 2016. Labor costs for January were required to close out contractual and deliverable requirements with Duke NUS to include receipt and review of their final report, travel report, invoice, and total expenses incurred on the project. In addition, training reports were followed up on to ensure submission and receipt by CBEP, finalizing all deliverables necessary on this TD. In addition, the vendor services contract was closed out with TMC for local procurement provided during the December event. (b)(6) organized and participated in routine communications with all partners to close out the project.

Research and Data Analyst:

Costs incurred during this period were for (b)(6) to assist the PM in closing out this activity. Hours worked included providing administrative support to close out TMC and Duke NUS contracts, ensure all deliverables were met, and final invoices were received. (b)(6) articipated in final communications with partners and internal team members to ensure project close out.

Trainer I:

No Trainer 1 costs are being invoiced during this period.

Trainer II:

No Trainer 2 costs are being invoiced during this period.

Trainer III:

No Trainer 3 costs are being invoiced during this period.

CLIN 1003 – Materials and Supplies

Material and supply costs incurred during this period were the costs of reagents and consumables purchased by Duke NUS for the laboratory training event held in December 2016. All items procured by Duke NUS were shipped to Kazakhstan using CLS, and transferred to the Molecular and Virology Institute of Kazakhstan under the materials transfer agreement.

CLIN 1004 – ODCs

No other direct costs costs are being invoiced during this period.

CLIN 1005 – Travel

No travel costs are being invoiced during this period.

TD 003 Bat Borne Virus from Annual Bat Cull India - Canceled and will not be invoiced

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives

Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/2015 - 05/15/2016

CLIN 1002 – Labor

Program Manager:

Hours incurred during this period were for work provided by (b)(6) the Metabiota program manager in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted include, routine conference calls and email communications with CBEP and A&AS regional leadership, Gryphon Scientific SMEs, RSS in-country partners, and Metabiota project personnel to coordinate conference invitations, abstract submissions and review, travel logistics, conference logistics for submission to CLS, and other routine project needs. Specific activities included following up and completion of final JKO trainings, submission of all CCR and travel logistic requirements to CBEP and CLS, review and edits of the abstract book, conference presentations and posters, press release, conference app and password protected website. Activities also included coordination of networking day, and continuing to work closely with all partners to finalize logistic requirements necessary for event execution.

Research and Data Analysts:

Hours incurred during this period were for work provided by (b)(6) the Metabiota project coordinator in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan (b)(6) activities included participation in routine project conference calls and travel tracking, coordination, and communication with all invited speakers and SAB members to ensure information was gathered for facilitation of JKO training requirements, travel needs for submission to CLS, and overall coordination of attendance (b)(6) worked closely with Gryphon SMEs, CLS and the Metabiota travel coordinator to ensure all participant information was secured, and accurately collected, logged, and submitted for vetting purposes. In addition, she reviewed conference documents and supported completion of the Master CLS form, revising logistics requested as needed, and in directed coordination with A&AS team members. She worked closely with the CLS and A&AS teams to ensure all details and requirements were met in preparation for event execution.
Hours incurred during this period included work provided by FOIA (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. M (b)(6) (b)(6) hours included working directly with Metabiota contracts and program managers to provide monthly invoicing and reporting requirements to the Metabiota team.
Hours incurred during this period also included work provided b (b)(6) n support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan (b)(6) hours included working with the Gryphon scientific team to secure presentations from speakers for the proceedings book, review of submitted abstracts for the abstract book, and assistance in developing content for the conference app.

Subject Matter Expert III:

Hours incurred during this period were for work provided by (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities included overseeing Gryphon SMEs working on this project, and managing all administrative and technical requirements in coordination with her team. In addition, she reviewed submitted abstracts to support completion of the abstract book (b)(6) continued to participate in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, poster presentations, talks, CVs, travel requirements, etc., for review and submission to other team members. (b)(6) continued to coordinate with the team regarding all logistics requirements, to include restructuring of the networking day, and working closely with RSS to facilitate technical requirements for the event. In addition, she oversaw development of the website app and password protected site.

Subject Matter Expert I:

Hours incurred during this period were for work provided b (b)(6) (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted by (b)(6) included continuing to finalize the conference agenda, reaching out to identified speakers for the plenary sessions, and lectures planned during this engagement. They collected and reviewed the abstracts, compiling them into the abstract book for submission to CBEP. They participated in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, CVs, travel requirements, etc., for review and submission to other team members. They supported finalization of the abstract book, and initiated development of the conference app and password protected website.

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats - Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/2015 - 01/31/2016

CLIN 1002 – Labor

Program Manager:

Costs incurred during this period were for (b)(6) to complete close out activities on this project. The second laboratory training under this TD was completed in December 2016. Labor costs for January were required to close out contractual and deliverable requirements with Duke NUS to include receipt and review of their final report, travel report, invoice, and total expenses incurred on the project. In addition, training reports were followed up on to ensure submission and receipt by CBEP, finalizing all deliverables necessary on this TD. In addition, the vendor services contract was closed out with TMC for local procurement provided during the December event. (b)(6) organized and participated in routine communications with all partners to close out the project.

Research and Data Analyst:

Costs incurred during this period were for (b)(6) to assist the PM in closing out this activity. Hours worked included providing administrative support to close out TMC and Duke NUS contracts, ensure all deliverables were met, and final invoices were received (b)(6) participated in final communications with partners and internal team members to ensure project close out.

Trainer I:

No Trainer 1 costs are being invoiced during this period.

Trainer II:

No Trainer 2 costs are being invoiced during this period.

Trainer III:

No Trainer 3 costs are being invoiced during this period.

CLIN 1003 – Materials and Supplies

Material and supply costs incurred during this period were the costs of reagents and consumables purchased by Duke NUS for the laboratory training event held in December 2016. All items procured by Duke NUS were shipped to Kazakhstan using CLS, and transferred to the Molecular and Virology Institute of Kazakhstan under the materials transfer agreement.

CLIN 1004 – ODCs

No other direct costs costs are being invoiced during this period.

CLIN 1005 – Travel

No travel costs are being invoiced during this period.

TD 003 Bat Borne Virus from Annual Bat Cull India - Canceled and will not be invoiced

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives

Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/2015 - 05/15/2016

CLIN 1002 – Labor

Program Manager:

Hours incurred during this period were for work provided by (b)(6) the Metabiota program manager in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted include, routine conference calls and email communications with CBEP and A&AS regional leadership, Gryphon Scientific SMEs, RSS in-country partners, and Metabiota project personnel to coordinate conference invitations, abstract submissions and review, travel logistics, conference logistics for submission to CLS, and other routine project needs. Specific activities included following up and completion of final JKO trainings, submission of all CCR and travel logistic requirements to CBEP and CLS, review and edits of the abstract book, conference presentations and posters, press release, conference app and password protected website. Activities also included coordination of networking day, and continuing to work closely with all partners to finalize logistic requirements necessary for event execution.

Research and Data Analysts:

Hours incurred during this period were for work provided by (b)(6) the Metabiota project coordinator in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. (b)(6) activities included participation in routine project conference calls and travel tracking, coordination, and communication with all invited speakers and SAB members to ensure information was gathered for facilitation of JKO training requirements, travel needs for submission to CLS, and overall coordination of attendance (b)(6) worked closely with Gryphon SMEs, CLS and the Metabiota travel coordinator to ensure all participant information was secured, and accurately collected, logged, and submitted for vetting purposes. In addition, she reviewed conference documents and supported completion of the Master CLS form, revising logistics requested as needed, and in directed coordination with A&AS team members. She worked closely with the CLS and A&AS teams to ensure all details and requirements were met in preparation for event execution.

Hours incurred during this period included work provided by FOIA (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. (b) (6) hours included working directly with Metabiota contracts and program managers to provide monthly invoicing and reporting requirements to the Metabiota team.

Hours incurred during this period also included work provided by (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. (b)(6) hours included working with the Gryphon scientific team to secure presentations from speakers for the proceedings book, review of submitted abstracts for the abstract book, and assistance in developing content for the conference app.

Subject Matter Expert III:

Hours incurred during this period were for work provided by (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities included overseeing Gryphon SMEs working on this project, and managing all administrative and technical requirements in coordination with her team. In addition, she reviewed submitted abstracts to support completion of the abstract book. (b)(6) continued to participate in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, poster presentations, talks, CVs, travel requirements, etc., for review and submission to other team members. (b)(6) continued to coordinate with the team regarding all logistics requirements, to include restructuring of the networking day, and working closely with RSS to facilitate technical requirements for the event. In addition, she oversaw development of the website app and password protected site.

Subject Matter Expert I:
Hours incurred during this period were for work provided by (b)(6) Jackson in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted by (b)(6) included continuing to finalize the conference agenda, reaching out to identified speakers for the plenary sessions, and lectures planned during this engagement. They collected and reviewed the abstracts, compiling them into the abstract book for submission to CBEP. They participated in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, CVs, travel requirements, etc., for review and submission to other team members. They supported finalization of the abstract book, and initiated development of the conference app and password protected website.

TD 009 NHLS BS&S Training - South Africa

Objectives

Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015-05/15/2016

CLIN 1002 – Labor

Program Manager:

Costs incurred during this period were for (b)(6) to continue project management activities on this project. (b)(6) communicated with NHLS to work on resolving issues with invoicing. (b)(6) provided management oversight of final preparatory activities leading up to the BS&S videography shoot in January. (b)(6) also communicated with NHLS leading up to the respirator fit-testing training event to ensure pick-up of required supplies including reagent-grade isopropanol. He additionally participated in communications with CLS and NHLS leading up to the respirator fit-testing training event regarding venue logistics. (b)(6) also began investigating alternative solutions to completing the OHASIS module development in the event that (b)(6) became permanently assigned to NHLS headquarters.

Grants Manager:

(b)(6) oversaw in-country work on the BS&S videography. This cost was captured in the FFP period.

Trainer 1:

Costs incurred during this period were for (b)(6) to continue coordination activities on this project. (b)(6) assisted in resolving invoicing issues and confirmed progress on final logistical preparations for the February fit-testing training event.

Research and Data Analyst:

No research and Data Analyst costs are being invoiced during this period.

TD 017 Georgia SME Grantsmanship

Objectives

Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during January for this effort for (b)(6) were for management oversight of all project activities (b)(6) held communications via phone and email with SMEs to discuss final travel logistics, agenda for mentoring trip, and details of mentoring plan (b)(6) also held communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues including WAWF training of NCDC personnel (b)(6) also communicated with (b)(6) (b)(6) at LMA regarding the identification of mentees and in-country mentorship logistics.

Subject matter expert 1:

No subject matter expert 1 costs are being invoiced during this period.

Subject Matter Expert 2:

Costs incurred for (b)(6) and (b)(6) were for the implementation of project activities. SMEs developed an on-site mentorship agenda for the early February mentorship visit. SMEs coordinated with (b)(6) to confirm participant identities and conduct preliminary discussions regarding research topics. SMEs assisted in searching for potential funding opportunities. SMEs finalized travel and logistical arrangements for 31 January – 6 February trip.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel

Costs invoiced represent a partial accounting of expenses for the late January/early February mentoring trip; largely they reflect airline ticket expenses. Costs for (b)(6) are listed in full; costs for (b)(6) have been prorated at 40% as we engaged in cost sharing with some of her other contracts that required her to be in Tbilisi at the same time, as (b)(6) spent 40% of her time on TD-017 related efforts.

TD 018 Georgia Visiting Scientist Genomics

Objectives

Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during January for this effort for (b)(6) were for management oversight of all project activities. (b)(6) held communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen. (b)(6) also held communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Subject matter 1:

Costs incurred during January for this effort for (b)(6) to assist in programmatic oversight of all project activities. (b)(6) participated in communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen. She also participated in communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Visiting Scientist

Costs incurred during January for this effort were for (b)(6) to provide genomics and bioinformatics mentoring to staff at the Lugar Center in Tbilisi, Georgia. (b)(6) mentored Georgian scientists on next-generation sequencing methods and data analysis, including a review of the physical processes underlying sequencing technology to support better overall understanding, an introduction to alternate software packages, mentoring on the components of draft genome reports, comparative genomics, genome annotation, and more.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

DBA insurance was applied for labor costs incurred overseas. Metabiota maintains a blanket DBA policy for all personnel and coverage for (b)(6) was added. Costs will be invoiced monthly as appropriate.

CLIN 1005 – Travel

No travel related costs are being invoiced during this period.

TD 019 Georgia Visiting Scientist Microbiology

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:
Costs incurred during January for this effort for (b)(6) were for management oversight of all project activities. (b)(6) held communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen (b)(6) also held communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Subject matter 1:
Costs incurred during January for this effort for (b)(6) to assist in programmatic oversight of all project activities. (b)(6) participated in communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen. She also participated in communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Visiting Scientist
Costs incurred during January for this effort were for (b)(6) to provide microbiology and other general scientific mentoring to Georgian scientists at NCDC and LMA. (b)(6) continued assisting Lugar Center and Batumi staff with troubleshooting of the PCR protocols and reagents for the avian influenza CBR work with University of Cambridge. He also communicated with project leads and compared issues seen at Lugar Center against issues at Batumi (b)(6) mentored LMA staff on a microscopic agglutination test (MAT) for tularemia. He also mentored their scientists working on procurements for anthrax and leptospirosis diagnostics. He also coordinated communications between LMA staff and (b)(6) egarding a BAA submission on African swine fever. Lastly, he mentored LMA staff in technical writing related to an upcoming quarterly report.

CLIN 1003 – Materials and Supplies
No materials or supply costs are being invoiced for during this period.

CLIN 1004 - Other Direct Costs
DBA insurance was applied for labor costs incurred overseas. Metabiota maintains a blanket DBA policy for all personnel and coverage for (b)(6) was added. Costs will be invoiced monthly as appropriate.

TD 013 One Health Epi Training - Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan and Nigerian National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015-02/29/2016

CLIN 1002 – Labor

Program Manger:
Costs were incurred during this period to support time spent by Metabiota Program Manager (b)(6) (b)(6) oversaw all day to day project activities in support of One Health Epidemiology training implementation (b)(6) lead bi-weekly project calls with CDC-Uganda representation in support of regular communication and preparation for implementation of Cohort 10 Module 2 One Health Epidemiology slated to take place in Fort Portal, Uganda in February 2016, and oversaw submission of updates to the Contractor Logistics Services form in support of trainee engagement (b)(6) additionally lead calls with DTRA CBEP representation in support of regular client communications.

Research and Data Analyst:
Represents the time spent by Metabiota Project Coordinator (b)(6) provided coordination support to the PM during the month of January to include: participating in, and taking minutes during all project and client calls; incorporating necessary information updates into the CLS form in support of Cohort 10 Module 2 training, and coordination of travel preparation meetings (b)(6) (b)(6) served in this capacity between the dates of January 16-31st.
These hours additionally represent time spent by Metabiota Project Coordinator (b)(6) provided coordination support to the PM during the month of January to include: participating in, and taking minutes during all project and client calls. (b)(6) served in this capacity between the dates of January 4-15th.

Trainer 1:
Metabiota Epidemiologis (b)(6) was engaged during this month to participate in bi-weekly project calls, and to offer insights as necessary regarding preparation for training implementation.

Subject Matter Expert 3:
Metabiota Senior Scientist (b)(6) was engaged during this month to participate in bi-weekly project calls, and to offer insights as necessary regarding preparation for training implementation.

CLIN 1003 – Materials and Supplies
No material costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs
No other direct costs are being invoiced during this period.

CLIN 1005 – Travel

Hotel costs were incurred in preparation for (b)(6), and (b)(6) to travel to Uganda to execute the final Cohort training module. The costs cover one night for (b)(6) in Entebbe and a 5 night stay for (b)(6) and (b)(6) at the training site.

TD 014 Grant Writing Mentorship and Workshop – Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 07/02 15-04 30/16

CLIN 1002 – Labor

Program Manager:

Represents the time spent by Metabiota Program Manage[(b)(6)] n support of preparations for the Kenya Writing Workshop. [(b)(6)] lead bi-weekly stakeholder conference calls with Kenyan point of contact [(b)(6)] and DTRA CBEP representation. [(b)(6)] oversaw the adjustment of previously submitted CDRLs in support of changing and developing landscape needs. He worked with AEP leadership in an effort to identify appropriate technical SMEs. [(b)(6)] additionally maintained communications with DTRA CBEP representation regarding the need to offer adjustments to the standing TD in support of [(b)(6)] request and justification for additional hours.

Subject matter 1:

Represents the time spent by Metabiota Project Manager [(b)(6)] in support of this project. M [(b)(6)] [(b)(6)] lead coordination efforts and provided technical support to the updating of CDRL documents including the CLS form [(b)(6)] attended, recorded, and provided technical insight as necessary during bi-weekly calls. She additionally provided support to the PM and AEP leadership in the onboarding of technical SMEs for this effort.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced for during this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel

TD 016 Georgia GIS

Objectives

Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during this period by (b)(6) were for coordination of efforts with the GIS SME team at University of Florida and the CBR project teams. Specific activities included submitting and clarifying travel authorization request and finalizing travel logistics for TM Blackburn. (b)(6) also worked on finalizing the subcontract with University of Florida. Costs for the UF team have not yet been accrued or invoiced.

Subject matter expert 1:

No subject matter expert costs are being invoiced during this period.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced during this period.

CLIN 1005 – Travel

No travel related costs are being invoiced during this period.

TD 017 Georgia SME Grantsmanship

Objectives

Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during January for this effort for [(b)(6)] were for management oversight of all project activities [(b)(6)] held communications via phone and email with SMEs to discuss final travel logistics, agenda for mentoring trip, and details of mentoring plan. [(b)(6)] also held communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues including WAWF training of NCDC personnel. [(b)(6)] also communicated with [(b)(6)] at LMA regarding the identification of mentees and in-country mentorship logistics.

Subject matter expert 1:

No subject matter expert 1 costs are being invoiced during this period.

Subject Matter Expert 2:

Costs incurred for [(b)(6)] and [(b)(6)] were for the implementation of project activities. SMEs developed an on-site mentorship agenda for the early February mentorship visit. SMEs coordinated with [(b)(6)] to confirm participant identities and conduct preliminary discussions regarding research topics. SMEs assisted in searching for potential funding opportunities. SMEs finalized travel and logistical arrangements for 31 January – 6 February trip.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel

Costs invoiced represent a partial accounting of expenses for the late January/early February mentoring trip; largely they reflect airline ticket expenses. Costs for [(b)(6)] are listed in full; costs for [(b)(6)] have been prorated at 40% as we engaged in cost sharing with some of her other contracts that required her to be in Tbilisi at the same time. as [(b)(6)] spent 40% of her time on TD-017 related efforts.

TD 018 Georgia Visiting Scientist Genomics

Objectives

Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during January for this effort for (b)(6) were for management oversight of all project activities. (b)(6) held communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen. (b)(6) also held communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Subject matter 1:

Costs incurred during January for this effort for (b)(6) to assist in programmatic oversight of all project activities. (b)(6) participated in communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen. She also participated in communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Visiting Scientist

Costs incurred during January for this effort were for (b)(6) to provide genomics and bioinformatics mentoring to staff at the Lugar Center in Tbilisi, Georgia. (b)(6) mentored Georgian scientists on next-generation sequencing methods and data analysis, including a review of the physical processes underlying sequencing technology to support better overall understanding, an introduction to alternate software packages, mentoring on the components of draft genome reports, comparative genomics, genome annotation, and more.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

DBA insurance was applied for labor costs incurred overseas. Metabiota maintains a blanket DBA policy for all personnel and coverage for (b)(6) was added. Costs will be invoiced monthly as appropriate.

CLIN 1005 – Travel

No travel related costs are being invoiced during this period.

TD 019 Georgia Visiting Scientist Microbiology

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:
Costs incurred during January for this effort fo[(b)(6)] were for management oversight of all project activities. [(b)(6)] held communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen. [(b)(6)] also held communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Subject matter 1:
Costs incurred during January for this effort for [(b)(6)] to assist in programmatic oversight of all project activities. [(b)(6)] participated in communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen. She also participated in communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Visiting Scientist
Costs incurred during January for this effort were fo[(b)(6)] to provide microbiology and other general scientific mentoring to Georgian scientists at NCDC and LMA. [(b)(6)] continued assisting Lugar Center and Batumi staff with troubleshooting of the PCR protocols and reagents for the avian influenza CBR work with University of Cambridge. He also communicated with project leads and compared issues seen at Lugar Center against issues at Batumi. [(b)(6)] mentored LMA staff on a microscopic agglutination test (MAT) for tularemia. He also mentored their scientists working on procurements for anthrax and leptospirosis diagnostics. He also coordinated communications between LMA staff and [(b)(6)] regarding a BAA submission on African swine fever. Lastly, he mentored LMA staff in technical writing related to an upcoming quarterly report.

CLIN 1003 – Materials and Supplies
No materials or supply costs are being invoiced for during this period.

CLIN 1004 - Other Direct Costs
DBA insurance was applied for labor costs incurred overseas. Metabiota maintains a blanket DBA policy for all personnel and coverage for [(b)(6)] was added. Costs will be invoiced monthly as appropriate.

CLIN 1005 – Travel
No travel related costs are being invoiced for during this period.

TD 014 Grant Writing Mentorship and Workshop – Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 07/02 15-04 30/16

CLIN 1002 – Labor

Program Manager:

Represents the time spent by Metabiota Program Manager (b)(6) in support of preparations for the Kenya Writing Workshop (b)(6) lead bi-weekly stakeholder conference calls with Kenyan point of contact (b)(6) and DTRA CBEP representation. (b)(6) oversaw the adjustment of previously submitted CDRLs in support of changing and developing landscape needs. He worked with AEP leadership in an effort to identify appropriate technical SMEs. (b)(6) additionally maintained communications with DTRA CBEP representation regarding the need to offer adjustments to the standing TD in support of (b)(6) request and justification for additional hours.

Subject matter 1:

Represents the time spent by Metabiota Project Manager FOIA (b)(6) in support of this project. (b)(6) (b)(6) lead coordination efforts and provided technical support to the updating of CDRL documents including the CLS form. (b)(6) attended, recorded, and provided technical insight as necessary during bi-weekly calls. She additionally provided support to the PM and AEP leadership in the onboarding of technical SMEs for this effort.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced for during this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced for during this period.

TD 016 Georgia GIS

Objectives

Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during this period by (b)(6) were for coordination of efforts with the GIS SME team at University of Florida and the CBR project teams. Specific activities included submitting and clarifying travel authorization request and finalizing travel logistics for FOIA (b)(6), (b)(6) also worked on finalizing the subcontract with University of Florida. Costs for the UF team have not yet been accrued or invoiced.

Subject matter expert 1:

No subject matter expert costs are being invoiced during this period.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced during this period.

CLIN 1005 – Travel

No travel related costs are being invoiced during this period.

TD 017 Georgia SME Grantsmanship

Objectives

Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during January for this effort for (b)(6) were for management oversight of all project activities. (b)(6) held communications via phone and email with SMEs to discuss final travel logistics, agenda for mentoring trip, and details of mentoring plan. (b)(6) also held communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues including WAWF training of NCDC personnel. (b)(6) also communicated with (b)(6) at LMA regarding the identification of mentees and in-country mentorship logistics.

Subject matter expert 1:

No subject matter expert 1 costs are being invoiced during this period.

Subject Matter Expert 2:

Costs incurred for (b)(6) were for the implementation of project activities. SMEs developed an on-site mentorship agenda for the early February mentorship visit. SMEs coordinated with (b)(6) to confirm participant identities and conduct preliminary discussions regarding research topics. SMEs assisted in searching for potential funding opportunities. SMEs finalized travel and logistical arrangements for 31 January – 6 February trip.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel

Costs invoiced represent a partial accounting of expenses for the late January/early February mentoring trip; largely they reflect airline ticket expenses. Costs for (b)(6) are listed in full; costs for (b)(6) have been prorated at 40% as we engaged in cost sharing with some of her other contracts that required her to be in Tbilisi at the same time, as FOIA (b)(6) spent 40% of her time on TD-017 related efforts.

TD 018 Georgia Visiting Scientist Genomics

Objectives

Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

Costs incurred during January for this effort for (b)(6) were for management oversight of all project activities (b)(6) held communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen (b)(6) also held communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Subject matter 1:

Costs incurred during January for this effort for (b)(6) to assist in programmatic oversight of all project activities (b)(6) participated in communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen. She also participated in communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Visiting Scientist

Costs incurred during January for this effort were for (b)(6) to provide genomics and bioinformatics mentoring to staff at the Lugar Center in Tbilisi, Georgia (b)(6) mentored Georgian scientists on next-generation sequencing methods and data analysis, including a review of the physical processes underlying sequencing technology to support better overall understanding, an introduction to alternate software packages, mentoring on the components of draft genome reports, comparative genomics, genome annotation, and more.

CLIN 1003 – Materials and Supplies

No materials or supply costs are being invoiced during this period.

CLIN 1004 - Other Direct Costs

DBA insurance was applied for labor costs incurred overseas. Metabiota maintains a blanket DBA policy for all personnel and coverage for (b)(6) was added. Costs will be invoiced monthly as appropriate.

CLIN 1005 – Travel

No travel related costs are being invoiced during this period.

TD 019 Georgia Visiting Scientist Microbiology

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:
Costs incurred during January for this effort for (b)(6) were for management oversight of all project activities. (b)(6) held communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen. (b)(6) also held communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Subject matter 1:
Costs incurred during January for this effort for (b)(6) to assist in programmatic oversight of all project activities. (b)(6) participated in communications via phone and email with Visiting Scientist to discuss work and any issues that may have arisen. She also participated in communications via phone and email with the DTRA Country Manager and A&AS support to discuss project status and issues.

Visiting Scientist
Costs incurred during January for this effort were for (b)(6) to provide microbiology and other general scientific mentoring to Georgian scientists at NCDC and LMA. (b)(6) continued assisting Lugar Center and Batumi staff with troubleshooting of the PCR protocols and reagents for the avian influenza CBR work with University of Cambridge. He also communicated with project leads and compared issues seen at Lugar Center against issues at Batumi (b)(6) mentored LMA staff on a microscopic agglutination test (MAT) for tularemia. He also mentored their scientists working on procurements for anthrax and leptospirosis diagnostics. He also coordinated communications between LMA staff and Dr. Guillermo Risatti regarding a BAA submission on African swine fever. Lastly, he mentored LMA staff in technical writing related to an upcoming quarterly report.

Objectives

Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/2015 - 05/15/2016

CLIN 1002 – Labor

Program Manager:

Project activities for the month of March were focused on implementation of the conference from 7-9 March 2016. The PM, (b)(6) and team members departed on 5 March for Amman, Jordan and conducted a pre-planning coordination meeting on 6 March with RSS, CBEP, and TTI to ensure all requirements were organized and the event venue, and logistics were ready for implementation on the morning of the 7th. She participated on the organization committee in preparation for and throughout the entire event, effectively cooperating and communicating to address conference needs, shifting logistics, and to resolve issues/changes as they arose allowing for the successful implementation of the event. The PM implemented the conference, overseeing all logistics for the event, coordinating directly with TTI and other team members to ensure smooth operations and delivery of the technical requirements. Following execution of the event, the PM has participated in routine project calls, coordinated submission of CDRLs and the proceedings book, and investigated options for video production services. In addition, the PM attended a hot wash with the project team and CBEP in DC to review implemented activities, open action items (proceedings, photo sharing, etc.). Additional activities during this time included review of LOE, submission of routine deliverables, and continued project coordination towards close out.

Research and Data Analysts:

The Project Coordinator (b)(6) supported the PM and project team in execution of the conference in Amman, Jordan, participating in all pre-planning activities and working directly with TTI to ensure all participants safely arrived at the event, and coordinated any last minute travel changes or logistic requirements, as needed. She participated on the organization committee in preparation for and throughout the entire event, effectively cooperating and communicating to address conference needs, shifting logistics, and to resolve issues/changes as they arose allowing for the successful implementation of the event. RSS collaborators and their team were very flexible and accommodating with minor changes required for the planned itinerary (e.g., pushing the coffee break up an hour on day 1, adding items to the lunch menu on day 2, filming interviews in the RSS lobby, and having the poster session tent stay up an additional half-day).

(b)(6) coordinated with Logistics Support, they were responsive, professional, and assisted above and beyond their requested services. TTI helped the organizing committee in all aspects of conference planning, preparation, execution, and closing out. Staff was on call 24/7 before and after the conference organizing travel, audio/visual, catering, and overall event logistics. (e.g., providing runners to direct people between the opening ceremony and conference venue, providing last-minute cars and drivers to participants, supporting unexpected needs and requests from travelers who needed additional travel or logistical services due to illness/ family emergency/ security issues/ etc.)

In addition (b)(6) followed up with all participants after the event, assisting in the development of feedback for the conference website, participants were actively engaged and enthusiastic throughout the two-day conference, and the networking and proceedings day. Metabiota had an almost perfect attendance with active conversations, presentations, and did not run into any logistical challenges during coordination and execution of the event. Emily participated in the hot wash, developing the after action draft report, and submission of the CDRL and proceedings book for review and approval. (b)(6) of Gryphon Scientific supported administrative and contractual requirements during this past month to facilitate compliance, and submission of project deliverables (monthly reporting and invoicing) required under the Gryphon Scientific sub-contract governing project execution. She participated on the organization committee in preparation for and throughout the entire event, effectively cooperating and communicating to address conference needs, shifting logistics, and to resolve issues/changes as they arose allowing for the successful implementation of the event.

Subject Matter Expert I:

SMEs (b)(6) traveled to Amman, Jordan to execute the conference with the MB project team. They facilitated the event, as part of the organizing committee, to include poster set up, note taking, timekeeping, presentation uploads, and technical coordination on the event, as well as scientific engagement and collaborative discussions with all participants. (b)(6) (b)(6) assisted in facilitation of the networking and proceedings day. Both SMEs attended the hot wash remotely, and assisted in completion of the proceedings book for submission to CBEP, to include technical review of all included papers. They followed up with participants following the conference, and assisted in the development and compilation of participant feedback.

Subject Matter Expert III:

(b)(6) executed the conference in March, to include leading the technical engagement for this event. She worked closely with (b)(6) of RSS to facilitate conference proceedings to include MCing the event, chairing sessions, ensuring collaborative discussions. She participated on the organization committee in preparation for and throughout the entire event, effectively cooperating and communicating to address conference needs, shifting logistics, and to resolve issues/changes as they arose allowing for the successful implementation of the event. She participated in all pre-planning, and post-conference activities to include attending the American Corner with the US Embassy in Amman on 6 March, and the hot wash conducted with the team in DC FOIA (b)(6) engaged publications to facilitate submission of post-conference announcements/write-ups in coordination with CBEP and the project team. In addition, (b)(6) led the development of the proceedings book for submission, and oversaw team activities for all Gryphon personnel. She participated in routine project calls and ensured project deliverables were submitted on time and according to schedule.

CLIN 1003 – Materials and Supplies

Material and supply costs were incurred to support the development of the password protected site, the conference proceedings page on the website, update case studies, and continue to provide services updating additional information on the conference website. In addition, costs were incurred to secure and provide services maintaining the conference app. Costs were also incurred for the graphical design of the conference certificate, posters, and agenda card. Additionally, costs were incurred for international communications for (b)(6) to execute program coordination while in Amman.

CLIN 1004 – ODCs

DBA was applied to the project for Metabiota and Gryphon Scientific employees to travel to Jordan for the conference deliverable in March.

CLIN 1005 – Travel

Travel costs include lodging, airfare and Per Diem for FOIA (b)(6) to travel to Amman Jordan for the final workshop. Additionally, costs incurred include expenses to purchase visas for Gryphon Scientific as well as airfare for Gryphon Scientific's FOIA (b)(6)

TD 005 Iraqi Distance Learning – Canceled and will not be invoiced

TD 006 Nipah Research Activity Project- Canceled - Invoiced to Completion Invoice #725

TD 007 Regional Baseline Assessment - Invoiced to Completion Invoice #725.

TD 008 Clinician Training – Invoiced to Completion Invoice #726.

Objectives

Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015-05/15/2016

CLIN 1002 – Labor

Program Manager:

(b)(6) led project activities for this effort. including communications with DTRA/A&AS to communicate project status. He led coordination with the in-country NHLS team to work through financial and administrative issues (b)(6) also spoke with the University of British Columbia to determine the technical requirements necessary for OHASIS module development in the event that the in-country developer is unable to complete the task.

Grants Manager:

(b)(6) led in-country activities for this effort, working with local vendors, banks, and the administrative staff at NHLS to resolve a financial issue with the videography subcontractor (b)(6) also participated in calls with (b)(6) to work through additional financial and administrative issues.

Trainer 1:

(b)(6) participated in project activities on this effort, including communications with DTRA/A&AS to communicate project status. She also coordinated with the in-country NHLS team to work through some financial and administrative issues.

Research and Data Analyst:

(b)(6) and (b)(6) assisted in working through financial and administrative issues including invoicing and the availability of (b)(6) to complete the OHASIS development.

CLIN 1003 – Materials and Supplies

No material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced this period.

CLIN 1005 – Travel

Travel costs being invoiced this period include lodging and per diem for the NHLS staff to conduct fit testing for deliverable 2.

TD 010 One Health Epidemiology - South Africa

Objectives
Define the South African Training One Health and Epidemiology training landscape, and oversee the review and development of recommendations for adaptation of existing One Health Epidemiology Training Materials while supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 - 03/31/2016

CLIN 1002 – Labor

Program Manger:
Metabiota Africa Regional Program Manager (b)(6) led project activities during this time period. He led bi-weekly conference calls with DTRA CBEP Representation, and separate bi-weekly calls with South African Project Stakeholders. (b)(6) provided oversight to the development and submission of the final project deliverable. He ensured that all relevant technical information gained during Metabiota's in-country meetings was integrated into the final project deliverable, and that the project was closed appropriately.

Trainer 1:
Metabiota Project Manager (b)(6) provided coordination support to the Program Manager and SME throughout this period. She participated in bi-weekly conference calls with DTRA CBEP representation and the South African project stakeholders. She contributed to the final project deliverable by providing technical input and general edits.

Subject Matter Expert 2:
Metabiota Staff Scientis (b)(6) provided technical leadership in the development of the final project deliverable during this period. She participated in bi-weekly conference calls with DTRA CBEP representation and the South African project stakeholders. She additionally provided technical oversight towards the development of the final project deliverable through ensuring that information integrated into the report was relevant to project scope and general scientific best practices. She additionally supported the PM by ensuring appropriate project closeout.

CLIN 1003 – Materials and Supplies
No material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs
No other direct costs are being invoiced this period.

CLIN 1005 – Travel
Travel costs incurred include lodging, airfare and per diem for subject matter exper (b)(6) and (b)(6) o travel to South Africa and lead/participate in face to face landscape analysis meetings. While in South Africa a car service was used to transport Metabiota staff. To meetings and to the airport.

TD 014 Grant Writing Mentorship and Workshop – Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 07/02/15-04/30/16

CLIN 1002 – Labor

Program Manager:

Metabiota Regional Program Manager for Africa, (b)(6) continued to manage and provide oversight to this project. He maintained bi-weekly communication with DTRA CBEP representation and worked to address their concerns on quantifying the SME evaluation process (b)(6) worked to maintain regular communication with the project team as they continued their evaluation of manuscripts. He worked to integrate updated project deliverable language into final deliverables.

Subject matter 1:

Metabiota Project Manager (b)(6) led coordination efforts and provided technical support during this period (b)(6) attended, recorded, and provided technical insight as necessary during bi-weekly calls. She additionally provided support to the PM and AEP leadership during the integration of new project deliverable requirements.

Metabiota independent consultant (b)(6) continued his work towards the evaluation and review of research participant manuscripts. He maintained communication with the PM and ensured compliance and understanding of the updated deliverable requests.

Metabiota independent consultan (b)(6) continued his work towards the evaluation and review of research participant manuscripts. He maintained communication with the PM and worked with lead SME (b)(6) to understand requests for updated deliverables.

Metabiota independent consultant (b)(6) continued his work towards the evaluation and review of research participant manuscripts. He maintained communication with the PM and worked with lead SME (b)(6) to understand requests for updated deliverables.

CLIN 1003 – Materials and Supplies

Costs being invoiced include access to KENVET: an investigation into a human anthrax outbreak in central Kenya for Bradford Brooks to aid training materials for the workshop.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced this period.

CLIN 1005 – Travel

Airfare, Lodging, ground transportation and Per Diem costs are being invoiced this period for FOIA (b)(6) FOIA (b)(6) to complete the Writing Workshop in Kenya in February. Per Diem costs for Metabiota SMEs (b)(6) and (b)(6) are being invoiced for their time conducting the workshop, their other travel costs have already been invoiced. Costs for purchasing visas for Metabiota staff to enter Kenya to complete the training are also being invoiced.

TD 015 Health Informatics Support Services – Vietnam - Invoiced to completion on Invoice #239

TD 016 Georgia GIS

Objectives

Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) led project activities for this effort, including communications with DTRA/A&AS to communicate project status. He also led coordination with the UF SME team to discuss project needs and upcoming travel (b)(6) filed travel documentation fo(b)(6) in collaboration with (b)(6) (b)(6) also worked with(b)(6) o educate the UF contracts office on reporting requirements for T&M and FFPLOE contracts(b)(6) also participated in project calls for the CBR projects on this project.

Subject Matter Expert 1:

(b)(6) articipated in project activities on this effort, including communications with DTRA/A&AS to communicate project status. She also coordinated with the UF team to discuss invoicing and travel logistics.(b)(6) also participated in project calls and observed the videoconferences with the GG-27 and AJ TAP-11 teams.

Subject Matter Expert 2:

Narrative covers the period from 1 October 2015 – 31 March 2016.(b)(6) served as the lead SME on the GIS team. He participated in all CBR project calls, and worked with the CBR project teams to identify GIS mentoring and research specific needs(b)(6) so reviewed current geospatial modeling literature as background for preparing a plan for GG-27 data analysis and mentoring. He worked with(b)(6) establish a path forward for the GG-27/AJ TAP-11 project. He and(b)(6) conducted videoconferences with the GG-27 and AJ TAP-11 teams.

(b)(6) dditionally traveled to Tbilisi Jan. 31-Feb. 6 in order to: participate in collaborator meetings on GG-10, GG-20, GG-27 (coordinated by CH2M Hill and Avila Scientific); to conduct a on-site visit at the Lugar Center GIS Center and mentor GG-19 personnel on project-related geospatial data; and to conduct a site visit at LMA's GIS Laboratory to provide mentorship on data entry and editing on GG-20 and GG-27.(b)(6) also worked with(b)(6) to file travel documentation for(b)(6) (b)(6) upcoming trip to Tbilisi.

Research and Data Analyst:

Narrative covers the period from 1 October 2015 – 31 March 201(b)(6) provided background information on AJ biosurveillance efforts to the team and worked with(b)(6) an(b)(6) o establish a path forward for the GG-27/AJ TAP-11 project.(b)(6) Ludwig worked with the GIS teams for GG-19 on the analysis of data and provided guidance via remote communications.(b)(6) conducted videoconferences with the GG-27 and AJ TAP-11 teams. These videos are being placed online on the SEER Lab website.(b)(6) additionally traveled to Tbilisi Jan. 31-Feb. 6 in order to: participate in collaborator meetings on GG-10, GG-20, GG-27 (coordinated by CH2M Hill and Avila Scientific); to conduct a on-site visit at the Lugar

Center GIS Center and mentor GG-19 personnel on project-related geospatial data; and to conduct a site visit at LMA's GIS Laboratory to provide mentorship on data entry and editing on GG-20 and GG-27. Ms. Ludwig also worked to get up to speed on the GG-20 and GG-27 projects in advance of her April trip to Tbilisi.

CLIN 1003 – Materials and Supplies
No Material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs
DBA costs were incurred for FOIA (b)(6) travel to Tbilisi Georgia to provide GIS mentorship.

CLIN 1005 – Travel
Travel costs for the trip in January will be invoiced in April after the subcontractor invoice is correcte.

TD 017 Georgia SME Grantsmanship

Objectives

Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) led project activities for this effort, including communications with DTRA/A&AS to communicate project status. He also led coordination with the Avila team to discuss project needs and upcoming travel. (b)(6) filed travel documentation for the Avila team's upcoming trip in April. (b)(6) participated in a teleconference with the interim director of the Laboratory of Ministry of Agriculture to seek their continued cooperation on this project and the potential identification of additional mentees.

Subject Matter Expert 1:

(b)(6) participated in project activities on this effort, including communications with DTRA/A&AS to communicate project status. She also coordinated with the Avila team to discuss project needs and upcoming travel. (b)(6) drafted travel documentation for the Avila team's upcoming trip in April. (b)(6) participated in a teleconference with the Avila team and LMA to seek their continued cooperation on the project.

