OI Task Organization

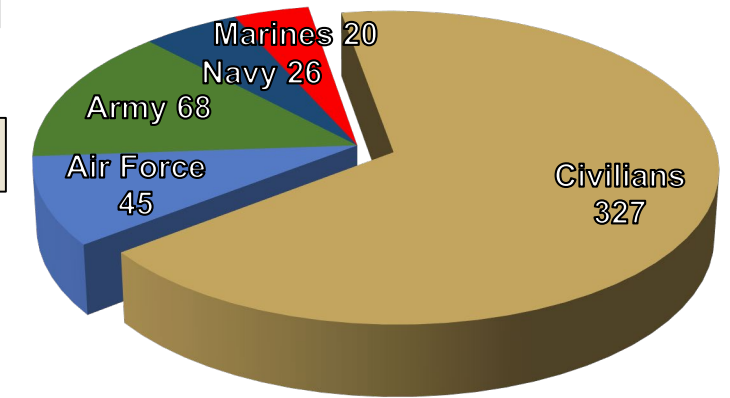

People and Skillsets

- Irregular Warfare Advisors
- Information Operations Advisors
- Counter Small Unmanned Aerial Systems Advisors
- WMD Search Advisors
- Sensitive Activity Advisors
- Hard/Critical WMD Target Advisors
- Operational Research Analysts
- Access/Ownership of ACCMs
- FVEY Liaisons and Embeds
- Embeds in UK and AUS

OI Personnel

Total OI Authorizations: 486
(159 Military & 327 Civilians)