Subject Matter Expert 2:

(b)(6) led the Grantsmanship mentoring on this project, holding weekly teleconferences with the mentees at LMA. They worked with (b)(6) to file travel documentation for their upcoming trip to Tbilisi. (b)(6) have begun working with the mentees to identify potential collaborators and prepare their draft white papers for submission to Horizon 2020 and ISTC for possible funding.

CLIN 1003 – Materials and Supplies

No material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced during this period.

TD 018 Georgia Visiting Scientist Genomics

Objectives

Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) ed project activities for this effort, including communications with DTRA/A&AS to communicate project status. He also led coordination with (b)(6) discuss project implementation. He drafted and edited narrative for reporting purposes, and reviewed and approved subcontractor invoices and reports.

Visiting Scientist

(b)(6) provided mentorship on genomics for the Georgian scientists at NCDC and LMA who do work at the Lugar Center. Specificall(b)(6) continued working with (b)(6) and (b)(6) on their comparative genomics analyses of *F. tularensis* strains. He also mentored (b)(6) and (b)(6) in optimizing draft genome assembly strategies and performing annotations using the Georgian Samtredia *Shigella* strain (described in past reports as a *Shigella*-like bacteria isolated in Georgia). (b)(6) is assisting the Georgians in developing a white paper on this *Shigella* work to potentially be used in seeking additional funding (b)(6) also continued working with (b)(6) on the assembly of the draft genome of the Georgian anthrax STI vaccine strain.

CLIN 1003 – Materials and Supplies

No material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs

DBA allocation is applied to this contract for FOIA (b)(6) to continue work in country.

CLIN 1005 – Travel

No travel costs are being invoiced this period.

TD 019 Georgia Visiting Scientist Microbiology

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 05/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) led project activities for this effort, including communications with DTRA/A&AS to communicate project status. He also led coordination with (b)(6) to discuss project implementation, and provided guidance on what directions to gently steer the Georgians in with regards to future project implementation and seeking additional funding. (b)(6) wrote a letter to the TAP-11 team indicating that Metabiota's position is that the project is IRB-exempt (b)(6) also participated in the CBR project calls for TAP-11.

Subject matter 1:
(b)(6) participated in project activities on this effort, including communications with DTRA/A&AS to communicate project status. She also coordinated with (b)(6) to discuss project implementation (b)(6) also participated in drafting narrative for reporting purposes.

Visiting Scientist
(b)(6) provided mentoring to the Georgian scientists at NCDC and LMA. He also participated in regular project coordination calls with (b)(6) and drafted narrative and bullets for reporting purposes. He assisted the TAP 11 PI on navigating the IRB issues and facilitating communications between Illumina Labs (the provider of the kits) and NCDC (b)(6) also began working with a Lugar Center scientist (b)(6) on drafting a manuscript for research on pathogens in bats. He is providing guidance in conjunction with (b)(6) from CDC (b)(6) is also investigating reference manager solutions (EndNote, Zotero) for the Georgian scientists. He further provided guidance and inputs to microbiologists at Lugar Center on a poster submission for a conference to occur in Munich (b)(6) also provided guidance and support in helping LMA evaluate which AIV probes to use. He worked with Lugar Center scientists on developing responses to reviewer comments on a *Yersinia* white paper proposal for the DTRA BAA. He has also been coordinating with both the Batumi Zonal Diagnostic Laboratory and Cambridge to discuss AIV diagnostic troubleshooting and at the end of the month identified a need for a trip to Batumi to do mentoring.

CLIN 1003 – Materials and Supplies
No material costs are being invoiced this period.

CLIN 1004 - Other Direct Costs
DBA allocation was applied to this project for Ryan Arner to continue providing support in country.

CLIN 1005 – Travel
No travel costs are being invoiced this period.

TD 020 Gabon Initial Engagement SME Support - Invoiced to Completion Invoice #729.

TD 021 Field Epidemiology Training - Iraq

Objectives

Conduct remote trainings on epidemiology and BS&S Biorisk management for one cohort of Iraqi scientists, and also engage them to familiarize them with the Iraq National Biological Emergency Response Plan and work on a gap analysis of said plan. Conduct remote trainings on epidemiology for a second cohort.

Period of Performance: 02/19/16 – 05/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) have supported all project activities to date (b)(6) has worked closely with CBEP, in-country and WMRI SMEs to facilitate project kick-off, receipt of training materials, review of BS&S needs and establishment of project meetings and routine calls supporting this engagement. They conducted a meeting with Watermark Risk Management International to facilitate their engagement on the project providing BS&S SME support developing and adapting training materials. The MB PM team held an in-person meeting with (b)(6) on 29 March to discuss project details and LOE projections. In addition, both PMs have participated in interviews and hiring of Epi Trainers as SMEs for this project, and will continue to support these efforts until the project team is complete, and fully engaged. The PMs have reviewed sub-contracting requirements for engagement of WMRI, and initiated review of the received BS&S materials, in addition to overseeing the project team. The team conducted meetings with Iraq FETP POC (b)(6) to collect existing epidemiology training materials. The team also received a list of topics (b)(6) believes should be included in the trainings, and we will initiate research into Tephinet, CDC, and WHO developed materials for inclusion / adaptation once the Epi Trainers are on board.

Subject Matter Expert 1:

SMEs (b)(6) have supported project activities in direct coordination with the PMs. They have participated in routine project calls, meetings, and assisted in the identification and engagement of the project team.

Specifically (b)(6) has utilized her regional network to engage potential partners, SMEs, and FLNs for training activities. She has met with WMRI to review BS&S needs for the project and will work closely with them for the development and implementation of BS&S training components. She received existing and approved BS&S training materials from CBEP and began coordinating and performing review of the materials for use during the training. The team will meet to discuss material review and the way forward in early April.

(b)(6) has coordinated all project activities to include development of the project schedule and CDRL requirements, initiation and participation in interviews with candidates for Epi Training positions, coordination of conference calls, and meetings to support engagement with in-country POCs and determination of participants, training topics and available materials for approval and adaptation on the project. She coordinated submission of a mutual non-disclosure agreement to American Councils, in support of identifying FLN trainers for this event through their in-country network and past training engagements in the region. Should they be successful in identifying appropriate FLNs, we will request approval to contract with them for this project.

Subject Matter Expert 2:
WMRI SME 2 (b)(6) participated in in person and teleconference meetings with DTRA, CBEP A&AS and Metabiota personnel. He worked to assist (b)(6) with development of information requirements and recommendations for project execution. He provided email and phone communications to support in engagement with in country SMEs.

Active Projects

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing - Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 - 11/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) reviewed, edited, and submitted the final report/lessons learned document for this effort.
(b)(6) also reviewed, edited and finalized other administrative reporting for this effort.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
No DBA costs are applied this period.

CLIN 1005 – Travel
Travel costs invoiced include costs for IC FOIA (b)(6) to travel to Cameroon and execute the training event in August. Costs include Per diem and Visa payments.

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015 - 11/15/2016

CLIN 1002 – Labor

Program Manager:
(b)(6) held email and phone communications with the in-country NHLS team to discuss project status and administrative and technical issues including subcontract closeout. (b)(6) also reviewed, edited and finalized other administrative reporting for this effort. (b)(6) also held a teleconference with DTRA/A&AS to discuss project status. (b)(6) further researched and initiated procurement of calipers for fit-testing of personnel and drafted and coordinated a CLS form for this shipment with DTRA/A&AS.

Trainer 1:
(b)(6) participated in email and phone communications with the in-country NHLS team to discuss project status and administrative and technical issues. (b)(6) also drafted and assisted drafting of other administrative and reporting documents for this effort including monthly reports, quad charts, and financial summaries. (b)(6) also participated in a teleconference with DTRA/A&AS to discuss project status.

TD 013 One Health Epidemiology Training - Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 – 11/15/2016

CLIN 1002 – Labor

Program Manager:
Metabiota Regional Africa Program Manager (b)(6) continued to lead regular communications with in country performer, CDC-Uganda. He also scheduled and lead communications with DTRA CBEP Uganda representation. Additionally, during this period, (b)(6) received and began to produce a requested summary and fact sheet document detailing all training implementation that was facilitated by Metabiota.

AFRICOM FLN-1:
Hours incurred include the remaining 60 hours for IC FLN (b)(6) to complete the training executed in September.

CLIN 1003 – Materials and Supplies
Material and Supplies costs invoiced this period include transaction fees and communication costs incurred during execution of the training event in September and not previously invoiced.

CLIN 1004 – ODCs
No DBA costs are invoiced this period.

CLIN 1005 – Travel
Travel costs incurred this period include remaining costs from training implementation in September.

I have reviewed and signed the consent form(s) for the vaccinations indicated above or have received the Travel Itinerary book, which contains the information about the vaccination(s) I received. I have been informed about the recommended vaccinations, possible side effects, and contraindications, and have had the chance to ask questions. I understand the benefits and risks of the vaccination(s) and request that the vaccine(s) be given to me.

I understand that Passport Health does NOT accept ANY health insurance-including Medicare and Medicaid and that I am solely responsible for any and all payment for services. Upon my request, Passport Health will submit a courtesy electronic insurance claim for me and request that all reimbursement checks be sent directly to me. Medicare and Medicaid are not eligible. I understand that travel supplies and medications are non-returnable. I understand I will receive documentation of all vaccines received and am responsible for keeping the record in a safe place and up-to-date. Passport Health keeps active records on file. Inactive records are kept on file for 5 years. I have read and agree to the paragraphs above:

TD 016 Georgia GIS

Objectives

Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 - 11/15/16

CLIN 1002 – Labor

Program Manager:

(b)(6) held email and phone communications with the University of Florida (UF) GIS team to discuss project status and administrative and technical issues. He also participated in CBR project calls with the greater CBR project teams. (b)(6) further reviewed administrative documents, including invoices, quad charts, and other reporting documents. (b)(6) also communicated with LMA to inquire about the status of data for the GG-20 effort and encourage participation in the GoToMeeting mentorship sessions. (b)(6) also participated in email and phone communications with DTRA/A&AS to discuss project status.

Subject Matter Expert 1:

(b)(6) participated in email and phone communications with University of Florida team to discuss project status and administrative and technical issues. (b)(6) also drafted and assisted drafting of other administrative and reporting documents for this effort including monthly reports, quad charts, and financial summaries. (b)(6) also participated in email and phone communications with DTRA/A&AS to discuss project status.

Subject Matter Expert 2:

(b)(6) participated in email and phone communications with (b)(6) to discuss project status. (b)(6) provided oversight to the UF team on all aspects of the project, including UF administrative issues and the GIS spatial epidemiology expertise required for the three CBR projects. (b)(6) also participated in CBR project calls with the greater CBR project teams. (b)(6) has continued working on developing outlines for manuscripts for all three CBR projects.

Research and Data Analyst:

(b)(6) participated in email and phone communications with (b)(6) to discuss project status. (b)(6) continued working on the R package encapsulating GIS spatial epidemiology algorithms and routines previously implemented in Excel and successfully ironed out all bugs in both the algorithms and the implementation of the software package. (b)(6) further assisted (b)(6) in developing vignettes for sample testing of the R package using both data from the Georgia projects and other publicly available data. (b)(6) assisted in testing the R package using data from GG-19. (b)(6) (b)(6) also held weekly GoToMeeting mentorship sessions with the Georgian scientists to help them understand the process of analyzing the data from the CBR projects. (b)(6) further worked on analyzing data from GG-19 and assisted (b)(6) on the outlining of the manuscript for GG-19. (b)(6) hours are high this month due to delayed invoicing from the subcontractor with his hours. (b)(6) has been working full time on this program since June.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
No ODC costs are invoiced this period.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 017 Georgia SME Grantsmanship

Objectives
Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/15 – 11/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) held email and phone communications with Avila Scientific to discuss project status and any ongoing issues (b)(6) along with (b)(6) reviewed subcontractor invoices and reports. (b)(6) (b)(6) also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports. (b)(6) also reviewed, revised, and filed travel documentation with DTRA for mentor travel in that took place late October and early November.

Subject Matter Expert 1:
(b)(6) participated in email and phone communications with Avila Scientific to discuss project status and any ongoing issues. (b)(6) reviewed subcontractor invoices and reports. (b)(6) (b)(6) also drafted reporting instruments including quad charts, invoicing, and monthly reports.

Subject Matter Expert 2:
(b)(6) participated in email and phone communications with Avila Scientific to discuss project status and any ongoing issues. (b)(6) conducted in-country and remote (via Skype) grantsmanship mentoring with LMA scientists. In particular, she worked with them on identifying collaborators, developing full proposals, budgeting, and responding to reviewer comments. She also assisted them with understanding some of the mechanical processes of applying to grant opportunities.

Trainer 2:
(b)(6) in conducting in-country and remote grantsmanship mentoring of LMA scientists. In particular, she worked with them on the coordination aspects of the grant application process, in identifying collaborators, and developing budgets.

CLIN 1003 – Materials and Supplies

TD 018 Georgia Visiting Scientist Genomics

Objectives
Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 – 08/15/16

CLIN 1002 – Labor

Program Manager:
(b)(6) held email and phone communications with (b)(6) to discuss project status and any ongoing issues. (b)(6) along with (b)(6) reviewed subcontractor invoices and reports. (b)(6) also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports. (b)(6) also communicated with A&AS to obtain clarifications on proposal submission process and status of pre-coordination for an effort on which (b)(6) mentoring the Georgian scientists.

Subject Matter Expert 1:
(b)(6) participated in email and phone communications with (b)(6) to discuss project status and any ongoing issues. (b)(6) reviewed subcontractor invoices and reports. (b)(6) (b)(6) also drafted reporting instruments including quad charts, invoicing, and monthly reports.

Visiting Scientist
(b)(6) participated in email and phone communications to discuss project status and ongoing issues. (b)(6) continued genomics and bioinformatics mentorship activities. (b)(6) continued mentoring (b)(6) in various in silico methods to identify whole genome-level variable-number tandem repeats (VNTRs) in bacterial genomes. (b)(6) additionally provided mentorship to (b)(6) (b)(6) in identifying and validating pathogen virulence plasmid sequences from raw next generation sequence data. He also provided (b)(6) with a review of the data requirements for a manuscript on *Francisella tularensis*. (b)(6) also continued investigating additional software tools for bioinformatics mentoring. Furthermore, (b)(6) completed co-drafting of the genome announcement report for the anthrax vaccine strain 55, which was submitted for DTRA review.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
DBA costs are applied for (b)(6) total compensation.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 021 Field Epidemiology Training - Iraq

Objectives
Conduct remote trainings on epidemiology and BS&S Biorisk management for one cohort of Iraqi scientists, and also engage them to familiarize them with the Iraq National Biological Emergency Response Plan and work on a gap analysis of said plan. Conduct remote trainings on epidemiology for a second cohort.

Period of Performance: 02/19/16 – 11/15/16

CLIN 1002 – Labor

Program Manager:
PMs (b)(6) have supported all project activities to date. PMs participated in routine meetings with DTRA CBEP and A&AS teams to facilitate updates and activities according to the project schedule, discuss challenges faced, and support routine implementation and tracking of project deliverables. The PMs have maintained visibility with DTRA CBEP on project status and have offered solutions to address project obstacles.

(b)(6) continued to work with all stakeholders to ensure successful execution of the remote training courses and completion of the NBEP gap analysis. He worked with SME's (b)(6) (b)(6) to continue review and finalization of the NBEP gap analysis, as well as Iraqi stakeholders. He participated in routine project calls and meetings with trainers, Iraqi partners, and CBEP stakeholders on a weekly basis to facilitate program implementation and provide expertise and input where needed. In addition, (b)(6) provided technical guidance and coordination of locally procured materials to ensure they met the standards required for the training and to adjust requirements when materials were not available to ensure successful execution of the HOT. (b)(6) participated in the opening of the HOT course and will provide administrative support throughout the event.

(b)(6) continued to manage administrative components of the project to include the schedule, LOE, budget, and delivery and submission of CDRLs. (b)(6) supported both local and US procurement, coordinating with the team to ensure all materials were purchased and secured according to standard and market availability. She executed and completed contractual requirements, to include contract modifications to facilitate project efforts and realign costs accordingly to support implementation for URC and epi trainers on the project. She participated in routine project calls and meetings with trainers, Iraqi partners, and CBEP stakeholders on a weekly basis to facilitate program implementation and provide expertise and input where needed. In addition, she continued to work with the project team to coordinate the CLS logistics requirements following approval of the request, as well as the transfer, storage, and use of all materials being procured in country to support the HOT course, to include completion of the Transfer of Materials (TOM). (b)(6) participated in the epidemiology and BS&S trainings and provided administrative assistance, as needed to facilitate the training sessions, to include attendance tracking, uploading of resources, recorded videos, and troubleshooting. She also assisted in close out of the remote training sessions. In addition, she has provided administrative support throughout the execution of the HOT. Lastly, (b)(6) responded to the TD modification for Rev 3 submitted and approved by CBEP.

Subject Matter Expert 1:

(b)(6) continued to provide assistance and expertise in completion of the gap analysis during this period. She worked with (b)(6) to provide input to the analysis, review language, and develop graphics required for the report. (b)(6) participated in routine communication with WRMI, PC and PMs.

The Project Coordinator, (b)(6) worked in coordination with the PMs to facilitate and implement the project. She continued to provide assistance in maintaining the project schedule, preparation of CDRL requirements, communication with training teams, LOE, material review and procurement, and coordination of routine project conference calls with all stakeholders. She continued coordination of PAO approval for materials, as well as supporting the logistics requirements for the HOT. (b)(6) participated in remote training sessions to provide administrative assistance, including attendance tracking, uploading of resources, recorded videos, and troubleshooting. In addition, (b)(6) continued to coordinate with the trainees to ensure attendance and any challenges faced were addressed and routed to the appropriate individuals. She worked with URC and Metabiota procurement personnel to secure materials for the HOT course, and compiled materials for use in the HOT. In addition, (b)(6) supported the PM in responding to the TD revision and supported close out of remote trainings for Cohort I and II.

Epidemiology SMEs (b)(6) and (b)(6) continued to participate in routine project calls and regular email communications with Metabiota PC and PMs. They worked with the epidemiology team to complete execution and delivery of the Cohort II remote training course. They assisted in the development of the HOT schedule and other requirements, to include trainer delivery of each course and module. As well, they participated in dry-runs and coordination with the local trainers in preparation for the HOT and compiled all necessary materials for the course. They provided input for the Cohort II TEP and began development of additional information for the after-action report. In addition, (b)(6) continued to facilitate internal meetings with the epi team for coordination and administrative support in maintaining the epidemiology content on the LMS site, to include finalization of the post-test for student distribution and completion.

WRMI SME (b)(6) participated in routine project calls and communications with WRMI personnel to support execution of the BS&S and HOT portions of the course. He delivered the BS&S remote course. In addition, he provided administrative support to team members in completing deliverable requirements on the project.

Subject Matter Expert 2:

WRMI SMEs, (b)(6) participated in routine project calls with Metabiota personnel and developed information requirements and recommendations for project execution via email and phone communications. They participated in dry-runs and coordination for the HOT, to include donning/doffing guidelines and training with FLNs to ensure successful execution of practicum portions of the HOT. They conducted BS&S remote trainings (b)(6) continued procurement coordination with the Metabiota and URC teams for execution of the HOT to include comparisons of materials received, inventories of supplies, and adaptation / planning of course delivery due to variance in materials between US and Iraq supplies. In addition, they conducted the HOT course and completed all BS&S requirements for the event. (b)(6) continued to assist Metabiota SMEs in completion of the gap analysis.

Epidemiology Trainer, [redacted] participated in routine project calls and regular email communications with Metabiota PC and PMs. She executed to the Cohort II Advanced Epidemiology remote training. She participated in dry-runs, planning and coordination for the HOT, and attended the opening of course.

Research and Data Analyst:

URC SMEs [redacted] continued to provide operational project support. As the US based project coordinator, [redacted] communicates routinely with URC's Iraq based team to ensure FLNs are attending and providing routine technical/administrative support during the remote training sessions. In addition, she worked directly with [redacted] and the procurement team to ensure all materials were sourced in country and procured to facilitate the HOT. She provided routine updates to Metabiota project team members and coordinated with URC leadership to ensure completion and delivery of CDRLs. In addition, [redacted] provided coordination and oversight of her team in preparation and scheduling for the HOT.

[redacted] participated in routine project calls, meetings, and email communications with Metabiota, URC US-based team members, and in-country stakeholders to ensure operational project needs were executed in-country. He worked with the procurement team to finalizing all procurement necessary for the HOT. He continued to coordinate with in-country stakeholders to assist in facilitating the transfer of materials and chain of custody for all locally procured items. He provided routine in-country updates and in-country information necessary to support completion of deliverables and project requirements. In addition, he worked with all stakeholders to facilitate and execute the HOT.

Please note: Originally [redacted] were reported as SME Is, however, with a labor rate reduction they have been moved to RDAs to provide a cost savings to the Government.

WRMI RDA, [redacted] continued to provide administrative and technical support to the WRMI project team during execution and completion of the remote BS&S course. She provided trainer support during execution of the HOT and continued to communicate routinely with Metabiota personnel in support of project execution for all BS&S course needs. In addition, she continued to provide LMS administrative support to the epidemiology team, trouble-shooting any challenges faced and supporting the close out of Cohort II training through posting of tests, materials, etc.

WRMI RDA [redacted] completed the monthly invoice requirement on the project.

Epidemiology Trainer, [redacted] in coordination with the other epidemiology instructors executed and completed the Cohort II advanced epidemiology remote training. As well, she finalized materials and participated in dry-runs in preparation for the HOT. She participated in routine project calls and communicated regularly with PC, PMs, and the epidemiology project team. In addition, she took part in the HOT kick-off and prepared for upcoming lectures.

Iraqi Advisor [redacted] participated in routine project calls with the PC, PMs, and URC team to support project implementation. He attended epidemiology and BS&S training sessions to observe participation and execution of the course. In addition, he spoke with participants to gather feedback and provide updates to the Metabiota project team. He met with MoH officials in preparation for the HOT and supported logistics requirements with TTI. In addition, he attended the HOT and provided support to the local training team and participants, as needed.

FLN Trainer [redacted] continued to attend and support Cohort I and II epidemiology and BS&S remote training courses. He was actively engaged in facilitating the online training to include participating in discussion sessions, assisting trainees with troubleshooting, encouraging participation, and responding to questions. As well, he participated in dry-runs in support of the HOT, and facilitated the first two days of the training with other FLN instructors.

Foreign Local Nationals:

FLN [redacted] continued to work with the URC team to complete in-country procurement activities and finalized all procurement for the HOT. He coordinated the materials transfer to the CPHL and conducted an inventory with the CPHL staff to ensure all materials had arrived and were properly stored. In addition, he assisted in preparing and organizing all materials for the HOT. Lastly, he provided routine administrative support to the team.

FLN trainers [redacted] continued to attend and support Cohort I and II epidemiology and BS&S remote training courses. They were actively engaged in facilitating the online training to include participating in discussion sessions, assisting trainees with troubleshooting, encouraging participation, and responding to questions. In addition, they participated in dry-runs in preparation for the HOT, and [redacted] reviewed all materials with [redacted] to prepare for the training and ensure the FLNs were prepared for demonstrations [redacted] facilitated the first two days of the HOT along with [redacted]

CLIN 1003 – Materials and Supplies

The Material costs include purchases of texts and supplies for the in-country training.

CLIN 1004 – ODCs

DBA is applied at [redacted] of total compensation for all in country performers.

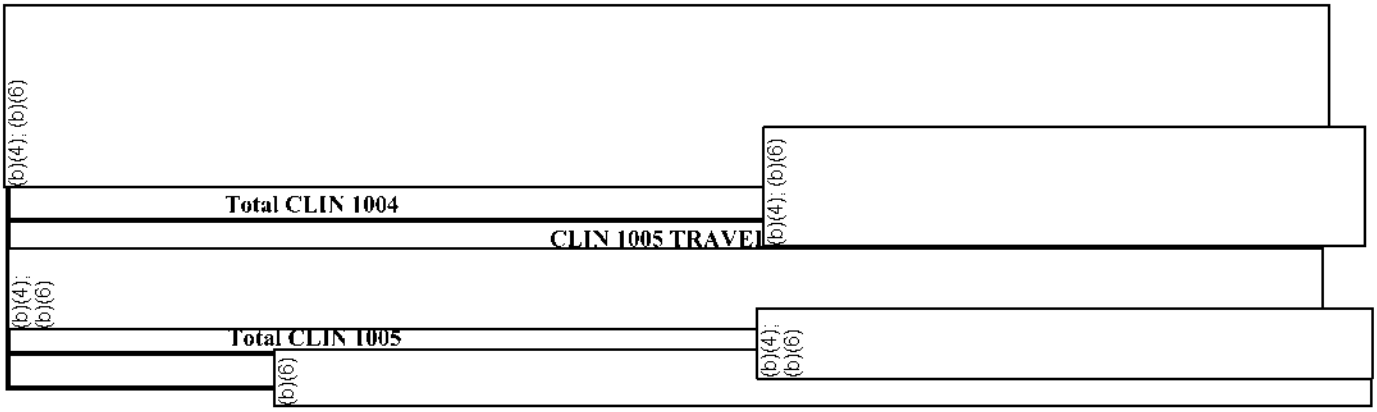

CLIN 1005 – Travel

No travel costs are invoiced this period.

TD 023 One Health Epidemiology Short Course – South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through the development of a One Health Epidemiology short course tailored to the needs of South Africa. Increase the sustainability of the course work through development of a train the trainer module to be delivered to select South African trainers of the short course.

Period of Performance: 3/21/16 – 11/15/16

CLIN 1002 – Labor

Program Manager:
Represents the time of Metabiota Africa Regional Program Manager, [redacted] provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as programmatic communications for the internal project team. He led regular bi-weekly communication with DTRA CBEP. [redacted] additionally worked to progressively elaborate the project schedule in an effort to reflect input from project SME's in real-time. [redacted] led the 100% submission by ensuring transfer of all materials and contributed heavily to the 60% technical comment response.

Research and Data Analyst:
Represents the time of Metabiota Epidemiologist [redacted] provided technical support towards the development and adaptation of materials and contributed to the development of the 100% submission. She participated in technical and programmatic communication calls with project staff, and provided infectious disease expertise towards the overall project approach as well as the delineation between advanced and basic course work. She also reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation.

Subject Matter Expert 2:
Represents the time of Metabiota Staff Scientist [redacted] provided technical leadership and overall product development guidance towards the adaptation of all materials prior to the 100% submission point. She participated in bi-weekly programmatic conference calls and led weekly technical communications with project staff. She additionally contributed directly to the development of presentations and worked to adapt and develop training materials, and to review the work of other project SMEs to ensure an overall consistency in approach. She reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation.

Trainer 2:
Represents the time of Metabiota subcontractor [redacted] provided technical support towards the development and adaptation of materials. He participated in technical and programmatic communication calls with project staff, and provided veterinary and training program development expertise towards the overall project approach.

CLIN 1003 – Materials and Supplies
No material costs are invoiced this period.

CLIN 1004 – ODCs
DBA costs are allocated for (b)(6) of total compensation.

CLIN 1005 – Travel
No travel costs are invoiced this period.

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing- Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 - 12/31/15

CLIN 1002 – Labor

Program Manager: 7 hours
(b)(6) provided administrative and technical oversight to the project in preparation for the training event originally scheduled to take place in November. He coordinated with DTRA to determine go/no-go status of the training and worked to efficiently demobilize the training team when it was determined that Leahy vetting would not be completed in time. He further communicated with DTRA to outline a plan for moving the training forward once Leahy vetting is completed.

Trainer 1: 8 hours
(b)(6) participated in coordination calls with the Metabiota training team in preparation for the November training event. (b)(6) participated in project coordination calls and made efforts on the ground in Cameroon to facilitate getting the information needed for Leahy vetting from the Cameroon Ministry of Defense.

Trainer 2: 5 hours
(b)(6) participated in project coordination communications and also made efforts on the ground in Cameroon to facilitate obtaining the information needed for Leahy vetting from the Cameroon Ministry of Defense.

Scientific Mentor: 7 hours
(b)(6) provided expertise in developing detailed training plans and agenda for each day of the proposed training. (b)(6) reviewed the CLS-translated training materials for accuracy and made corrections to the translation where needed.

CLIN 1003 – Materials and Supplies
Material and Supply costs were not incurred during this period.

CLIN 1004 – ODCs
Other Direct Costs were not incurred during this period.

CLIN 1005 – Travel
Funds were used to secure an expedited visa for Cameroon for one member of the Metabiota training team before the postponement of the training event was confirmed.

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats - Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/2015 - 01/31/2016

CLIN 1002 – Labor

Program Manager: 49 hours

Hours incurred during this period were for work provided by (b)(6) the Metabiota program manager in support of executing the scheduled MERS-CoV training event being held from 07-11 December 2015 in Almaty, Kazakhstan. Activities conducted during this period included coordination and management of international shipments and local procurement for materials and supplies necessary for the training event, in coordination with CLS, project team members and DTRO. (b)(6) continued to work with the Institute of Microbiology and Virology (IMV) and the CBEP Country Manager to facilitate execution of CDRL 11, the Materials and Transfer Agreement. (b)(6) coordinated with CLS on receipt of all materials, and in-country logistics requirements to include transportation, meals, and interpretation and translation services during the event. She finalized all training preparations, and departed for Almaty, Kazakhstan to begin coordination with Duke NUS Trainers, Martin Linster and Ian Mendenhall to prep laboratory requirements (optimization of assays, supply checks, dry-runs for training), and secure all administrative needs with IMV, EZS Solutions, TMC, and in-country POCs to ensure successful implementation of the training event. In addition, (b)(6) (b)(6) participated in routine conference calls with CBEP regional leads, and other key stakeholders to finalize all event arrangements.

Research and Data Analyst: 64 hours

Hours incurred during this period were for work provided by (b)(6) the Metabiota project coordinator in support of executing the scheduled MERS-CoV training event being held from 07-11 December 2015 in Almaty, Kazakhstan. Activities conducted during this period included, daily coordination and communication with CLS, in-country partners, and Duke-NUS trainers to ensure internationally procured reagents and supplies were picked up and shipped to Kazakhstan, in accordance with custom clearance requirements. In addition, she prepared administrative documents for inventory and supply logs for both internationally and locally procured materials, per diem payments for Duke NUS trainers, and the daily agenda and travel schedule for the Metabiota and Duke NUS team during the training week. (b)(6) scheduled and participated in routine conference calls with all team members and stakeholders to facilitate this event, and coordinated directly with A&AS team members to ensure all training materials were translated, and in proper order for printing and binding according to the training agenda. Lastly, she coordinated with all partners to ensure the final participant list was complete for the training event, capturing additional participants from RIBSP and CH2M Hill.

Trainer II: 8 Hours

Hours incurred during this period were for work provided by (b)(6) in support of executing the scheduled MERS-CoV training event being held from 07-11 December 2015 in Almaty, Kazakhstan. (b)(6) participated in routine communication via email and conference calls to coordinate with Metabiota project personnel in support of the upcoming training event.

CLIN 1003 – Materials and Supplies

Material and Supply costs were not incurred during this period.

CLIN 1004 – ODCs

Other Direct Costs were not incurred during this period.

CLIN 1005 – Travel

Foreign Travel costs incurred during this period were in support of the scheduled MERS-CoV training event being held in Almaty from 07-11 December 2015. Transportation costs included ground transport in the amount of 1,190.00 USD to provide daily transportation from the Intercontinental Hotel in Almaty to the training venue, The Microbiology and Virology Institute (IMV) for the Metabiota Program Manager and Duke NUS Trainers.

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/2015 - 05/15/2016

CLIN 1002 – Labor

Program Manager: 34 hours
Hours incurred during this period were for work provided by (b)(6) the Metabiota program manager in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities conducted include, routine conference calls and email communications with CBEP and A&AS regional leadership, Gryphon Scientific SMEs, RSS in-country partners, and Metabiota project personnel to coordinate conference invitations, abstract submissions and review, travel logistics, conference logistics for submission to CLS, and other routine project needs. In addition, most project activities at this time included travel coordination efforts for all confirmed speakers and Scientific Advisory Board (SAB) members traveling to Amman for the conference, to include coordination of JKO trainings, completion of CLS requirements, and planning for the Petra networking day.

Research and Data Analysts: 108 hours
Hours incurred during this period were for work provided by (b)(6) the Metabiota project coordinator in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. (b)(6) activities included participation in routine project conference calls and travel tracking, coordination, and communication with all invited speakers and SAB members to ensure information was gathered for facilitation of JKO training requirements, travel needs for submission to CLS, and overall coordination of attendance. (b)(6) worked closely with Gryphon SMEs, CLS and the Metabiota travel coordinator to ensure all participant information was secured, and accurately collected, logged, and submitted for vetting purposes.
Hours incurred during this period also included work provided by (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. (b)(6) hours included working directly with Metabiota contracts and program managers to finalize modifications required for the Gryphon subcontract, as well as provide monthly invoicing and reporting requirements to the Metabiota team. (b)(6) hours included compilation of all submitted abstracts for review by Gryphon, RSS, Metabiota, CBEP, and the SAB for selection determination and inclusion in the abstract book.

Subject Matter Expert III: 50 hours
Hours incurred during this period were for work provided by (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. Activities included overseeing Gryphon SMEs working on this project, continuing to finalize the conference agenda, and securing all speakers for the plenary sessions, and lectures planned during this engagement. In addition, submitted abstracts were reviewed for oral and poster presentations, and

submitted to the SAB for their review, selection, and scheduling within the event. (b)(6) continued to participate in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, CVs, travel requirements, etc., for review and submission to other team members. (b)(6) continued development of the abstract book for use during the conference.

Create workshop website. Completed in September 2015. We have not yet completed the proposed list of additional features to be developed for the website.

Compile the selected abstracts and posters and publish them into the workshop program. Gryphon Scientific and RSS are currently collecting abstracts and biographies of speakers to include in the abstract book. In addition, we have compiled the abstract submitted through the website for review by the Scientific Advisory Board. Once the Board completes the oral and poster presentation selections, we will make sure all other necessary information is available to create the abstract book.

Subject Matter Expert I: 130 hours

Hours incurred during this period were for work provided by (b)(6) (b)(6) in support of executing the MESA Epigenetics and Genomics Conference scheduled in March 2016 in Amman, Jordan. In addition, (b)(6) departed Gryphon Scientific this month, and has been replaced. Activities conducted by (b)(6) included continuing to finalize the conference agenda, reaching out to identified speakers for the plenary sessions, and lectures planned during this engagement. In addition, they collected and reviewed the abstracts submitted for oral and poster presentations, and coordinated with all SAB members to determine, and establish the meeting for abstract review. They continued to participate in routine conference calls and communications with CBEP, RSS, and Metabiota to facilitate coordination of the event and provide key information on invited speakers to include gathering their abstract submissions, CVs, travel requirements, etc., for review and submission to other team members. They supported development of the abstract book, and researched additional features and add-ons to the conference website, for review and approval, that would enhance networking capabilities among participants.

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015-05/15/2016

CLIN 1002 – Labor

Program Manager: 35.5 Hours
(b)(6) provided administrative and technical oversight to the project as a whole, and led communications with NHLS and DTRA on the efforts. He also led communication with CLS on both shipping issues and venue selection/training participant logistics. (b)(6) provided administrative oversight of efforts by the South African team at NHLS and provided reporting to Metabiota on those efforts.

Trainer 1: 37 Hours
(b)(6) provided coordination of bi-weekly stakeholder meetings to ensure tasks and deliverables are completed on time. She reviewed reports and draft invoices and

Research and Data Analyst: 20 Hours
Research and Data Analysts at NHLS participated in bi-weekly meetings and prepared draft reports and invoices. (b)(6) assisted with coordination leading up to the postponed fit testing training, refined the training agenda and managed receipt of the PortaCount fit-testing equipment.

Subject Matter Expert 1: 12 hours
(b)(6) held conversations with stakeholders at laboratories and facilities within the NHLS system to understand needs and further derive requirements for the OHASIS module. He also participated in coordination meetings leading up to the postponed fit testing training.

CLIN 1003 – Materials and Supplies
S82,345.97 was paid to TSI, Inc., for 5 PortaCount Pro fit testers and corresponding 3-year calibration plans.

CLIN 1004 - Other Direct Costs
No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel

TD 010 One Health Epi Training - South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 - 03/31/2015

CLIN 1002 – Labor

Program Manger: 25.5 Hours
Represents the time spent by Metabiota Africa Regional Program Manager (b)(6) in support of this technical direction. (b)(6) was responsible for leading all communications, including bi-weekly and as necessary conference calls, with DTRA CBEP representation and South African stakeholders representing CDC South Africa, and USDA South Africa (b)(6) lead and oversaw the continued development of the One Health Epidemiology - South Africa landscape review report, and ensured that progress on this deliverable was communicated effectively to DTRA CBEP representation and remained within scope of the technical direction. He additionally provided resource and leadership support to Metabiota Staff Scientist (b)(6) in her role as technical lead on the mentioned deliverable.
In an effort to support timeline and other deliverable needs for this TD, (b)(6) oversaw the development of all travel related CDRLs to include the Travel Authorization form, Cable Clearance Request form, and the Contractor Logistics Services Form for submission to DTRA CBEP representation and in support of in country efforts taking place in February.

Trainer 1: 25.5 Hours
Represents the time spent by Metabiota Project Coordinator (b)(6) was responsible for attending and providing relevant commentary during all conference calls in support of this technical direction. She was also responsible for the development of meeting agendas and the aggregation of meeting minutes. (b)(6) was tasked with supporting the program manager in his efforts to lead the development of the One Health Epidemiology - South Africa landscape review report, and in addition was requested to coordinate follow up communications between South African Project stakeholders.
In an effort to support timeline and other deliverable needs for this TD, (b)(6) developed all travel related CDRLs to include the Travel Authorization form, Cable Clearance Request form, and the Contractor Logistics Services Form for submission to DTRA CBEP representation and in support of in country efforts taking place in February.

Subject Matter Expert 2: 40 Hours
Represents the time spent by Metabiota Staff Scientist (b)(6) in support of this technical direction. (b)(6) attended all conference calls between Metabiota and DTRA CBEP representation, as well as all calls between Metabiota and the South African project stakeholders. (b)(6) served in the role of technical lead during the continued development of the One Health Epidemiology - South Africa landscape review, and in this role was tasked to engage all South African project stakeholders regarding their specific subject matter expertise.

(b)(6) more specifically in her role as technical lead on the development of the OHE-SA landscape review, spent time further evaluating One Health Epidemiology training manuals developed for both Nigeria and Uganda for context and understanding. She engaged project stakeholders to answers specific questions regarding One health gaps in country, current one health efforts in country, review of materials, and long term one health goals.
(b)(6) took the lead on content development for the landscape review report and as such spent time writing and integrating stakeholder comments.

TD 013 One Health Epi Training - Uganda

Objectives

Increase the operational biosafety and bio-surveillance capacity of Ugandan and Nigerian National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015-02/29/2016

CLIN 1002 – Labor

Program Manager: 33.5 Hours

Represents the time spent by Metabiota Africa Regional Program Manage[redacted]n support of this technical direction. In the period under review [redacted] contributed to support pre training events for One Health Epidemiology by leading bi-weekly stakeholder calls with CDC Uganda and DTRA CBEP representation. These calls provided an opportunity for all stakeholders to discuss key issues regarding upcoming trainings. [redacted] lead email communication with all stakeholders in support of preparation of Cohort 9 Module 2 and Cohort 10 Module 1 epidemiology trainings. He additionally took cause to engage all project performers in lessons learned communications in the context of improving forthcoming trainings.

[redacted] supervised the program coordination activities for of OHE Uganda. CDRLs (CCR and CLS form) for Cohort 9 Mod 2 and Cohort 10 mod 1 were submitted to the client. Due to participant cancellations, there were several revisions to the CLS form that took place. [redacted] led the CONUS efforts to ensure that all changes were shared with DRTA CBEP representation. He also provided transparency to CLS subcontractor TTI when necessary and under the purview of DTRA CBEP representation.

Research and Data Analyst: 64 Hours

Represents the time spent by Metabiota Africa Project Coordinator [redacted] functioned as a liaison between CDC Uganda and Metabiota under the supervision of the program manager. Her efforts were focused on supporting consistent communications with CDC Uganda representatives and training manager [redacted] The two were in regular communication with respect to the preparations for Cohort 9 module 2 and Cohort 10 module 1 trainings. In collaboration with the program manager, [redacted] nsured the timely submission of CDRLs, and as changes arose with participants [redacted] shared updated CLS forms with [redacted] drafted the agendas, participated, composed, and shared minutes for all bi-weekly OHE Stakeholder calls.

[redacted] also participated in, and lead the Metabiota pre training event trip planning meeting. These meetings included representation from Metabiota Programmatic, Technical, and Logistical team members. All parties reviewed upcoming travel and prepared for the team's travel. [redacted] also worked with Metabiota AEP Travel Coordinator to ensure the in country logistics for Metabiota's team were in place and organized with respect to the FAR.

Trainer 1: 4 Hours

Represents the time spent by Metabiota Epidemiologist, [redacted] attended bi-weekly stakeholder calls and offered his comments where relevant from a technical and scientific perspective. [redacted] was tasked by the program manager to develop and update the trip risk report.

Subject Matter Expert 3: 2 Hours

Represents the time spent by Metabiota Senior Scientist, [redacted] attended bi-weekly stakeholder calls and attended pre travel meetings while contributing expert advice to lessons learned and general technical approach.

CLIN 1003 – Materials and Supplies

No Materials or supply costs are being invoiced for during this period.

CLIN 1004 - Other Direct Costs

No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel

To provide programmatic and technical support for Cohort 9 module 1, a training event that took place in October of 2015, [redacted] traveled to Jinja, Uganda. Airline tickets for Program Manager [redacted] nd Senior Scientist [redacted] were procured; allowing these key team members to attend the trainings and contribute their respective programmatic and technical expertise. The Tickets were selected based on cost and time effectiveness, and are being expensed during the month of November.

Ground transportation for the Metabiota in country project team to include [redacted] was provided in support of Cohort 9 module 1, a training event that took place in October. A 4x4 vehicle was rented for a total of 7 days to support safety and convenience for the team, and to deliver Metabiota staff to and from the training location as needed. The costs for these expenses are being invoiced in the month of November.

Lodging for the training event at a total of 6 nights each for Metabiota staff; [redacted] in addition to Metabiota Independent contractor Bernard Lubwama, was provided and paid for in support of Cohort 9 module 1 training that took place in October. The costs for these expenses are being invoiced in the month of November.

Per Diem in line with USG rates for each respective region traveled to are being expensed this month to support [redacted] time in country and in transit. for a total of 10 full or partial dates in the regions of Entebbe, 2 full, and 2 half days each, Jinja, 6 full days each.

Additionally, one night each for [redacted] was covered at a hotel located next to the airport to support convenience and safety with respect to avoid driving at night. These costs are being invoiced during the month of November, though the stay occurred in October.

Visa fees for [redacted] were provided, which will cover a six-month period to support [redacted] inclusion in the remaining three modules for Cohort 9 Module 1, and Cohort 10 Module 2. In alignment with travel health recommendations, malaria prophylaxis was also provided for [redacted] nderwent the JKO training and completed the ISOPREP form to serve as an alternative Metabiota in-country representative. [redacted] is a Project Coordinator and was poised (if needed) to provide her expertise for training efforts.

(b)(4); (b)(6)						

TD 019 Georgia Visiting Scientist Microbiology

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/15 05/15/16

CLIN 1002 – Labor

Program Manager: 14.5 Hours
(b)(6) provided administrative and technical oversight to this effort. He held regular coordination calls with the Visiting Scientist to discuss current efforts and any technical or programmatic issues of concern and reviewed informal reports from the Visiting Scientist. He communicated with DTRA via teleconference, email, and face-to-face meeting on this effort, especially with regards to the possibility of using BTRIC support for technical translation and interpretation.

Subject matter 1: 11 Hours
(b)(6) assisted the PM in providing administrative and technical oversight to this effort. She participated in regular coordination calls with the Visiting Scientist, reviewed informal reports from the Visiting Scientist, and drafted language for reporting to DTRA. She is also working with the Visiting Scientist to determine the most efficient path forward for translation and interpretation services.

Visiting Scientist 146 Hours
(b)(6) participated in regular coordination calls with the PM and PC, providing informal reports on activities being conducted. He worked on the TAP-11 validation plan and worked with both NCDC and USAMRIID on IRB issues related to the project. The VS also reviewed and provided feedback to Georgian scientists on three abstracts for submission to DTRA in support of conference attendance, including one abstract on the GG-19 invasion assay work. He provided and continues to provide bacteriology mentoring to LMA staff, especially as related to helping LMA with brucellosis proficiency testing. (b)(6) assisted Lugar Center and Batumi staff with troubleshooting of PCR protocols and reagents for the avian influenza CBR work with University of Cambridge. He also assisted NCDC staff with preparatory work for the GCMS instrument secured through UNICRI.

CLIN 1003 – Materials and Supplies
No Materials or supply costs are being invoiced for during this period

CLIN 1004 - Other Direct Costs
No other direct costs are being invoiced for during this period.

CLIN 1005 – Travel
No travel related costs are being invoiced for during this period.

This submission of the Monthly Report (Contract Data Requirements List; CDRL A001) encompasses implementation of Academic Engagement Partnership (AEP) program activities in accordance with Defense Threat Reduction Agency (DTRA) Cooperative Biological Engagement Program (CBEP) contract HDTRA1-14-C-0104 for 01/01/16-01/30/16.

Technical Directives

AFRICOM

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing – Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 – 04/30/16
Total Estimated Budget: $125,975.00
Estimated Expenditure: $79,766.14
Technical Direction Status: Approved

Completed Activities

- Metabiota PM and PC participated in regular communications with DTRA and A&AS via email and phone.
  Metabiota PM and PC coordinated with the training team and have identified a two-week span in April which appears to be viable for gathering all trainers in Cameroon for the execution of the training.

Upcoming Activities

- Metabiota is awaiting confirmation from the Cameroon Ministry of Defense and/or DTRA on the final dates for the PPE/VHF training.
  Metabiota is engaging in final coordination among the training team in preparation for the upcoming training.

Challenges
Identifying a training date that falls within the existing POP and meets travel documentation lead times must be completed as soon as possible.

TD 008 Clinician Training – Uganda

Objectives
This effort has been cancelled.

Period of Performance: 05/16/15-08/18/15
Total Estimated Budget: $2,769,776.00

Total Expenditure: $737,361.45
Technical Direction Status: *Completed, Closed.*

TD 009 NHLS BS&S Training – South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/15- 05/15/16
Total Estimated Budget: $335,608.00
Estimated Expenditure: $200,304.97
Technical Direction Status: Approved

Completed Activities

- Metabiota PM and PC communicated with DTRA CBEP personnel and A&AS support contractors via email and phone to discuss ongoing work and issues.
- The Metabiota PM communicated with both DTRA and the CLS shipping team regarding VAT issues.
- The Metabiota PM and PC communicated regularly with NHLS point of contacts to discuss and work through logistical and programmatic issues.
- Primary filming for the biosafety and biosecurity video was completed over the period 18-22 January 2016.

Final logistical arrangements were made for the fit-testing training taking place Feb. 2-4 2016.

Upcoming Activities

The Master Trainer Orientation training for fit testing took place Feb. 2-4, 2016.
Post-production on the Biosafety and Biosecurity video is underway.

Challenges

(b)(6) the developer of the OHASIS module, has been seconded on a temporary basis to NHLS Head Office to act in a senior position. He is slated to return to his normal duties this month.

TD 010 One Health Epi Training – South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 12/31/15
Total Estimated Budget: $134,551.00
Estimated Expenditure: $90,648.98
Technical Direction Status: Approved

Completed Activities

- Conducted bi-weekly conference calls with DTRA CBEP personnel and A&AS support contractors.
- Conducted bi-weekly conference calls with South African stakeholders supporting the review and modification of One Health Epidemiology training materials, and the development of a training roll out plan.
- Procured international flights and in country ground transport and hotel accommodations to support Metabiota Project Team efforts in South Africa.
  Established draft agenda for Metabiota in country meeting set to take place between the dates of February 17th-19th, 2016.
- Scheduled specific meeting times between Metabiota Project Team and South African stakeholders.
- Requested specific meeting times to be set by South African stakeholders with other organizations of One Health determination including but not limited to: The One Health Steering Committee, University of Pretoria, Department of Agriculture, and the National Institute of Communicable Disease.

Upcoming Activities

Receive and respond to questions or needs for clarification regarding the submitted One Health Epidemiology landscape analysis report.
Preparation of slide presentation to support the facilitation of scheduled in country meetings;

- Finalization and solidification of in-country stakeholder meetings.
- Continue to ensure effective coordination of communication between stakeholders involved in the materials review process.
- Development of final deliverable outline for detailing of recommendations for modification of existing one health epidemiology materials.
  Development of final deliverable outline for training plan roll out recommendations.

Challenges

While our South African partners for this effort are decidedly motivated and engaged in the process of progressing One Health Epidemiology training in country, they have each individually expressed their respective limited bandwidths on this project. Further, and despite our efforts to identify one of our South African stakeholders as a lead communicator, there seems to be continued limitations with in country coordination. This has caused Metabiota to alter its approach towards the development of deliverables and outreach to stakeholders. In kind, an additional amount of effort greater than expected has been necessary to keep the project within scope and on the scheduled timeline.

TD 013 One Health Epi Training – Uganda

Objectives

Increase the operational biosafety and bio-surveillance capacity of Ugandan and Nigerian National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 02/29/16

Total Estimated Budget: $381,705.00
Estimated Expenditure: $232,699.14
Technical Direction Status: Approved

Completed Activities

- Held pre-travel meeting in preparation of Cohort 10 Module 2 Training to take place in Fort Portal, Uganda.
- Re-submission of CLS form to adjust for last minute participant cancellations and associated additions.
- Held bi-weekly conference calls with DTRA CBEP personnel and A&AS support representation;
- Supported request from CDC Uganda to provide improved training manuals for participants during Cohort 10 Module 2 Training.
- Held bi-weekly conference calls with CDC-Uganda to discuss implementation of trainings going forward.
- Developed pre-travel Risk Assessment Report identifying specific threats within Uganda and associated mitigation strategies.
- Procurement and selection of appropriate air travel, hotel, and in-country ground transportation accommodations.
- Management of independent consultant engagement needs for Cohort 10 Module 2 OHE Training.

Upcoming Activities

- Continuation of bi-weekly calls with all OHE project stakeholders.
- Continuation of bi-weekly calls with DTRA CBEP and Metabiota.
- Implementation of OHE Cohort 10 Module 2 training between February 1-5, 2016 in Fort Portal, Kabarole, Uganda.
- Development of Training Trip Report.
- Development and delivery of Project After Action Report containing in-depth recommendations, detailed lessons learned, and further insight for the DTRA COR.

Challenges

The lead up and eventual U.S. based Metabiota Project Team departure to Uganda for Cohort 10 Module 2, was generally smooth and without incident; however, there was some level of difficulty with regard to engaging our CDC partners and determined trainers. Though, much of this lack of communication can be ascribed to the personal and daily workload needs of individuals.

TD 014 Grant Writing Mentorship and Workshop – Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 7/21/15- 5/15/16
Total Estimated Budget: $113,982.82
Estimated Expenditure: $29,197.62

Technical Direction Status: Approved

Completed Activities

Held bi-weekly calls with DTRA CBEP representation.

- Held follow up calls with DTRA CBEP and (b)(6) regarding resource concerns to support TD-014.
- Developed and submitted a resource reallocation solution in support of (b)(6) concerns over limitations in project resources to DTRA CBEP.

Developed and submitted suggestions for technical direction and technical proposal revisions to DTRA CBEP representation.

- Developed and delivered independent consultant agreements for three Kenya based subject matter experts.
- Engagement of Metabiota Subject Matter experts in support of the review and improvement of participant research manuscripts.

Engagement of AEP Deputy Director to contribute time and technical research writing skills in a subject matter expert capacity.

Final assignment of all manuscripts to workshop mentors.

- Development of SME engagement plan regarding the review of submitted research manuscripts.
- Proposal of draft agenda and lecture materials to all project SMEs in lieu of a response from in country point of contact (b)(6) regarding the delivery of these materials.
- Receipt of 17 of 20 research manuscripts requested.

Submission of CLS and TAF forms to support writing workshop logistics and Metabiota Project Team Travel.

- Resubmission of CLS and TAF forms to support alterations within the project landscape.

Resubmission of CCR form to support the travel of AEP Deputy Director.

Upcoming Activities

Coordination of pre-workshop review of draft participant manuscripts by subject matter experts to support the Writing Workshop.

- Execution of in country workshop in Naivasha Kenya.

Coordination of participants during workshop activities to ensure effective subject matter expert engagement.

Delivery of draft participant manuscripts to DTRA CBEP representation to serve as baseline for evaluation of manuscript improvement.

- Coordination with CLS to ensure that logistical concerns are in line with technical and programmatic needs of the workshop.
- Finalization of Independent Consultant agreements to support the onboarding of Kenyan SMEs.

Begin the process of post workshop SME review of participant manuscripts.

- Continuation of bi-weekly stakeholder calls.
- Development and submission of training trip report in support of Kenya Writing Workshop.

Challenges

Our Kenyan SME's have expressed concern regarding the number of hours available to execute this activity. To address their concerns, Metabiota progressively iterated with the client and Kenyan SME's to revise budgeted hours by labor category, which provided a substantial increase in the number of hours available. Importantly, this exercise did not exceed the originally approved budget.

Departure of Metabiota lead SME (b)(6) lead to some level of last minute logistical challenges. Specifically, (b)(6) departure left the project team down one mentor and, importantly, did not allow enough time to submit new CCR's within DTRA's required window. CBEP POC's, were briefed of this situation and allowed Metabiota to submit a new CCR for AEP Deputy Director, (b)(6) 15 days ahead of travel. (b)(6) will travel to Kenya to provide SME mentor support in (b)(6) absence. While our project team was able to prepare fully for the execution of the workshop, a higher amount than expected of project management and coordination hours were necessary. Finally, there were sustained issues with regard to project SME adherence in engaging in scheduled biweekly calls.

TD 020 Initial Engagement SME Support – Gabon – Cancelled

Objectives
To provide technical support to DTRA CBEP regarding initial engagement activities with Gabonese ministerial officials, historical context and technical advice on gap analyses, and recommend CBEP engagement approaches with the Government of Gabon

Period of Performance: 12/14/15 - 3/31/16
Total Estimated Budget: S 31,955.00
Estimated Expenditure: S2,014.63
Technical Direction Status: *Cancelled*

Completed Activities
- Requested the establishment of a bi-weekly call with DTRA CBEP representation; and Development of communication plan to support TD-020.

Upcoming Activities
- This technical direction has been cancelled

Challenges
No Challenges to report in January

CENTCOM

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats – Kazakhstan

Objectives
To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/15- 01/31/16
Total Estimated Budget: S391,056.00

Estimated Expenditure: $378,548.34
Technical Direction Status: Approved

Completed Activities

- Collect, review, and store all documents to ensure the project has met its objectives;
  Prepare written spotlight piece to highlight project activities and successes;
- Review all invoice payments for project closure;
- Completion of final project deliverables to close out TD 002.

Upcoming Activities

None, project is complete.

Challenges

No Challenges to report in January.

TD 003 Bat Borne Virus from Annual Bat Cull – India – Cancelled

Objectives

This effort has been cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: *Cancelled*

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop – Jordan

Objectives

Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/15 to 05/15/16
Total Estimated Budget: $488,040.00
Estimated Expenditure: $310,647.75
Technical Direction Status: Approved

Completed Activities

- Continued identification and preparations of logistical requirements, costs, itinerary, and agenda for the Networking and Proceedings Day on 9 March, 2016.
- Submission of revised travel CLS for Scientific Advisory Board members, invited Speakers, and presenters receiving travel support.
  Submission of revised Master CLS for in-country ground travel and logistics support request for March Conference.
  Final US citizen completing JKO trainings for DoD travel support.
  Finalization of Conference agenda and abstract book.

- Submission of conference materials for internal and PAO approval.
  Perform internal export control review of presentation slides.
- Conduct virtual meetings with plenary and symposium speakers to review presentation expectations and introduce speakers to the members in their respective sessions.
  Ongoing communication and collaboration with CBEP personnel, in-country partner RSS, Gryphon Scientific, and CLS to coordinate logistical requirements of the Workshop.

Upcoming Activities

Final CCR submission for non-USG employees.

- Submission of CLS form for Proceedings Book.
  Implement Scenario Planning Day on 9 February to execute a dry-run of the conference event with all partners present.
  Continue close collaboration with key CBEP personnel, Gryphon, RSS, and CLS to monitor travel arrangements and finalize CLS logistical requirements for March, 2016 Conference.

Challenges

Several unexpected events have caused the project requirements to shift, therefore changing the schedule and costs of the project as well. Metabiota, Gryphon, TTI, RSS, CBEP and A&AS have increased communication and shared the additional responsibilities and costs associated with SME travel requirements, Networking Day funding, and overall event logistical planning. Metabiota will continue to maintain clear lines of communication and to engage all relevant stakeholders in regular virtual meetings, in-person group meetings, and email correspondence to achieve project objectives.

TD 005 Long Distance Learning – Iraq – Cancelled

Objectives

This effort has been cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: *Cancelled*

EUCOM

TD 011 TADR Activity Project 4 (TAP-4) – Ukraine

Objectives

The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/15/15-01/31/16
Total Estimated Budget: $116,879,54
Estimated Expenditure: $77,644.81
Technical Direction Status: Approved

Completed Activities

Metabiota PM and PC completed and sent final report summarizing the work done in Ukraine, including those items performed by the subcontractor SAFOSO.

Upcoming Activities

None, this activity has completed.

Challenges

No challenges to report in January.

TD 012 Ukraine Project 2 – Ukraine

Objectives

This effort has completed

Period of Performance: 05/16/15-09/30/2015
Total Estimated Budget: $264,788.00
Total Expenditure: $264,788.00
Technical Direction Status: *Completed, Closed* (Transferred to BTRIC TO4)

TD 016 Georgia Geographic Information Systems – Georgia

Objectives

Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15-05/15/16
Total Estimated Budget: $139,514.62
Estimated Expenditure: $15,139.54
Technical Direction Status: Approved

Completed Activities

- Metabiota PM, PC, and SME have participated in communications with the project teams of GG-19, GG-20, and GG-27.
- University of Florida subcontract was fully executed.
- Travel logistics for (b)(6) (UF) were completed.

Upcoming Activities

- Metabiota SME team is providing GIS data analysis support and mentoring to the Georgian scientists while in country, and will continue to do so upon return to US.

Challenges

The CBR project teams have rescheduled teleconferences and meetings a number of times, which has made coordination of the GIS portion of this work challenging. However, it appears that the

coordination of these projects is back on track and the Metabiota PM is communicating with the CBR project teams' leads outside of the scheduled teleconferences and meetings as a risk mitigation.

TD 017 Georgia Subject Matter Expert Grantsmanship – Georgia

Objectives

Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: S136,732.00
Estimated Expenditure: S48,214.68
Technical Direction Status: Approved

Completed Activities

Metabiota PM and PC held regular communications with the SMEs to discuss the mentorship plan and materials, and the strategy for moving forward with LMA, and for providing WAWF training to NCDC.

Metabiota PM and PC communicated with DTRA and A&AS via email and phone to discuss project status and obstacles.

- Metabiota SMEs drafted an agenda for kicking off Grantsmanship work with LMA scientists.

Metabiota SMEs departed to Tbilisi in order to implement Grantsmanship mentoring with LMA.

Upcoming Activities

Metabiota SMEs were in country from 31 January to February 6 to implement Grantsmanship mentoring with scientists at LMA.

- Metabiota is developing a path forward for WAWF training for NCDC administrative staff.

Challenges

No challenges to report January

TD 018 Georgia Visiting Scientist Genomics – Georgia

Objectives

Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $384,435.00
Estimated Expenditure: S138,719.93
Technical Direction Status: Approved

Completed Activities

The Metabiota PM and PC held email and phone communications with the Visiting Scientist (VS) to discuss current activities and assist the VS with any issues requiring programmatic input.

- Metabiota VS has continued mentoring [redacted] in multiple topic areas related to next-generation sequencing methods. These efforts covered but was not limited to topics such as the chemistry and physical basis underlying the Illumina sequencing technology; elements of the NGS data analysis pipeline including error, file structures, software tools, and more; and a review of other sequencing platforms for comparative purposes.
  Metabiota VS mentored [redacted] and [redacted] on the structure and content of draft genome reports for submission to publications.
- Metabiota VS mentored [redacted] on comparative genomics procedures for the recently funded *F. tularensis* project.

Upcoming Activities

- Metabiota VS will continue mentoring in all above mentioned mentoring areas.

Challenges

There appears to be an issues with the Illumina MiSeq sequencer at the Lugar Center. There may be a physical problem with the machine. No new data can be generated at this time; this likely will not impact mentorship unless the issue persists for an extended period of time as existing data can be used for mentorship purposes.

TD 019 Georgia Visiting Scientist Microbiology – Georgia

Objectives

Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $382,330.00
Estimated Expenditure: $181,043.99
Technical Direction Status: Approved

Completed Activities

The Metabiota PM and PC held regular calls with the Visiting Scientist (VS) to discuss current activities and assist the VS with any issues requiring programmatic input.

- Metabiota VS continued assisting Lugar Center and Batumi staff with troubleshooting of the PCR protocols and reagents for the avian influenza CBR work with University of Cambridge. Metabiota VS communicated with project leads and compared issues seen at Lugar Center against issues at Batumi. There may be two separate problems. Further assistance with troubleshooting will not be possible without traveling to the Batumi ZDL.
  Metabiota VS mentored LMA staff on a microscopic agglutination test (MAT) for tularemia. He also mentored their scientists working on procurements for anthrax and leptospirosis diagnostics. He also coordinated communications between LMA staff and [redacted] regarding a BAA submission on African swine fever. Lastly, he mentored LMA staff in technical writing related to an upcoming quarterly report.

Upcoming Activities

- Metabiota PM, PC, and VS have begun initial planning for troubleshooting at Batumi ZDL related to the DTRA-funded AIV surveillance.
  Metabiota VS will continue to participate in coordination calls and meetings for CBR projects funded by DTRA and support and mentor Georgian scientists involved in those projects as needed.
  Metabiota VS will begin mentoring a Lugar Center scientist on manuscript preparation related to bacterial work on bat specimens.
- Metabiota VS is assisting NCDC in considering options on how to use the GC/MS instrument to satisfy funder goals.

Challenges
No challenges to report in January.

PACOM

TD 006 Nipah Research Activity Project – Philippines – Cancelled

Objectives
This effort has completed.

Period of Performance: 06/01/15 09/30/15
Total Estimated Budget: $874,846.00
Total Expenditure: $11,985.82
Technical Direction Status: *Cancelled*

TD 007 Regional Baseline Assessment Southeast Asia

Objectives
Characterize the region based on the disease landscape, organic regional capabilities, and external factors that impact CBEP objectives, identify needs and areas of overlap with other stakeholders, and provide overarching strategic guidance & goals to CBEP PACOM Country Managers in the development of country engagement strategies.

Period of Performance: 05/16/15 10/31/15
Total Estimated Budget: $850,489.00
Total Expenditure: $850,489.00
Technical Direction Status: Approved

Completed Activities

Prepared briefing for February PACOM out-brief in coordination with Metabiota SMEs and CBEP.
Prepared for and rescheduled out-briefing to February to allow for leadership attendance.
Coordinated with CBEP regional leads to close out project and ensure bound, final deliverable and out-briefing is presented in February.

Upcoming Activities

- Final project briefing in early February.

Challenges
No Challenges to report in January.

TD 015 Health Informatics Support – Vietnam

Objectives
This effort has completed.

Period of Performance: 05/16/15 06/30/15
Total Estimated Budget: S51,804.80
Total Expenditure: $51,804.80
Technical Direction Status: *Completed, Closed*

Metrics

Table 2 – Summary of Implemented Training

Training Month	Region	Country	Type	Human, Veterinary, One Health	#Trained	TOT
Apr-14	Africom	Sierra Leone	Clinical	Human	385	Yes
May-14	Pacom	Singapore	Bio-Surveillance	One Health	8	No
Feb-15	Africom	Uganda	Bio-Surveillance	One Health	25	No
Apr-15	Pacom	Australia	Bio-Surveillance	One Health	9	No
Apr-15	Africom	Uganda	Clinical	Human	33	Yes
May-15	Africom	Uganda	Bio-Surveillance	One Health	38	Yes
May -15	Africom	Uganda	Clinical	Human		Yes
June-15	Africom	Uganda	Clinical	Human		Yes
May -15	Centcom	Kazakhstan	Bio-Surveillance	Human		Yes
Jul-15	No trainings implemented in July.					
Aug-15	No trainings implemented in August					
Sept-15	No trainings implemented in September					
Oct-15	Africom	Uganda	Bio-Surveillance	One Health	22	Yes
Nov-15	No trainings implemented in November					
Dec-15	Africom	Uganda	Bio-Surveillance	One Health	22	Yes
Dec-15	Africom	Uganda	Bio-Surveillance	One Health	25	Yes
Dec-15	Centcom	Kazakhstan	Bio-Surveillance	Human		Yes

Table 3 – Summary of Contract Modifications

Contract Modifications	Requirement / Description	Date Received	Letter Issued to DTRA
P00001	Respond to the Ebola outbreak in Africa	21-Mar-14	18-Apr-2014
P00002	Removed FTE and geographical restrictions from SOW	27-Mar-14	25-Apr-2014
P00003	Authorized use of existing LOE under CLIN 04 at the discretion of the COR	4-Apr-14	9-May-2014
P00004	Bat-borne pathogen surveillance	6-May-14	5-Jun-2014
P00004	Clinician Training in at least 3 African countries	6-May-14	5-Jun-2014
P00004	BS&S / NHLS Training in South Africa	6-May-14	5-Jun-2014
P00005	Added funding at the SLIN level to requirements listed in P00004	14-May-14	N/A
P00006	SURGE CLIN - Extended POP for EBOV response	12-Jun-14	N/A
P00007	REA Negotiation	25-Jun-14	27-Jun-2014
P00008	Surge POP extension	6-Aug-14	N/A
P00009	REA for Bat-Borne Training and revised Rate Cards	3-Sep-14	N/A
P00010	Ukraine Projects – UP2 & TAP4	17-Sep-14	N/A
P00011	Incorporates FAR clause 52.225-99 initiating use of Synchronized Pre-deployment and Operational tracker for efforts in Africa.	4-Dec-14	N/A
P00012	Authorizes FFP funds for CLIN 0003 and CLIN 1006. Incorporates requirement for DBA insurance.	26-Jan-15	N/A
P00013	Issues change order from FFP LOE to FFP. Requests Proposal extension of base year through April.	2-Feb-15	N/A
P00014	Awards Base Year Extension	10-Apr-15	N/A
P00015	Realigns funding between ACRNS	16-Apr-15	N/A
P00016	Issues two week extension for base year	21-Apr-15	N/A
P00017	Awards T&M Option Year for $12,771,956.28.	15-May-15	N/A
P00018	Provides Incremental funding for Option Year 1	15-May-15	N/A
P00019	Funds REA and changes contract clauses.	3-Sep-15	N/A
P00020	Adds funding to CLIN 1002 and 1005	28-Sep-15	N/A
P00021	Adds FLN rate card. Changes Key Personnel. Adds Subcontractor and FAR clause	28-Sep-15	N/A

Table 4 – Summary Committed Funds

CLIN	Total Awarded	Total Funded	Total Committed	Total Remaining Funding
0001	$2,945,896.76	$2,945,896.76	$2,945,896.76	$0.00
0002	$392,352.53	$392,352.53	$392,352.53	$0.00
0003	$1,283,857.97	$1,283,857.97	$1,283,857.97	$0.00
0004	$1,194,823.51	$1,194,823.51	$1,194,823.51	$0.00
0005	$371,713.24	$371,713.24	$371,713.24	$0.00
0006	$554,060.59	$554,060.59	$554,060.59	$0.00

0008	$164,002.13	$164,002.13	$122,032.17	$41,969.96
0009	$137,683.96	$137,683.96	$137,683.96	$0.00
1001	$1,938,246.22	$1,938,246.22	$1,938,246.22	$0.00
1002	$7,619,312.70	$3,720,344.38	$4,088,989.72	-$368,645.34
1003	$806,459.36	$421,652.00	$449,826.47	-$28,174.47
1004	$78,348.00	$78,348.00	$77,297.84	$1,050.16
1005	$2,329,590.00	$400,000.00	$365,409.19	$34,590.81
TOTAL	**$19,816,346.97**	**$13,602,981.29**	**$13,922,190.16**	**-$319,208.87**

Table 5 – 75% Estimate

CLIN	Total Awarded	Total Funded	Total Expended	Estimate 75% Funding Completion Date
1001	$1,938,246.22	$1,938,246.22	$1,372,925.42	February 2016
1002	$7,619,312.70	$3,720,344.38	$3,216,979.17	29-Dec-2015
1003	$806,459.36	$421,652.00	$343,022.04	29-Dec-2015
1004	$78,348.00	$78,348.00	$6,748.55	15-May-2016
1005	$2,329,590.00	$400,000.00	$167,207.12	15-May-2016

This submission of the Monthly Report (Contract Data Requirements List; CDRL A001) encompasses implementation of Academic Engagement Partnership (AEP) program activities in accordance with Defense Threat Reduction Agency (DTRA) Cooperative Biological Engagement Program (CBEP) contract HDTRA1-14-C-0104 for 06/01/16 – 06/31/16.

Active Technical Directives

AFRICOM

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing – Cameroon

Objectives

Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 – 11/15/16
Task Areas: Task 2 (Scientific Mentor), Task 3 (Qualified Trainers)
Total Estimated Budget: $125,975.00
Estimated Expenditure: $89,639.99
Technical Direction Status: *Approved, Ongoing*

Key Points

- Tentative training dates were proposed by DTRA CBEP to the Cameroon Ministry of Defense for August 9-11, 2016.
- Forward progress continues to be hampered by the lack of agreement by DTRA CBEP, US Embassy, and Ministry of Defense on a confirmed set of dates for the training to occur. Metabiota continues to maintain awareness of trainer schedules to facilitate the identification of new training dates.

Completed Activities

Program Manager:
(b)(6) (in conjunction with Trainer 1 (b)(6) participated in teleconferences with LCDR (b)(6) (DTRA CBEP Cameroon Country Manager) and his support team. (b)(6) provided general oversight to the submission of pre-travel documentation requirements.

Trainer 1:
(b)(6) (in conjunction with (b)(6) participated in teleconferences with DTRA & A&AS. (b)(6) also continued the effort to keep our online trainer availability calendar updated. (b)(6) additionally developed and submitted pre-travel preparation forms, including an amendment to the Training Event Plan, the CCR, and the draft CLS form.

Upcoming Activities

- Once training dates have been finalized, Metabiota will move forward with training travel preparations.

Challenges
Training dates are being coordinated slowly through the OSC Chief at US Embassy in Yaoundé. Additionally, there may be a need for DTRA CBEP to procure PPE specifically for this training; [redacted] had indicated his intention to release current PPE stocks to maintain relations with Government of Cameroon.

TD 009 NHLS BS&S Training – South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/15 – 11/15/16
Task Areas: Task 3 (Qualified Trainers) Task 4 (Subject Matter Experts)
Total Estimated Budget: $335,607.11
Estimated Expenditure: $268,352.03
Technical Direction Status: *Approved, Ongoing*

Key Points
- The period of performance for this activity was extended through a no-cost extension to 15 November 2016.
- Work has begun on the software development of the OHASIS module.
- Post-production continues on the BS&S videography.
- Procurements of respirators and adaptors have begun to support the fit-testing effort.

Completed Activities

Program Manager:
[redacted] teleconferences with the DTRA CBEP South Africa Country Manager [redacted] DTRA CBEP AFRICOM Regional Science Manager [redacted] and A&AS representatives to discuss project status, including discussions around the extension of the period of performance. [redacted] provided management oversight of the Metabiota/NHLS team, communicating with the NHLS team via email and telephone. He worked with the NHLS team on administrative matters including contract extensions, procurements, reporting, and invoicing. [redacted] also provided inputs to [redacted] regarding the submission of the final scripts for the BS&S videos as well as progress of the OHASIS module development.

Grants Manager:
[redacted] provided in-country oversight and management of the NHLS team. He worked with [redacted] to address administrative matters including contract extensions, procurements, reporting, and invoicing. [redacted] also worked with [redacted] on developing the OHASIS module. Specifically, [redacted] helped to collect data for entry into the OHASIS module for beta testing as well

as assist the procurement of a more appropriate style of caliper for facial measurements. Mr. Jones also worked with the NHLS subject matter experts involved in the videography project to collect inputs on the final scripts and translations for the videos and provide those inputs back to the videography company for use in post-production.

[redacted] participated in teleconferences with DTRA CBEP and A&AS representatives to discuss project status. [redacted] and [redacted]s on administrative matters including contract extensions, procurements, reporting, and invoicing. [redacted] also provided inputs to Mr. Jones regarding the submission of the final scripts for the BS&S videos as well as progress of the OHASIS module development.

Subject Matter Expert 1:
[redacted] continued the development of the OHASIS module to be deployed into the NHLS OHASIS system. In particular, he worked with [redacted]o identify requirements, generate mockups, and continue writing software code to implement the module.

Research and Data Analyst:
Research and Data Analysts [redacted]a and [redacted]l provided administrative support in-country on financial tasks including timekeeping, invoicing, and contract extension. [redacted] also participated in project coordination calls with [redacted]

Upcoming Activities

- Continue development of the OHASIS module.
- Finalize procurements for the fit-testing program.

Challenges
There are no significant challenges present or anticipated at this time.

TD 013 One Health Epi Training – Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15 – 11/15/16
Task Areas: Task 2 (Scientific Mentor), Task 3 (Qualified Trainers), Task 4 (Subject Matter Expert).
Total Estimated Budget: $350,241.87
Estimated Expenditure: $272,022.82
Technical Direction Status: *Approved, Ongoing*

Key Points

- Complete list of training participants have been identified jointly by CDC-Uganda and the Ugandan Ministry of Health.
- Submission of all training training and travel related CDRLs and contractual requirements including the TEP, CCR, CLS, and TAF forms in support of Cohort 11 Module 1 Training.

- Submission of all training and travel related CDRLs and contractual requirements including the TEP, CCR, CLS, and TAF forms in support of Cohort 11 Module 1 Training.
- Selection of the training location for Cohort 11 Module 1 Training as Fort Portal, Kabarole District Uganda.
- Identification of Uganda based trainers to support Cohort 11 Module 1 Training.
- Established and executed monthly programmatic call with DTRA CBEP.
- Established and executed bi-weekly project calls with CDC-Uganda.

Completed Activities

Program Manager:
Metabiota Regional Africa Program Manager (b)(6) established and led regular communications with in country performer, CDC-Uganda and DTRA CBEP Uganda. He provided project and programmatic oversight to the submission of all travel and training related CDRLs and contractual requirements. (b)(6) additionally provided oversight to the onboarding and engagement of independent contractors tasked with leading the implementation of the training in country.

Research and Data Analyst:
Metabiota Project Coordinator (b)(6) provided communication support during all engagements with DTRA CBEP and the Uganda based stakeholders by participating in all project calls and recording and distributing all meeting minutes. (b)(6) provided technical support towards the development and adjustment of independent consultant agreements. She also participated in all conversations surrounding the identification of challenges and mitigation strategies associated with project risks.

Upcoming Activities:

- Implementation of Cohort 11 Module 1 One Health Epidemiology Training
- Submission of Travel and training related CDRLs and supporting documentation including the Training Even Plan (TEP), CLS form, Cable Clearance Request Form (CCR), Travel Authorization Request (TAF), and Bill of Materials (BOM) in support of Module 2 of Cohort 11 training.
- Continuation of bi-weekly project calls with CDC-Uganda Representation.
- Continuation of Monthly project calls with DTRA CBEP Uganda Representation.
- Identification and procurement of travel support including airfare, visas, vaccinations, lodging, and transport.
- Delivery of participant invitation letters.

Challenges:
None

TD 022 Biosurveillance and Grantsmanship Training – Uganda

Objectives
Advance the biosafety and biosecurity capacity in Uganda through the development, coordination and execution of a pilot biosurveillance study focused in Rift Valley fever (RVF), avian influenza (AI), and peste des petits ruminants virus (PPRV). Provide subject matter expertise to assist participants in

development and submission of grant proposals, and development of standard operating procedures to increase enhance local skills in early detection and prevalence determination of RVF AI and PPRV.

Period of Performance: 3/21/16 – 11/15/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts), Task 5 (Research Collaborators) Task 6 (Research Activity Projects)
Total Estimated Budget: $253,635.27
Estimated Expenditure: $41,838.96
Technical Direction Status: *Approved, Ongoing*

Key Points

- SOPs have been granted an ACURO biosurveillance exemption after being reviewed by the associated DTRA board
- All SOPs have been submitted and are pending a review for their approval for use in country under the Uganda Virus Research Institute's existing IRB.
- Documents were submitted for all training and travel related CDRLs and contractual requirements including the TEP, CCR, CLS, and TAF forms in support of Biosurveillance training implementation set to take place between the dates of August 15-26, 2016.
- Metabiota engaged project performer and subcontractor Africa Biomedical Laboratories to prepare all training materials for biosurveillance training implementation.
- A list of materials to be procured for the biosurveillance training and biosurveillance pilot study was developed, finalized and sent to DTRA CBEP for review.
- Draft CLS documents were developed and submitted for review in support of the biosurveillance pilot study implementation needs.

Completed Activities:

Program Manager:
Metabiota Regional Africa Program Manager, (b)(6) continued to lead regular communications with project study lead stakeholders, project subcontractors, and DTRA CBEP representation. (b)(6) provided communication and oversight to the onboarding of Project subcontractor Africa Biomedical Laboratories in an effort to determine their ability and willingness to lead the pilot study training. (b)(6) oversaw the development of both a schedule and timeline in support of the development of training materials and ensured the submission of all travel and training related CDRLs and contractual requirements in support of biosurveillance training implementation.

(b)(6) led communications in support of an ethical review of project SOPs. A path forward was identified for the submission of all project SOPs to the DTRA CBEP ROB, and the documents were submitted in kind with (b)(6) oversight. (b)(6) worked with project stakeholders, the Metabiota PC and the internal scientific team at Metabiota to identify a Uganda based IACUC at the Uganda Virus Research Institute. he additionally provided oversight to the submission of these documents to the IACUC. (b)(6) also refined the field and laboratory materials lists for pilot study implementation. (b)(6) reached out to project leads to identify which materials on the original lists are critical for study implementation. The resulting lists now adhere to the $100,000 ceiling for materials.

Research and Data Analyst:

(b)(6) continued to lead the effort to collect and revise SOPs for DTRA ROB and institutional IACUC submission. After identifying and collecting all project SOPs involving direct animal use, (b)(6) (b)(6) developed an engaged a structure for the protocols and led the primary review of the SOPs for completeness. After receiving revised SOPs from the project SME, (b)(6) conducted a final round of revisions and review to ensure SOPs meet ROB standards. (b)(6) wrote a project proposal to accompany the SOPs requesting a biosurveillance exemption.

(b)(6) worked to support the development of draft CLS forms to reflect the need for an overlapping approach to pilot study implementation. This approach adhered to the 8-week pilot study window while addressing stakeholders' concerns of a lack of available time to complete all project work (b)(6) ensured the collection of information through discussion with project stakeholders, (b)(6) was additionally able to compile a list of sampling locations for the pilot studies. (b)(6) (b)(6) continued to provide overall programmatic support during all project communications and worked to develop the procurement list in concert with (b)(6) the project stakeholders and internal Metabiota staff prior to submission to DTRA for review.

Subject Matter Expert 1:

(b)(6) assisted thoroughly with the effort to identify an external IACUC for SOP submission. (b)(6) (b)(6) provided overall technical review of all of the SOPs submitted by the project stakeholders giving expert feedback to ensure their conduciveness to ethical standards.

(b)(6) also began leading the development of all biosurveillance training materials during this period, he took on this role after it was identified that AFENET would not be available to complete this task originally requested of them.

Subject Matter Expert 1:

(b)(6) provided support to (b)(6) during both the review of all project SOPs and the development of training materials to support training implementation. (b)(6) additionally provided support to the development supplementary documents to be submitted for both ACURO and IACUC review.

Upcoming Activities

- Submission of travel and training related CDRLs and supporting documentation including the BOM and potentially any revisions to the CLS form in support of the 10-day pilot study training.
- Receipt and potential revision of pilot study SOPs submitted to DTRA for ROB exemption.
- Receipt and potential revision of pilot study SOPs submitted to the UVRI IACUC review.
- Submission of all ACURO and IACUC reviewed SOPs to UNCST for final in country approval
- Submission of all CLS forms detailing pilot study needs for all projects.
- Finalization of all procurement documents in support of pilot study material acquisition.
- Development of training materials for PAO approval.

Challenges

Project stakeholders have been minimally responsive to requests for materials such as SOPs, pilot study plans, and project proposals. These and other materials have only been obtained after repeated email communication and phone calls and sometimes not at all. The materials that have been obtained frequently do not meet the requested specifications (for content, format, or length) or arrive too late to

be relevant for the particular task. As a result, the Metabiota project team has consistently needed to develop much of this content with project resources otherwise relegated to other programmatic needs. Though not identified as part of the original technical direction, Metabiota has been required to spend a significant amount of effort on the development and revision of SOPs in support of both the ACURO and IACUC approval process. While this effort has been facilitated and accomplished, it was done so at the expense of significant project resources.