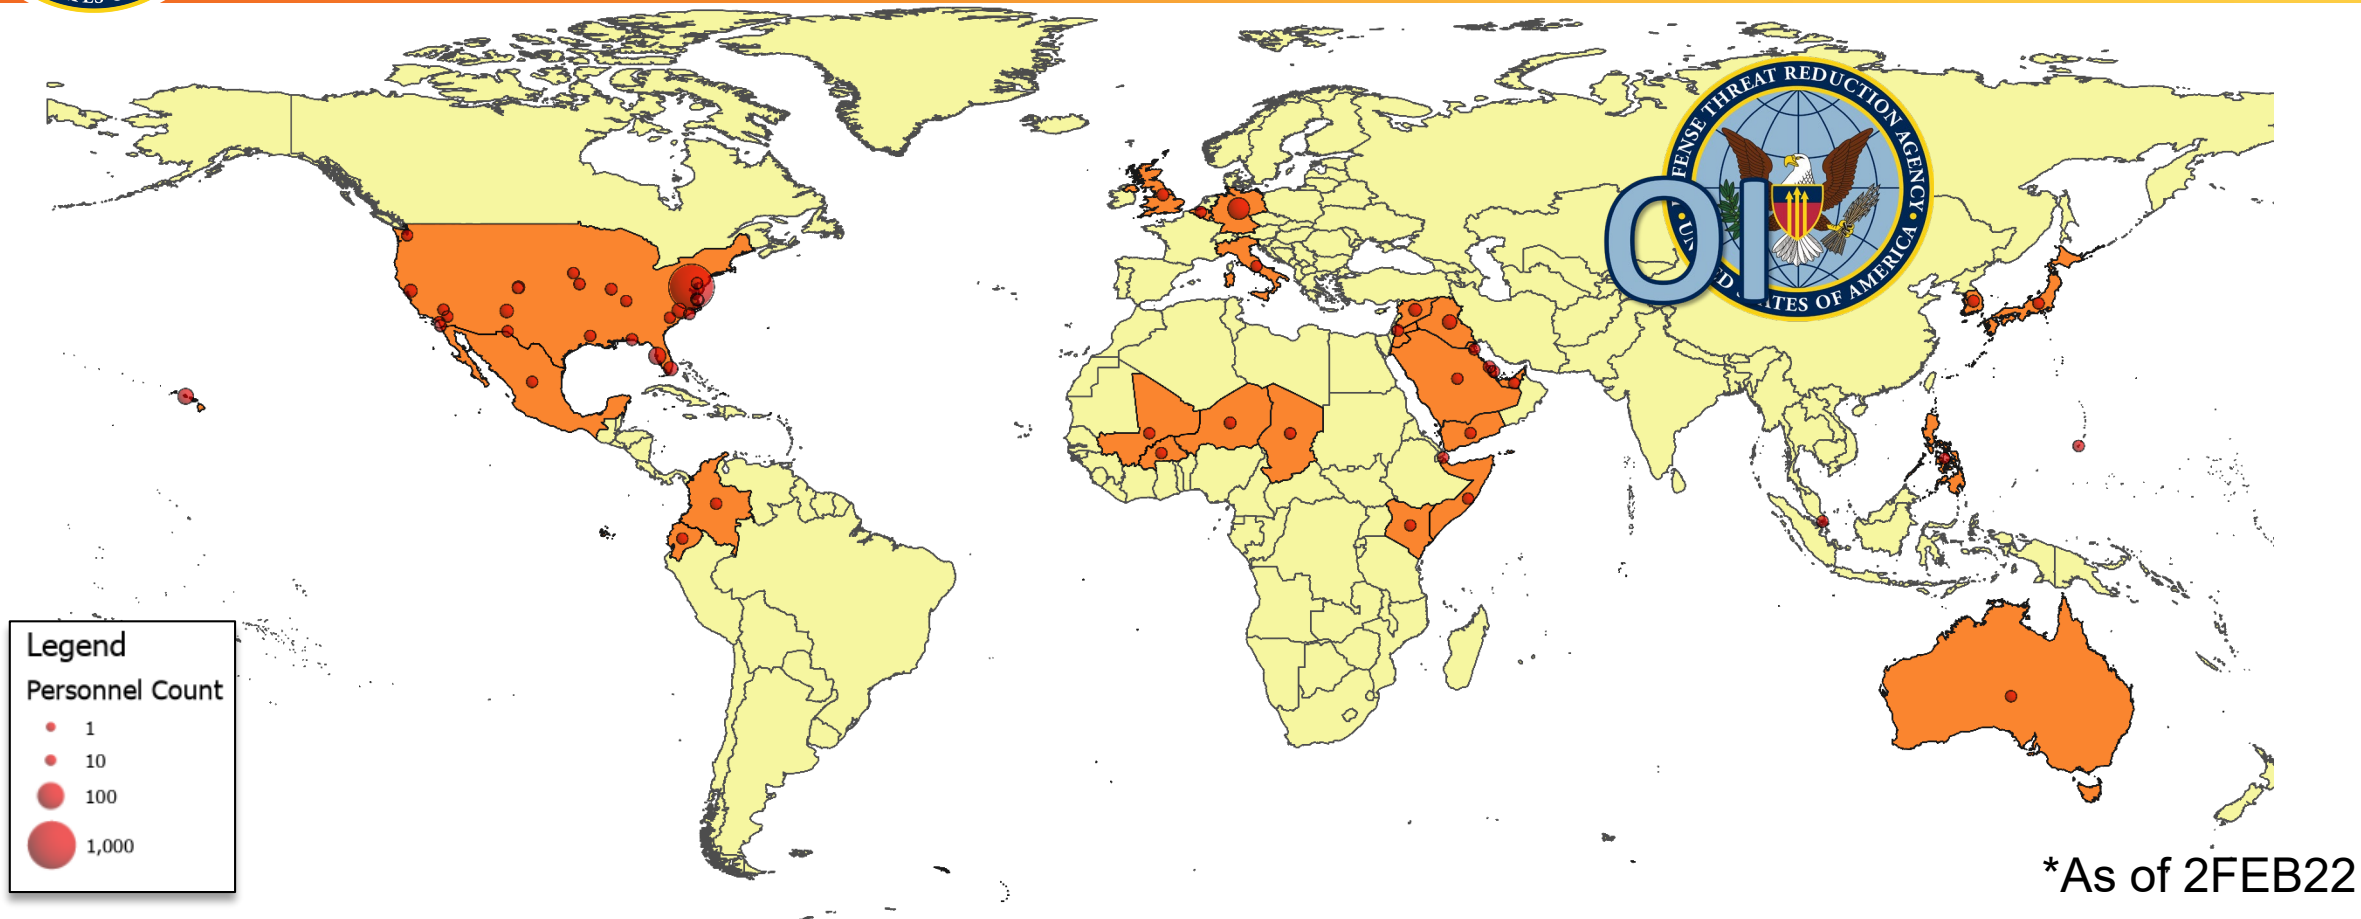

OI people and capabilities become the warfighter's enabling "weapon of choice" when conducting offensive actions against WMD and emerging threats.

UNCLASSIFIED

OI Global Footprint Map

With nearly 1,500 personnel located in 29 countries, OI is poised to support the warfighter when and where they need us.

Operations Analysis Department (OI-OA)

Mission Priority: The Operational Analysis Department provides tailored, innovative and agile intelligence analysis, enhancing tactical, operational, and strategic stakeholders' capability to detect, deter, and defeat WMD and current and emerging threats.

CORE CAPABILITIES

- WMD Technical Analysis
- Emerging Threat Analysis
- Directorate Support Teams
- Strategic Competition Analysis
- Five Eyes (FVEY) Integration
- CCMD and TSOC Analytic Support
- Joint CWMD Exercise Support
- Hard Target Defeat Support
- Interagency Support

OPERATIONAL OUTCOME

- Identify and understand WMD and emerging threats
- Identify opportunities working with partners to counter WMD and emerging threats

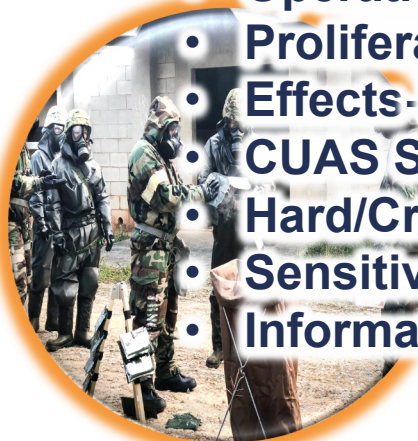

Operations Department (OI-OP)

Mission Priority: The Operations Department enables global situational awareness and provides operational effects to DTRA's globally integrated support to Department of Defense, Allies, and interagency partners in order to counter and deter WMD and emerging threats.