It has been identified by both project stakeholders and the internal project team, that the amount of topics and study areas requested to be included as part of the implementation of biosurveillance training in Uganda may be too dense. In kind the roll out of training could serve to gloss over certain necessary aspects. Metabiota has been working with project subcontractor Africa Biomedical Laboratories and its internal scientific team to identify the most appropriate path forward.

TD 023 One Health Epidemiology Short Course Curriculum Update and Edits – South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through the development of a One Health Epidemiology short course tailored to the needs of South Africa. Increase the sustainability of the course work through development of a train the trainer module to be delivered to select South African trainers of the short course.

Period of Performance: 3/21/16 – 11/15/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts)
Total Estimated Budget: $112,883.28
Estimated Expenditure: $44,989.56
Technical Direction Status: *Approved, Ongoing*

Key Points
- Project SME's have continued to streamline their development process with support from the Metabiota PM and PC.
- A clear strategy to delineate basic and advanced training tracks has been developed.
- Seven basic and advanced presentations have been completed.
- SMEs involved in materials adaptation have been engaged specifically with regard to their areas of focus, and continue to work in concert to ensure effective output and prevent duplication of effort.

Completed Activities

Program Manager:
Metabiota Africa Regional Program Manager, (b)(6) provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as programmatic communications for the internal project team. He led regular bi-weekly communication with DTRA CBEP and oversaw the submission of a project work plan purposed to clarify scope and to provide DTRA CBEP with an outline of project constraints. (b)(6) dditionally worked with Metabiota PC (b)(6) to progressively elaborate the project schedule in an effort to reflect input from project SME's in real-time. (b)(6) additionally oversaw the development of a review agenda for the 30% meeting during this period

Research and Data Analyst:
Metabiota Project Coordinator (b)(6) provided communication support during all engagements with DTRA CBEP and the Ugandan stakeholders by participating in all project calls and recording and distributing all meeting minutes. (b)(6) provided technical and writing support towards the development of the project work plan. She also participated in all conversations surrounding the identification of challenges and mitigation strategies associated with project risks. (b)(6) additionally worked to support the resource needs of all SME personnel through regular communication and collaborative engagement, and supported (b)(6) n the development of the 30% review agenda.

Hours charged to this category also represent the time of (b)(6) rovided technical support towards the development and adaptation of materials specifically for "Measures of Disease Spread". She participated in technical and programmatic communication calls with project staff, and provided infectious disease expertise towards the overall project approach as well as the delineation between advanced and basic course work. She also reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation.

Subject Matter Expert 2:
Metabiota Staff Scientist (b)(6) provided technical leadership towards the development and adaptation of all materials. She participated in bi-weekly conference calls with DTRA CBEP representation and led weekly technical communications with project technical staff. She additionally worked towards the development of the project work plan by ensuring feasibility of the overall project approach. (b)(6) worked to adapt and develop training materials, and to review the work of other project SMEs to ensure an overall consistency in approach. She reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation.

Trainer 2:
(b)(6) rovided technical support towards the development and adaptation of materials specifically for "Introduction to Excel" and "Avian Influenza" lectures. He participated in technical and programmatic communication calls with project staff, and provided veterinary and training program development expertise towards the overall project approach as well as the delineation between.

Upcoming Activities

- Maintain bi-weekly communication DTRA CBEP South Africa representation.
- Maintain regular weekly technical communication with the internal project team.
- Continued development of project modules.
- 30% materials review slated to take place on 7 July 2016.
- Identification of 60% review dates.
- Continued adaptation of schedules.

Challenges

- The currently suggested LOE to complete all project deliverables may be insufficient. Metabiota has suggested a realignment of SME hours and has taken steps to minimize operational costs on this project. The project team will report to DTRA CBEP with regularity regarding this issue.

TD 025 Technical Writing Workshop and Mentorship – Ethiopia

Objectives
Provide capacity building and sustainability in BS&S projects by conducting a Technical Writing workshop on developing a successful research proposal and white paper. Provide mentorship and support to workshop participants in finalizing and submitting for grant support to increase the research project completed in country.

Period of Performance: 4/15/16 – 11/15/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts)
Total Estimated Budget: $89,240.77
Estimated Expenditure: $14,663.00
Technical Direction Status: *Approved, Ongoing*

Key Points
- Regular bi-weekly communications were held with both DTRA CBEP representation and the Ethiopian Stakeholders representing NAHDEC and EPHI.
- Metabiota subcontractor AAAS was has been on-boarded to the project.
- Dates for the in-country workshop have been selected and agreed upon as 25-29 July 2016 between DTRA CBEP, Metabiota, and the Ethiopian stakeholders representing NAHDEC and EPHI.
- All travel and training related CDRLs and contractual requirements have been submitted in support the in-country workshop including the TEP, CCR, CLS, and TAF forms.
- Materials for the implementation of the technical writing and Grantsmanship workshop have been submitted for PAO approval.

Completed Activities

Program Manager:
Metabiota Africa Regional Program Manager, (b)(6) provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as programmatic communications for the internal project team. He led and established a project kick-off call with both DTRA CBEP and the Ethiopia based stakeholders. (b)(6) worked with Metabiota PC (b)(6) to ensure submission of the CLS, CCR, and TAF forms. (b)(6) additionally oversaw the submission of all materials developed by AAAS in support of the technical writing and Grantsmanship workshop.

Research and Data Analyst:
Metabiota Project Coordinator (b)(6) provided communication support during all engagements with DTRA CBEP and the Ethiopian stakeholders by participating in all project calls and recording and distributing all meeting minutes. (b)(6) provided technical and writing support towards the development of all project CDRLs and contractual requirements. She also participated in all conversations surrounding the identification of challenges and mitigation strategies associated with project risks.

Subject Matter Expert 1:

Represents the time of (b)(6) who served as the lead subject matter expert during this period. (b)(6) contributed to the development of all training materials during this time period and participated in all regular communications with Metabiota.

This also represents the time of (b)(6) during the month of June who is a representative of AAAS. (b)(6) participated in regular project communication and provided support to (b)(6) (b)(6) during the development of all training materials.

Upcoming Activities

- Continuation of bi-weekly communication with DTRA CBEP representation and Ethiopian Stakeholders.
- Implementation of the technical writing and Grantsmanship workshop in Addis Ababa Ethiopia.
- Respond to any comments or concerns surrounding the approval of materials submitted for PAO approval.

Challenges

None

CENTCOM

TD 021 Field Epidemiology and BS&S Training – Iraq

Objectives

Conduct remote trainings on epidemiology and BS&S/Biorisk management for one cohort of Iraqi scientists, and also engage them to familiarize them with the Iraq National Biological Emergency Response Plan and work on a gap analysis of said plan. Conduct remote trainings on epidemiology for a second cohort.

Period of Performance: 02/19/16 – 11/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $741,503.00
Total Expenditure: $300,440.93
Technical Direction Status: *Approved, Ongoing*

Key Points

- Received approval for TEP 0356 IZ and TEP 0357 IZ, pending participant roster information.
- Prepared and submitted identified project risks and impacts with a revised project schedule to DTRA, which was informally approved on June 23.
- Received Comments Tracker from CBEP for Topic 1 materials.
- Reviewed and responded to DTRA comments. Will submit final Topic 1 materials and responses to Topic 1 Comments Tracker NLT July 8.
- Submitted Topic 2 Epi materials for technical review and PAO approval.
- Submitted Topic 3 Epi materials for technical review and PAO approval.
- Prepared and submitted Memos for DTRA to present to MoH.
- Reviewed and responded to DTRA comments. Will submit final Topic 2 materials and responses to Topic 2 Comments Tracker NLT July 22.

- Facilitated an Arabic-only phone call between DTRA, CDC, MB and Iraq MoH.
- Held LMS Admin Training.
- Continued development of FLN support contract with URC.
- Sent RFQ to prospective vendors for hands-on-training material procurement. Completed Cost-Bid-Analysis on June 6.
- Revised materials list and sent revised materials list for updated RFQ on June 29.
- Prepared BS&S Remote and Hands-on Training materials, completed internal review. Currently incorporating internal review feedback. Will submit materials in July.

Completed Activities

Program Manager:

PMs (b)(6) have supported all project activities to date. PMs participated in routine meetings with DTRA CBEP and A&AS teams to facilitate updates to project schedule, discuss challenges, and support project approval, as well as provide routine project updates. The PMs have maintained visibility with DTRA CBEP on project status and have offered solutions to address project obstacles.

(b)(6) continues to work closely with CBEP POCs as well as in-country and WMRI SMEs to facilitate communication, receive training materials, review BS&S needs, and participate in routine project meetings and calls to support this engagement. (b)(6) has provided a general review of WRMI's submitted course materials for the Biosafety, Biosecurity and Biorisk Management Remote Course (b)(6) (b)(6) have reviewed epidemiology training materials, completed project schedule changes, and assisted in the facilitation of project approval by the MoH. He participates in routine project calls with BS&S and Epidemiology Trainers and provides technical support and guidance as needed. He coordinates directly with CBEP PoCs and attended a comments review meeting on the epidemiology materials facilitating revision requirements needed for epi materials.

(b)(6) manages administrative components to include project schedule, LOE, budget, and delivery and submission of CDRLs. (b)(6) worked with the project coordinator to approve purchases of selected course materials, contractual engagements on the project, and completion of the URC subcontractor for local procurement and FLN support. She participates in routine project calls with the epi and BS&S teams, and has taken part in the LMS training.

Subject Matter Expert 1:

SMEs (b)(6) support project activities in direct coordination with PMs. They participate in routine project calls, meetings, and assist in the engagement of the project team.

(b)(6) supports and works closely with Watermark Risk Management International (WRMI) in the development of BS&S training components. She has provided an in-depth review of WRMI's submitted course materials for the Biosafety, Biosecurity and Biorisk Management Remote Course, and provided feedback to the team. (b)(6) also reviewed the hands-on materials list and provided edits and feedback according to course material and delivery. She coordinated the completion of a revised procurement list with WRMI and the PC. (b)(6) participated in routine communication with WRMI, PC and PMs.

The Project Coordinator, (b)(6) supports the PMs through the maintenance of the project schedule, preparation of CDRL requirements, communication with and coordination of BS&S and Epidemiology technical teams, LOE review, material review and procurement, maintenance of project visibility to CBEP POCs and stakeholders, and coordination of routine project conference calls and meetings with technical teams and CBEP POC's. (b)(6) submitted the revised Hands-On-Training materials list to the Procurement Department to prepare a Request for Bid and Cost Bid Analysis. (b)(6) continued to facilitate revisions of URC's contract for FLN support and has established and participated in the LMS training (b)(6) ubmitted training materials for technical review and public affairs approval and will continue to coordinate submission of CDRLs and routine calls with the project team and SMEs.

Epidemiology SME Is (b)(6) participated in routine project calls and regular email communications with Metabiota PC and PMs. They worked with the epidemiology team to complete development of epidemiology training materials and development of the course schedule, to include trainer delivery of each course and module. (b)(6) and Lam completed responses and revisions to the epidemiology training materials following feedback from CBEP, and completed the comments tracker for submission. They participated in a materials review call with CBEP & A&AS PoCs and will continue to address revisions, as needed. In addition, (b)(6) continued to facilitate internal meetings with the epi team for coordination of material development.

Subject Matter Expert II:
WRMI SME II's, (b)(6) participated in routine project calls with Metabiota personnel and developed information requirements and recommendations for project execution via email and phone communications. SMEs completed development of the first hands-on BRM/BS&S course including lesson plans, presentations, and associated documentation. Following coordination with the Metabiota project team, they completed revisions to the hands-on course materials list, and submitted the Detailed Design Document covering the Hands-on Course. In addition, they began revision of the remote course materials based on Metabiota project team feedback.

Epidemiology Trainer, (b)(6) Jumaan participated in routine project calls and regular email communications with Metabiota PC and PMs. She worked with the epidemiology team to complete development of epidemiology training materials and development of course schedule. (b)(6) completed responses and revisions to the epidemiology training materials following feedback from CBEP, and completed the comments tracker for submission. She participated in a materials review call with CBEP & A&AS PoCs and will continue to address revisions, as needed. (b)(6) facilitated communication with in-country PoC (b)(6) and has communicated directly with him regarding facilitation of the project. She also participated in an Arabic only call to discuss project execution, approval and to address and mitigate project challenges.

Research and Data Analyst:
The WMRI RDA has provided administrative support to the WMRI project team and completed the monthly invoiced required on the project.

Epidemiology Trainer (b)(6) has continued to collect reference materials, and participated in the development of the project schedule for delivery of training modules. She collected and provided diagrams and illustrations to be included in training materials, supplementary training materials, as well as pre and post tests for course delivery. In addition, she continued development of topic 1,2, and 3

training materials completing revisions and addressing CBEP feedback. She also initiated development of topic 4 materials for submission to CBEP. (b)(6) participates in routine project calls and communicates regularly with PC, PMs, and Epidemiology Project Team.

Upcoming Activities

- Submission of BS&S and Epidemiology training materials to DTRA CBEP for technical review and PAO approval.
- Moodle LMS software training courses for BS&S and Epidemiology Trainers.
- Complete training material procurement by June 15, submit CLS Shipping Request forms, and begin shipment of materials to CLS warehouse.
- Submit request to subcontract with URC to CBEP, complete subcontract execution, engage identified FLNs.
- Continue coordination with key stakeholders and partners.

Challenges

Pending approval for the in-country PoC, (b)(6) to support the development of this project, compounded with the absence of official approval from the Director General of Public Health to implement the project, has caused delays in project planning and preparation. Epidemiology and Biosafety & Biosecurity Trainers adapted course materials to accommodate the lack of participant information, however, the letters of invitation for the courses cannot be delivered until the project receives official authorization to proceed. Since June is the holy month of Ramadan and Eid in Iraq, these delays of political authorization will impact project schedule. Metabiota PMs and PC have prepared alternate fast tracked schedules so as to minimize the impact to project scope.

TD 024 MESA Short Video – Jordan

Objectives

Further CBEP Cooperative Biological Research (CBR) objectives through a video documentation of the MESA Jordan conference (TD 004) increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 04/15/16 – 07/31/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $51,878.00
Estimated Expenditure: $35,580.00
Technical Direction Status: *Approved, Ongoing*

Key Points

- Submitted TD-24 modification response.
- Received approval of modification.
- Extended Gryphon Scientific and August II Production contracts to meet revised scope and extension.
- Confirmed Closed Captioning requirements.
- Began preparations for July 26 Premiere Event.
- Completed final version of the MESA film by end of June. Submitted on July 1 to CBEP for review and PAO approval.
- Submitted revised film version on July 5 following feedback received from CBEP.

Completed Activities

Program Manager:
The PM, (b)(6) facilitated project coordination to include revising and coordination modifications to service agreements for August II Productions and Gryphon Scientific, extending the scope and PoP in support of the revised technical direction. Included in the modification to August II Production's agreement was the inclusion of the Voice Over, completed by (b)(6) and the closed captioning requirements. The PM continued to work with the PC to hold weekly project meetings with CBEP, Gryphon, and August II Productions to facilitate completion of the film. The PM continues to oversee the project schedule, LOE, labor and materials budget, communication management, and overall progress of the film development. The PM, with the PC and SME III continued review and editing of the film stringers produced by August II productions, identifying clips, speakers and content to feature in the video. Following numerous edits, viewings, and feedback, a final version of the film was submitted on 1 July, and a revised version following CBEP feedback submitted on 5 July. In addition, the PM has worked with CBEP to facilitate the film premiere scheduled for 26 July, and ensure completion and PAO approval of the film for release on this date.

Subject Matter Expert 1:
The Project Coordinator (b)(6) supported the PM in project coordination, meeting scheduling, and communication management. The PC scheduled and participated in teleconference meetings with Gryphon, CBEP, and August II Productions, and she coordinated film content and submission of requirements between August II Productions and CBEP for execution of the film. The PC has maintained routine communication with August II Productions and Gryphon Scientific to communicate tasks, project schedule, updates, and complete edits required for film completion. The PC maintains clear visibility of project progress and communicates developments to PM, CBEP and A&AS. The PC completed review of additional conference transcripts to identify clips, speakers and identified content to feature in the video.

Subject Matter Expert 3:
(b)(6) articipated in weekly calls with the Metabiota project team, DTRA CBEP, and August II Productions to support the development and completion of the film. The SME completed review of conference transcripts to identify clips, speakers and content to feature in the video. In addition, she provided input in selection of the music for the film, identification and inclusion of speakers, presentation slides, and credits for the film. She supported development of the film premiere agenda and list of invitees.

Upcoming Activities

- Complete review of the film selection and send updates to CBEP for review, if necessary.
- Secure PAO approval of the film, and make any edits necessary following their guidance for final release on 26 July.
- Complete closed captioning requirements following PAO approval.
- Organize the film premier to include sending out invitations, and securing attendees.
- Continue routine communications with the project team and CBEP to facilitate completion of the project.

Challenges

The approved period of performance for this project is very narrow, forcing the project schedule to be aggressive. Metabiota received a modification to include funding for the voice over and closed captioning features, as well as an extension to the period of performance to provide sufficient time for comprehensive review and editing of the film and additional buffer time in the event that the PAO identifies changes to be incorporated into the film. Working with the project team, and CBEP Metabiota has met the revised project schedule and is on track for release on July 26. In addition, Metabiota noticed that August II Productions was missing transcripts and footage from presentations, as well as the networking day, which is why key speakers were not being included in the originally received film versions. Metabiota brought this to their attention and retransfer of material and completion of transcripts was achieved for film inclusion.

EUCOM

TD 016 Georgia Geographic Information Systems – Georgia

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 11/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $271,707.23
Estimated Expenditure: $142,827.82
Technical Direction Status: *Approved, Ongoing*

Key Points

- Metabiota executed a contract modification for continuation of this effort with the performer at the University of Florida.

Completed Activities
Program Manager:
(b)(6) led project activities for this effort, including communications with DTRA/A&AS to communicate project status. He also led coordination with the UF SME team to discuss project needs and project aspects of the project extension. (b)(6) also participated in project calls for the CBR projects involved on this project.

Subject Matter Expert 1:
(b)(6) participated in project activities on this effort, including communications with DTRA/A&AS to communicate project status. She also coordinated with the UF project contracts office to resolve invoicing and reporting issues as well as issue a contract modification. (b)(6) also participated in project calls for the CBR projects on this project.

Subject Matter Expert 2:
(b)(6) served as the lead SME on the GIS team. He participated in all CBR project calls, and worked with the CBR project teams to identify continued GIS mentoring and research specific needs. He identified and on-boarded (b)(6) replacement, (b)(6) as well as

provided oversight to [redacted] in the conduction of project calls videoconferences with the GG-19, GG-20, GG-27/AJ TAP-11 teams.

Research and Data Analysts:
(b)(6) provided background information on AJ biosurveillance efforts to the team and worked with (b)(6) to move forward with the GG-19, GG-20, GG-27/AJ TAP-11 projects. (b)(6) was on-boarded and began worked with the GIS teams.

Upcoming Activities

- Continuation of GIS mentorship activities.

Challenges

Coordination of all project stakeholders is difficult due to the large number of participants, and is being compounded by the drawdown of the Azerbaijan BTRIC.

TD 017 Georgia Subject Matter Expert Grantsmanship – Georgia

Objectives

Provide mentorship in all aspects of Grantsmanship to stakeholders in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/2015 – 11/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $276,675.85
Estimated Expenditure: $126,031.05
Technical Direction Status: *Approved, Ongoing*

Key Points

- TD response extending project period of performance was approved.
- Subcontract extension with Avila Scientific was drafted and fully executed.
- Metabiota SMEs began re-engaging with mentees at LMA.

Completed Activities

Program Manager:
(b)(6) held regular communications with Avila Scientific including teleconferences, emails and other methods as required to discuss mentorship status and programmatic issues. (b)(6) also held a teleconference with the DTRA/A&AS Georgia team to discuss project status. Lastly, (b)(6) generated and reviewed materials related to invoicing and reporting. (b)(6) also reviewed materials related to the Avila Scientific subcontract extension.

Subject Matter Expert 1:
(b)(6) participated in regular communications with both (b)(6) and the DTRA/A&AS Georgia team. (b)(6) also drafted materials related to the Avila Scientific subcontract extension, and invoicing and reporting.

Subject Matter Expert 2:
Avila Scientific subject matter exper[redacted] reviewed, revised, and executed subcontract extension documents. [redacted] held Skype meetings with LMA mentees. Meetings were held to discuss the extension of work, and to continue discussions of what goes into a full proposal. A meeting was also held to discuss the transition in mentors [redacted] will be taking over for [redacted] in the near term).

Upcoming Activities
Metabiota will continue mentorship activities as expected. Metabiota expects to file travel documentation for a mentorship trip to occur in early September.

Challenges
No challenges or issues to report at this time.

TD 018 Georgia Visiting Scientist Genomics – Georgia

Objectives
Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015 08/15/16
Task Areas: Task 2 (Visiting Scientist)
Total Estimated Budget: $384,435.71
Estimated Expenditure: $313,325.20
Technical Direction Status: *Approved, Ongoing*

Key Points
- Facilitated project development discussions between LMA and NCDC virology staff.
- Continued ongoing mentorship activities in genomics and bioinformatics.

Completed Activities

Program Manager:
[redacted] held regular communications with [redacted] including weekly teleconferences and emails and other methods as required to discuss mentorship status and programmatic issues [redacted] also held a teleconference with the DTRA/A&AS Georgia team to discuss project status. Lastly [redacted] generated and reviewed materials related to invoicing and reporting.

Subject Matter Expert 1:
[redacted] participated in regular communications with both [redacted] and the DTRA/A&AS Georgia team. [redacted] also drafted materials related to invoicing and reporting.

Visiting Scientist:
[redacted] participated in regular communications with [redacted] to discussion mentorship status and programmatic issues. [redacted] provided mentorship and subject matter expertise in genomics and bioinformatics to the Georgian staff at NCDC and LMA on an ongoing

basis. He provided mentorship in fundamental concepts of the field including molecular evolution, genetic drift, natural selection, and phylogenetic analysis to multiple NCDC staff and interns.

[redacted] reviewed use of the MEGA software package with [redacted] and [redacted] Differences in distance-based and character-based methods were reviewed and analysis parameters were illustrated and discussed while using the software. [redacted] continued to provide guidance and mentoring to [redacted] and [redacted] on topics related to the *F. tularensis* strain sequencing project.

[redacted] also facilitated project development discussions between LMA and NCDC virology staff, and individually with members of each organization.

Upcoming Activities

[redacted] will continue genomics and bioinformatics mentoring.

Challenges

The Lugar Center MiSeq instrument has been experiencing reoccurring technical problems which appear to be related to a misalignment in the optics path or similar issue causing a degradation in image capture. The MiSeq has been serviced by the Turkish company Incekara but full QA/QC of the repair work has not yet completed. Additionally, [redacted] has encountered some minor language barriers with newer staff members at the Lugar Center.

TD 019 Georgia Visiting Scientist Microbiology – Georgia

Objectives

Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015 11/15/16
Task Areas: Task 2 (Visiting Scientist)
Total Estimated Budget: $706,027.02
Estimated Expenditure: $417,417.28
Technical Direction Status: *Approved, Ongoing*

Key Points

- [redacted] assisted the Georgian researchers on GG-19 with finalizing their poster for ASM.
- [redacted] continued work with the Georgians on TAP-11 data acquisition and analysis.
- [redacted] coordinated discussions between CDC and Georgian CBR managers regarding the possibility of using retrospective samples in a Zika study.

Completed Activities

Program Manager:

[redacted] held regular communications with [redacted] including weekly teleconferences and emails and other methods as required to discuss mentorship status and programmatic issues. [redacted] also held a teleconference with the DTRA/A&AS Georgia team to discuss project status. Lastly, [redacted] generated and reviewed materials related to invoicing and reporting.

Subject Matter Expert 1:
(b)(6) participated in regular communications with both (b)(6) and the DTRA/A&AS Georgia team. (b)(6) also drafted materials related to invoicing and reporting.

Visiting Scientist:
(b)(6) articipated in regular communications with (b)(6) to discussion mentorship status and programmatic issues. (b)(6) provided mentorship and subject matter expertise to the Georgian staff at NCDC and LMA on an as-needed basis. In particular, He worked with the PI and other project staff on TAP-11 to discuss project results and begin the drafting of the final report for this project. He also provided inputs to the Georgian team's poster on GG-19 for the ASM general conference. He fielded questions about ELISA setup and results for the Jordan collaborat and also reviewed a related abstract for submission to the One Health conference in Australia. (b)(6) also discussed the core concepts of scientific writing with an NCDC scientists studying *Brucella* in dogs.

(b)(6) also spent some time familiarizing himself with the mass spectrometer installed at NCDC in order to assist the Georgians with planning. He also provided inputs to NCDC engineers regarding water quality testing. (b)(6) coordinated discussions between CDC and Georgian CBR managers regarding the possibility of using retrospective samples in a Zika study. (b)(6) eld discussions with NCDC personnel about Grantsmanship and the level of detail that should be included in their proposals.

Upcoming Activities
(b)(6) will continue mentorship as expected.

Challenges
None at this time.

Closed Technical Directives

AFRICOM

TD 008 Clinician Training – Uganda

Objectives
Identify gaps in current country-specific training systems and develop clinical training materials to address those gaps and sustainably increase the capacity of medical practitioners at the sub-national level of healthcare systems to identify, diagnose & report disease outbreaks.

Period of Performance: 05/16/15 - 08/18/15
Task Areas: Task 2 (Scientific Mentor), Task 3 (Qualified Trainers)
Total Estimated Budget: $736,470.25
Total Expenditure: $736,470.25
Technical Direction Status: *Completed, Closed.*

TD 010 One Health Epi Training – South Africa

Objectives

Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15 03/31/16
Task Areas: Task 3 (Qualified Trainer), Task 4 (Subject Matter Experts)
Total Estimated Budget: $134,551.13
Total Expenditure: S134,551.13
Technical Direction Status: *Completed, Closed.*

TD 014 Grant Writing Mentorship and Workshop Kenya

Objectives
The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 7/21/15 – 04/30/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $113,984.16
Total Expenditure: S101,408.40
Technical Direction Status: *Completed, Completed*

TD 020 Initial Engagement SME Support – Gabon – Cancelled

Objectives
To provide technical support to DTRA CBEP regarding initial engagement activities with Gabonese ministerial officials, historical context and technical advice on gap analyses, and recommend CBEP engagement approaches with the Government of Gabon

Period of Performance: 12/14/15 3/31/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $ 31,955.00
Total Expenditure: S2,014.63
Technical Direction Status: *Cancelled*

CENTCOM

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats Kazakhstan

Objectives
To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/15 01/31/16
Task Areas: Task 3 (Qualified Trainers)
Total Estimated Budget: $391,056.00
Total Expenditure: $376,933.87
Technical Direction Status: *Completed, Closed.*

TD 003 Bat Borne Virus from Annual Bat Cull – India – Cancelled

Objectives
Increase the biosafety/ bio-surveillance and early diagnostic capacity in Nagaland India through implementation of a study on the risks of bat-borne virus transmission during an annual bat cull and the presence of known select agents within the community of bats known to be naturally harbored in the species and that have caused mortality in humans.

Period of Performance: 06/01/15 – 09/30/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts), Task 6 (Research Activity Project)
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: *Cancelled*

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop – Jordan

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/15 – 05/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $488,040.04
Estimated Expenditure: $474,680.81
Technical Direction Status: *Approved, Closed*

TD 005 Long Distance Learning Iraq Cancelled

Objectives
Increase the operational capacity of disease surveillance, detection, reporting and response with specialized training of core veterinarians from public health and laboratory settings through in person training and weekly web based modules entailing interactive case based materials focusing on both endemic and high consequence pathogens.

Period of Performance: 06/01/15 09/30/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts)
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: *Cancelled*

EUCOM

TD 011 TADR Activity Project 4 (TAP-4) – Ukraine

Objectives
The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/15/15 – 01/31/16
Task Areas: Task 3 (Qualified Trainers), Task 6 (Research Activity Project)
Total Estimated Budget: $116,879.66
Total Expenditure: $77,464.81
Technical Direction Status: *Completed, Closed*

TD 012 Ukraine Project 2 – Ukraine

Objectives
The overarching objectives of this project are to develop both explanatory and predictive, spatially-explicit models to explore the geography and ecology of EDPs, specifically Francisella tularensis, the causative agent of tularemia, and Bacillus anthracis, the causative agent of anthrax, across Ukraine at multiple spatial scales.

Period of Performance: 05/16/15 – 09/30/2015
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts), Task 6 (Research Activity Project)
Total Estimated Budget: $264,788.37
Total Expenditure: $297,029.64
Technical Direction Status: *Completed, closed* (Transferred to BTRIC TO4)

PACOM

TD 006 Nipah Research Activity Project – Philippines – Cancelled

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through; identification of reservoir and host range for Nipah or related viruses; examination of the seroprevalance of Nipah in bats, peridomestic animals and humans, and understanding the risk factors for cross species transmission in the Philippines.

Period of Performance: 06/01/15 – 09/30/15
Task Areas: Task 4 (Subject Matter Experts), Task 6 (Research Activity Project)
Total Estimated Budget: $874,846.00
Total Expenditure: $11,985.82
Technical Direction Status: *Cancelled*

TD 007 Regional Baseline Assessment – Southeast Asia

Objectives

Characterize the region based on the disease landscape, organic regional capabilities, and external factors that impact CBEP objectives, identify needs and areas of overlap with other stakeholders, and provide overarching strategic guidance & goals to CBEP PACOM Country Managers in the development of country engagement strategies.

Period of Performance: 05/16/15 12/31/15
Task Areas: Task 4 (Subject Matter Expert)
Total Estimated Budget: $850,489.00
Total Expenditure: $850,317.11
Technical Direction Status: *Completed.*
TD 015 Health Informatics Support Vietnam

Objectives
Improve Vietnam Ministry of Health systems (processes and software) to support public health disease reporting and response capacity and improve compliance with National and International Health regulations (e.g., IHR 2005).

Period of Performance: 05/16/15 06/30/15
Task Areas: Task 4 (Subject Matter Expert)
Total Estimated Budget: $51,804.80
Total Expenditure: $51,804.80
Technical Direction Status: *Completed, Closed*

Metrics

Table 1 – Summary of Invoicing

CLIN	Total Awarded	Total Funded	Total Invoiced	Total Remaining

0001	$2,945,896.76	$2,945,896.76	$2,945,896.76	$0.00
0002	$392,352.53	$392,352.53	$392,352.53	$0.00

Table 3 – Summary of Contract Modifications

Contract Modifications	Requirement / Description	Date Received	Letter Issued to DTRA
P00001	Respond to the Ebola outbreak in Africa	21-Mar-14	18-Apr-2014
P00002	Removed FTE and geographical restrictions from SOW	27-Mar-14	25-Apr-2014
P00003	Authorized use of existing LOE under CLIN 04 at the discretion of the COR	4-Apr-14	9-May-2014
P00004	Bat-borne pathogen surveillance	6-May-14	5-Jun-2014
P00004	Clinician Training in at least 3 African countries	6-May-14	5-Jun-2014
P00004	BS&S / NHLS Training in South Africa	6-May-14	5-Jun-2014
P00005	Added funding at the SLIN level to requirements listed in P00004	14-May-14	N/A
P00006	SURGE CLIN - Extended POP for EBOV response	12-Jun-14	N/A
P00007	REA Negotiation	25-Jun-14	27-Jun-2014
P00008	Surge POP extension	6-Aug-14	N/A
P00009	REA for Bat-Borne Training and revised Rate Cards	3-Sep-14	N/A
P00010	Ukraine Projects UP2 & TAP4	17-Sep-14	N/A
P00011	Incorporates FAR clause 52.225-99 initiating use of Synchronized Pre-deployment and Operational tracker for efforts in Africa.	4-Dec-14	N/A
P00012	Authorizes FFP funds for CLIN 0003 and CLIN 1006. Incorporates requirement for DBA insurance.	26-Jan-15	N/A
P00013	Issues change order from FFP LOE to FFP. Requests Proposal extension of base year through April.	2-Feb-15	N/A
P00014	Awards Base Year Extension	10-Apr-15	N/A
P00015	Realigns funding between ACRNS	16-Apr-15	N/A
P00016	Issues two week extension for base year	21-Apr-15	N/A

P00017	Awards T&M Option Year for $12,771,956.28.	15-May-15	N/A
P00018	Provides Incremental funding for Option Year I	15-May-15	N/A
P00019	Funds REA and changes contract clauses.	8-Sep-15	N/A
P00020	Adds funding to CLIN 1002 and 1005	28-Sep-15	N/A
P00021	Adds FLN rate card. Changes Key Personnel. Adds Subcontractor and FAR clause	11-Nov-15	N/A
P00022	Adds funding to CLIN 1002	3-Mar-16	N/A
P00023	Adds funding to CLIN 1003	30-Mar-16	N/A
P00024	Extends POP to 11.15.16 and adds value and funding	5.21.156	N/A

Table 4 – Summary Committed Funds

CLIN	Total Awarded	Total Funded	Total Committed	Total Remaining Funding
0001	$2,945,896.76	$2,945,896.76	$2,945,896.76	$0.00
0002	$392,352.53	$392,352.53	$392,352.53	$0.00
0003	$1,283,857.97	$1,283,857.97	$1,283,857.97	$0.00

This submission of the Monthly Report (Contract Data Requirements List; CDRL A001) encompasses implementation of Academic Engagement Partnership (AEP) program activities in accordance with Defense Threat Reduction Agency (DTRA) Cooperative Biological Engagement Program (CBEP) contract HDTRA1-14-C-0104 for 07/01/16 – 07/31/16.

Active Technical Directives

AFRICOM

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing – Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 – 11/15/16
Task Areas: Task 2 (Scientific Mentor), Task 3 (Qualified Trainers)
Total Estimated Budget: $125,975.00
Estimated Expenditure: $90,706.43
Technical Direction Status: *Approved, Ongoing*

Key Points

- The training event has been scheduled for 9-11 August. Metabiota team has executed all of the logistical arrangements within our control and assisted DTRA in coordinating remaining arrangements.

Completed Activities

Program Manager:
(b)(6) held calls and email communications with DTRA/A&AS to discuss ongoing logistical issues surrounding the execution of the training event scheduled for 9-11 August. (b)(6) also held calls and email communications with the Metabiota training team for this effort (home locations in DC, Yaoundé, and France). (b)(6) also participated in communications with CLS regarding both PPE delivery and event logistics.

Trainer 1:
(b)(6) participated in calls and email communications with DTRA/A&AS to discuss ongoing logistical issues surrounding the execution of the training event. (b)(6) also participated in communications with the Metabiota training team for this effort. (b)(6) worked with our travel coordinator to arrange for travel logistics for our training team.

(b)(6) and (b)(6) participated in calls and email communications with the (b)(6) to prepare for the PPE/VHF training.

Upcoming Activities
The PPE/VHF training event is scheduled to take place 9-11 August 2016.

Challenges
There are logistical issues beyond Metabiota's control which must be handled in order for this training to occur, including acquisition and delivery of PPE, participant logistics, and venue logistics. Metabiota team has itemized these concerns and communicated them to DTRA.

Participant lunches will not be paid for by DTRA. Cost estimate is approximately $2400.

TD 009 NHLS BS&S Training – South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/15 – 11/15/16
Task Areas: Task 3 (Qualified Trainers) Task 4 (Subject Matter Experts)
Total Estimated Budget: $335,607.11
Estimated Expenditure: $275,658.44
Technical Direction Status: *Approved, Ongoing*

Key Points
- NHLS has completed initial development of the OHASIS module.
- The BS&S videos have been edited into a new version and edits continue to move forward.

Completed Activities

Program Manager:
(b)(6) worked to fully educate (b)(6) and (b)(6) on FAR requirements for materials invoicing. (b)(6) worked with them to reconcile all issues and discrepancies so that NHLS could recover costs for the purchase of respirators and adapters. (b)(6) and (b)(6) held calls and email communications with DTRA/A&AS to discuss project status. (b)(6) and (b)(6) also held communications with NHLS staff to oversee progress. (b)(6) also investigated the costs of purchasing calipers for measuring facial dimensions at the request of NHLS and communicated with them regarding specifications.

Grants Manager:
(b)(6) worked with (b)(6) on resolving issues and discrepancies with material invoicing. He also participated in communications with (b)(6) to discuss project progress. He reviewed a new version of the BS&S videos. He has also worked with (b)(6) on the rollout of the OHASIS module.

Trainer 1:
(b)(6) participated in calls and email communications with DTRA/A&AS to discuss project status. (b)(6) also held communications with NHLS staff to oversee progress.

Subject Matter Expert 1:
(b)(6) completed initial development of the OHASIS module. He has begun testing and implementing some bug fixes for the OHASIS module.

Research and Data Analyst:
(b)(6) and (b)(6) worked on financial bookkeeping for this project.

Upcoming Activities
In the near future, Metabiota and NHLS expect to do final bug testing and rollout of OHASIS module. Metabiota also expects final delivery of the finished BS&S videos.

Challenges
No significant challenges at this time.

TD 013 One Health Epi Training – Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15 – 11/15/16
Task Areas: Task 2 (Scientific Mentor), Task 3 (Qualified Trainers), Task 4 (Subject Matter Expert).
Total Estimated Budget: $350,241.87
Estimated Expenditure: $278,640.66
Technical Direction Status: *Approved, Ongoing*

Key Points
- The participant list for Cohort 11 was finalized upon agreement between CDC-Uganda and Ministry of Health Uganda.
- Invitation letters were sent out to participants for the Cohort 11 Module 1 training event in Fort Portal Uganda.
- CDC Uganda received responses from 25 of 25 participants stating that they would be attending the training.
- Travel arrangements for the Metabiota project team were finalized.
- The OCONUS Metabiota project team departed for Uganda on 29 July, 2016.

Completed Activities

Program Manager:
Metabiota Regional Africa Program Manager (b)(6) led regular communications with in country performer, CDC-Uganda and DTRA CBEP Uganda. He provided project and programmatic oversight to

the submission of all travel and training related CDRLs and contractual requirements. [redacted] provided oversight to the onboarding and engagement of independent contractors tasked with leading the implementation of the training in country. He also engaged in communications between CDC Uganda and the CLS contract team in an observational capacity to ensure that no action needed to be taken prior to training development.

Research and Data Analyst:
Metabiota Project Coordinator [redacted] reached out to two trainers who are eligible to be engaged as independent consultants within the constraints outlined by the U.S. ambassador to Uganda's memo, [redacted] and [redacted] also worked closely with Metabiota Travel Coordinator [redacted] to support the finalization of travel arrangements for the project team. [redacted] departed for Uganda in support of this project during this period, on July 29, 2016.

Upcoming Activities:

- Implementation of Cohort 11, module 1 training on 8/1 - 8/5.
- Submission of Training Trip Report for Cohort 11 module 1 training.
- Development and submission of project CDRLs and contractual requirements including TEP, CCR, CLS, and BOM forms.
- Development of after action wrap-up report to DTRA CBEP representation for Cohort 11 Module 1.

Challenges:
Less than 24 hours before the training event was set to begin, [redacted] one of the intended trainers slated to be supported by Metabiota as part of Cohort 11 Module 1 training, notified the program manager that he was unable to fulfill his contractual obligations. To mitigate the effects of this last minute departure, a meeting was held between the Metabiota project team and CDC Uganda to ensure that [redacted]ble and responsibilities would be covered. The other three trainers agreed on a new presentation schedule before the start of training. This new approach included training presentation is expected to include contribution from Metabiota Senior Scientist, [redacted]nd support from CDC Uganda representative, [redacted]

TD 022 Biosurveillance and Grantsmanship Training – Uganda

Objectives
Advance the biosafety and biosecurity capacity in Uganda through the development, coordination and execution of a pilot biosurveillance study focused in Rift Valley fever (RVF), avian influenza (AI), and peste des petits ruminants virus (PPRV). Provide subject matter expertise to assist participants in development and submission of grant proposals, and development of standard operating procedures to increase enhance local skills in early detection and prevalence determination of RVF AI and PPRV.

Period of Performance: 3/21/16 – 11/15/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts), Task 5 (Research Collaborators) Task 6 (Research Activity Projects)
Total Estimated Budget: $253,635.27
Estimated Expenditure: $104,495.75
Technical Direction Status: *Approved, Ongoing*

Key Points

- The field and laboratory materials lists were approved by DTRA CBEP.
- Purchase Orders for all materials were developed by the Metabiota project team and signed by AEP leadership.
- Purchase orders were sent to all relevant vendors.
- Shipping requests were developed and sent to the CLS contract team.
- Training materials were developed, underwent CTSC review, and were subsequently submitted for PAO approval post a response to comments by the Metabiota project team.
- Biosurveillance training dates in country were changed from 8/15/16 - 8/26/16 to 8/22/16 - 9/2/16 to assist in the management of various project timelines.
- All forms have been assembled for both UVRI and UNCST standard operating procedures (SOP) submission (including translated informed consent document).
- The Training Event Plan detailing the new training dates was resubmitted.
- CLS forms supporting pilot study implementation respective of a postponement by 1 week was resubmitted reflective of new dates.
- CLS forms that had received previous approval from DTRA CBEP were adjusted and updated to reflect both the new dates outlined by the TEP and recent communications received from stakeholders.

Completed Activities:

Program Manager:
Metabiota Regional Africa Program Manager (b)(6) led regular bi-weekly and as needed communications with in country stakeholders. He also led communications with DTRA CBEP representation on a bi-weekly and as needed basis. He provided project and programmatic oversight to the development and delivery of all travel and training related CDRL and other associated contractually requirement document resubmissions. (b)(6) additionally provided oversight to the development of training materials by subcontractor ABL, and the final submission process – including management of the response to comments generated during the CTSC review prior to PAO approval.

(b)(6) additionally took effort during this time to engage in communications with Ugandan stakeholders named within the original technical direction but not yet engaged – due to their stated unavailability.

Research and Data Analyst:
Metabiota Project Coordinator, (b)(6) lead the revisions to the laboratory and field materials list. (b)(6) assembled a full set of laboratory SOPs and aligned the materials requested to these SOPs. Upon approval of the list, (b)(6) identified and contacted appropriate vendors to obtain final quotes and place orders. (b)(6) provided the list of materials and shipment information to the CLS warehouse and lead communications with SAIC and vendors. In light of a potential shipment delay (see challenges) (b)(6) has identified and reached out to several in-country vendors who may be able to deliver materials more quickly.

(b)(6) worked with DTRA representation and performer Africa Biomedical Laboratories (ABL) to develop a detailed training agenda for the biosurveillance training. (b)(6) conducted the primary

review of all materials developed by ABL and identified additional PAO-approved materials appropriate for the training.

(b)(6) additionally worked in a general coordination capacity supporting (b)(6) as necessary and specifically during his absence due to involvement in other CBEP work. This support included leading project communications and responding to official DTRA requests in (b)(6) stead.

Subject Matter Expert 1:
(b)(6) erved in a technical leadership capacity during the development of materials for the biosurveillance training scheduled to take place between 8/22/16 and 9/2/16. His efforts during this period include the development materials for a study background/overview, introduction to the SOPs, study design and sample size calculations, data analysis, and BS&S in the laboratory. (b)(6) additionally participated in project coordination conference calls and maintained steady communications with Metabiota representation throughout this month.

Time spent during this period at SME 1 is also represented by the efforts of ABL representative (b)(6) (b)(6) contributed to the development of the above listed materials for the biosurveillance training at the direction of (b)(6) was also available for project coordination and communication efforts and provided responses to internal technical inquiries as requested.

Upcoming Activities

- Continue revision of CLS forms in response to DTRA CBEP feedback.
- Continue communications with SAIC to follow delivery of materials to our Ugandan stakeholders.
- Identification of field and laboratory materials available in-country for immediate purchase and delivery to stakeholder facilities as a contingency plan.
- Submission of SOPs to UNCST for country-level approval upon approval from UVRI.
- Implementation of biosurveillance training in Entebbe Uganda (week 1), and Kasese, Uganda (week 2).

Challenges

A significant proportion of the materials ordered were either on backorder or slow to arrive at the CLS warehouse. Additionally, errors on the part of the primary vendor involved in the overall procurement have resulted in the arrival of errant items to the CLS warehouse, causing a delay in the finalization of the transportation requests. The project team is currently exploring alternative avenues to procure the delayed and backordered items and ensure materials are available for workshop implementation by 8/22/16. These avenues for procurement include but are not limited to the engagement of local vendors and borrowing of supplies from our Ugandan partners. Currently there is a risk of cost overrun due to the procurement and shipment needs of this project.

Participants in the biosurveillance training and pilot studies reside in a variety of districts. This will result in different accommodation, travel reimbursement, and per diem payments among individuals who will be working closely together over a 10-week period. As none of the participants can be directly compensated per constraints outlined by the ambassador's memo, this may result in tensions between those receiving differential benefits and may reduce the motivation for those receiving no per diem. The Metabiota project team will remain diligent about communicating these issues clearly to the participants, and provide transparency to DTRA CBEP should any concerns arise.

Receiving concrete stakeholder input and feedback to all aspects of project planning continues to be challenging. For example, it took many iterations of communication to receive input on laboratory SOPs, UNSCT materials, additional study information requested by UVRI, and a list of training and pilot study participants and roles. Whenever possible, the project team leverages their expertise to fill in missing information, however some information is only known to project stakeholders. Delays in obtaining such information has resulted in overall project delays.

Finally, and although an agenda has been developed for the biosurveillance training covering all topics requested by DTRA CBEP, concern remains over the feasibility of adequately covering all topics during the training window. Many of the materials have never been presented, and detailed information about participant familiarity with each of the topics is not fully known. While the majority of participants are expected to be experienced in some of the areas, it is unlikely that all participants will be skilled in all areas. The amount of time available for each topic may not be sufficient to ensure full comprehension by those new to the subject. The project team will use best judgment during and prior to the training to ensure that no time or effort is wasted during training implementation. Metabiota will also ensure that participants are provided with training materials to use and reference whenever necessary including during subsequent phases of this effort.

TD 023 One Health Epidemiology Short Course Curriculum Update and Edits – South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through the development of a One Health Epidemiology short course tailored to the needs of South Africa. Increase the sustainability of the course work through development of a train the trainer module to be delivered to select South African trainers of the short course.

Period of Performance: 3/21/16 – 11/15/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts)
Total Estimated Budget: $112,883.28
Estimated Expenditure: $59,378.45
Technical Direction Status: *Approved, Ongoing*

Key Points
- The 30% review meeting between Metabiota and DTRA CBEP representation was held to review active project status of all presentation.
- A materials list was submitted to DTRA CBEP subject matter experts for review and requests for modification.
- Metabiota continued development and adaptation of all course materials.
- Metabiota continued weekly technical and bi-weekly programmatic calls.
- Metabiota continued regular communications with DTRA CBEP.

Completed Activities

Program Manager:
Metabiota Africa Regional Program Manager, [redacted], provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as

programmatic communications for the internal project team. He led regular bi-weekly communication with DTRA CBEP and oversaw the review and submission of those slides presented to DTRA CBEP at the 30% review meeting. (b)(6) additionally worked with Metabiota PC (b)(6) to progressively elaborate the project schedule in an effort to reflect input from project SME's in real-time. (b)(6) led and oversaw the 30% meeting purposed to provide DTRA CBEP representation updates to the current status of the project. (b)(6) also worked with DTRA CBEP representation to identify the 60% review meeting dates as 09/15/2016.

Research and Data Analyst:
Metabiota Project Coordinato (b)(6) provided communication support during all engagements with DTRA CBEP and the Ugandan stakeholders by participating in all project calls and recording and distributing all meeting minutes. She also participated in all aspects of the 30% review meeting where relevant.

Research and data analyst (b)(6) provided technical support towards the development and adaptation of materials specifically for "Analysis of Surveillance Data, Measures of Spread, Outbreak Investigation, and Generating Hypotheses". She participated in technical and programmatic communication calls with project staff, and provided infectious disease expertise towards the overall project approach as well as the delineation between advanced and basic course work. She also reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation.

Subject Matter Expert 2:
Metabiota Staff Scientist (b)(6) provided technical leadership towards the development and adaptation of all materials. She participated in bi-weekly conference calls with DTRA CBEP representation and led weekly technical communications with project technical staff, and provided represented the technical team at the 30% review meeting held at CTSC. She additionally contributed directly to the development of presentations including, "Measures of Disease Spread and Public Health Statistics" (b)(6) worked to adapt and develop training materials, and to review the work of other project SMEs to ensure an overall consistency in approach. She reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation.

Trainer 2:
(b)(6) provided technical support towards the development and adaptation of materials specifically for "Questionnaire Design, Measures of Disease Spread, and finalization of the Avian Influenza presentation". He participated in technical and programmatic communication calls with project staff, and provided veterinary and training program development expertise towards the overall project approach as well as the delineation between.

Upcoming Activities

- Continued revision and updates of OHE presentations.
- Continued revisions to the overall course agenda and component list.
- Revision of presentations covered during 30% review in response to written comments received from DTRA CBEP.
- Revision to OHE exercises.
- Execution of the 60% review meeting.

Challenges
The currently suggested LOE to complete all project deliverables may be insufficient. Metabiota has suggested a realignment of SME hours and has taken steps to minimize operational costs on this project. The project team will report to DTRA CBEP with regularity regarding this issue.

TD 025 Technical Writing Workshop and Mentorship – Ethiopia

Objectives
Provide capacity building and sustainability in BS&S projects by conducting a Technical Writing workshop on developing a successful research proposal and white paper. Provide mentorship and support to workshop participants in finalizing and submitting for grant support to increase the research project completed in country.

Period of Performance: 4/15/16 – 11/15/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts)
Total Estimated Budget: $89,240.77
Estimated Expenditure: $34,291.00
Technical Direction Status: *Approved, Ongoing*

Key Points
- The participant list was finalized for training implementation.
- Invitation letters were delivered and 15 participants out of the expected 15 agreed to participate.
- The Technical Writing and Grantsmanship Workshop in Addis Ababa, Ethiopia was successfully implemented between the dates of 7/25 - 7/29.
- All materials received PAO approval prior to workshop implementation, and were sent in time to the CLS contract team to ensure their readiness for use by the training participants during the workshop.
- CLS updates including those related to a bill of materials were submitted, and received approval, prior to workshop implementation.
- As a value added component of the training, Metabiota subcontractors AAAS offered a one-year membership to their organization to support the provision of proposal writing reference materials to all 15 participants, plus one originally identified participant who became unavailable due to an unplanned obligation.

Completed Activities

Program Manager:
Metabiota Africa Regional Program Manager, (b)(6) provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as programmatic communications for the internal project team. (b)(6) worked with Metabiota PC (b)(6) (b)(6) to ensure resubmission of the CLS for respective of the bill of materials (BOM) needs. (b)(6) additionally oversaw the submission of all materials developed by AAAS in support of the technical writing and Grantsmanship workshop.

(b)(6) also travelled to Addis Ababa, Ethiopia on overhead support to provide leadership to the technical team and ensure the success of all aspects of this training including the management of logistical challenges that posed risk to training implementation. He also used this time to ensure the

development and delivery of daily reports to DTRA CBEP representation and to collect information needed to support the development of post workshop deliverables.

Research and Data Analyst:
Metabiota Project Coordinator (b)(6) participated in all project calls, both internal and with DTRA CBEP. (b)(6) took and distributed minutes following calls with DTRA CBEP. (b)(6) managed communications with performer AAAS regarding materials development and revisions in response to DTRA CBEP comments. (b)(6) developed additional material on BS&S requirements to address DTRA CBEP concerns. (b)(6) also provided coordination support to (b)(6) as necessary during training preparation and implementation.

Subject Matter Expert 1:
(b)(6) assembled materials for the technical writing and Grantsmanship workshop. Upon receipt of comments from DTRA CBEP (b)(6) revised the materials to include more information specific to DTRA BAA Thrust Area 6. (b)(6) travelled to Addis Ababa, Ethiopia to serve as the technical lead during the implementation of the Technical Writing Workshop. (b)(6) spent 5 full days leading training presentations between July 25-29th, 2016. (b)(6) also arrived to the training a day early to ensure that the workshop was set up properly and that materials were conducive the training needs.

(b)(6) during the month of July who is a representative of AAAS (b)(6) participated in regular project communication and provided support to (b)(6) during the development of all training materials. (b)(6) travelled to Addis Ababa, Ethiopia to serve as a presenter during the implementation of the Technical Writing Workshop. (b)(6) spent 5 full days providing training presentations between July 25-29th, 2016. (b)(6) also arrived to the training a day early to ensure that the workshop was set up properly and that materials were conducive the training needs.

Upcoming Activities

- Development of schedule for mentoring and proposal development activities.
- Submission of TTR.
- Submission of post workshop survey responses.
- Continued communications with stakeholders.

Challenges
The relatively short project timeline leading up to workshop implementation resulted in quick turnaround window for materials development and workshop planning, by engaging in an overlapping project plan, and with support from DTRA CBEP representation the workshop was implemented successfully and without incident.

CENTCOM

TD 021 Field Epidemiology and BS&S Training – Iraq

Objectives
Conduct remote trainings on epidemiology and BS&S/Biorisk management for one cohort of Iraqi scientists, and also engage them to familiarize them with the Iraq National Biological Emergency Response Plan and work on a gap analysis of said plan. Conduct remote trainings on epidemiology for a

second cohort.

Period of Performance: 02/19/16 11/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $747,163.00
Total Expenditure: $400,038.05
Technical Direction Status: *Approved, Ongoing*

Key Points

- Topic IV materials were submitted for review and revision.
- BS&S Module online training materials were submitted for review and revision.
- Metabiota finalized the Moodle LMS site for online training and execution of first epidemiology training course for Cohort 1 on August 08.
- Metabiota sent LOI's to participants in Cohort I and II and secured participation in both courses.
- Metabiota adjusted participants to evenly balance attendance in both courses, supported by (b)(6)
- Secured Zoom webinar seats for all trainers and held Zoom training in preparation for online course execution.
- Submitted revised Topic III materials to CBEP with response to comments tracker.
- Received approval of revised TD to change the scope for the gap analysis.
- Received PAO approval for Topic I materials.
- Submitted Topic II materials for PAO approval.
- Executed subcontract with URC for in-country FLN and procurement support.
- Executed a modification to RDA, Salma Afifi's ICA authorizing additional LOE supporting revisions and development of training materials.
- Received confirmation that all participants had been vetted for attendance and were approved to participate in the course.
- Initiated creation of private YouTube channel for hosting of all recorded trainings.

Completed Activities

Prog
PMs (b)(6) ave supported all project activities to date. PMs participated in routine meetings with DTRA CBEP and A&AS teams to facilitate updates to project schedule, discuss challenges, and support the project approval, as well as provide routine project updates. The PMs have maintained visibility with DTRA CBEP on project status and have offered solutions to address project obstacles.

(b)(6) ntinues to work closely with CBEP POCs as well as in-country and WMRI SMEs to facilitate communication, receive training materials, review BS&S needs, and participate in routine project meetings and calls to support this engagement (b)(6) has provided a general review of WRMI's submitted course materials for the Biosafety, Biosecurity and Biorisk Management Remote Course (b)(6) have reviewed epidemiology training materials, completed project schedule changes, and assisted in initiating the gap analysis. He participates in routine project calls with BS&S and Epidemiology Trainers and provides technical support and guidance as needed. He coordinates directly with CBEP PoCs and continues to provide guidance in response to comments trackers, and finalization of all

materials for PAO approval. [redacted] also participated in the TD response to revision received by CBEP for the g[redacted]sis, and provided alternate scheduling options to ensure a successful delivery of the analysis. [redacted] participated in trainings on Moodle and Zoom to facilitate on-line training.

[redacted] manages administrative components to include project schedule, LOE, budget, and delivery and submission of CDRLs. [redacted] worked with the project coordinator to approve purchases of selected course materials, contractual engagements on the project, and completion of the URC subcontractor for local procurement and FLN support. She participates in routine project calls with the epi and BS&S teams, and has taken part in the LMS and Zoom training. [redacted] assisted in the TD response provided to CBEP, and has assisted in securing additional resources to build out the LMS site with project materials and finalization of all needs prior to delivery of online training course.

Subject Matter Expert I:

SMEs [redacted] nd [redacted] upport project activities in direct coordination with PMs. They participate in routine project calls, meetings, and assist in the engagement of the project team.

[redacted] supports and works closely with Watermark Risk Management International (WRMI) in the development of BS&S training components. She has provided and continues to provide, in-depth review of WRMI's submitted course materials for the Biosafety, Biosecurity and Biorisk Management Remote Course, as well as the hands on course, and provided feedback to the team. [redacted] participated in routine communication with WRMI, PC and PMs.

The Project Coordinator, [redacted] supports the PMs through the maintenance of the project schedule, preparation of CDRL requirements, communication with and coordination of BS&S and Epidemiology technical teams, LOE review, material review and procurement, maintenance of project visibility to CBEP POCs and stakeholders, and coordination of routine project conference calls and meetings with technical teams and CBEP POC's. [redacted] continued to facilitate revisions of URC's contract for FLN support and has established and participated in the LMS training. [redacted] continues submission of training materials for technical review and public affairs approval and will continue to coordinate submission of CDRLs and routine calls with the project team and SMEs. [redacted] also assisted in the build out of the LMS site, and continued coordination of copyright approvals for training materials in conjunction with WMRI RDA and Metabiota epi trainer, [redacted] In addition [redacted] coordinated and submitted LOIs to all participants and secured course participation by the cohorts.

Epidemiology SME I's [redacted] participated in routine project calls and regular email communications with Metabiota PC and PMs. They worked with the epidemiology team to complete development and revision of epidemiology training materials and development of the course schedule, to include trainer delivery of each course and module. [redacted] completed responses and revisions to the epidemiology training materials following feedback from CBEP, and completed the comments trackers for submission. In addition, [redacted] continued to facilitate internal meetings with the epi team for coordination of material development, and continued to secure copyright approvals for training materials. Both SMEs participated in "dry runs" utilizing the LMS platform in preparation for delivery of the first course in August. They assisted in completion of the course syllabus, and finalized all materials and needs in preparation for next month's delivery.

Subject Matter Expert II:

WRMI SME II's, (b)(6) participated in routine project calls with Metabiota personnel and developed information requirements and recommendations for project execution via email and phone communications. SMEs completed revisions to BS&S/BRM course materials and resubmitted them to Metabiota for approval. They also participated in training on Zoom and Moodle, and began building out the BS&S training site on the LMS platform. They provided input to development and execution of the gap analysis and revised their project LOE and costs to reply to a change in scope and requirements, at the request of Metabiota.

Epidemiology Trainer, (b)(6) participated in routine project calls and regular email communications with Metabiota PC and PMs. She worked with the epidemiology team to complete development of epidemiology training materials and development of course schedule. (b)(6) completed responses and revisions to the epidemiology training materials following feedback from CBEP, and completed the comments trackers for submission. She participated in trainings on Zoom and Moodle in preparation for online course delivery.

Research and Data Analyst:
The WMRI RDA has provided administrative support to the WMRI project team, to include supporting copyright permission requests for all BS&S materials. She participated in Zoom and Moodle trainings, and supported the build out of the Moodle site for BS&S training components. She completed the monthly invoiced required on the project.

Epidemiology Trainer (b)(6) has continued to collect reference materials, and participated in the development of the project schedule for delivery of training modules. She continued development of topic 1,2, and 3 training materials completing revisions and addressing CBEP feedback. She also initiated development of topic 4 materials for submission to CBEP. (b)(6) participates in routine project calls and communicates regularly with PC, PMs, and Epidemiology Project Team.

Upcoming Activities

- Continue submission of Epidemiology and BS&S training materials for DTRA CBEP technical and PAO approval according to timeline and project requirements.
- Execute Zoom webinar training for FLNs supporting the online and hands-on course.
- Continue to procure materials for hands-on course.
- Continue to secure and finalize copyright requirements for all training materials.
- 8 August Initiate the first training course for Cohort 1.
- Continue coordination with Iraqi stakeholders to initiate gap analysis.

Challenges

Delayed approval for the in-country PoC, (b)(6) to support the development of this project, compounded with the absence of official approval from the Director General of Public Health to implement the project, has caused delays in project planning and preparation. However, formal approval has now been received and (b)(6) has been on-boarded as a project consultant and has been extremely helpful in project execution. Epidemiology Trainers continue to complete and revise course materials following feedback from CBEP. Continued revision requests to administrative and technical components of the materials has put an increased burden on trainers and the project team to complete all materials and deliver the course in an already compact timeline. In addition, the inclusion of the gap analysis and revisions to scope on the delivery and execution of the analysis is a very rapid turnaround, which will be difficult to implement and is dependent on strong participation by Iraqi stakeholders. Metabiota worked

with CBEP to determine multiple schedules to account for risks identified in completion of this requirement, and will continue to keep CBEP informed on execution of this task within the required timeframe.

TD 024 MESA Short Video – Jordan

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through a video documentation of the MESA Jordan conference (TD 004) increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 04/15/16 07/31/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $51,878.00
Estimated Expenditure: $51,878.00
Technical Direction Status: *Approved, Ongoing*

Key Points
- Submitted film to (b)(6) for technical review and PAO approval.
- Completed edits to film following feedback received from the US Embassy in Jordan and CBEP leadership.
- The film was submitted by (b)(6) for PAO approval and was approved shortly after.
- Organized film premiere with CBEP regional team and Gryphon scientific to include developing invitation, inviting attendees, securing venue in coordination with TTI, and finalizing logistical requirements.
- Held film premiere at the Crystal Gateway Marriott. Premiere was attended by members of CBEP leadership and regional project personnel, Metabiota, Gryphon Scientific, USG stakeholders, regional Embassy personnel, and conference attendees.
- Completed closed captioning on film.
- Submitted final deliverables, to include DVD with closed captioning to CBEP.

Completed Activities

Program Manager:
During the month of July, (b)(6) continued coordination and management of TD-24 to include participating in routine weekly calls with CBEP and Gryphon project teams and SMEs. She oversaw finalization and submission of the film for PAO approval and final release at the film premiere held on 26 July. She participated in film revisions and finalization of content and edits necessary following feedback from the US Embassy in Jordan, and CBEP leadership, and ensured all edits were made prior to PAO approval. (b)(6) coordinated the film premiere, to include development of the invitation, agenda, participant list, and sending of invitations to ensure attendance at the event. She oversaw the execution of the film premiere and coordinated final delivery of the film with closed captioning in hard format to CBEP, closing out project requirements.

Subject Matter Expert 1:
During the month of July, (b)(6) supported the PM in routine coordination of the project to include participation in routine calls and communications with CBEP and Gryphon project teams and

SMEs. She assisted in the finalization and submission of the film, as well as coordination and execution of the film premiere (b)(6) ensured final delivery of the product to CBEP.

Subject Matter Expert 3:
During the month of July, (b)(6) continued to provide editing and feedback on the film to finalize the product following feedback received from the US Embassy in Jordan, as well as CBEP technical review. She assisted in the revision of included sound bites, content changes, and updated titles, and final technical reviews prior to final submission for PAO approval. She participated in routine weekly calls with Metabiota and CBEP project teams, and assisted in the coordination and execution of the film premiere on 26 July. In addition, she provided the final deliverables required under the Gryphon subcontract with Metabiota, finalizing all project requirements within the period of performance.

*All activities supporting the film premiere were provided at no cost to the Government.

Upcoming Activities

- Following final approval of film with closed captioning, and posting on the DTRA CBEP YouTube channel, the film link will be posted on the MESA Conference website, and Metabiota website, as well as shared with colleagues.
- Complete project close-out, to include close out of Gryphon and August II Productions agreements.

Challenges
Receipt of PAO approval on 26 July resulted in a very short turnaround for completion of closed captioning within the assigned PoP. However, August II Productions was able to complete closed captioning on the film by 31 July, meeting the project timeline and Metabiota delivered the final product to CBEP on 5 August, following receipt and review of the material on 1 August.

EUCOM

TD 016 Georgia Geographic Information Systems – Georgia

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 – 11/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $271,707.23
Estimated Expenditure: $154,910.46
Technical Direction Status: *Approved, Ongoing*

Key Points

- Initial analyses of the GG-19 data set suggested that there may not be enough data to support 1km^2 grid cells, and that they may need to broaden to 5km^2 cells. (b)(6) also set up GoToMeeting calls with the GG-19 team

Completed Activities

Program Manager:
(b)(6) (b)(6) held calls and email communications with DTRA/A&AS to discuss project status. (b)(6) held calls with University of Florida to discuss work on this project. (b)(6) also participated in CBR project calls. (b)(6)

Subject Matter Expert 1:
(b)(6) participated in calls and email communications with DTRA/A&AS to discuss project status. (b)(6) further held calls with University of Florida to discuss work on this project.

Subject Matter Expert 2:
(b)(6) participated in CBR project calls and identified and on boarded new staff to conduct GIS analyses on the three CBR projects GG-19, -20, and -27. (b)(6) also participated in calls and email communications with (b)(6) to discuss future work on this project.

Research and Data Analysts:
(b)(6) participated in CBR project calls for this effort. (b)(6) worked on analyzing the GG-19 data set and the transition from ArcGIS to QGIS. Initial analyses suggest that there may not be enough data to support 1km^2 grid cells, and that they may need to broaden to 5km^2 cells. (b)(6) also set up GoToMeeting calls with the GG-19 team. (b)(6) worked on implementing analytical routines in R which had initially been built in Excel.

Upcoming Activities
Metabiota and UF will continue working with CBR project teams to execute research goals for the three CBR projects.

Challenges
No challenges to report.

TD 017 Georgia Subject Matter Expert Grantsmanship – Georgia

Objectives
Provide mentorship in all aspects of Grantsmanship to stakeholders in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/2015 – 11/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $276,675.85
Estimated Expenditure: $127,177.92
Technical Direction Status: *Approved, Ongoing*

Key Points
- Mentorship with LMA scientists has resumed. In-country mentorship has been planned for 2-17 September 2016. Travel documents were submitted and approved.

Completed Activities

Program Manager:
[redacted] held calls and email communications with DTRA/A&AS to discuss project status. [redacted] further held calls with Avila Scientific to discuss work on this project. [redacted] reviewed and submitted travel documents (CCR and TAF) for Avila Scientific's planned travel to execute in-country mentorship from 2-17 September 2016.

Subject Matter Expert 1:
[redacted] participated in calls and email communications with DTRA/A&AS to discuss project status. [redacted] further participated in calls with Avila Scientific to discuss work on this project. [redacted] reviewed travel documents (CCR and TAF) for Avila Scientific's planned travel to execute in-country mentorship from 2-17 September 2016.

Subject Matter Expert 2:
[redacted] continued mentorship of LMA scientists in Grantsmanship. [redacted] also participated in communications with [redacted] to discuss plans for this effort.

Upcoming Activities
Mentorship is expected to continue ramping up in August. An abstract on anthrax is expected to be submitted to the DTRA BAA for possible funding.

Challenges
July saw a drawdown in LMA participant availability as most of LMA staff took vacation. Staff are expected to be available in August, though LMA will be participating in proficiency testing and other government mandated work which may continue to affect mentee availability.

TD 018 Georgia Visiting Scientist Genomics – Georgia

Objectives
Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015 – 08/15/16
Task Areas: Task 2 (Visiting Scientist)
Total Estimated Budget: $384,435.71
Estimated Expenditure: $346,685.25
Technical Direction Status: *Approved, Ongoing*

Key Points
- [redacted] facilitated a meeting between LMA Director Irakli Guledani and Deputy Director [redacted] and representatives from USAMRIID and WRAIR.
- [redacted] helped to organize and work on multiple efforts on the *F. tularensis* strain comparison work.

Completed Activities

Program Manager:

[redacted] held calls and email communications with DTRA/A&AS to discuss project statu[redacted] further held calls wit[redacted] at Farlow Scientific to discuss work on this project.[redacted] further provided a breakdown of financial status on this project to [redacted] and [redacted] at DTRA.

Subject Matter Expert 1:

[redacted] participated in calls and email communications with DTRA/A&AS to discuss project status.[redacted] further participated in calls wi[redacted] to discuss work on this project.

Visiting Scientist:

[redacted] participated in calls and email communications wit[redacted] to discuss work on this project.[redacted] also continued genomics and bioinformatics mentorship of Georgian scientists. Specifically, in July [redacted] held multiple bioinformatics mentoring sessions at the Lugar Center. Attendees included [redacted] and [redacted] July's sessions included additional methods on operating MEGA phylogenetic software package modules and additional theory on phylogenetic methods discussed in June, including 1) distance-based and character-based methods, neighbor-joining and UPGMA algorithms and both maximum parsimony and maximum likelihood analyses. Evolutionary model testing with MEGA was also reviewed.

[redacted] facilitated a meeting between LMA Director [redacted] and Deputy Director [redacted] and representatives from USAMRIID and WRAIR.[redacted] further worked with staff at LMA on preliminary work which may lead to a project proposal on comparative genomics of ASFV.

[redacted] also helped to organize and work on multiple efforts on the *F. tularensis* strain comparison work. Farlow and [redacted] ntinued work on genome-wide read-based variant comparisons of the 12 Georgian *tularensis* strains across major Biovar B Group representatives.

[redacted] worked with [redacted] to identify the source/lot information on strains we sequenced at the Lugar Center. Original vials and lot numbers were available only for the veterinary vaccine strain (strain 55) samples from Tbilisi (Immunogenic Ltd. and Baku) but not for the STI strain [redacted] nd [redacted] are finalizing draft genome data for two sources of the anthrax strain 55, one commercial sample from Baku and another distributed by Immunogen Ltd., in Tbilisi.

[redacted] also worked with the NCDC staff to perform quality assessments on data coming off of the Lugar Center MiSeq machine following the recent servicing. Preliminary analysis appears to suggest that the differences in data quality are not related to the reagent chemistry from alternating kits. The possibility remains that library preparation may be a source of variability.[redacted] has also arranged a monthly Lugar Center Scientific Journal Club for staff to present and critically review international research articles.

Upcoming Activities
At this time, Metabiota is beginning to prepare for TD termination and closeout unless an extension is received.

Challenges
No significant challenges at this time.

TD 019 Georgia Visiting Scientist Microbiology Georgia

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015 11/15/16
Task Areas: Task 2 (Visiting Scientist)
Total Estimated Budget: $706,027.02
Estimated Expenditure: S465,911.04
Technical Direction Status: *Approved, Ongoing*

Key Points
- (b)(6) prepared a draft of TAP-11 final report which was submitted to the CBR project managers.
- The GG-19 media comparison is completed with (b)(6) oversight, and all media appears to be equivalent.
- (b)(6) assisted NCDC epidemiologists and laboratorians with preparing their final proposal versions for the CDC GHSA Operational Research call.
- (b)(6) assisted an NCDC microbiologist with an application to GRDF for a fellowship to acquire skills in cryptosporidium diagnostics.

Completed Activities

Program Manager:
(b)(6) held calls and email communications with DTRA/A&AS to discuss project status. (b)(6) further held calls and email communications with (b)(6) to discuss work on this project.

Subject Matter Expert 1:
(b)(6) participated in calls and email communications with DTRA/A&AS to discuss project status. (b)(6) further participated in calls with (b)(6) to discuss work on this project.

Visiting Scientist:
(b)(6) participated in calls and email communications with (b)(6) to discuss work under this TD.

(b)(6) assisted in data analysis and drafted and submitted the draft final report for TAP-11. He addressed comments from the CBR project managers to the best of his ability and worked with the Georgian PI to address signature issues with the validation/qualification plan.

(b)(6) also worked with the GG-19 project team to plan and provide oversight for the media comparison study. He submitted his Q12 collaborator report and addressed comments from Avila Scientific. He has also held discussions with the NCDC repository scientists on techniques for working with *Yersinia pestis*.

(b)(6) also supported discussions at NCDC for the possibility of applying for a Fogarty Center grant for establishing a training program. He also supported their efforts in applying for a CDC GHSA Operational Research grant by reviewing materials, providing feedback to their application, and assisting with the technical submission of the proposal materials.

(b)(6) worked with LMA to procure and prepare for the use of the lepto kits for the Jordan collaboration. He communicated with vendors to work out invoicing issues and continues to search for an appropriate anthrax kit. He also worked to clarify protocols for titering ELISAs.

(b)(6) assisted LMA staff by answering questions about various diagnostics in order to address testing requirements from the Ministry level. He also discussed the issues with their new FPA (fluorescence polarization assay) instruments and communicated with the manufacturer regarding th issue. He further met with the LMA Director to discuss their needs for brucellosis diagnostic testing (b)(6) worked with Georgian scientists at LMA on planning a manuscript on their brucellosis research.

Upcoming Activities

(b)(6) will continue mentorship as expected.

Challenges

(b)(6) notes that it has become increasingly frequent that LC scientists and others are preparing and submitting abstracts or reports very near or at the deadlines. This practice makes it difficult to properly assist them or assess their work.

Closed Technical Directives

AFRICOM

TD 008 Clinician Training – Uganda

Objectives

Identify gaps in current country-specific training systems and develop clinical training materials to address those gaps and sustainably increase the capacity of medical practitioners at the sub-national level of healthcare systems to identify, diagnose & report disease outbreaks.

Period of Performance: 05/16/15 - 08/18/15
Task Areas: Task 2 (Scientific Mentor), Task 3 (Qualified Trainers)
Total Estimated Budget: $736,470.25
Total Expenditure: $736,470.25

Technical Direction Status: *Completed, Closed.*

TD 010 One Health Epi Training – South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15 – 03/31/16
Task Areas: Task 3 (Qualified Trainer), Task 4 (Subject Matter Experts)
Total Estimated Budget: $134,551.13
Total Expenditure: $134,551.13
Technical Direction Status: *Completed, Closed.*

TD 014 Grant Writing Mentorship and Workshop – Kenya

Objectives
The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 7/21/15 – 04/30/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $113,984.16
Total Expenditure: $101,408.40
Technical Direction Status: *Completed, Completed*

TD 020 Initial Engagement SME Support – Gabon – Cancelled

Objectives
To provide technical support to DTRA CBEP regarding initial engagement activities with Gabonese ministerial officials, historical context and technical advice on gap analyses, and recommend CBEP engagement approaches with the Government of Gabon

Period of Performance: 12/14/15 – 3/31/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $ 31,955.00
Total Expenditure: $2,014.63
Technical Direction Status: *Cancelled*

CENTCOM

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats – Kazakhstan

Objectives
To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/15 01/31/16
Task Areas: Task 3 (Qualified Trainers)
Total Estimated Budget: $391,056.00
Total Expenditure: S376,933.87
Technical Direction Status: *Completed, Closed.*

TD 003 Bat Borne Virus from Annual Bat Cull – India – Cancelled

Objectives
Increase the biosafety/ bio-surveillance and early diagnostic capacity in Nagaland India through implementation of a study on the risks of bat-borne virus transmission during an annual bat cull and the presence of known select agents within the community of bats known to be naturally harbored in the species and that have caused mortality in humans.

Period of Performance: 06/01/15 – 09/30/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts), Task 6 (Research Activity Project)
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: *Cancelled*

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop – Jordan

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/15 – 05/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $488,040.04
Estimated Expenditure: S474,680.81
Technical Direction Status: *Approved, Closed*

TD 005 Long Distance Learning – Iraq – Cancelled

Objectives
Increase the operational capacity of disease surveillance, detection, reporting and response with specialized training of core veterinarians from public health and laboratory settings through in person training and weekly web based modules entailing interactive case based materials focusing on both

endemic and high consequence pathogens.

Period of Performance: 06/01/15 09/30/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts)
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: *Cancelled*

EUCOM

TD 011 TADR Activity Project 4 (TAP-4) Ukraine

Objectives
The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/15/15 – 01/31/16
Task Areas: Task 3 (Qualified Trainers), Task 6 (Research Activity Project)
Total Estimated Budget: $116,879.66
Total Expenditure: $77,464.81
Technical Direction Status: *Completed, Closed*

TD 012 Ukraine Project 2 – Ukraine

Objectives
The overarching objectives of this project are to develop both explanatory and predictive, spatially-explicit models to explore the geography and ecology of EDPs, specifically Francisella tularensis, the causative agent of tularemia, and Bacillus anthracis, the causative agent of anthrax, across Ukraine at multiple spatial scales.

Period of Performance: 05/16/15 – 09/30/2015
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts), Task 6 (Research Activity Project)
Total Estimated Budget: $264,788.37
Total Expenditure: $297,029.64
Technical Direction Status: *Completed, closed* (Transferred to BTRIC TO4)

PACOM

TD 006 Nipah Research Activity Project Philippines Cancelled

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through; identification of reservoir and host range for Nipah or related viruses; examination of the seroprevalance of Nipah in bats, peridomestic animals and humans, and understanding the risk factors for cross species transmission in the Philippines.

Period of Performance: 06/01/15 09/30/15

Task Areas: Task 4 (Subject Matter Experts), Task 6 (Research Activity Project)
Total Estimated Budget: $874,846.00
Total Expenditure: $11,985.82
Technical Direction Status: *Cancelled*

TD 007 Regional Baseline Assessment – Southeast Asia

Objectives
Characterize the region based on the disease landscape, organic regional capabilities, and external factors that impact CBEP objectives, identify needs and areas of overlap with other stakeholders, and provide overarching strategic guidance & goals to CBEP PACOM Country Managers in the development of country engagement strategies.

Period of Performance: 05/16/15 – 12/31/15
Task Areas: Task 4 (Subject Matter Expert)
Total Estimated Budget: $850,489.00
Total Expenditure: $850,317.11
Technical Direction Status: *Completed.*

TD 015 Health Informatics Support – Vietnam

Objectives
Improve Vietnam Ministry of Health systems (processes and software) to support public health disease reporting and response capacity and improve compliance with National and International Health regulations (e.g., IHR 2005).

Period of Performance: 05/16/15 – 06/30/15
Task Areas: Task 4 (Subject Matter Expert)
Total Estimated Budget: $51,804.80
Total Expenditure: $51,804.80
Technical Direction Status: *Completed, Closed*

Table 3 – Summary of Contract Modifications

Contract Modifications	Requirement / Description	Date Received	Letter Issued to DTRA
P00001	Respond to the Ebola outbreak in Africa	21-Mar-14	18-Apr-2014
P00002	Removed FTE and geographical restrictions from SOW	27-Mar-14	25-Apr-2014
P00003	Authorized use of existing LOE under CLIN 04 at the discretion of the COR	4-Apr-14	9-May-2014
P00004	Bat-borne pathogen surveillance	6-May-14	5-Jun-2014
P00004	Clinician Training in at least 3 African countries	6-May-14	5-Jun-2014
P00004	BS&S / NHLS Training in South Africa	6-May-14	5-Jun-2014
P00005	Added funding at the SLIN level to requirements listed in P00004	14-May-14	N/A
P00006	SURGE CLIN - Extended POP for EBOV response	12-Jun-14	N/A
P00007	REA Negotiation	25-Jun-14	27-Jun-2014
P00008	Surge POP extension	6-Aug-14	N/A
P00009	REA for Bat-Borne Training and revised Rate Cards	3-Sep-14	N/A
P00010	Ukraine Projects – UP2 & TAP4	17-Sep-14	N/A
P00011	Incorporates FAR clause 52.225-99 initiating use of Synchronized Pre-deployment and Operational tracker for efforts in Africa.	4-Dec-14	N/A
P00012	Authorizes FFP funds for CLIN 0003 and CLIN 1006. Incorporates requirement for DBA insurance.	26-Jan-15	N/A
P00013	Issues change order from FFP LOE to FFP. Requests Proposal extension of base year through April.	2-Feb-15	N/A
P00014	Awards Base Year Extension	10-Apr-15	N/A
P00015	Realigns funding between ACRNS	16-Apr-15	N/A
P00016	Issues two week extension for base year	21-Apr-15	N/A
P00017	Awards T&M Option Year for $12,771,956.28.	15-May-15	N/A
P00018	Provides Incremental funding for Option Year 1	15-May-15	N/A
P00019	Funds REA and changes contract clauses.	8-Sep-15	N/A
P00020	Adds funding to CLIN 1002 and 1005	28-Sep-15	N/A

P00021	Adds FLN rate card. Changes Key Personnel. Adds Subcontractor and FAR clause	11-Nov-15	N/A
P00022	Adds funding to CLIN 1002	3-Mar-16	N/A
P00023	Adds funding to CLIN 1003	30-Mar-16	N/A
P00024	Extends POP to 11.15.16 and adds value and funding	5.21.156	N/A

Table 4 – Summary Committed Funds

CLIN	Total Awarded	Total Funded	Total Committed	Total Remaining Funding
0001	$2,945,896.76	S2,945,896.76	$2,945,896.76	S0.00

This submission of the Monthly Report (Contract Data Requirements List; CDRL A001) encompasses implementation of Academic Engagement Partnership (AEP) program activities in accordance with Defense Threat Reduction Agency (DTRA) Cooperative Biological Engagement Program (CBEP) contract HDTRA1-14-C-0104 for 09/01/16 – 09/30/16.