CORE CAPABILITIES

- Joint Operations Center
- Crisis Operations Response Team
- Readiness and Deployments
- Operational Statistics Forecast
- Proliferation Pathway Defeat
- Effects-based Ops Support
- CUAS Strategic Site Assessments
- Hard/Critical WMD Target Advisors
- Sensitive Activity Advisors
- Information Operations Fusion Cell

OPERATIONAL OUTCOME

- Identify and provide viable options and opportunities to counter WMD and emerging threats to DTRA mission partners

Contingency Operations Department (OI-CO)

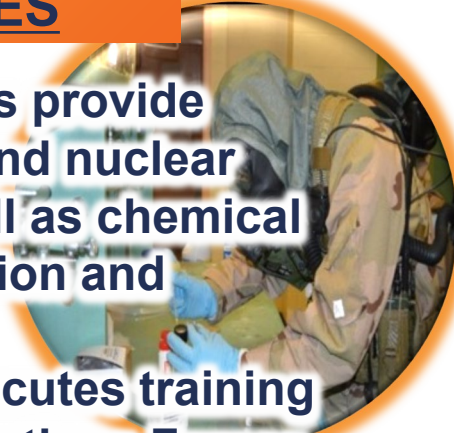

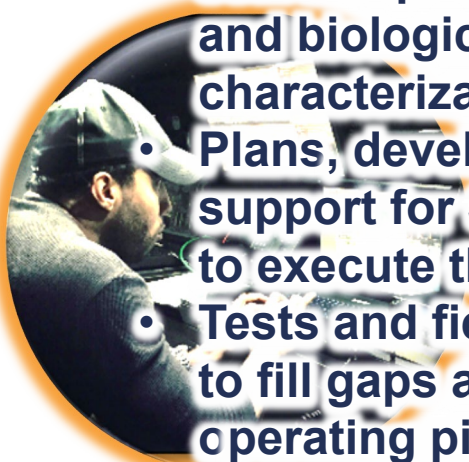

Mission Priority: The Contingency Operations Department enables designated joint and combined forces to conduct mission-tailored reconnaissance to locate, identify, and characterize Weapons of Mass Destruction and Chemical, Biological, Radiological, and Nuclear threats across the completion continuum in support of the Combatant Commander.

CORE CAPABILITIES

- Technical support groups provide support to radiological and nuclear search operations as well as chemical and biological identification and characterization
- Plans, develops, and executes training support for Special Operations Forces to execute their CWMD mission
- Tests and fields specialized equipment to fill gaps and integrate into a common operating picture

OPERATIONAL OUTCOME

- Enable response forces to search for and detect WMD/CBRN threats

Mission Support Department (OI-MS)

Mission Priority: Provide the delivery of rapid collection, fusion, analysis, and dissemination of operational information to DoD, intelligence community, and the interagency while simultaneously providing integrated, effective security and counterintelligence services to enable the DTRA mission.

CORE CAPABILITIES

- Capability Data Integrators
- Virtual Modeling and Simulations
- Analysis Tools and Methodologies
- Federated Non-traditional Data
- Visitor and Personnel Security
- Physical, Facilities, Site Security
- Mission and Information Security
- Critical Technology Protection
- Special Access Programs
- Foreign Disclosure Release
- Counterintelligence
- Insider Threat

OPERATIONAL OUTCOME

- Utilize tools and services and leverage existing relationships with warfighters and interagency partners to enable the deployment and assessment of operationally relevant capabilities.

Global Integration Department (OI-GI)

Mission Priority: Facilitate collaboration with external partners to enable unified action that contains and reduces WMD and emerging threats, and positions the Agency to fight and win against strategic competitors.

CORE CAPABILITIES

- Represent Agency to external customers
- Integrate Agency capabilities, activities, and support into CCMD operations
- Manage Foreign liaison officer program, Agency bilateral and multilateral Actions Plans, facilitate the Five Eyes Counter-Threat Steering Committee Deputy Head of Delegation

OPERATIONAL OUTCOME

- Integrate DTRA capabilities into CCMDs
- Enable FVEY collaboration

UNCLASSIFIED

Integrated Mission Analytics and Operations (IMAX) OI-Portfolio of Professional Support Services

- Three GSA Task Orders with five year duration including base and option periods
- Performance-based task orders with mission-oriented performance measures and award fee structure to reinforce desired outcomes
- Surge capacity to enable rapid response to changing world events with deployment capability
- IMAX Task Orders:
 - **Decisive Action (DA)** – Analytical Support/Operations integration
 - **Mission Information Technology (MIT)** – Develop, field and maintain secure IT tools, models and simulations
 - **Planning, Operations, and Advisory Services (POAS)** - Acquisition support, Systems Engineering Technical Assistance (SETA), Advisory and Assistance Services (A&AS)