Active Technical Directives

AFRICOM

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing – Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 – 11/15/16
Task Areas: Task 2 (Scientific Mentor), Task 3 (Qualified Trainers)
Total Estimated Budget: $135,890.21
Estimated Expenditure: $154,243.54
Technical Direction Status: *Approved, Ongoing*

Key Points

Project closeout is ongoing and expected to complete in early October.

Completed Activities

(b)(6) on the drafting of the final report and lessons learned document for this project. (b)(6) also worked with (b)(6) on administrative activities including review and approval of subcontractor and independent consultant invoices, and communication with Metabiota Cameroon and DTRA on disposition of remaining training materials. (b)(6) also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports.

Trainer 1:
(b)(6) worked with (b)(6) on the drafting of the final report and lessons learned document for this project. (b)(6) also worked on administrative activities including review and approval of subcontractor and independent consultant invoices, and communication with Metabiota Cameroon and DTRA on disposition of remaining training materials. (b)(6) also drafted reporting instruments including quad charts, invoicing, and monthly reports.

Upcoming Activities

Submission of final report and lessons learned.

Challenges

No significant challenges at this time.

TD 009 NHLS BS&S Training – South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/15 – 11/15/16
Task Areas: Task 3 (Qualified Trainers) Task 4 (Subject Matter Experts)
Total Estimated Budget: $335,607.11
Estimated Expenditure: $313.223.06
Technical Direction Status: *Approved, Ongoing*

Key Points

Project activities are beginning to wind down, and Metabiota is preparing to close out this project.
OHASIS module is being deployed.
BS&S videos are near completion.

Completed Activities

Program Manager:
(b)(6) held email and phone communications with the NHLS team to discuss current project status and any issues. (b)(6) also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports. (b)(6) also held email and in-person communications with DTRA/A&AS to review the 4th edit of the BS&S videos and discuss current project status including the potential for procurement of calipers for facial measurements during respirator fit testing. (b)(6) also led communications with TSI, Inc. to resolve an issue regarding the model of one of the Porta Count units which was procured for use by NHLS.

Grants Manager:
(b)(6) participated in email and phone communications with (b)(6) He communicated with Grounded Media regarding the editing of the BS&S videos and their transfer to media for distribution. He also provided oversight over the deployment of the OHASIS module. (b)(6) and his team identified the potential issue with the Porta Count unit.

Trainer 1:
Ms. (b)(6) participated in email and phone communications with the NHLS team to discuss current project status and any issues. (b)(6) also participated in email and in-person communications with DTRA/A&AS to review the 4th edit of the BS&S videos and discuss current project status. (b)(6) also drafted reporting instruments including quad charts, invoicing, and

monthly reports.

Research and Da

(b)(6) and (b)(6) provided administrative support to the in-country team on financial and contractual matters such as invoicing and reporting.

Upcoming Activities

The final edit of the BS&S videos will be transferred to USB sticks and iPads for distribution at NHLS sites.
Metabiota and NHLS are planning one final procurement of calipers.

Challenges

No significant challenges at this time.

TD 013 One Health Epi Training – Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.
Period of Performance: 05/16/15 – 11/15/16
Task Areas: Task 2 (Scientific Mentor), Task 3 (Qualified Trainers), Task 4 (Subject Matter Expert).
Total Estimated Budget: $350,241.87
Estimated Expenditure: $336,799.42
Technical Direction Status: *Approved, Ongoing*

Key Points

Cohort 11 Module 2 One Health Epidemiology training was implemented successfully and without issue between the dates of September 19-23rd, 2016 in Fort Portal Uganda. The Training Trip Report for Cohort 11 Module 2 has been submitted in kind
Of the 23 participants stating that they would be attending the training, all 23 were available for all aspects of Module 2;
The participants gave presentations during the Cohort 11 Module 2 training event that included analysis and explanation of data gathered and studied during the 6 week break between modules; and
Continued bi-weekly follow up conversations with in-country stakeholders at the Centers for Disease Control – Uganda (CDC-Uganda).

Completed Activities

Program Manager:
Metabiota Regional Africa Program Manager (b)(6) led regular communications with in country performer, CDC-Uganda and DTRA CBEP Uganda. He provided project and programmatic oversight to

the submission of all travel and training related CDRLs and contractual requirements associated with training implementation.
Additionally, during this month (b)(6) managed the procurement of travel support for the Metabiota implementation team.

Research and Data Analyst:
Metabiota Project Coordinator (b)(6) continued to provide support to (b)(6) during all communications with CDC Uganda and DTRA CBEP Uganda representation. (b)(6) departed the organization this month and worked to ensure that all of her earlier responsibilities were handed over to (b)(6) in an effective manner.

Subject Matter Expert 3:
Metabiota Senior Advisor (b)(6) attended bi-weekly stakeholder calls and attended pre travel meetings while contributing expert advice to lessons learned and the general technical training approach.

(b)(6) traveled to Uganda from Washington, DC to support the implementation of Cohort 11 module 2 training in Fort Portal, Uganda. (b)(6) served as both a presenter and a training mentor during this training event and evaluated both the materials and the presentation of information in an effort to ensure both accuracy and consistency. (b)(6) provided expert insight to both Metabiota staff and CDC Uganda representation during all pre training meetings, and during exercise breakout sessions.

Trainer 1:
Metabiota Program Manager and epidemiology subject matter expert (b)(6) MSPH provided technical training support to OHE training implementation for Cohort 11 Module 2. He traveled from Washington, DC to Fort Portal Uganda for this effort. (b)(6) served as an epidemiologist trainer 1 during this time and took observational minutes of all training presentations. During this time, (b)(6) served as the field team leader throughout the training event. (b)(6) reported all project activates back to Metabiota AEP leadership and maintained consistent communication with DTRA CBEP representation as necessary.

AFRICOM FLN-1:
Metabiota Independent Contractor, Epidemiologist (b)(6) served as the lead trainer in support the implementation of Cohort 11 Module 2 training in Fort Portal, Uganda. He was tasked to provide both leadership and support to other One Health Epidemiology (OHE) trainers and to provide lectures to all OHE training participants during the exercises and presentations (b)(6) was tasked to travel from his home base in Kampala Uganda to Fort Portal in support of the training event.

Upcoming Activities:

Development and delivery of a final after action and lessons learned report; and
General project closeout

Challenges:

Cohort 11 Module 2 training ran smoothly and was brought to completion on time and without incident; however, some delays were seen and caused by trainees coming back late from getting their lunch. Venues for future training events should be identified with this logistical challenge in mind. Specifically, venues should be identified in populated areas with affordable lunch options or working lunches should be provided via the CLS mechanism.

Additionally, (b)(6) (the Metabiota independent consultant who failed to attend to his duties during the previous training) was not replaced due to unavailability of qualified trainers on short notice. The challenge of his absence was mitigated seamlessly and again involved contributions to presentations from Metabiota Senior Advisor (b)(6) as well as CDC Uganda Epidemiologist (b)(6)

TD 022 Biosurveillance and Grantsmanship Training – Uganda

Objectives

Advance the biosafety and biosecurity capacity in Uganda through the development, coordination and execution of a pilot biosurveillance study focused in Rift Valley fever (RVF), avian influenza (AI), and peste des petits ruminants virus (PPRV). Provide subject matter expertise to assist participants in development and submission of grant proposals, and development of standard operating procedures to increase enhance local skills in early detection and prevalence determination of RVF AI and PPRV.

Period of Performance: 3/21/16 – 11/15/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts), Task 5 (Research Collaborators) Task 6 (Research Activity Projects)
Total Estimated Budget: $253,635.27
Estimated Expenditure: $211,410.47
Technical Direction Status: *Approved, Ongoing*

Key Points

All remaining materials procured within the US for shipment to Uganda in support of this pilot study were placed on a final TR that has been submitted to DTRA CBEP;
The Biosurveillance training event was successfully brought to completion during the early days of the month of September;
The Training Trip Report built out in support of the Biosurveillance training event was submitted to DTRA CBEP post successful completion of the event;
CLS forms supporting pilot study implementation were resubmitted to DTRA CBEP to reflect necessary changes identified by the project team and study leads for all three pilot efforts including the Rift Valley fever (RVF) study, avian influenza (AI) study, and the peste des petites ruminants (PPR) study;
CLS bill of materials forms supporting the biosurveillance pilot study event were submitted to DTRA CBEP to support paper materials necessary for pilot study implementation including consent forms, data collection forms and standard operation procedure forms (SOPs);

Local Uganda scientific supply vendors that had been previously identified in country were engaged and placed on call to support the pilot studies as a stop gap solution to address those items missing due to delayed shipping from vendors in the US;
Weekly reporting forms were developed and distributed to the pilot study leaders by the Metabiota project team to ensure accurate and real time collection of study sample data and relevant implementation challenges;
A data management lead was identified in country and chosen from the training cohort by the study leads to serve as a focal point of contact and ensure a timely and accurate management of all study data; and
Metabiota trainer and SME (b)(6) was identified as the lead for the proposal development effort and engaged all study leads by developing a path forward for proposal build out.

Completed Activities:

Program Manager:
Metabiota Regional Africa Program Manager (b)(6) led regular bi-weekly and as needed communications with in country stakeholders. He also led communications with DTRA CBEP representation on a bi-weekly and as needed basis. He provided project and programmatic oversight to the update, re-development and delivery of pilot study related CDRLs and other associated contractually requirement document resubmissions. He also contributed to the finalization of procurement documents and provided technical oversight to the selection of items necessary for pilot study implementation. (b)(6) provided general management and direction to the project team during the finalization of the biosurveillance training event in the early days of September. He continued to lead presentations including the closing remarks and next steps conversations, and continued to provide technical guidance in the subject areas of epidemiology, data analysis, study design, and sample size calculation. (b)(6) also maintained communications with DTRA CBEP during this time and developed and implemented a reporting protocol for all study leads.

Research and Data Analyst:
(b)(6) provided general coordination and implementation support to the project team in the during the execution of the biosurveillance training event. She continued to provide technical leadership during several components of the training event including the set up and execution of post-collection sample management activities. (b)(6) also contributed to the post-training next steps discussion that provided guidance to the study leads during the subsequent 8 weeks' pilot study. Finally, (b)(6) at the direction of (b)(6) began building out relevant components of the final project report due at the time of project closeout (11/15/2016).

Subject Matter Expert 1:
(b)(6) remained on travel during the early days of this month in Kasese, Uganda and continued to serve as a technical leader during the closeout of the biosurveillance training event. His efforts during this period included the delivery of technical oversight on BS&S in the field laboratory, trapping sampling and handling of avian and ruminant species, field waste management, sample management in the field, and sample management in the field laboratory. (b)(6) additionally participated in all post training meetings and provided general support to the teams in preparation for the subsequent and forthcoming biosurveillance pilot studies. Finally (b)(6) began the proposal development process, by holding at length discussions with study leads and building out a general outline.

Time spent during this period at SME 1 is also represented by the efforts of ABL representative (b)(6) contributed to the proposal development process at the guidance of (b)(6) was engaged to support both proposal writing and study design portions of this effort.

Upcoming Activities

As necessary, continue revision of CLS forms in response to DTRA CBEP feedback and biosurveillance pilot study implementation needs;
Continue to identify as necessary, field and laboratory materials available in-country for immediate purchase and delivery to stakeholder facilities as a contingency plan;
Development of the final project report;
Continued minimum bi-weekly communications with DTRA CBEP representation;
Continued weekly communication with study leads working to implement the biosurveillance pilot studies; and
Continue to support the development of contingency plans as new challenges arise during the 8-week pilot study implementation phase.

Challenges

A significant proportion of the materials ordered were either on backorder or slow to arrive at the CLS warehouse. Additionally, errors on the part of the primary vendor involved in the overall procurement had resulted in the arrival of errant items to the CLS warehouse, causing a delay in the finalization of the transportation requests. The project team was forced to explore alternative avenues to procure the delayed and backordered items and ensure materials were available for pilot study implementation. These avenues for procurement included, but were not limited to, the engagement of local vendors and borrowing of supplies from our Ugandan partners. Currently there is some risk of cost overrun to the materials budget due to the procurement and shipment needs of this project.

Participants in the biosurveillance training and pilot studies reside in a variety of districts. This will result in different accommodation, travel reimbursement, and per diem payments among individuals who will be working closely together over a 10-week period. As none of the participants can receive a facilitation fee due to their being government employees per constraints outlined by the ambassador's memo, this may still result in tensions between those participants receiving differential benefits and may reduce the motivation for those receiving no per diem. The Metabiota project team will remain diligent about communicating these issues clearly to the participants, and provide transparency to DTRA CBEP should any concerns materialize.

Receiving concrete stakeholder input and feedback to all aspects of project planning continues to be challenging. Whenever possible, the project team has leveraged their expertise to fill in missing information, however some information is only known to project stakeholders. Delays in obtaining such information has resulted in project schedule compression.

TD 023 One Health Epidemiology Short Course Curriculum Update and Edits – South Africa

Objectives

Increase the operational biosafety and bio-surveillance capacity through the development of a One Health Epidemiology short course tailored to the needs of South Africa. Increase the sustainability of the course work through development of a train the trainer module to be delivered to select South African trainers of the short course.

Period of Performance: 3/21/16 – 11/15/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts)
Total Estimated Budget: $112,883.28
Estimated Expenditure: $79,764.43
Technical Direction Status: *Approved, Ongoing*

Key Points

The Metabiota project team with support for AEP leadership led a 60% review meeting during this period purposed to offer DTRA CBEP representation insight to the status of the project;
The post 60% review comments were received by Metabiota from DTRA CBEP and CTSC representation and the response to these comments will be offered at the time of the 100% review submission deadline;
Metabiota continued development and adaptation of all course materials;
Metabiota continued weekly technical and bi-weekly programmatic calls; and
Metabiota continued regular communications with DTRA CBEP.
The 100% review meeting is scheduled for 11/07/2016 at Metabiota.

Completed Activities

Program Manager:
Metabiota Africa Regional Program Manager (b)(6) provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as programmatic communications for the internal project team. He led regular bi-weekly communication with DTRA CBEP. (b)(6) additionally worked with Metabiota PC (b)(6) to progressively elaborate the project schedule in an effort to reflect input from project SME's in real-time. (b)(6) also led a 60% review of progress meeting during the day of 09/15/2016 and provided transparency on the status of the project. (b)(6) also worked with DTRA CBEP during this meeting to identify a final deliverables submission and review schedule.

Research and Data Analyst:
Metabiota Project Coordinator (b)(6) provided communication support during all engagements with DTRA CBEP and the Ugandan stakeholders by participating in project calls.
Metabiota Epidemiologist (b)(6) also represented by this labor category, provided technical support towards the development and adaptation of materials and contributed to the development of the 30% review response. She participated in technical and programmatic communication calls with project staff, and provided infectious disease expertise towards the overall project approach as well as the delineation between advanced and basic course work. She also reported

regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation.

Subject Matter Expert 2:
Metabiota Staff Scientist (b)(6) provided technical leadership and overall product development guidance towards the development and adaptation of all materials. She participated in bi-weekly conference calls with DTRA CBEP representation and led weekly technical communications with project technical staff, and represented the technical team at the 60% review meeting held at CTSC. She additionally contributed directly to the development of presentations and worked to adapt and develop training materials, and to review the work of other project SMEs to ensure an overall consistency in approach. She reported regularly to the PM and provided an explanation of weekly production for submission to DTRA CBEP representation. (b)(6) also contributed to the development of the 30% review response document.

Trainer 2:
(b)(6) provided technical support towards the development and adaptation of materials. He participated in technical and programmatic communication calls with project staff, and provided veterinary and training program development expertise towards the overall project approach as well as the delineation between. (b)(6) also contributed to the development of the 30% review response document.

Upcoming Activities

Continued revision and updates of OHE presentations;
Continued revisions to the overall course agenda and component list;
Development and submission of comments tracker for the 60% review response to written comments received from DTRA CBEP;
Revision to OHE exercises;
Submission of 100% completed product;
Response to 100% completion comments from DTRA CBEP and CTSC representation; and
Execution of the 100% review meeting.

Challenges

The currently suggested LOE to complete all project deliverables may be insufficient. Metabiota has suggested a realignment of SME hours and has taken steps to minimize operational costs on this project; however, there continues to be a residual risk. The project team will report to DTRA CBEP with regularity regarding this issue.

TD 025 Technical Writing Workshop and Mentorship – Ethiopia

Objectives
Provide capacity building and sustainability in BS&S projects by conducting a Technical Writing workshop on developing a successful research proposal and white paper. Provide mentorship and support to workshop participants in finalizing and submitting for grant support to increase the research project completed in country.

Period of Performance: 4/15/16 – 11/15/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts)
Total Estimated Budget: $89,240.77
Estimated Expenditure: $71,647.00
Technical Direction Status: *Approved, Ongoing*

Key Points

The team representing the Ethiopian Public Health Institute (EPHI), submitted an official abstract to the DTRA Thrust Area 6 mailbox;
Upon receipt of invitation, the team representing EPHI, submitted an official white paper to the DTRA Thrust Area 6 Broad Agency Announcement (BAA) through grants.gov;
The team representing the National Animal Health Diagnostics Investigation Center (NAHDIC) submitted an official abstract to the DTRA Thrust Area 6 mailbox;
The Metabiota project team worked with its respective team leads and team lead representation to maintain the mutually agreed upon proposal submission schedule;
Continued weekly communications with EPHI and NAHDIC leadership;
Continued bi-weekly project calls between Metabiota and project performer, AAAS, representation; and
Continued bi-weekly calls with DTRA CBEP representation.

Completed Activities

Program Manager:
Metabiota Africa Regional Program Manager, (b)(6) provided programmatic oversight throughout this period and was responsible for leading all communications with DTRA CBEP as well as programmatic communications for the internal project team. (b)(6) additionally managed daily communications will all members of the project team to ensure adherence to the proposal deliverables schedule.

Research and Data Analyst:
Metabiota Project Coordinator (b)(6) participated in project calls, both internal and with DTRA CBEP. (b)(6) took and distributed minutes following calls with DTRA CBEP. (b)(6) also provided coordination support to (b)(6) as necessary during post training reporting.

Subject Matter Expert 1:
(b)(6) post the closeout of the training workshop worked as the technical lead of this project to maintain communication with leadership from EPHI and NAHDIC. (b)(6) worked with (b)(6) and his technical team to develop the proposal deliverables schedule, and to relay the DTRA CBEP approved schedule and its implications to the team leads for both EPHI and NAHDIC. (b)(6) (b)(6) additionally provided oversight and direct contribution to his technical team towards the development of draft thrust area 6 abstracts and white papers by EPHI and NAHDIC led teams.

(b)(6) during the month of August, provided support to (b)(6) as the technical project lead. (b)(6) additionally worked with representation from EPHI and NAHDIC towards concept and abstract development, and reported timeline challenges to (b)(6) also worked to provide recommended edits to draft abstracts submitted by EPHI and NAHDIC.

Upcoming Activities

Continued adherence to the proposal development schedule;
Submission of informal abstracts to DTRA CBEP representation;
Submission of informal white papers to DTRA CBEP representation;
Submission of formal abstracts to DTRA CBEP representation;
Submission of formal white papers to DTRA CBEP representation;
Continued regular communications with stakeholders and DTRA CBEP representation; and
Oversight of the development of full proposals by EPHI and NAHDIC led teams.

Challenges

While the EPHI team was able to maintain adherence to project scheduling, and effectively submit their white paper in line with the proposed timelines, the NAHDIC team failed to submit their white paper in time despite best efforts on their part. Our technical team provided approval of quality and direction to submit a white paper on 9/29/16; however, NAHDIC representation was radio silent and unreachable for a period of more than 5 days. This period of non-response was likely due to a civil unrest in their region that led to a shut down of the communication systems in the area.

DTRA CBEP representation is aware of the technical difficulties surrounding this issue and, regardless of the fact that NAHDIC will miss the initial submission window, has suggested that our team proceed with the development of the NAHDIC full proposal as if the white paper had been submitted in time in the hopes that there will be an opportunity for them to gain technical assistance during the development of the proposal.

CENTCOM

TD 021 Field Epidemiology and BS&S Training – Iraq

Objectives
Conduct remote trainings on epidemiology and BS&S/Biorisk management for one cohort of Iraqi scientists, and also engage them to familiarize them with the Iraq National Biological Emergency Response Plan and work on a gap analysis of said plan. Conduct remote trainings on epidemiology for a second cohort.

Period of Performance: 02/19/16 – 11/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $747,163.00
Total Expenditure: $653,538.22
Technical Direction Status: *Approved, Ongoing*

Key Points

Sent Letters of Invitation (LOI) to selected Cohort II for attendance in the Advanced Epidemiology Training scheduled from 18 September to 27 October. Secured 24 trainees for the course.

Continued facilitation of US based procurement for Hands-On-Training (HOT) course. Secured Fisher Scientific as the vendor and initiated purchase order for materials to be shipped to SME Trainer (b)(6) for remote training implementation.

Developed HOT syllabus and schedule for course implementation and logistics coordination. Finalizing schedule with Iraqi partners for final submission to CBEP for review and use in CLS logistics execution.

Submitted CLS logistics request for HOT on 6 September. Revisions submitted on 7 September following CBEP guidance. Further revision and finalization of the form will be completed in October following guidance on logistics support for participants within a 50-mile radius of training venue and provision of meals during training event.

Finalized copyright permissions for all cited training materials and uploaded materials to LMS training site.

18 trainees successfully completed the Cohort I Advanced Epidemiology training course on 15 September. Overall, there was an 86% attendance rate and trainee's test scores improved by 9% following completion of the course.

Presented initial NBERP gap analysis findings at the NBMC held at Sandia National Laboratories on 7-8 September.

Continued refinement and finalization of NBERP gap analysis for submission to CBEP in November, to include cross-walking initial findings with updated NBERP received from Iraqi partners.

Secured the Central Public Health Laboratory (CPHL) as the venue for the HOT at no charge. Confirmed CPHL will also be the host country recipient for the materials transfer per the MOH.

Continued coordination of local procurement and Transfer of Materials (TOM) with URC, CPHL, and (b)(6) for purchase, storage, and execution of the HOT.

Submitted revised HOT materials and draft syllabus to CBEP on 27 September. Materials are pending PAO approval.

Received PAO approval of BS&S materials on 16 September.

Kicked off Cohort I BS&S training course and Cohort II Advanced Epidemiology training course on 18 September. Courses continued successfully throughout the month.

Received professional translation of updated NBERP from CBEP on 30 September. Continued gap analysis finalization utilizing translated document (previous work was being completed using a Google Translate version of the document.)

Completed Activities

Program Manager:

PMs (b)(6) have supported all project activities to date. PMs participated in routine meetings with DTRA CBEP and A&AS teams to facilitate updates and activities according to the project schedule, discuss challenges faced, and support routine implementation and tracking of project deliverables. The PMs have maintained visibility with DTRA CBEP on project status and have offered solutions to address project obstacles.

(b)(6) ontinued to work with all stakeholders to ensure successful execution of the remote training courses and completion of the NBERP gap analysis. (b)(6) continued to assist in the development, review, and revisions completed for BS&S, epidemiology, and HOT course materials submitted to CBEP for use in the training course. He worked with SME's (b)(6) to continue

review and finalization of the NBERP gap analysis, following presentation of initial findings at the NBMC. He participated in routine project calls and meetings with trainers, Iraqi partners, and CBEP stakeholders on a weekly basis to facilitate program implementation and provide expertise and input where needed. In addition, (b)(6) provided technical guidance and coordination of locally procured materials to ensure they met the standards required for the training and to adjust requirements when materials were not available to ensure successful execution of the HOT.

(b)(6) continued to manage administrative components of the project to include the schedule, LOE, budget, and delivery and submission of CDRLs. (b)(6) worked with the project coordinator and WRMI RDA to finalize copyright permissions for all materials. In addition, she supported both local and US procurement, coordinating with the team to ensure all materials were purchased and secured according to standard and market availability. She executed and completed contractual requirements, to include contract modifications to facilitate project efforts and realign costs accordingly to support implementation. She participated in routine project calls and meetings with trainers, Iraqi partners, and CBEP stakeholders on a weekly basis to facilitate program implementation and provide expertise and input where needed. In addition, she continued to work with the project team to coordinate the CLS logistics requirements (via CDRL submission), as well as the transfer, storage, and use of all materials being procured in country to support the HOT course, to include completion of the Transfer of Materials (TOM). (b)(6) participated in the epidemiology and BS&S trainings and provided administrative assistance, as needed to facilitate the training sessions, to include attendance tracking, uploading of resources, recorded videos, and troubleshooting.

Subject Matter Expert 1:

(b)(6) continued to provide assistance and expertise in completion of the gap analysis during this period. She traveled with the Metabiota and WRMI team of experts to New Mexico and took part in presenting high-level findings of the NBERP gap analysis at the NBMC. In addition, (b)(6) continued to finalize the gap analysis with (b)(6) for submission to CBEP in November. (b)(6) participated in routine communication with WRMI, PC and PMs.

The Project Coordinator, (b)(6) worked in coordination with the PMs to facilitate and implement the project. She continued to provide assistance in maintaining the project schedule, preparation of CDRL requirements, communication with training teams, LOE, material review and procurement, and coordination of routine project conference calls with all stakeholders. She continued submission of training materials for technical review and public affairs approval, to include ensuring PAO approval was secured prior to training course kick-off. She continued to coordinate submission of CDRLs and supported completion of the CLS logistics form. (b)(6) assisted trainers with build out and maintenance of the training scheduled and participated in remote training sessions to provide administrative assistance, including attendance tracking, uploading of resources, recorded videos, and troubleshooting. In addition, (b)(6) continued to coordinate with the trainees to ensure attendance and any challenges faced were addressed and routed to the appropriate individuals. She worked with URC and Metabiota procurement personnel to secure materials for the HOT course, and coordinated directly with Dr. Faris to secure CPHL as a venue and the recipient of materials. In addition, (b)(6) (b)(6) drafted communications and provided routine guidance to ensure project implementation.

Epidemiology SMEs (b)(6) continued to participate in routine project calls and regular email communications with Metabiota PC and PMs. They worked with the epidemiology team to complete development and revisions of epidemiology training materials for submission to CBEP and

use in the training course. They assisted in the development of the Cohort II and HOT schedule, to include trainer delivery of each course and module. In addition, [redacted] continued to facilitate internal meetings with the epi team for coordination of material development, as well as provide administrative support in maintaining the epidemiology content on the LMS site. Both SMEs delivered and supported lectures during the Cohort I and Cohort II epidemiology training courses. In addition, they continued to source and provide additional resource materials for the trainees.

URC SMEs [redacted] and [redacted] continued to provide operational project support. As the US based project coordinator, [redacted] communicates routinely with URC's Iraq based team to ensure FLNs are attending and providing routine technical/administrative support during the remote training sessions. In addition, she works directly with [redacted] and the procurement team to ensure all materials are being sourced in country and procured to facilitate the HOT. She provides routine updates to Metabiota project team members and coordinates with URC leadership to ensure completion and delivery of CDRLs.

[redacted] participated in routine project calls, meetings, and email communications with Metabiota, URC US-based team members, and in-country stakeholders to ensure operational project needs are being executed in-country. He worked with the procurement team to identify vendors and secure materials needed for the HOT course, finding alternatives when needed, and notifying Metabiota of availability and pricing changes due to the local market. He continued to coordinate with in-country stakeholders to assist in facilitating the transfer of materials and chain of custody for all locally procured items. He provided routine in-country updates and in-country information necessary to support completion of deliverables and project requirements.

WRMI SME [redacted] participated in routine project calls and communications with Metabiota and WRMI personnel to support execution of the BS&S and HOT portions of the course. He continued to refine course materials following CBEP guidance and delivered remote BS&S training courses according to schedule. In addition, he attended Zoom/LMS training sessions to ensure facilitation of the remote BS&S training course and to prepare for delivery of the HOT course at the end of the month. In addition, he provided administrative support to team members in completing deliverable requirements on the project.
[redacted] was mistakenly represented as a SME 2 under activities completed in August's report. He is, however, invoiced correctly at a SME I level.

Subject Matter Expert 2:
WRMI SMEs, [redacted] participated in routine project calls with Metabiota personnel and developed information requirements and recommendations for project execution via email and phone communications. They completed revisions to HOT course materials and resubmitted them for approval. They also participated in training on Zoom and Moodle, and completed the build out of the BS&S training site on the LMS platform with assistance from [redacted] They conducted BS&S remote trainings, and assisted in the development of the HOT syllabus and identified requirements necessary to successfully implement the HOT course. [redacted] provided technical support in procurement and began receiving locally procured materials for HOT delivery. In addition, they presented high-level findings of the gap analysis at the NBMC, and [redacted] continues to assist Metabiota SMEs in completion of the final draft.

Epidemiology Trainer, (b)(6) participated in routine project calls and regular email communications with Metabiota PC and PMs. She worked with the epidemiology team to complete development and revisions of the epidemiology training materials for course delivery. She conducted epidemiology training for Cohort I and II, and assisted in preparations for the HOT. She continued to source reference materials for the epidemiology course, uploading them to the LMS site. She continued to provide local guidance on training implementation and as a native Arabic speaker assisted in translations and structuring of materials and schedule to ensure cultural sensitivities are maintained and customs are accounted for in training delivery.

Research and Data Analyst:

WRMI RDA, (b)(6) provided administrative support to the WRMI project team, to include completion of copyright permission requests for all BS&S and HOT materials. (b)(6) completed administrative and formatting revisions for BS&S HOT materials. In addition, she completed the preparation and build out of the BS&S LMS site for training execution, and administers all remote training courses for the BS&S team, to include hosting sessions, taking attendance, material / video uploads, troubleshooting, and providing routine communications and updates to the Metabiota team on course progress.

WRMI RDA, (b)(6) completed the monthly invoice requirement on the project.

Epidemiology Trainer, (b)(6) continued to collect reference materials, develop and revise training materials for HOT submission and approval. She participated in routine project calls and communicated regularly with PC, PMs, and the epidemiology project team. (b)(6) delivered and supported lectures during the ongoing Cohort I and II epidemiology training courses. In addition, she assisted in planning and preparation of the HOT schedule.

Iraqi Advisor (b)(6) participated in routine project calls with the PC, PMs, and URC team to support project implementation. He attended epidemiology and BS&S training sessions to observe participation and execution of the course. In addition, he spoke with participants to gather feedback and provide updates to the Metabiota project team. He met with MoH officials and secured the CPHL as the training venue and receiver of all materials, and communicated with URC team members in country to ensure chain of custody for materials and coordination in storage and transfer of items once procured. In addition, he worked with the Director General (DG) of Public Health at the MoH to ensure he had all information required for the HOT and to begin conversations securing participant attendance and release from normal duties during this event.

FLN Trainer (b)(6) continued to attend and support Cohort I and II epidemiology remote training courses. In addition, he attended and supported the BS&S remote training course. He was actively engaged in facilitating the online training to include participating in discussion sessions, assisting trainees with troubleshooting, encouraging participation, and responding to questions.

Foreign Local National 3

(b)(6) continued to work with the URC team to complete in-country procurement activities, purchasing the necessary supplies for the HOT course. He worked with the operations manager to identify vendors, securing revised bids, and identifying alternate materials for procurement in the local market. He provided updates on materials available, not available, and pricing changes in

order to finalize needs and issue purchase orders for local supplies. In addition, he provided routine administrative support to the team.

FLN trainers (b)(6) and (b)(6) continued to attend and support Cohort I and II epidemiology remote training courses. In addition, they attended and supported the BS&S remote training course. They were actively engaged in facilitating the online training to include participating in discussion sessions, assisting trainees with troubleshooting, encouraging participation, and responding to questions.

Upcoming Activities

Submit Transfer of Materials draft agreement on 5 Oct for CBEP review, translation and execution following inventory of materials
Submit first draft of NBERP gap analysis to Iraqi Experts on 7 October and receive input by 20 October
Finalize logistic preparations with CLS for HOT (venue selection, travel bookings, lodging arrangements, per diem, printing of materials, audio/ visual support, transportation, etc.)
US procured materials for remote demonstrations to be received by US-based instructor
Iraq procured materials to be received by URC coordinator and inventory to be conducted prior to CPHL storage
Iraq Trainers and Remote Instructors to conduct dry-run preparations during weeks of 10, 17, and 24 October
Complete Cohort I BS&S training and Cohort II Advanced Epidemiology training on 27 October
Implement HOT for Cohort 1 from 30 October to 3 November
Submit final NBERP gap analysis to CBEP on 4 November

Challenges

Material procurement in the US and Iraq has been more challenging than expected with delayed lead times and the lack of availability of many supplies on the local market. US based trainers have shifted training plans to account for unavailable materials in Iraq and additional materials have been procured in the US to use for demonstration purposes only. This will accommodate the training syllabus and plan, however, it has delayed lead times and receipt of materials by trainers. All materials are anticipated to arrive prior to execution of the HOT and in-time to conduct dry-runs, however Metabiota personnel are routinely following up on the status and delivery of items should there be further delays, and to plan accordingly.

BS&S trainers have faced some difficulties with course participants not completing course assignments or participating in discussion sessions, which will affect their overall grade in the course. Trainers have communicated with participants to ensure they understand the requirements and aware that it will impact their final assessment, however, the Metabiota team will work with (b)(6) to ensure that participants also know that it may affect their CME credits awarded by the MoH at the end of the course in hopes to increase participation and make sure they are well aware of this prior to the end of the course.

In addition, completing the gap analysis has required additional LOE from SMEs due to delays in receiving a professionally translated version of the latest iteration of the NBERP. To date, SMEs have been using a Google Translated version in order to move the analysis forward and maintain delivery to

CBEP according to schedule, however, this has caused an increased amount of effort in cross-walking the document for accuracy prior to completion of the analysis. SMEs transitioned to the professionally translated version received on 30 September, which should assist in expediting remaining work. In addition, slow and limited responses from Iraqi stakeholders may impact the schedule and final delivery to CBEP.

Overall, LOE requirements have been higher than anticipated due to the challenges faced in procurement, the management of the trainings, inclusion of multiple cohorts, and overlapping schedules with the gap analysis and training implementation resulting in additional administrative assistance required to meet all deliverables. The project team has been able to meet all goals and deliver the training, however LOE costs are anticipated to exceed the budget in order to implement project requirements.

EUCOM

TD 016 Georgia Geographic Information Systems – Georgia

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15 11/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $271,707.23
Estimated Expenditure: $208,930.26
Technical Direction Status: *Approved, Ongoing*

Key Points

A package of GIS analysis algorithms in R is near completion for review by DTRA.
GIS mentorship of Georgian scientists is ongoing by GoToMeeting.

Completed Activities

Program Manager:
(b)(6) eld email and phone communications with the UF subject matter expertise team to discuss project status and any ongoing issues. (b)(6) also participated in CBR project calls. (b)(6) also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports.

Subject Matter Expert 1:
(b)(6) participated in email and phone communications with the UF subject matter expertise team to discuss project status and any ongoing issues. (b)(6) so drafted reporting instruments including quad charts, invoicing, and monthly reports.

Subject Matter Expert 2:
(b)(6) articipated in email and phone communications with (b)(6) o discuss project status and issues. (b)(6) also participated in email communications with the CBR

project teams [redacted] provided oversight and guidance to [redacted] in their work. He also worked with [redacted] framing a potential publication for the GG-27/AJ TAP-11 anthrax analysis project.

Research and Data Analysts:

[redacted] participated in email and phone communications to discuss project status and ongoing issues. [redacted] continued work on developing geospatial analysis algorithms in R, and began packaging them for potential distribution. [redacted] tested the algorithms using data from GG-19. He also scheduled and conducted GoToMeeting mentorship sessions for Georgian scientists working on the various CBR projects. [redacted] participated in CBR project calls. [redacted] framing a potential publication for the GG-27/AJ TAP-11 project.

Upcoming Activities

Continue GIS research and mentorship activities as planned.

Challenges

Scheduling remote GIS mentorship was hampered by Georgian scientist travel in September.

TD 017 Georgia Subject Matter Expert Grantsmanship – Georgia

Objectives

Provide mentorship in all aspects of Grantsmanship to stakeholders in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC (National Center for Disease Control and Public Health), and work with LMA (Laboratory of Ministry of Agriculture) on all aspects of Grantsmanship.

Period of Performance: 09/21/2015 – 11/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $276,675.85
Estimated Expenditure: $193,916.30
Technical Direction Status: *Approved, Ongoing*

Key Points

Metabiota experts conducted a two-week in-country mentorship session for scientists at LMA.

Completed Activities

Program Manager:

[redacted] held email and phone communications with Avila Scientific to discuss project status and any ongoing issues. [redacted] along with [redacted] reviewed subcontractor invoices and reports. [redacted] also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports. [redacted] also reviewed, revised, and filed travel documentation with DTRA for mentor travel in late October and early November.

Subject Matter Expert 1:
(b)(6) participated in email and phone communications with Avila Scientific to discuss project status and any ongoing issues. (b)(6) eviewed subcontractor invoices and reports. (b)(6) (b)(6) also drafted reporting instruments including quad charts, invoicing, and monthly reports.

Subject Matter Expert 2:
(b)(6) articipated in email and phone communications with Avila Scientific to discuss project status and any ongoing issues (b)(6) onducted in-country and remote (via Skype) grantsmanship mentoring with LMA scientists. In particular, she worked with them on identifying collaborators, developing full proposals, budgeting, and responding to reviewer comments. She also assisted them with understanding some of the mechanical processes of applying to grant opportunities.

Trainer 2:
(b)(6) ssisted (b)(6) in conducting in-country and remote grantsmanship mentoring of LMA scientists. In particular, she worked with them on the coordination aspects of the grant application process, in identifying collaborators, and developing budgets.

Upcoming Activities

Final in-country mentorship trip to occur 22 October – 5 November.

Challenges

No significant challenges at this time.

TD 018 Georgia Visiting Scientist Genomics – Georgia

Objectives
Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015 – 11/15/16
Task Areas: Task 2 (Visiting Scientist)
Total Estimated Budget: $488,580.17
Estimated Expenditure: $414,882.14
Technical Direction Status: *Approved, Ongoing*

Key Points

Genomics and bioinformatics mentoring continues without significant issues.
Provided mentorship on genomic project proposal efforts.
Continued mentorship and other work on *F. tularensis* comparative genomics.
Draft genome assembly of anthrax vaccine strains is completed.

Completed Activities

Program Manager:
held email and phone communications with to discuss project status and any ongoing issues. D along with reviewed subcontractor invoices and reports. also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports. also communicated with A&AS to obtain clarifications on proposal submission process and status of pre-coordination for an effort on which mentoring the Georgian scientists.

Subject Matter Expert 1:
participated in email and phone communications with to discuss project status and any ongoing issues. reviewed subcontractor invoices and reports. also drafted reporting instruments including quad charts, invoicing, and monthly reports.

Visiting Scientist:
participated in email and phone communications to discuss project status and ongoing issues. continued genomics and bioinformatics mentorship activities. He worked with scientists at LMA and coordinated some discussions with NCDC on the development of an ASF research project. He also provided oversight and mentorship on the comparative whole genome analysis of *Francisella tularensis* strains. worked with li to complete draft genome assemblies and the majority of the genome annotations of the anthrax vaccine strains and performed preliminary variant comparisons. He is working with to draft a manuscript for publication. also continued working with NCDC staff to gather information to perform quality assessments of the Lugar Center MiSeq run data.

Upcoming Activities

Continue mentorship activities as planned.

Challenges

No significant challenges at this time.

TD 019 Georgia Visiting Scientist Microbiology – Georgia

Objectives
Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015 – 11/15/16
Task Areas: Task 2 (Visiting Scientist)
Total Estimated Budget: $706,027.02
Estimated Expenditure: $541,192.96
Technical Direction Status: *Approved, Ongoing*

Key Points

Microbiology mentoring continues without significant issues.

Completed Activities

Program Manager:
(b)(6) held email and phone communications with (b)(6) to discuss project status and any ongoing issues. (b)(6) also reviewed and finalized reporting instruments including quad charts, invoicing, and monthly reports.

Subject Matter Expert 1:
(b)(6) participated in email and phone communications with (b)(6) to discuss project status and any ongoing issues. (b)(6) also drafted reporting instruments including quad charts, invoicing, and monthly reports.

Visiting Scientist:
(b)(6) participated in email and phone communications to discuss project status and ongoing issues. (b)(6) continued mentorship activities. He assisted with the revision of the quarterly report for the Jordan collaboration and assisted in resolving procurement issues of the leptospirosis and anthrax kits. He also worked with scientists from LMA and the Azerbaijani anti-plague station to discuss and work on potential tularemia project design. (b)(6) also brokered and held discussions between Georgian and Azerbaijani scientists on the possibility of collaborating on a regional *Brucella* project. (b)(6) (b)(6) further worked with the GG-19 PI and the Lugar Center statistician on enhancing the analysis of the media comparison. He familiarized himself with the mass spec system and began preparing recommendations to the NCDC leadership on how best to utilize the system. (b)(6) also reviewed reports, SOPs, and other documents from NCDC scientists and assisted one Lugar Center scientist with an application for a training trip.

Upcoming Activities

Continue mentoring activities as planned.

Challenges

No significant challenges to report at this time.

Closed Technical Directives

AFRICOM

TD 008 Clinician Training – Uganda

Objectives
Identify gaps in current country-specific training systems and develop clinical training materials to address those gaps and sustainably increase the capacity of medical practitioners at the sub-national level of healthcare systems to identify, diagnose & report disease outbreaks.

Period of Performance: 05/16/15 - 08/18/15
Task Areas: Task 2 (Scientific Mentor), Task 3 (Qualified Trainers)
Total Estimated Budget: $736,470.25
Total Expenditure: $736,470.25
Technical Direction Status: *Completed, Closed.*

TD 010 One Health Epi Training – South Africa

Objectives
Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.
Period of Performance: 05/16/15 – 03/31/16
Task Areas: Task 3 (Qualified Trainer), Task 4 (Subject Matter Experts)
Total Estimated Budget: $134,551.14
Total Expenditure: $134,551.14
Technical Direction Status: *Completed, Closed.*

TD 014 Grant Writing Mentorship and Workshop – Kenya

Objectives
The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 7/21/15 – 04/30/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $101,408.39
Total Expenditure: $101,408.39
Technical Direction Status: *Completed, Completed*

TD 020 Initial Engagement SME Support – Gabon – Cancelled

Objectives
To provide technical support to DTRA CBEP regarding initial engagement activities with Gabonese ministerial officials, historical context and technical advice on gap analyses, and recommend CBEP engagement approaches with the Government of Gabon

Period of Performance: 12/14/15 – 3/31/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $ 31,955.00
Total Expenditure: $2,014.63
Technical Direction Status: *Cancelled*

CENTCOM

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats – Kazakhstan

Objectives
To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/15 – 01/31/16
Task Areas: Task 3 (Qualified Trainers)
Total Estimated Budget: $376,933.84
Total Expenditure: $376,933.84
Technical Direction Status: *Completed, Closed.*

TD 003 Bat Borne Virus from Annual Bat Cull – India – Cancelled

Objectives
Increase the biosafety/ bio-surveillance and early diagnostic capacity in Nagaland India through implementation of a study on the risks of bat-borne virus transmission during an annual bat cull and the presence of known select agents within the community of bats known to be naturally harbored in the species and that have caused mortality in humans.

Period of Performance: 06/01/15 – 09/30/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts), Task 6 (Research Activity Project)
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: *Cancelled*

TD 004 MESA Epigenetics and Genomics of Infectious Disease Workshop – Jordan

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/15 – 05/15/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $481,368.18
Estimated Expenditure: $481,368.18
Technical Direction Status: *Approved, Closed*

TD 005 Long Distance Learning – Iraq – Cancelled

Objectives
Increase the operational capacity of disease surveillance, detection, reporting and response with specialized training of core veterinarians from public health and laboratory settings through in person training and weekly web based modules entailing interactive case based materials focusing on both endemic and high consequence pathogens.

Period of Performance: 06/01/15 – 09/30/16
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts)
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: *Cancelled*

TD 024 MESA Short Video – Jordan

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through a video documentation of the MESA Jordan conference (TD 004) increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 04/15/16 07/31/16
Task Areas: Task 4 (Subject Matter Experts)
Total Estimated Budget: $51,876.70
Estimated Expenditure: $51,876.70
Technical Direction Status: *Approved, Closed*

EUCOM

TD 011 TADR Activity Project 4 (TAP-4) Ukraine

Objectives
The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/15/15 – 01/31/16
Task Areas: Task 3 (Qualified Trainers), Task 6 (Research Activity Project)
Total Estimated Budget: $77,644.81
Total Expenditure: $77,644.81
Technical Direction Status: *Completed, Closed*

TD 012 Ukraine Project 2 – Ukraine

Objectives
The overarching objectives of this project are to develop both explanatory and predictive, spatially-explicit models to explore the geography and ecology of EDPs, specifically Francisella tularensis, the causative agent of tularemia, and Bacillus anthracis, the causative agent of anthrax, across Ukraine at multiple spatial scales.

Period of Performance: 05/16/15 – 09/30/2015
Task Areas: Task 3 (Qualified Trainers), Task 4 (Subject Matter Experts), Task 6 (Research Activity Project)
Total Estimated Budget: $297,029.64
Total Expenditure: $297,029.64
Technical Direction Status: *Completed, closed* (Transferred to BTRIC TO4)

PACOM

TD 006 Nipah Research Activity Project – Philippines – Cancelled

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through; identification of reservoir and host range for Nipah or related viruses; examination of the seroprevalance of Nipah in bats, peridomestic animals and humans, and understanding the risk factors for cross species transmission in the Philippines.

Period of Performance: 06/01/15 – 09/30/15
Task Areas: Task 4 (Subject Matter Experts), Task 6 (Research Activity Project)
Total Estimated Budget: $874,846.00
Total Expenditure: $11,985.82
Technical Direction Status: *Cancelled*

TD 007 Regional Baseline Assessment – Southeast Asia

Objectives
Characterize the region based on the disease landscape, organic regional capabilities, and external factors that impact CBEP objectives, identify needs and areas of overlap with other stakeholders, and provide overarching strategic guidance & goals to CBEP PACOM Country Managers in the development of country engagement strategies.

Period of Performance: 05/16/15 – 12/31/15
Task Areas: Task 4 (Subject Matter Expert)
Total Estimated Budget: $850,477.71
Total Expenditure: $850,477.71
Technical Direction Status: *Completed.*

TD 015 Health Informatics Support – Vietnam

Objectives

Improve Vietnam Ministry of Health systems (processes and software) to support public health disease reporting and response capacity and improve compliance with National and International Health regulations (e.g., IHR 2005).

Period of Performance: 05/16/15 – 06/30/15
Task Areas: Task 4 (Subject Matter Expert)
Total Estimated Budget: $51,804.80
Total Expenditure: $51,804.80
Technical Direction Status: *Completed, Closed*

This submission of the Monthly Report (Contract Data Requirements List; CDRL A001 encompasses implementation of Academic Engagement Partnership (AEP) program activities in accordance with Defense Threat Reduction Agency (DTRA) Cooperative Biological Engagement Program (CBEP) contract HDTRA1-14-C-0104 for 10/01/15-10/31/15.

Technical Directives

AFRICOM

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing- Cameroon

Objectives
Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 11/06/15
Total Estimated Budget: $125,975.00
Estimated Expenditure: $74,591.00
Technical Direction Status: Approved

Completed Activities
- Metabiota revised training materials in response to DTRA/A&AS comments. The revised training materials were submitted and accepted. The training materials were then sent simultaneously for public affairs approval and translation into French.
- Metabiota filed a Country Clearance Request for the November PPE training event.
- Metabiota drafted and filed a travel authorization request, which was approved.
- Metabiota drafted a CLS form for logistics of the November PPE training event and handed it off to DTRA/A&AS.
- Metabiota DC engaged in regular communications with the overseas personnel to discuss and work through training event logistics.
- Metabiota drafted letters to the US Embassy and Cameroon Ministry of Defense for DTRA to assist with obtaining information for Leahy vetting.

Upcoming Activities
- PPE training event slated for November is likely to be postponed. Metabiota will work with DTRA to identify alternative dates once Leahy vetting is completed.
- Metabiota is reviewing CLS-translated training materials for accuracy.

Challenges
MinDef has said no additional information will be provided on participants. DTRA and A&AS are working with US Embassy on the path forward. This will likely result in postponement of training until late January at the earliest.

Detailed Invoice by Technical Directive

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing- Cameroon

Objectives

Increase the capacity for Cameroonian responders to mitigate the hazards posed by emerging outbreak and other biosafety threats through biosafety training in the appropriate techniques for donning and doffing personal protective ensembles.

Period of Performance: 05/16/15 - 12/31/15

CLIN	Total PCO	Total Invoiced	Total Remaining
1002	$110,048.00	$56,439.04	$53,608.96
1003	$0.00	$0.00	$0.00
1004	$3,080.98	$0.00	$3,080.98
1005	$12,846.10	$0.00	$12,846.10
TOTAL	$125,975.08	$56,439.04	$69,536.04

CLIN 1002 – Labor

Costs for direct labor to support this activity during this period was required for the following personnel:

Program Manager: 50.50 hours

(b)(6) completed proposal development, including development of the overall project budget and the drafting of text for both the technical and management approaches. He oversaw development of project plan, led subcontract development, assisted subcontractor understanding of implications of T&M mechanism, and negotiated of labor rates. (b)(6) provided overall coordination of the training event, including communications with DTRA/A&AS and the subcontractor team in Cameroon.

Trainer 1: 28 hours

(b)(6) assisted with development subcontractor training deliverables. She developed the project schedule, and prepared Training Event Plans for implementation. She participated in calls with DTRA/A&AS to assist PM in ensuring all relevant information was delivered.

Trainer 2: 217 hours

(b)(6) prepared data for proposal development, to include assisting with the development of the overall training plan and drafting of text for the technical approach. He initiated development of SOWs for subcontractors and ICs. and assisted the PM in coordinating with the subcontractors during the process ensuring compliance with DoD and training requirements.

(b)(6) provided remote support and on-the-ground support, respectively, for the meeting with Ministry of Defense. He also worked with Program Staff on subcontract development, to include revision and negotiation of SOW and labor rates. providing on-the-ground support in Cameroon for

meeting with the Ministry of Defense and gathering information necessary for the tailoring of training materials.

Trainer 3: 12.5 hours

(b)(6) provided expertise and historical data for proposal development, to include assisting with the development of the overall training plan and drafting of text for the technical approach. She provided integration with other Metabiota training efforts to ensure uniformity across the program.

Scientific Mentor: 24 hours

(b)(6) began adaptation of the training materials provided by DTRA. In particular, (b)(6) began tailoring the VHF training materials to include diseases more likely to be relevant in Cameroon than Azerbaijan. PPE training materials are being similarly addressed, and updated with photographs of the specific PPE that will be used. A draft agenda was developed, and is currently being revised.

CLIN 1003 – Materials and Supplies

No material costs have been incurred.

CLIN 1004 – ODCs

DBA insurance is being acquired for all Metabiota personnel or subcontractors working outside of the United States but this cost has not been finalized or invoiced at this time.

CLIN 1005 – Travel

No travel costs have been incurred at this time.

TD 001 Viral Hemorrhagic Fever (VHF) & Personal Protective Equipment (PPE) Donning and Doffing- Cameroon

Transaction Project ID	PLC Cd	PLC Desc	Name	Bill Hours	Billing Rate	Amount To Bill	Cumulative Hours	Cumulative Amount
(b)(4); (b)(6)								

- Established bi-weekly calls with DTRA CBEP representation, [redacted] and the Metabiota Project Team.
- Development of Project Charter for TD-014.
- Development of profile for Subject Matter Experts slated to participate in the writing workshop.
- Identification of probable dates for the writing workshop set to take place in Nairobi, Kenya.
- Request submitted to [redacted] for the delivery of the manuscripts produced by 20 participants selected from the Regional Conference on Zoonotic Diseases in Eastern Africa.

Upcoming Activities

- Selection of subject matter experts to support the Writing Workshop.
- Finalization of dates for the workshop.
- Submission of TEP, CLS form, CCR form, and any other relevant CDRLs in support of in country efforts.
- Continuation of bi-weekly stakeholder calls.

Challenges

The Grant Writing Mentorship and Workshop purposed to foster the improvement of research manuscripts from selected participants is on time and currently on track to remain within the budget ceiling. However, the tasks involving the coordination, management, and actual technical review and improvement of manuscripts for this effort will likely require more time than proposed.

CENTCOM

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats – Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-Cov) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/15- 01/31/16
Total Estimated Budget: $391,056.00
Estimated Expenditure: $273,285.00
Technical Direction Status: Approved

Completed Activities

- PIs from IVM completed second pre-training trip on October 6 and submitted Trip Report on October 15. An additional institution was identified during this trip to participate in the December training: The Aralomorsk AntiPlague Station.
- Submitted CLS travel and logistics support request for additional participant from the

Aralomorsk AntiPlague Station, which was identified during the second IVM pre-training trip. Resubmitted translation and interpretation request of training materials.

- Confirmed laboratory access for all participants, trainers and organizers.
- Secured DBA insurance for Metabiota and Duke personnel for travel to Almaty, and in response to the extended PoP.
- Finalized daily itinerary and reserved ground transportation for Metabiota, and Duke personnel to and from the December training venue.
- Executed the MOU between Metabiota and the IVM.
- Completed modification of the Duke-NUS subcontract with revised PoP and budget.
- Completed the Brokerage agreement signatures between SAIC, Global Link, and IVM.
- Received updated quote from local procurement support TMC Global Professional Services and modified PO to the extended period of performance and increased ceiling price.
- Continued coordination with IVM to arrange official approval from the Ministry of Agriculture to secure customs acceptance of training materials being shipped into the country continued communication with CLS to coordinate translation, printing, and shipment of training materials.
- Continued communication and collaboration with key CBEP, in-country partners, Duke-NUS Qualified Trainers (QT), and CLS to coordinate logistical requirements of the training event.

Upcoming Activities

- Completion and submission of CDRL 11 Transfer of Equipment and Materials to IVM.
- Completion of modified PO with TMC.
- Continue to work with key CBEP personnel, in-country partners, and CLS to monitor shipment through KZ customs clearance, finalize procurement of required materials for the event, and secure all pending logistical needs for the training event.
- Conduct shipment of materials for pick-up date in USA and Singapore during the week of November 16 and delivery date in Almaty, Kazakhstan during the week of November 23.
- Final bi-weekly project meetings with in-country partners and Duke-NUS Qualified Trainers (QT) before travel dates of December 1-2.

Challenges

Metabiota faced communication challenges and language barriers while finalizing the in-county material procurement quote with TMC. While language barriers will occasionally create obstacles, we will continue to utilize our on-site language assets to mitigate those effects. Additionally, IVM PI's have expressed desires to pursue extended engagements after the completion of the December training event. While Metabiota will not be the prime contractor for the continued CBEP work in Kazakhstan, we have explained the shift of contractors following the December training event to IVM and assuaged their concerns regarding any perceived impact the switch will have on the current and future activities.

TD003 Bat Borne Virus from Annual Bat Cull India- Cancelled

Period of Performance: 06/01/15 09/30/16
Total Estimated Budget: $874,846.00

TO 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats - Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-CoV) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 06/01/2015 - 09/30/2015

CLIN 1002 – Labor

TO 002 MERS-COV Training Kazakhstan			
CLIN	Total ROM	Total Invoiced	Total Remaining
1002	$193,010.00	$128,607.70	$64,402.30
1003	$69,578.14	$13,524.01	$56,054.13
1004	$3,062.36	$3,062.10	$0.26
1005	$125,405.36	$41,764.57	$83,640.79
TOTAL	$391,055.86	$186,958.38	$204,097.48

Costs for direct labor to support this activity during this period was required for the following personnel:

Program Manager: 205

Metabiota SEA Program Manager, (b)(6) conducted activities during this time period that included preparation and coordination of the training events to include management of deliverables, logistics, procurement, tracking of project requirements, and implementation of the first training event from 29 July - 5 July 2015. In addition, activities included coordination with Qualified Trainers, in country collaborators, CBEP regional and country personnel, and project team members to ensure CDRL submissions and project requirements were met.

Trainer 1: 364 hours

(b)(6) conducted activities during this time period that included assisting in training coordination and submission of CDRL requirements to CBEP following review of training documents, participating in routine conference calls with Qualified Trainers, and in-country collaborators, procurement of materials and supplies, and logistical support to ensure the training was conducting according to the assigned schedule. Duke NUS Trainers, (b)(6) (b)(6) conducted activities during this time period that included, assisting senior trainers in facilitating the training event, to include adaptation of materials, syllabus input, procurement of materials and supplies, preparation of bat bags for sample collection and, execution of the training event from 29 June - 05 July 2015, during which they provided lecture and practicum training to participants.

Trainer 2: 120 hours

procurement of laboratory materials and supplies, optimization of assays for the laboratory training scheduled later in the year, coordination with in-country partners, and Metabiota personnel to facilitate the June training event. (b)(6) traveled to Kazakhstan to conduct the training course, which included, delivering classroom training and conducting and overseeing field sampling activities, to include facilitation of scientific engagement.

Trainer 3: 124 hours

Duke NUS Trainer 3, (b)(6) traveled to Kazakhstan to conduct the training course, which included, delivering classroom training and conducting and overseeing field sampling activities, to include facilitation of scientific engagement. Trainer (b)(6) provided expertise finalizing training materials.

Research and Data Analyst: 83 hours

Metabiota Research and Data Analyst, (b)(6) was brought into this project following recognition that the short time frame required for execution of the event, and that meeting all deliverables to successfully implement the training would require additional project coordination support. (b)(6) hours were reduced on the project to allow her more time to focus on the PACOM regional baseline analysis, and this provided a cost savings to the Government by utilizing an employee billable at a lower rate. (b)(6) has conducted activities during this time period that include overall project coordination supporting travel for project personnel, review and submission of deliverables, project scheduling, establishing routine communications with trainers and in-country partners as well as tracking deliverables, and routine administrative support.

CLIN 1003 – Materials and Supplies

Materials and supplies costs were incurred during this period to support the field surveillance training and BSL2 laboratory practices event held in Almaty, Kazakhstan from 29 June – 05 July 2015. Materials and supplies were procured locally by TMC and by Metabiota personnel. Materials and supplies purchased at this time included field supplies, such as GPS, lanterns, rechargeable batteries, flashlights, field chairs and tables, and headlamps. Other supplies included consumables such as pipettes, pipette tips, tubes and holders, sharp boxes, gloves, and tape. Additional supplies procured included materials for transport and storage of collected samples, PPE, and decon materials such as biohazard bags, sharps containers, etc. In accordance with contract compliance, costs incurred for unforeseen customs clearance fees were not billed to the Government. These costs were absorbed by Metabiota in order to successfully execute the training in the short suspense required. Once the team was on the ground and conducted the pre-site assessments, it was determined that additional materials and supplies were necessary to ensure safety was maintained during sampling activities. These materials included a ladder to access the site, safety harnesses, additional PPE, and decon supplies. Additional materials procured were necessary to maintain personal safety for all participants throughout the field sampling events.

In addition, costs were incurred for fit testing services and local procurement services. This was required to fit N95 masks on all trainees participating in the field sampling portion of the event. Fit testing services were provided by local contractor TMC, and supported the technical implementation provided by (b)(6) of Metabiota.

CLIN 1004 – ODCs

Per contract guidelines DBA insurance is required for all personnel engaged on the AEP project. DBA insurance was purchased for Duke NUS trainers supporting this activity for the entire period of

performance. as they are based in Singapore. This insurance also covered their travel to Almaty, Kazakhstan in support of the June-July training event.

CLIN 1005 – Travel

Travel expenses incurred during this period are for costs to support execution of the field surveillance training conducted in Almaty, Kazakhstan from 29 June to 5 July. Costs include airfare, per diem, hotel, and transportation costs for (b)(6) Deputy Director of the AEP program and (b)(6) Southeast Asia Program Manager to oversee and execute implementation of the training.

Additional costs incurred were for the airfare, per diem, hotel, and transportation to support the six Qualified Trainers traveling from Duke NUS to conduct training activities for this effort.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

Named Insured			Endorsement Number
Metabiota, Inc			010
Policy Symbol: ENI	Policy Number: D37429193 001	Policy Period: December 22, 2014 to December 22, 2015	Effective Date of Endorsement: June 01, 2015
Issued By (Name of Insurance Company): ACE American Insurance Company			

AMENDMENT TO SCHEDULE IN DEFENSE BASE ACT CONTRACT AND/OR PROJECT ENDORSEMENT

This endorsement modifies insurance provided under the following:

DEFENSE BASE ACT WORKERS COMPENSATION AND EMPLOYERS LIABILITY INSURANCE POLICY

The Schedule of the DEFENSE BASE ACT COVERAGE ENDORSEMENT is amended to read as follows:

Schedule

Contract Name/Number/Country(s) or Project Name & Country(s)
In consideration of additional premium charge of $2,345 travel to Kazakhstan from 06/01/2015 to 09/30/2015 under currently scheduled contract is afforded coverage as of the effective date of this endorsement. This travel is completed by Third Country Nationals and coverage is afforded for the same. A rate of $3.50 applied. Payroll of $67,005 is added to the policy. It is further agreed this additional premium charge is fully earned and the minimum earned premium is amended to read $47,247. Policy payroll now totals $1,349,909.

All other terms and conditions of this policy remain unchanged.

TD004 MESA Epigenetics and Genomics of Infectious Disease Workshop

Objectives
Further CBEP Cooperative Biological Research (CBR) objectives through topic focused, poster and training sessions thereby identifying potential partners for future research cooperation, increasing knowledge of specific areas of research educating on best practices in international scientific collaboration.

Period of Performance: 06/01/15 to 05/15/16
Total Estimated Budget: $488,040.00
Estimated Expenditure: $150,808.00
Technical Direction Status: Approved

Completed Activities
- Completed Scoping Visit of RSS facilities in Amman, Jordan on October 12.
- Following Scoping Visit of venue, prepared initial CLS logistics request; logistics are currently being edited internally before submission.
- Prepared first CLS travel support request for March Conference; document is currently being edited internally before submission.
- Began JKO trainings for U.S. citizens who will require travel support for March Conference.
- Submitted Press Release for PAO approval.
- Speakers and panel board members continue to be invited.
- Continued revisions of conference agenda and panel board members with Gryphon, CBEP, and Scientific Advisory Board.
- Ongoing outreach of conference event to increase participation.
- Ongoing communication and collaboration with CBEP personnel, in-country partner RSS, Gryphon Scientific, and CLS to coordinate logistical requirements for the conference.

Upcoming Activities
- First round of abstract submission deadlines on November 06, to be extended through December 1.
- Submit first CLS travel support request for Scientific Advisory Board Members and Speakers who have confirmed attendance.
- Submit Travel Authorization Form for Gryphon and Metabiota personnel for March Conference event.
- Gryphon subcontract to be modified a second time due to personnel and additional administrative changes.
- Continue to work with key CBEP personnel, Gryphon, RSS, and CLS to monitor travel requests, participant applications, and finalize CLS logistical requirements for March, 2016 Conference.

Challenges
Due to the large size of this event, questions concerning the coordination of travel requirements have arisen. Metabiota is in communication with key CBEP personnel, CLS, and Gryphon Scientific to clarify roles and responsibilities and ensure that all required information is collected and provided to CLS. Additionally, outreach efforts will be expanded to increase the number of abstracts submitted and participants attending the Conference.

TD005 Long Distance Learning Iraq- Cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: Cancelled

EUCOM

TD 011 Ukraine TADR Activity Project 4 (TAP-4)

Objectives
The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/15/15-01/31/16
Total Estimated Budget: $116,879,54
Estimated Expenditure: $57,687.00
Technical Direction Status: Approved

Completed Activities
- Travel arrangements for Metabiota personnel were established.
- Metabiota confirmed the Ukrainian participant list and followed up with A&AS regarding CLS's arrangements for the Ukrainian delegation after identifying unusual flight arrangements that arrived very late into Georgia.
- Metabiota developed a short presentation for the Metabiota slot of workshop day 2.
- Metabiota personnel participated in conference calls and email communications with the broader ASF working group and also with SAFOSO specifically.
- The Ukrainian personnel continued with the distribution of educational materials and outreach activities.
- (b)(6) reprinted several of his ASF-related research posters for presentation at the November conference.

Upcoming Activities
- TAP-4 final workshop occurred in early November; travel trip report and final closeout to occur.

CLIN 1002 – Labor

Following conversations with DTRA CBEP programmatic and contact personnel it was determined that labor costs will not be billed between the period of 2 June and 22 July, as the technical directive had not yet been approved. Costs for direct labor to support this activity was required for the following personnel, supporting proposal development and execution of activities once authorized by the Government:

Program Manager: 13 hours

Metabiota SEA Program Manager, (b)(6) conducted activities during this time period that included proposal development, contracting packages, and coordination with partner organizations to complete the technical and cost proposal. Once approved, (b)(6) engaged in overseeing project personnel in the execution of requirements for implementing the workshop, managing project deliverables, including submission of requirements to CBEP, tracking project requirements, interacting and reporting to CBEP personnel providing project visibility and coordination, financial monitoring, coordination and management of Gryphon Scientific personnel, and coordination with RSS.

Research and Data Analysts: 74 hou

Metabiota Research and Data Analyst, (b)(6) conducted activities during this time period that included supporting proposal development and contract packages in response to the technical directive. Once approved, she was responsible for project coordination for this activity. Activities included day-to-day coordination of the project, routine communication with collaborators, processing of project documents, tracking and review of CDRLs, and travel and logistical support for the pre-coordination meeting scheduled in October. Additional activities included, supporting contractual requirements for engaging Gryphon Scientific and developing the project schedule.

Gryphon's (b)(6) conducted activities during this time period that included identifying experts working in relevant fields and on relevant research through literature review, and assisting in preparation

of workshop documents. Gryphon's (b)(6) conducted activities during this time period that included preparation of sub-contract materials for submission to Metabiota and review of the final sub-contracts package for execution.

Subject Matter Expert 3: 30 hours

Gryphon's (b)(6) conducted activities during this time period that included coordination with Metabiota personnel to support completion and review of Gryphon's proposal for this project and contracting requirements, once authorized. She also conducted initial review and development of conference materials, participating in routine communications and conference calls with Metabiota and RSS personnel, and development of the project schedule and CDRL requirements in coordination with Metabiota project personnel.

Subject Matter Expert 1: 59.5 hours

Gryphon's (b)(6) expertise in regional planning were utilized during this time period that included initiation of conference planning, design of the conference logo, project scheduling, and participation in routine communications with Metabiota personnel to initiate project activities. Additional activities included communications with vendors to provide website and graphics support for this event.

CLIN 1003 – Materials and Supplies

Materials and supplies costs were not incurred during this invoice period.

CLIN 1004 – ODCs

ODC costs were not incurred during this invoice period.

CLIN 1005 – Travel

Travel costs were not incurred during this invoice period.

PACOM

TD 006 Nipah Research Activity Project-Cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: $11,986.00
Technical Direction Status: Cancelled

TD 007 Regional Baseline Assessment

Objectives
Characterize the region based on the disease landscape, organic regional capabilities, and external factors that impact CBEP objectives, identify needs and areas of overlap with other stakeholders, and provide overarching strategic guidance & goals to CBEP PACOM Country Managers in the development of country engagement strategies.

Period of Performance: 05/16/15 – 10/31/15
Total Estimated Budget: $850,489.00
Estimated Expenditure: $850,489.00
Technical Direction Status: Approved

Completed Activities

- Submitted draft gap analysis to CBEP on 29 October and held review meeting with regional team on 30 October.
- Submitted responses in comments matrix on 30 October to CBEP regional team, showing revisions and progress made in addressing identified modifications and changes improving the overall document.
- Secured additional SME support to complete revisions and edits needed to finalize the regional baseline analysis and respond to comments received by CBEP.
- Assigned internal team leads and functional teams to support revisions to the regional baseline analysis.
- Met with CBEP regional team and set revised submission schedule with final deliverable due 18 December.
- Requested NCE extending project period to 31 December.
- Continued revisions and edits to regional gap analysis in preparation for final submission.

Upcoming Activities

- Continue revisions, and editing to the regional baseline analysis for submission of draft document on 20 November.
- Perform QAQC reviews of draft document by SMEs prior to submission of draft document on 20 November.
- Secure additional SME support, at no cost to the Government for further build out and analysis of the regional baseline analysis.
- Secure additional graphic services for finalization and stylization of the report.

Challenges

TD 006 Nipah Research Activity Project-Canceled

Objectives

Further CBEP Cooperative Biological Research (CBR) objectives through: identification of reservoir and host range for Nipah or related viruses; examination of the seroprevalance of Nipah in bats, peridomestic animals and humans, and understanding the risk factors for cross species transmission in the Philippines.

Period of Performance: 06/01/2015 – 09/30/2015

TOTAL	$11,985.82	$6,913.29	$5,072.53

This technical directive was canceled on 18 August 2015. Following conversations with DTRA CBEP programmatic and contract personnel, it was determined that only labor costs associated with developing the proposal in response to the technical directive(s) would be billed to the Government. No other costs were incurred.

CLIN 1002 – Labor

Costs for direct labor to support this activity were incurred for the following personnel:

Program Manager: 24 hours

Metabiota Program Manager, (b)(6) worked with the Research Institute of Tropical Medicine (RITM) and Duke-NUS to request and prepare requirements necessary for proposal development and submission in response to the Technical Directive and Revised Technical Directive received for this activity. In support of this effort, (b)(6) participated in routine conference calls with SMEs and RCs from each institute to garner the necessary information required for the submission. In addition, she coordinated with CBEP regional personnel to ascertain project requirements, to include revised directives, and understanding of project objectives and end-states to accurately respond to the directive In addition, (b)(6) developed the technical and cost proposal submitted to CBEP in support of this activity.

Research and Data Analysts: 46.50 hours

To complete these efforts, (b)(6) was supported by Metabiota Research and Data Analysts (b)(6) (b)(6) coordinated directly with identified SMEs and RCs from RITM and Duke-NUS to develop subcontract requests and packages in support of technical proposal development. They scheduled and participated in routine conference calls and communication with the collaborators to support development of the technical and cost proposal. In addition, they assisted in proposal development.

CLIN 1003 – Materials and Supplies
Costs were not incurred under CLIN 1003, as this technical directive was canceled.

CLIN 1004 – ODCs
Costs were not incurred under CLIN 1004, as this technical directive was canceled.

CLIN 1005 – Travel
Costs were not incurred under CLIN 1005, as this technical directive was canceled.

CLIN 1002 – Labor

Metabiota's support of this effort is based on the solid expertise and cadre of exceptional researchers and SMEs the organization has on hand, and has engaged to support this project. Critical to developing an informed, targeted, and useable analysis is the reliance on field-specific expertise to inform and drive the regional assessment using risk analytics, scientific rigor and in-depth research analysis coupled with QA/QC measures to provide an informative, pointed landscape of the PACOM region that will support CBEP's 5+ year strategic plan and programmatic metrics. SMEs from a variety of disciplines have been and will be engaged to support this project to ensure all aspects of the analysis are captured to include the disease landscape, political and economic environment, legislation and governmental requirements, cultural, religious and behavioral practices, geographical and environmental issues, security concerns, and the interstices and overlapping confluence of aspects that make this a multi-faceted assessment recognizing and addressing a dynamic and changing landscape. Key to the development of this framework is driving it to an end state that will support CBEP's long-term mission in this area of operation. Metabiota's diverse team is dedicated to supporting this endeavor and bringing this project to completion. The experience of Metabiota's project management team, lead by [redacted] is focused on achieving the desired end state and has built out the required labor to support this endeavor through rigorous recruiting and recognition of qualified experts. Team members supporting this effort are providing various levels of effort depending on their expertise and the required support needed to address specific components of the analysis. Utilizing a flexible schedule, and a cadre of team members, Metabiota can ramp up or down activity levels to address, build and support the needs required to complete this effort.

Costs for direct labor to support this activity were incurred for the following personnel:

Program Manager: 238 Hours

Metabiota SEA Program Manager, (b)(6) oversaw and executed the project to include management of the cost, schedule and performance. In addition, she provided direct management and oversight of all project personnel to include labor and reporting, driving the project to completion.

Subject Matter Experts 1: 1078.5 Hours

Metabiota Subject Matter Expert 1 (b)(6) oversaw the day-to-day activities of the project, as the key POC in Washington DC, supporting (b)(6) and (b)(6) in the overall execution of this work. She coordinated daily with project staff, CBEP regional and country leadership to ensure they were provided routine visibility on the project to include coordination of in-person meetings, weekly reports, and analysis updates. (b)(6) provided experience and development, review, and adaptation of research documents and deliverables, as well as general research activities and facilitation of scientific collaboration.

Subject Matter Experts 2: 486 Hours

(b)(6) (b)(6) provided experience and development, review, and adaptation of research documents and deliverables, as well as general research activities and facilitation of scientific collaboration. This team utilized experience in risk management, environmental studies, GIS, cultural anthropology, veterinary sciences and other related disciplines to conduct open source research, validating collected data, develop pathogen profiles, socio-economic, behavioral, and cultural components of the landscape, and provide critical scientific writing and editing skills to ensure document flow and mapping of information. The originally proposed TBD Soft Sciences labor hours were divided between (b)(6)

Subject Matter Experts 3: 508.50 Hours

(b)(6) (b)(6) provided extensive experience and development, review, adaptation of research documents and deliverables, data and mapping visualization support, as well as general research activities and facilitation of scientific collaboration. Experts at this level bring a breadth of regional and international experience to the project specifically focused in their areas of expertise to include microbiology, virology, health informatics, medical anthropology, and data analytics. This team provides QA/QC measures to validate the data, as well as being a critical part of the team in collecting and driving the strict research aspects of this assessment.

Research and Data Analysts: 911 Hours

Research and Data Analysts, (b)(6) (b)(6) conducted general research activities and assist in document review and editing. This team made up the general open research group of the project and provided research to support the analysis support SMEs in developing and building out the assessment. They also edited and referenced citations, ensuring that the document flow and citations were correct.

CLIN 1003 – Materials and Supplies

Materials and supplies costs incurred during this period include graphic services provided by Spot On Marketing. Services provided during this period included, maps, stylization, and development of the document framework for the regional landscape analysis to provide CBEP with a highly professional finished product.

Skype communication costs were incurred during this period to support communications with the project team and SMEs working on PACOM both CONUS and OCONUS.

In addition, template vector maps were procured to support graphic design and regionally specific maps required for the final deliverable of the regional baseline analysis, supporting the narrative framework and qualitative research.

CLIN 1004 – ODCs

Per contract guidelines DBA insurance is required for all personnel engaged on the AEP project traveling or working overseas. DBA insurance was purchased for (b)(6) during his travel to Manila, Philippines in support of attendance at the APSED meeting.

CLIN 1005 – Travel

At the request of DTRA, (b)(6) Southeast Asia Program Manager traveled to New Orleans to attend PACOM meetings, as well as the American Society for Microbiology (ASM) General Meeting and to conduct working groups with DTRA CBEP Regional Leadership.

Travel was authorized fo (b)(6) Southeast Asia Program Manager, and (b)(6) SME I, to travel to Cebu, Philippines to attend the Asia-Pacific Biosafety Association (A-PBA) 10th Anniversary Conference and meetings with CBEP Regional Leads and other stakeholders in support of completing the PACOM baseline analysis. After booking the trip and registering for the conference, the trip was canceled due to the CCR not being approved. Costs are billed for bookings and reservations that were partially refunded upon cancellation. These include conference and airline processing fees for cancelation– no costs are billed for fully refunded bookings or expenses.

(b)(6) Deputy Director of the AEP Program traveled to Manila, Philippines to attend the World Health Organization Western Pacific Regional Office (WHO/WPRO) Technical Assistance Group (TAG) meeting on the Asia Pacific Strategy for Emerging Diseases (APSED).

TD 008 Clinician Training - Uganda

Objectives
Identify gaps in current country-specific training systems and develop clinical training materials to address those gaps and sustainably increase the capacity of medical practitioners at the sub-national level of healthcare systems to identify, diagnose & report disease outbreaks.

Period of Performance: 05/16/15-08/18/15
Total Estimated Budget: S2,769,776.00
Estimated Expenditure: S737,361.00
Technical Direction Status: Cancelled

Completed Activities

- Metabiota completed the audit of an invoice updated and re-submitted by subcontractor, the Alliance, for labor and materials used during the period of active performance.
- A final cost for time and materials used during the period of active performance was aggregated through an iterative process with subcontractor, the Alliance, to support accuracy and comprehensiveness.
- A final invoice for TD-008 Clinician Training Uganda has been developed and prepared for submission to DTRA.

Upcoming Activities

- Final submission of Metabiota invoice to DTRA

Challenges
Finalization of Metabiota's invoice to DTRA for time and materials supporting Clinician Training Uganda was further delayed by our continued need to audit the invoice and supporting documentation produced by subcontractor the Alliance. The Alliance as an organization is traditionally unfamiliar with the time and materials contract mechanism, and experienced significant challenges in producing a comprehensive invoice. Extensive communication and technical support was required to support this effort.

TD 009 NHLS BS&S Training - South Africa

Objectives
Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/15- 05/15/16
Total Estimated Budget: S335,608.00
Estimated Expenditure: S85,138.00
Technical Direction Status: Approved

Completed Activities

- Metabiota personnel engaged in teleconferences and email communications with both NHLS and DTRA personnel.
- Metabiota submitted a Training Event Plan, which was approved.
- Metabiota worked with NHLS personnel to identify appropriate participants for the fit-testing training event. Metabiota drafted a CLS request containing these participant's information, along with a venue request. This CLS form was submitted to DTRA.
- Metabiota began the procurement of PortaCount Pro fit testers from TSI, Inc.
- Metabiota investigated multiple vendors for iPad pricing and began the procurement of iPads from Apple, Inc.
- Metabiota and NHLS personnel generated fit-testing training materials from established protocols provided by TSI, Inc.
- Metabiota drafted a CLS form for shipping needs and sent this onward to DTRA for submission to the CLS contractor.
- Metabiota drafted and submitted a Travel Authorization request with plug data; this request was approved.
- The Metabiota team members at NHLS began identifying additional requirements for the OHASIS module development.

Upcoming Activities

- BS&S training videography is expected to begin soon.
- PortaCount fit testers and iPads are expected to be delivered to the CLS shipping warehouse for further shipment to South Africa.
- The fit testing training event is scheduled to occur at the end of November.

Challenges

Coordination with CLS on both the training venue/logistics and procurement shipping/logistics has been cumbersome as we are routing all communications through DTRA/A&AS.

TD 010 One Health Epi Training - South Africa

Objectives

Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 12/31/15
Total Estimated Budget: $134,551.00
Estimated Expenditure: $50,392.00
Technical Direction Status: Approved

Completed Activities

- Development and delivery of structured outline to support the training materials and landscape review process.
- Conducted bi-weekly conference calls with DTRA CBEP personnel and A&AS support contractors.
- Conducted bi-weekly conference calls with South African stakeholders supporting the

TD 009 NHLS BS&S Training - South Africa

Objectives

Reduce the risk of laboratory exposures of potentially dangerous pathogens through increased BS&S capabilities of South Africa's National Health Laboratory Service (NHLS) to, ultimately, mitigate risk associated with handling potential hazards and protect individuals operating in potentially hazardous environments.

Period of Performance: 05/16/2015-05/15/2016

CLIN	Total Cost	Total Accrual	Total Remaining
1002	$205,037.00	$40,107.77	$164,929.23
1003	$111,454.09		$111,454.09
1004	$4,092.47		$4,092.47
1005	$15,024.00		$15,024.00
TOTAL	$335,607.56	$40,107.77	$295,499.79

CLIN 1002 – Labor

Labor costs for this project include PM and PC activities, such as maintenance of the objective 1 activities from the base year, coordinating the efforts of the NHLS team, proposal development, initiation of procurements, and subcontract modification development to incorporate Objectives 2 and 3. Costs also include accruals of labor projected for NHLS staff for this time period.

Program Manager: 84.5 Hours

Metabiota's (b)(6) performed as Program Managers while Metabiota identified ideal candidates for the position. During this time, they participated in proposal development, including the assisting with the development of the overall project budget and the drafting of text for both the technical and management approaches. (b)(6) took over as Program Manager in June and finalized proposal development. He also oversaw development of project plan. Dennis provided oversight for subcontract modification and coordination of the project activities, including communications with DTRA/A&AS and the subcontractor team in South Africa.

NHLS Program Manager David Jones led coordination with Metabiota and oversaw efforts of South African team to meet project goals. He also secured quotes for procurement of materials and equipment from South African vendors for comparison with US vendors. Leading coordination of approvals of paperwork through NHLS management.

Trainer 1: 59 Hours

(b)(6) led the development of the project plan and led subcontract modification to include drafting of SOW, project charter, and project schedule. She provided expertise in contract development to assist NHLS performers in understanding DOD requirements. She drove coordination of project activities, including communications with the subcontractor team in South Africa and the initiation of procurement activities.

Research and Data Analyst: 18.5 Hours

(b)(6) participated in proposal development to include the drafting of text for both the technical and management approaches.

(b)(6) of NHLS Participated in subcontract modification discussions. He assisted in securing quotes for procurement of materials and equipment from South African vendors and coordinating approvals of paperwork through NHLS management.

Subject Matter Expert 3: 74 Hours

(b)(6) provided historical knowledge and data to the new program manager and assisted with his transition to include assisting with budget development and the drafting of text for both the technical and management approaches. She coordination with NHLS team on continuation of Objective 1 from the base year. Secured quotes for procurement of materials and equipment from US vendors.

CLIN 1003 – Materials and Supplies

No material costs have been incurred.

CLIN 1004 – ODCs

DBA insurance is being acquired for all Metabiota personnel or subcontractors working outside of the United States but this cost has not been finalized or invoiced at this time.

CLIN 1005 – Travel

No travel costs have been incurred at this time.

- Metabiota drafted and submitted a Travel Authorization request with plug data; this request was approved.
- The Metabiota team members at NHLS began identifying additional requirements for the OHASIS module development.

Upcoming Activities

- BS&S training videography is expected to begin soon.
- PortaCount fit testers and iPads are expected to be delivered to the CLS shipping warehouse for further shipment to South Africa.
- The fit testing training event is scheduled to occur at the end of November.

Challenges

Coordination with CLS on both the training venue/logistics and procurement shipping/logistics has been cumbersome as we are routing all communications through DTRA/A&AS.

TD 010 One Health Epi Training - South Africa

Objectives

Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 12/31/15
Total Estimated Budget: $134,551.00
Estimated Expenditure: $50,392.00
Technical Direction Status: Approved

Completed Activities

- Development and delivery of structured outline to support the training materials and landscape review process.
- Conducted bi-weekly conference calls with DTRA CBEP personnel and A&AS support contractors.
- Conducted bi-weekly conference calls with South African stakeholders supporting the

review and modification of one health epidemiology materials.
- Conducted individual calls with each South African stakeholder to ensure understanding of project scope of work and to provide opportunity for direct questions.
- Completion of module 1 review and analysis of one health epidemiology materials by Metabiota Subject Matter Expert.
- Technical discussions between Metabiota Epidemiology Subject Matter Expert and South African stakeholders regarding training goals and training needs in country.

Upcoming Activities
- Continued development of OHE Landscape Review report to include identification of section leads among South African stakeholders and the Metabiota Project Team.
- Solidification of dates for in-country materials review and modification meeting.
- Submission of relevant TEP for in-country assessment.
- Continue to ensure effective coordination of communication between stakeholders involved in the materials review process.

Challenges
A misunderstanding in project scope was identified to have occurred among the South African stakeholders. They were collectively under the impression that One Health Epidemiology South Africa was related to an effort implemented by a DTRA country manager previous to [redacted]. This lead to questions and some confusion regarding the existing scope of work; however, this misunderstanding has since been rectified. Additionally, in country stakeholders have had some level of trouble attending regularly scheduled bi-weekly calls with the Metabiota Project Team due to availability and other obligations.

TD 013 One Health Epi Training - Uganda

Objectives
Increase the operational biosafety and bio-surveillance capacity of Ugandan and Nigerian National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 02/29/15
Total Estimated Budget: $381,705.00
Estimated Expenditure: $135,337.00
Technical Direction Status: Approved

Completed Activities
- Completion of Cohort 9 Module 1 One Health training in Jinja, Uganda (October 19- 23, 2015).
- Submission of TAF, CCR, CLS, and BOM in support of Cohort 9 Module 2 to take place in Jinja, Uganda.
- Submission of TEP, TAF, CCR, CLS, and BOM in support of Cohort 10 Module 1 to take place in Kabarole, Uganda.

Objectives

Increase the operational biosafety and bio-surveillance capacity through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/2015 - 12/3/2015

CLIN	Total Obligation	Total Invoiced	Total Remaining
1002	$124,815.63	$22,820.66	$101,994.97
1003	$663.20	$0.00	$663.20
1004	$576.60	$0.00	$576.60
1005	$8,496.50	$0.00	$8,496.50
TOTAL	$134,551.93	$22,820.66	$111,731.27

CLIN 1002 – Labor

Per contractual agreement with DTRA CBEP it was determined that this non-legacy project will not begin incurring operational costs prior to technical direction approval. Listed below is a breakdown of labor activity associated with proposal development and related proposal development communication with DTRA CBEP representation.

Program Manger: 48 Hours

(b)(6) was responsible for leading the development of the original technical proposal and for managing and assigning tasks to all those involved in the process. He was responsible for communication to DTRA during this time (b)(6) assumed the management role upon his arrival at Metabiota and took over the responsibility of maintaining communication with DTRA CBEP representation, setting up bi-weekly calls, developing a communication plan, and ensuring that the Metabiota project team was prepared for the approval of the technical direction.

Trainer 1:

(b)(6) was tasked with building out the technical proposal at the direction of (b)(6) and with input from (b)(6) She was also responsible for providing expertise on government and DOD requirements, working with (b)(6) to develop a communication strategy with all stakeholders.

Trainer 3: 12.5 Hours

(b)(6) activities included technical support for proposal development with regard to training scheduling and timeline development regarding the materials review process.

Subject Matter Expert 3: 30 Hours

(b)(6) provided technical expertise in proposal development. (b)(6) was tasked to ensure that adequate time and Level of Effort was assigned to each labor category from a technical perspective. She was also tasked with providing advice and insight to the program manager and program coordinator regarding the development of the operational phase timeline.

(b)(6)

Challenges
Due to the large size of this event, questions concerning the coordination of travel requirements have arisen. Metabiota is in communication with key CBEP personnel, CLS, and Gryphon Scientific to clarify roles and responsibilities and ensure that all required information is collected and provided to CLS. Additionally, outreach efforts will be expanded to increase the number of abstracts submitted and participants attending the Conference.

TD005 Long Distance Learning Iraq- Cancelled

Period of Performance: 06/01/15 – 09/30/16
Total Estimated Budget: $874,846.00
Total Expenditure: 0.00
Technical Direction Status: Cancelled

EUCOM

TD 011 Ukraine TADR Activity Project 4 (TAP-4)

Objectives
The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/15/15-01/31/16
Total Estimated Budget: $116,879,54
Estimated Expenditure: $57,687.00
Technical Direction Status: Approved

Completed Activities
- Travel arrangements for Metabiota personnel were established.
- Metabiota confirmed the Ukrainian participant list and followed up with A&AS regarding CLS's arrangements for the Ukrainian delegation after identifying unusual flight arrangements that arrived very late into Georgia.
- Metabiota developed a short presentation for the Metabiota slot of workshop day 2.
- Metabiota personnel participated in conference calls and email communications with the broader ASF working group and also with SAFOSO specifically.
- The Ukrainian personnel continued with the distribution of educational materials and outreach activities.
- (b)(6) reprinted several of his ASF-related research posters for presentation at the November conference.

Upcoming Activities
- TAP-4 final workshop occurred in early November; travel trip report and final closeout to occur.

Challenges

Beyond the current ASF outbreak in Ukraine, no significant challenges were encountered.

TD 012 Ukraine Project 2 (UP-2)

Objectives
The overarching objectives of this project are to develop both explanatory and predictive, spatially-explicit models to explore the geography and ecology of EDPs, specifically Francisella tularensis, the causative agent of tularemia, and Bacillus anthracis, the causative agent of anthrax, across Ukraine at multiple spatial scales.

Period of Performance: 05/16/15-09/30/2015
Total Estimated Budget: $264,788.00
Estimated Expenditure: $297,064.00
Technical Direction Status: Approved, Complete (Transferred to BTRIC TO4)

Completed Activities
- Project transitioned to BTRIC TO4.

Upcoming Activities
- Closing out invoicing for Kansas State University and Ukrainians via CRDF Global.

Challenges
None identified.

TD 016-Georgia GIS

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15-05/15/16
Total Estimated Budget: $139,514.62
Estimated Expenditure: $8,489.00
Technical Direction Status: Approved

Completed Activities
- Metabiota achieved agreement with the GIS subject matter expertise team at University of Florida on scope and budget.
- Metabiota began preliminary coordination with CBR project leads in order to understand needs.
- Metabiota developed and submitted a revised proposal as a result of ground-truthing the actual project requirements from project teams and Forms A of the relevant CBR projects.

Upcoming Activities
- Metabiota will finalize the subcontract with the UF team.

TD 011 Ukraine TADR Activity Project 4 (TAP-4)

Objectives

The overarching focus of TAP-4 is to establish and standardize a regional alliance between several CBEP partner countries within Eastern Europe to raise awareness to and provide education on ASF.

Period of Performance: 05/16/2015 - 01/31/2015

CLIN	Total ROM	Total Invoiced	Total Remaining
1002	$111,733.00	$38,283.07	$73,449.93
1003	$105.27	$0.00	$105.27
1004	$2,768.39	$0.00	$2,768.39
1005	$16,462.50	$8,122.49	$8,340.01
TOTAL	$131,069.16	$46,405.56	$84,663.60

CLIN 1002 – Labor

The primary labor costs for TAP-4 have been subject matter expertise in the form of two Trainer 2's from SAFOSO AG. The SAFOSO trainers implemented the 3rd training workshop in Lviv, Ukraine for the regional African swine fever (ASF) outreach program involving Armenia, Georgia, Kazakhstan, and Ukraine. The SAFOSO trainers also implemented a training-of-trainers in Kyiv, Ukraine, specific to the Ukrainian veterinary community. Additionally, PM and PC costs have been incurred in finalizing the SAFOSO subcontract under the T&M mechanism, managing requests from the Ukrainian participants, and in preparing for the final workshop to be held in Tbilisi, Georgia in November.

Program Manager: 64.5 Hours

(b)(6) led proposal development, including the development of the overall project budget and the drafting of text for both the technical and management approaches. He oversaw subcontract development to include editing of SOW and ensuring progress through Metabiota's contracts shop as well as project activities, including communication with BTRIC personnel integrating efforts with the Ukrainian veterinarians.

Trainer 1: 23 Hours

(b)(6) was responsible for assisting with proposal development, to include the drafting of text for both the technical and management approaches, and assisting with ensuring CDRLs such as Training Event Plans, Travel Authorization Requests, and more are delivered in a timely fashion. She Participated in calls with DTRA/A&AS to assist PM in ensuring all relevant information was delivered.

Trainer 2: 155 hours

SAFOSO trainers (b)(6) led the development of workshop agendas and coordination of the various country participants in developing tailored training materials for use in each country's respective outreach efforts. They also developed the Ukraine-specific workshop where a training of trainers occurred to teach the Ukrainian veterinary community how to conduct outreach.

CLIN 1003 – Materials and Supplies

No material costs have been incurred.

CLIN 1004 – ODCs
No ODCs were incurred in the T&M period.

CLIN 1005 – Travel
Travel costs were incurred for both [redacted] and SAFOSO trainers during the 3rd training workshop in Lviv. The travel costs for SAFOSO have not yet been invoiced; existing travel costs here come from the portion of [redacted] travel that followed the transition to the T&M.

TD 01 Travel 6 C

Beyond the current ASF outbreak in Ukraine, no significant challenges were encountered.

TD 012 Ukraine Project 2 (UP-2)

Objectives
The overarching objectives of this project are to develop both explanatory and predictive, spatially-explicit models to explore the geography and ecology of EDPs, specifically Francisella tularensis, the causative agent of tularemia, and Bacillus anthracis, the causative agent of anthrax, across Ukraine at multiple spatial scales.

Period of Performance: 05/16/15-09/30/2015
Total Estimated Budget: $264,788.00
Estimated Expenditure: $297,064.00
Technical Direction Status: Approved, Complete (Transferred to BTRIC TO4)

Completed Activities
- Project transitioned to BTRIC TO4.

Upcoming Activities
- Closing out invoicing for Kansas State University and Ukrainians via CRDF Global.

Challenges
None identified.

TD 016-Georgia GIS

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15-05/15/16
Total Estimated Budget: $139,514.62
Estimated Expenditure: $8,489.00
Technical Direction Status: Approved

Completed Activities
- Metabiota achieved agreement with the GIS subject matter expertise team at University of Florida on scope and budget.
- Metabiota began preliminary coordination with CBR project leads in order to understand needs.
- Metabiota developed and submitted a revised proposal as a result of ground-truthing the actual project requirements from project teams and Forms A of the relevant CBR projects.

Upcoming Activities
- Metabiota will finalize the subcontract with the UF team.

TD 012 Ukraine Project 2 (UP-2)

Objectives

The overarching objectives of this project are to develop both explanatory and predictive, spatially-explicit models to explore the geography and ecology of EDPs, specifically Francisella tularensis, the causative agent of tularemia, and Bacillus anthracis, the causative agent of anthrax, across Ukraine at multiple spatial scales.

Period of Performance: 05 16 2015 - 05/16/2016

CLIN	Total $(CM)	Total Invoiced	Total Remaining
1002	$433,233.00	$26,469.00	$406,764.00
1003	$135,002.37	$2,979.14	$132,023.23
1004	$172,190.60		$172,190.60
1005	$56,587.08		$56,587.08
TOTAL	$797,013.05	$29,448.14	$767,564.91

CLIN 1002 – Labor

The primary labor costs on Metabiota AEP for UP-2 have been program management (PM) and project coordination (PC) costs. The main drivers of the costs were incurred in planning for expeditions by the US collaborators (WRAIR, UF, KSU) on this project to Ukraine to work with the Ukrainian scientists. Additionally, some PM/PC costs incurred are associated with the work necessary to transition to a T&M contract, including proposal development and subcontract development. We have accrued some labor costs for (b)(6) (KSU) effort in continuing his efforts on land use/land cover analysis and in preparing for the August field trip.

Program Manager: 94.50 Hours

(b)(6) led proposal development, including the development of the overall project budget and the drafting of text for both the technical and management approaches. He provided oversight on subcontract development to include editing of SOWs., coordination of the project activities, including communication with BTRIC personnel integrating efforts and procurement efforts for biological safety cabinet (BSC) re-certification and laboratory and field collection supplies for Ukrainian institutes. He also leads a twice-monthly telecom with project stakeholders including WRAIR, UF, KSU, and DTRA.

Training Manager: 65.50 Hours

(b)(6) assisted with proposal development, including the drafting of text for both the technical and management approaches. She provided coordination of the project training activities, including communication with BTRIC personnel integrating efforts. She assisted with procurement efforts for BSC re-certification and laboratory and field collection supplies for Ukrainian institutes. Ensured progress of the subcontracts (including purchase orders) through the Metabiota contracts shop.

Subject Matter Expert 3: 20 Hours

(b)(6) provided Land cover/land use subject matter expertise. He participated in project activities to include teleconferences and preparation for field collection exercise. Assisted in developing an alternative plan for biotope mapping validation.

CLIN 1003 – Materials and Supplies
Metabiota contracted for BSC re-certification at UCDCM, IVM, and VOLC in order to ensure safety of project participants.

CLIN 1004 – ODCs
To date, the ODCs accrued on UP-2 represent a subcontract to CRDF to pay Ukrainian personnel for their efforts on the project. This subcontract captures their labor and CRDF's fee. Metabiota understands that these ODCs may be required to be re-characterized as labor if Metabiota AEP is given the opportunity to implement foreign local national (FLN) labor categories. The Ukrainians on this project at IVM and UCDCM have continued (to the best of their capabilities) in analyzing previously collected samples and the data generated. These accrued costs have not been invoiced.

CLIN 1005 – Travel
No travel costs were incurred under Metabiota AEP.

[illegible]

[illegible]

1. CONTRACT
Metabiota No. 2015-11-190

DATA

2. INTRODUCTION

2.1 The parties to this Contract (the "Parties") are the Contractor and the Vendor (both as defined below).

2.2 Metabiota, Inc., a company organized under the laws of the State of Delaware, U.S.A. and represented by [illegible] (the "Contractor").

2.3 [illegible] (the "Vendor").

2.4 [illegible]

3. SUBJECT OF THE CONTRACT

3.1 The Vendor has agreed to provide and the Contractor has agreed to obtain the Services in accordance with the terms and conditions of this Contract and the Annexes to this Contract.

3.2 The Services shall be provided for the Externally Funded Development of the Ebola Virtual Forecasting System for Zoonotic Diseases Employing GIS Technology (hereinafter referred to as the "Project"), which is implemented under the USAID Global Program to Combat Avian Influenza and Other Emerging Threats (GAP) and funded by the United States Agency for International Development (USAID) under Assistance Agreement No. [illegible] (the "Prime Agreement").

4. SERVICES TO BE PERFORMED BY THE VENDOR

4.1 The Vendor undertakes to provide the Services for certificates and for goods of Chromatic Laboratories certificates of Vendor's custom Flow Cleary Device (FSCD) and Polymerase Chain Reaction Cabinet (PSCC) [illegible] to the Attachment 1 (the "Specification Scope of Work") (Attachment 1 is an integral part of this Subcontract).

5. PRICE AND ENTIRE VALUE OF THE CONTRACT

5.1 The [illegible] is [illegible] $28830.

5.2 The Services shall be [illegible] days.

6. TERMS OF PAYMENT

6.1 [illegible]

2. ВСТУП

prepayment.

6.2 Invoicing. The invoice shall be submitted in English and Ukrainian as one electronic copy to the Company. The invoice shall be submitted via email to [illegible]

6.3 All bank charges in Ukraine are for the Vendor's account. All bank charges outside of Ukraine are the Metabiota's expenses.

6.2 Рахунки. Рахунок подається на Замовника в електронному вигляді. Рахунок надсилається електронною поштою на адресу [illegible]

6.3 Банківські витрати на території України несе Виконавець. Банківські витрати за межами території України несе Замовник.

7. TERMS OF SERVICES

7.1. The Services approved for purchase in the Attachment 1 shall be completed within 2 weeks after receipt of payment by the Vendor.

7.2 The act of signing the transfer acceptance of the services performed at the rates indicated in the Attachment 1 is considered as the delivery date of services.

7. УМОВИ НАДАННЯ ПОСЛУГ

7.1. Послуги, що узгоджені для покупки у Додатку 1, мають бути виконані протягом 2 тижнів після отримання оплати від Виконавця.

7.2 Датою виконання послуг вважається дата підписання акту прийому-передачі виконаних робіт наданих у Додатку 1.

8. GENERAL PROVISION

8.1 All the relations between the Parties of the present Contract are the subject to norms of the material law of Ukraine.

8.2 This Contract is prepared in English and Ukrainian language versions which have equal validity except in the event of a dispute regarding interpretation of this Contract, in which case the English language version shall govern.

8.3 All amendments to this Contract are integral part of the entire agreement:

- Attachment 1 "Cost of Services"
- Attachment 2 "Invoice N 24"

8. ЗАГАЛЬНІ УМОВИ

8.1 Всі відносини між сторонами цього Контракту мають базуватися на основі законів України.

8.2 Цей Договір складено англійською та українською мовами, які мають однакову юридичну силу, але у випадку виникнення [illegible] перевагу має текст складений англійською мовою.

8.3 Всі додатки до цього договору є невід'ємною частиною:

- Додаток №1 «Перелік послуг»
- Додаток 2 «Рахунок №24»

review and modification of one health epidemiology materials.

- Conducted individual calls with each South African stakeholder to ensure understanding of project scope of work and to provide opportunity for direct questions.
- Completion of module 1 review and analysis of one health epidemiology materials by Metabiota Subject Matter Expert.
- Technical discussions between Metabiota Epidemiology Subject Matter Expert and South African stakeholders regarding training goals and training needs in country.

Upcoming Activities

- Continued development of OHE Landscape Review report to include identification of section leads among South African stakeholders and the Metabiota Project Team.
- Solidification of dates for in-country materials review and modification meeting.
- Submission of relevant TEP for in-country assessment.
- Continue to ensure effective coordination of communication between stakeholders involved in the materials review process.

Challenges

A misunderstanding in project scope was identified to have occurred among the South African stakeholders. They were collectively under the impression that One Health Epidemiology South Africa was related to an effort implemented by a DTRA country manager previous to [redacted]. This lead to questions and some confusion regarding the existing scope of work; however, this misunderstanding has since been rectified. Additionally, in country stakeholders have had some level of trouble attending regularly scheduled bi-weekly calls with the Metabiota Project Team due to availability and other obligations.

TD 013 One Health Epi Training - Uganda

Objectives

Increase the operational biosafety and bio-surveillance capacity of Ugandan and Nigerian National and Regional Response Teams through training events and the development of standard operating procedures for emergent disease outbreak response, supporting interagency cooperation and a unified training approach.

Period of Performance: 05/16/15- 02/29/15
Total Estimated Budget: $381,705.00
Estimated Expenditure: $135,337.00
Technical Direction Status: Approved

Completed Activities

- Completion of Cohort 9 Module 1 One Health training in Jinja, Uganda (October 19- 23, 2015).
- Submission of TAF, CCR, CLS, and BOM in support of Cohort 9 Module 2 to take place in Jinja, Uganda.
- Submission of TEP, TAF, CCR, CLS, and BOM in support of Cohort 10 Module 1 to take place in Kabarole, Uganda.

- The Non-Disclosure and Independent Consultant Agreements between the lead Trainer- [redacted] and Metabiota were signed and invoiced.
- Held bi-weekly conference calls with DTRA CBEP personnel and A&AS support representation.
- Held bi-weekly conference calls with CDC-Uganda and Ugandan Ministry of Health to discuss implementation of trainings going forward.
- Submission of Training trip report 238 In support of Cohort 9 Module 1 One Health Epidemiology training.

Upcoming Activities

- Preparation for Cohort 9 Module 2 set to take place December 7-11, 2015 in Jinja, Uganda.
- Preparation for Cohort 10 Module 1 set to take place December 14-18, 2015 in Kabarole District Uganda.
- Continuation of bi-weekly calls for with all stakeholders.
- Continuation of bi-weekly calls with DTRA CBEP representation and Metabiota.
- Incorporation of new labor rates for foreign local national independent consultants supporting OHE training.

Challenges

During training implementation in Jinja, Uganda, Module 1 of Cohort 9, some logistical problems were encountered. Insufficient quantities of training materials were provided for participants. The company subcontracted to support this training did not provide per diem to trainees and facilitators until mid-week. Per Diem payments were requested for distribution daily, and were promised to the trainers in kind. The decision by the company to delay distribution created anxiety among trainees and facilitators who were promised otherwise. The junior level staff representing this company at the training event was not authorized to make decisions, nor come up with a timely solution.

Trainees were concerned that they would not be able to meet with their team to complete the field assignments once back in the district. The fieldwork is a key component of the training and provides participants the chance to implement the theories learned in module one.

TD 014 Grant Writing Mentorship and Workshop - Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 7/21/15- 5/15/16
Total Estimated Budget: $113,982.82
Estimated Expenditure: $11,384.00
Technical Direction Status: Approved

CLIN 1002 – Labor

One health Epidemiology training Uganda is a legacy project that required a multi-faceted and specifically talented team to execute the proposal development and initial operational and reporting stages of this effort. Listed below is a breakdown of the labor activity used to support such activities.

Program Manager: 120 Hours

Program Management hours were used to support interim program manager, (b)(6) as tasked with leading the development of the proposal. (b)(6) was tasked with general program oversight during the time before (b)(6), would take over the management of the program on a permanent basis. (b)(6) set up and led stakeholder meetings and provided direction to the program coordinator to ensure timely submission of CDRLs to DTRA. (b)(6) took over these responsibilities upon his arrival to Metabiota. He set and led additional stakeholder meetings with DTRA CBEP representation that had been deemed necessary, developed a communication protocol with all stakeholders, took over the responsibility for timely submission of all CDRLs, and developed operational solutions to the changing training landscape through thorough communication in in-country stakeholders.

Research and Data Analyst: 97 Hours

(b)(6) activities included the building out of the original technical proposal at the direction of interim Program Manager, (b)(6) and with input from (b)(6) During the operation phase of this project (b)(6) as tasked under the direction of permanent Program Manager, (b)(6) with the development of CCR forms, CLS forms, TAF forms, Training Event Plans. She was responsible for maintaining a schedule for the timely submission of the mentioned deliverables, and for overall support to the program manager as tasked. (b)(6) was also responsible for recording and distributing minutes for all stakeholder calls. Research and Data Analyst provided final edits on proposal submission.

Trainer 1: 17 Hours

(b)(6) provided technical support regarding training scheduling and level of effort allocation during the proposal development stage of this project. (b)(6) was also tasked operationally to join bi-weekly stakeholder calls, and to support (b)(6) with the development of training event plans as needed.

Trainer 3: 81 Hours

Hours were allocated to support Metabiota International Training Manager (b)(6) These hours were used to provide technical expertise with regard to the development and design of the training schedules, and for the development of the training trip report for a training that took place while the technical direction was under FFP (b)(6) dditionally supported permanent program manager (b)(6) by attending stakeholder calls and providing technical expertise as needed; she also provided support to (b)(6) in the development and submission of training event plans as needed.

Subject matter 1: 16 Hours

Hours were used to support Metabiota Program Coordinator (b)(6) (b)(6) provided technical and coordination support during proposal development as well as initial program coordination support. She was tasked to work under the direction of (b)(6) uring his interim effort as program manger for this effort.

Subject Matter Expert 3: 17 Hours

Hours were used to support Metabiota Senior Scientist, (b)(6) for the purpose of providing high technical expertise to the program manager during proposal development. He was also tasked with contributing to the development of the initial training trip report.

Trainees were concerned that they would not be able to meet with their team to complete the field assignments once back in the district. The fieldwork is a key component of the training and provides participants the chance to implement the theories learned in module one.

TD 014 Grant Writing Mentorship and Workshop - Kenya

Objectives

The objective is to conduct a 6-day workshop and provide continuing mentorship on the skills required to successfully write scientific publications to a cohort of 20 scientists to be selected from the attendees of the Regional Conference on Zoonotic Diseases in Eastern Africa held in Kenya in March 2015.

Period of Performance: 7/21/15- 5/15/16
Total Estimated Budget: $113,982.82
Estimated Expenditure: $11,384.00
Technical Direction Status: Approved

Completed Activities

- Established bi-weekly calls with DTRA CBEP representation, (b)(6) and the Metabiota Project Team.
- Development of Project Charter for TD-014.
- Development of profile for Subject Matter Experts slated to participate in the writing workshop.
- Identification of probable dates for the writing workshop set to take place in Nairobi, Kenya.
- Request submitted to (b)(6) for the delivery of the manuscripts produced by 20 participants selected from the Regional Conference on Zoonotic Diseases in Eastern Africa.

Upcoming Activities

- Selection of subject matter experts to support the Writing Workshop.
- Finalization of dates for the workshop.
- Submission of TEP, CLS form, CCR form, and any other relevant CDRLs in support of in country efforts.
- Continuation of bi-weekly stakeholder calls.

Challenges

The Grant Writing Mentorship and Workshop purposed to foster the improvement of research manuscripts from selected participants is on time and currently on track to remain within the budget ceiling. However, the tasks involving the coordination, management, and actual technical review and improvement of manuscripts for this effort will likely require more time than proposed.

CENTCOM

TD 002 Sample Collection and Diagnostics Training on Middle East Respiratory Syndrome (MERS-Coronavirus) in Camels and Bats – Kazakhstan

Objectives

To advance scientific study and experimentation and increase worldwide knowledge of safe sample collection and laboratory diagnostics through detailed training sessions both in labs and in the field. The training will focus on safe sample collection and laboratory diagnostics for Middle East Respiratory Syndrome (MERS-Cov) in camels and bats supporting enhanced biosafety and biosurveillance efforts in the region.

Period of Performance: 05/16/15- 01/31/16
Total Estimated Budget: $391,056.00
Estimated Expenditure: $273,285.00
Technical Direction Status: Approved

Completed Activities

- PIs from IVM completed second pre-training trip on October 6 and submitted Trip Report on October 15. An additional institution was identified during this trip to participate in the December training: The Aralomorsk AntiPlague Station.
- Submitted CLS travel and logistics support request for additional participant from the

The deliverable submitted to CBEP on 1 October did not meet the standards of research that both Metabiota and CBEP were looking for in the final product. Previous challenges identified in the accelerated schedule and volume of research and analysis required to complete this project impeded progress towards the 1 October submission that should have been more clearly communicated to CBEP leadership. Following review and receipt of the comments matrix by the CBEP team, Metabiota has initiated revisions and responses to CBEP comments in preparation for the final deliverable on 18 December. To complete this task, Metabiota has secured additional internal and external SME support, at no cost to the Government to complete the required revisions to the analysis and provide a final product that meets the standards required.

TD 015 Health Informatics Support in Vietnam-Complete

Objectives
This effort has completed.

Period of Performance: 05/16/15 06/30/15
Total Estimated Budget: S51,804.80
Estimated Expenditure: S51,804.80
Technical Direction Status: Approved, Closed

TD 015 Health Informatics Support Services - Vietnam

Objectives

Improve Vietnam Ministry of Health systems (processes and software) to support public health disease reporting and response capacity and improve compliance with National and International Health Regulations (e.g., IHR 2005).

Period of Performance: 05/16/2015 – 06/30/2015

CLIN	Total Receipt	Total Invoiced	Total Remaining
1002	$51,805.00	$51,804.80	$0.20
1003	$0.00	$0.00	$0.00
1004	$0.00	$0.00	$0.00
1005	$0.00	$0.00	$0.00
TOTAL	$51,805.00	$51,804.80	$0.20

The period of performance for this activity extended 1.5 months into Option Year 1 of the AEP contract to accommodate close out activities conducted by (b)(6) in Vietnam and completion of the final report to the optimal extent.

CLIN 1002 – Labor

Costs for direct labor to support this activity were incurred for the following personnel:

Program Manager: 8 Hours

Metabiota SEA Program Manager, (b)(6) to allow for continued program management activities and oversight for the duration of the period of performance. Tasks included: coordination with (b)(6) in closing out all activities for the project, to include contract invoicing and close out, receipt and review of the final report and submission of the report to CBEP and CDC personnel.

Visiting Scientist: 176 Hours

Visiting Scientist (b)(6) to allow for continued contact and key meetings with in- country partners, supporting completion of the evaluation report in a timely manner in order to identify gaps in the capability and capacity of the existing disease reporting and response systems, as well as supporting information systems software and other tools to meet the Vietnam National and International Health Regulation's (IHR 2005) reporting requirements in the scope of GHS Agenda. In addition, labor hours in this period included close out and demobilization activities in Vietnam, as well as completion and submission of the final report and attachments.

CLIN 1003 – Materials and Supplies

No costs were incurred during this period.

CLIN 1004 – ODCs

No additional costs were incurred. Costs for DBA insurance were previously incurred for (b)(6) time in Vietnam.

CLIN 1005 – Travel
No costs were incurred during this period.

TD 012 Ukraine Project 2 (UP-2)

Objectives
The overarching objectives of this project are to develop both explanatory and predictive, spatially-explicit models to explore the geography and ecology of EDPs, specifically Francisella tularensis, the causative agent of tularemia, and Bacillus anthracis, the causative agent of anthrax, across Ukraine at multiple spatial scales.

Period of Performance: 05/16/15-09/30/2015
Total Estimated Budget: $264,788.00
Estimated Expenditure: $297,064.00
Technical Direction Status: Approved, Complete (Transferred to BTRIC TO4)

Completed Activities
- Project transitioned to BTRIC TO4.

Upcoming Activities
- Closing out invoicing for Kansas State University and Ukrainians via CRDF Global.

Challenges
None identified.

TD 016-Georgia GIS

Objectives
Provide GIS subject matter expertise to project teams responsible for DTRA CBEP research projects GG-19, GG-20, and GG-27. Subject matter expertise will be responsible for providing mentoring to Georgian scientists both via remote communication and in person.

Period of Performance: 09/15/15-05/15/16
Total Estimated Budget: $139,514.62
Estimated Expenditure: $8,489.00
Technical Direction Status: Approved

Completed Activities
- Metabiota achieved agreement with the GIS subject matter expertise team at University of Florida on scope and budget.
- Metabiota began preliminary coordination with CBR project leads in order to understand needs.
- Metabiota developed and submitted a revised proposal as a result of ground-truthing the actual project requirements from project teams and Forms A of the relevant CBR projects.

Upcoming Activities
- Metabiota will finalize the subcontract with the UF team.

- Metabiota will work with CBR project leads to ensure GIS SME needs are met.

Challenges
The requirements outlined in the technical direction do not mesh up with the requirements as outlined in the Forms A of the various CBR and TAP projects. This leads us to a discrepancy between the labor mix initially approved and the labor mix that we believe will be required to correctly fill the requirements of the technical direction.

TD 017-Georgia SME Grantsmanship

Objectives
Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $136,732.00
Estimated Expenditure: $14,609.00
Technical Direction Status: Approved

Completed Activities
- Metabiota identified the SME team to execute Grantsmanship mentoring.
- Metabiota drafted SOW and contract documents, and signed subcontract with Attimo (soon to be Avila).
- The Metabiota project team spoke with Georgian stakeholders at LMA and NCDC on separate occasions to gather input on the mentorship needs of each institution.
- The Metabiota project team has drafted an initial mentorship project plan.

Upcoming Activities
- The Metabiota project team will push a tentative schedule of milestones out to stakeholders at LMA and NCDC. This schedule will establish an initial work plan for Georgian participants.
- After the near-term work plan has been distributed, we expect to receive project ideas and drafts of proposals to begin coming in for initial review.

Challenges
Subcontractor approval has not yet been granted by DTRA. Currently Attimo has stopped work on this project, which puts timelines at risk.

TD 018-Georgia Visiting Scientist Genomics Grantsmanship

Objectives
Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects. The genomics SME will

Period of Performance: 09/21/2015-05/15/16

Challenges
The requirements outlined in the technical direction do not mesh up with the requirements as outlined in the Forms A of the various CBR and TAP projects. This leads us to a discrepancy between the labor mix initially approved and the labor mix that we believe will be required to correctly fill the requirements of the technical direction.

TD 017-Georgia SME Grantsmanship

Objectives
Provide mentorship in all aspects of Grantsmanship to POCs at the Lugar Center in Georgia. In particular, Metabiota will provide guidance on understanding direct/indirect costs to NCDC, and work with LMA on all aspects of Grantsmanship.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $136,732.00
Estimated Expenditure: $14,609.00
Technical Direction Status: Approved

Completed Activities
- Metabiota identified the SME team to execute Grantsmanship mentoring.
- Metabiota drafted SOW and contract documents, and signed subcontract with Attimo (soon to be Avila).
- The Metabiota project team spoke with Georgian stakeholders at LMA and NCDC on separate occasions to gather input on the mentorship needs of each institution.
- The Metabiota project team has drafted an initial mentorship project plan.

Upcoming Activities
- The Metabiota project team will push a tentative schedule of milestones out to stakeholders at LMA and NCDC. This schedule will establish an initial work plan for Georgian participants.
- After the near-term work plan has been distributed, we expect to receive project ideas and drafts of proposals to begin coming in for initial review.

Challenges
Subcontractor approval has not yet been granted by DTRA. Currently Attimo has stopped work on this project, which puts timelines at risk.

TD 018-Georgia Visiting Scientist Genomics Grantsmanship

Objectives
Metabiota will provide subject matter expertise in genomics for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects. The genomics SME will

Period of Performance: 09/21/2015-05/15/16

Total Estimated Budget: $384,435.00
Estimated Expenditure: $36,517.00
Technical Direction Status: Approved

Completed Activities

- Metabiota identified genomics expertise and established subcontract said expertise.
- Genomics VS has continued mentoring of (b)(6) in comparative genomics. They are examining the in-country anthrax vaccine strain STI. Preliminary results suggest a significant variance between the Georgian STI strain and the reference STI strain reported by Okinaka, *et al.*
- Genomics VS is working with Lugar center staff to acquaint them with publicly available genome databases.
- Genomics VS has begun mentoring (b)(6) on raw sequence data quality control, draft genome assembly, and comparative genomic analysis. Together they have created genome assemblies for an atypical *Shigella*-like bacterial strain. Preliminary bioinformatics analysis indicates that the isolate encodes shiga toxin genes. They are also working on understanding its phylogenetic placement.
- Genomics VS advised Lugar Center microbiologists on the need to potentially modify testing procedures for bacterial strains that do not react to established pathogen-specific antisera.
- Genomics VS has begun training (b)(6) in viral genome assembly and annotation using a test data set.

Upcoming Activities

- Genomics VS has begun development of an *in silico* workflow for pathogen subtyping and will mentor (b)(6) and others in both the development and use of the workflow for NGS data.
- Genomics VS has begun developing workflow for genome and plasmid sequence annotation in order to enable Lugar Center staff to characterize genomic data and submit data to Genbank prior to publication.
- Genomics VS is developing a skill-set review workshop in conjunction with NCDC science director (b)(6)
- Genomics VS will continue supporting all activities listed above.

Challenges

The Lugar Center (and by extension NCDC) does not appear to have a good method for transferring knowledge learned (especially that learned abroad) from person to person, and many staff members frequently switch research topics. Additionally, it appears that collaborating foreign labs are doing a significant portion of the sequence analysis. These factors have the effect of impacting sustainability. Lugar Center staff are also often skipping the post-NGS quality control step in their workflows.

TD 019-Georgia Visiting Scientist Microbiology

Objectives

Total Estimated Budget: $384,435.00
Estimated Expenditure: $36,517.00
Technical Direction Status: Approved

Completed Activities

- Metabiota identified genomics expertise and established subcontract said expertise.
- Genomics VS has continued mentoring of (b)(6) n comparative genomics. They are examining the in-country anthrax vaccine strain STI. Preliminary results suggest a significant variance between the Georgian STI strain and the reference STI strain reported by Okinaka, *et al.*
- Genomics VS is working with Lugar center staff to acquaint them with publicly available genome databases.
- Genomics VS has begun mentoring (b)(6) n raw sequence data quality control, draft genome assembly, and comparative genomic analysis. Together they have created genome assemblies for an atypical *Shigella*-like bacterial strain. Preliminary bioinformatics analysis indicates that the isolate encodes shiga toxin genes. They are also working on understanding its phylogenetic placement.
- Genomics VS advised Lugar Center microbiologists on the need to potentially modify testing procedures for bacterial strains that do not react to established pathogen-specific antisera.
- Genomics VS has begun training (b)(6) in viral genome assembly and annotation using a test data set.

Upcoming Activities

- Genomics VS has begun development of an *in silico* workflow for pathogen subtyping and will mentor (b)(6) and others in both the development and use of the workflow for NGS data.
- Genomics VS has begun developing workflow for genome and plasmid sequence annotation in order to enable Lugar Center staff to characterize genomic data and submit data to Genbank prior to publication.
- Genomics VS is developing a skill-set review workshop in conjunction with NCDC science director (b)(6)
- Genomics VS will continue supporting all activities listed above.

Challenges

The Lugar Center (and by extension NCDC) does not appear to have a good method for transferring knowledge learned (especially that learned abroad) from person to person, and many staff members frequently switch research topics. Additionally, it appears that collaborating foreign labs are doing a significant portion of the sequence analysis. These factors have the effect of impacting sustainability. Lugar Center staff are also often skipping the post-NGS quality control step in their workflows.

TD 019-Georgia Visiting Scientist Microbiology

Objectives

Metabiota will provide subject matter expertise in microbiology for the purpose of providing mentorship and guidance to Georgian scientists at the Lugar Center, especially in support of CBEP-funded research projects.

Period of Performance: 09/21/2015-05/15/16
Total Estimated Budget: $382,330.00
Estimated Expenditure: $46,377.00
Technical Direction Status: Approved

Completed Activities

- Metabiota identified and worked to bring onboard the subject matter expertise requested in the technical direction. Metabiota is bringing the VS on as a full-time Metabiota employee effective 1 November, and issuing an independent consulting agreement to cover work activities in the month of October.
- Metabiota personnel communicated electronically with CBR project leads to better understand needs under this technical direction.
- Metabiota VS is working with Batumi Zonal Diagnostic Laboratory on avian influenza PCR work. Metabiota VS assisted with troubleshooting of Rotor-Gene PCR instruments at Batumi; this work is ongoing.
- Metabiota VS is assisting Lugar Center personnel with drafting and editing of GG TAP-11 validation plan.
- Metabiota VS is assisting NCDC with preparations and planning for the installation of a GC/MS instrument funded by UNICRI. This ongoing effort will enhance NCDC relationships with international organizations and provide the foundation for a potential proteomics capability which may be leveraged in future research, as well as biosafety and biosecurity efforts.
- Metabiota VS met with [redacted] and other CBR project personnel to discuss ongoing efforts on GG-19, -20, -27, and TAP-11.
- Metabiota VS met with a field team from LMA to help prepare them for a seroprevalence study among animal workers and animals.

Upcoming Activities

- Metabiota VS will test avian influenza PCR controls and primers at Lugar Center.
- Metabiota VS will continue assisting with all ongoing efforts listed above.

Challenges

The Metabiota VS previously recruited a technical translator/interpreter who was then hired by CH2M Hill. CH2 was issued technical direction by a previous Georgia country manager to provide support to the PSU AEP VS, and believes that this technical direction is now expired. Technical translation is difficult, and it would be preferred to continue working with the same person, but new technical direction to CH2M Hill may be required in order to make this happen. We believe quality and speed of translation/interpretation efforts will be impacted if forced to use CLS.
